Pleas in the Circuit Court of the United States for the Northern District of Illinois—Eastern Division, in chancery sitting at the United States Court Room, in the City of Chicago in said District and Division before the Honorable Christian C. Kohlsaat, Circuit Judge, for said 7th Judicial Circuit at the regular December 1907 term of said Court towit: On March 21st, 1908, and April 14th, 1908, being two of the days of the said term of said Court.

H. S. STODDARD,
Clerk.

IN THE
Circuit Court of the United States.

NORTHERN DISTRICT OF ILLINOIS.

EASTERN DIVISION.

THE UNITED STATES OF AMERICA

vs.

OBERLIN M. CARTER et al.

No. 25,980.

Be it remembered that on the 27th day of August, 1901, came the complainants in the above entitled Cause, by their Solicitors, Marion Erwin, Special Assistant to the Attorney General, and S. H. Bethea, United States Attorney as counsel, and filed in the Clerk's Office of the said Circuit Court of United States for the Northern District of Illinois, Northern Division, a certain bill of complaint, for injunction, receiver and relief, in words in figures following to wit—

BILL.

To the Honorable, the Judges of the Circuit Court of the United States for Northern District of Illinois.

The United States of America brings this its bill of complaint against Oberlin M. Carter, a citizen of the State of Ohio at present residing in the United States Penitentiary at Fort Leavenworth in the State of Kansas, and against Lorenzo D. Carter, a citizen of the State of Illinois residing at Oakland, Coles County, Illinois, and I. Stanton Carter, a citizen of the State of Illinois, residing at Chicago, Illinois, and against N. W. Harris & Company, a partnership composed of N. W. Harris, a resident of the City of Chicago, Illinois, and others.

I.

Carter's Duties, Powers and Discretions.

And thereupon your orators charge, aver,, complain and say that from about the year 1888 until the 20th day of July, 1897, continuously, the said Oberlin M. Carter was an officer of the United States Army in the Corps of Engineers, and as such engineer in local charge in the Southern Judicial District of Georgia, of what is usually called the "Savannah District" for the improvement by the United States of rivers and harbors, and as such officer he was engaged in and about the execution of such river and harbor improvements as were made in said Savannah District during said period; and as such officer in charge of said Savannah District he was vested with sundry powers, duties and discretions during said period and amongst others:

With power, duty and discretion in proposing from time to time to his superiors for adoption, projects for the improvement of the Rivers and Harbors in said Savannah District.

With power, duty and discretion in proposing from time to time to his Superiors for adoption, projects for the expenditure of moneys appropriated by Congress for the improvement of the Rivers and Harbors in said Savannah District.

With power, duty and discretion in devising, drafting and proposing from time to time to his Superiors for adoption, specifications for contracts for such River and Harbor improvements proposed to be made in said Savannah District.

With power, duty and discretion in from time to time drafting and proposing to his superiors for adoption, forms of advertisements for giving notice to the public that competitive bids would be receiving by him for the construction of such proposed River and Harbor works.

With power, duty and discretion in causing to be fixed and fixing the time such advertisements would be published prior to the opening of bids.

With power, duty and discretion in proposing from time to time to his superiors for adoption, and causing to be fixed, and fixing for such contracts to be let, the time designated in the specifications within which the successful bidder would be required to commence work.

With power, duty and discretion in giving out information in regard to such contracts to be let.

With power, duty and discretion in from time to time receiving proposals for and recommending to his superiors the awarding of such contracts.

With power, duty and discretion in approving or rejecting the bonds required to be given by such contractors.

With power, duty and discretion in superintending the work being done by contractors under such contracts in said Savannah District; and in approving and accepting or rejecting material being put in and work done by such contractors in said Savannah District, according as the same was in accordance with the requirements of such contracts or not.

With power, duty and discretion in from time to time approving modifications of such contracts and suggesting to his superiors the adoption of such modifications.

With power, duty and discretion in from time to time approving or rejecting the accounts rendered to him by such contractors for material furnished and work done or claimed by such contractors to have been furnished or done by them under contracts let, according as such accounts should be fair and honest or false and fraudulent.

And with power, duty and discretion when in funds intrusted to him as a disbursing officer, in from time to time paying such contractors or refusing to pay them, the amounts claimed by them to be due them for material furnished and work done under such contracts let, according as such claims were fair and honest or false and fraudulent.

II.

The Scheme Devised to Defraud.

That on or about the year 1891, the said Oberlin M. Carter and one Benjamin D. Greene, one John F. Gaynor, one William T. Gaynor, one Edward H. Gaynor and one Michael A. Connolly (hereinafter for the sake of brevity called the conspirators), devised, concocted and put in operation a certain fraudulent scheme for the purpose of defrauding your orators, the United States of America.

(1) That the said fraudulent scheme contemplated that the said Oberlin M. Carter as such engineer officer in charge of said Savannah district should fraudulently exercise the said

powers of his office and discretion vested in him as aforesaid in favor of said conspirators and against the interest of the United States, and contrary to the duty and allegiance due by him to the Government under which he held such high and important trust.

(2) That said fraudulent scheme contemplated that by undue shortness of time in advertising the letting of contracts; that by withholding specifications from proposed bidders not in the conspiracy, as far as such withholding could be made consistent with the concealment of the fraud; that by drafting the specifications, so as to mislead proposed bidders not in the conspiracy as to the character and quantity of material really intended to be used in the work under the contracts, and by fraudulently and secretly furnishing to his co-conspirators information as to the bids, and as to his future course as engineer officer in charge in the construction of the work under the contracts, the said Oberlin M. Carter would effectually suppress competition in the bidding for such contracts to be let for the United States through said Oberlin M. Carter, for said Savannah District, and that the said conspirators in the name of some one of them, or of some other person or corporation for their benefit, would be the only real bidders for such contract work for construction of jetties, spur-dams and training walls, for the improvement of the rivers and harbors in said Savannah District. That thus all such contracts which would be from time to time let for such work as aforesaid would be obtained by some one or other of said conspirators or by and in the name of some other person or corporation but secretly for the benefit of said conspirators; to the end that the said river and harbor work in said Savannah District put out to be done on contracts, would be fraudulently let for the benefit of said conspirators at high and exorbitant cost to the said United States of America, and at great profit to the said conspirators.

(3) That said fraudulent scheme further contemplated, that said Oberlin M. Carter, as such engineer officer in charge as aforesaid should in drafting the specifications for contracts to be let by competitive bids for what is commonly called mattress work to be used in the construction of jetties, spur-dams and training-walls in the river and harbor improvements in said Savannah District, would introduce into the specifications the novel provision of having two or more designs of mattresses specified, to be bid for by the proposed contractor at one price for either design; the one design to be

very much more costly for the contractor to furnish than the other or others, but the engineer in charge to have the option after the contract should be let to call for either design he might choose to have put in the work; with intent that the bid of any person not a party to said fraudulent scheme who should propose to bid on such contract would have to be based upon the most costly design of mattress so specified, as the one most apt to be called for by the engineer, while the said conspirators or the person acting for them, would be informed by the said Oberlin M. Carter before the bidding that only the cheapest design of those specified in the specifications would be called for to be put in the works, and would thus, even if the other means to suppress competition provided for in the fraudulent scheme should fail, be able to bid a very high price for the contract, based on the cheapest design of mattress, and still underbid all other bidders and obtain the contract.

(4) That said fraudulent scheme further contemplated, that said Oberlin M. Carter as such engineer, officer in charge as aforesaid, should in drafting the specifications for contracts to be let for jetties, spur-dams and training walls in said Savannah District would specify so vaguely, and so uncertainly set forth the character, quality, quantity, description and design of the material to be used in the work, (a) that when the material was furnished by the contractor under such contracts as should be so fraudulently obtained for the benefit of said conspirators as aforesaid, the said specifications could and would by a fraudulent, strained and lax construction to be placed upon the same, by said engineer in charge, be made to apparently justify the acceptance and approval which he would make for payment at such high and exorbitant prices, of large quantities of material of very poor and cheap quality, description and design, and of very small value to the United States, and (b) that when if by chance any person not a party to said fraudulent scheme should happen to be the lowest bidder and obtain any such contract in said Savannah District that by a fraudulent, unfair, rigid and stringent construction to be placed upon the specifications by said engineer in charge, the specifications could and would be made to apparently justify the rejection which he would make of material furnished by such contractor of very much better quality, quantity, description and design and of a greater value to the United States, with the intent that by such oppressive rejections, the performance of such contract would be made

ruinous to the contractor so having dared to compete with said conspirators in bidding for such contract, and thus that further competition with the said conspirators would thereafter be effectually cut off.

(5) That said fraudulent scheme further contemplated that on all work so let on contracts which should be obtained for the benefit of said conspirators as aforesaid, the said Oberlin M. Carter, as Engineer in charge as aforesaid, would so instruct and locate the assistant Engineers and Inspectors under him, intended for inspecting the details of the work of construction that there would be little if any inspection of the details necessary to be inspected to ensure the furnishing of honest work and material, and that the said Oberlin M. Carter as such engineer officer in charge would fraudulently accept for the government under such contracts, work done and material furnished known by him to be of inferior quality and quantity and not in accordance with the specifications, to the end that the United States might be defrauded with enhanced profits to the said conspirators.

(6) That said fraudulent scheme further contemplated that the said Oberlin M. Carter as such engineer officer in charge as aforesaid, would fraudulently approve for payment, and when in funds as a disbursing officer, fraudulent pay, accounts which would be rendered to him as such engineer officer in charge as aforesaid, by the said conspirators, or by some one of them, or by or in the name of the person or corporation which should by the successful operation of said fraudulent scheme have obtained such contracts for the secret benefit of said conspirators, and which accounts should be rendered as aforesaid, for such inferior material and work to be put into said works as aforesaid, and at the exorbitant and fraudulent prices stated in such contracts so fraudulently to be obtained by said conspirators as aforesaid.

(7) That said fraudulent scheme further contemplated that the said moneys so fraudulently obtained on such contracts by the said conspirators through the said Oberlin M. Carter, as such Engineer officer in charge, and disbursing officer as aforesaid, should be appropriated to the use of the said conspirators and that they should aid each other in the concealment from the officers of the United States not parties to the conspiracy of the moneys from time to time so misappropriated and of the investments thereof; to the end that said scheme might be further operated by them and that they

might be secure from detection in the enjoyment of such moneys.

(8) That said fraudulent scheme further contemplated that out of the moneys so to be fraudulently appropriated by said conspirators as aforesaid, certain portions the full and exact amount of which is to your orators unknown, should be appropriated by the said William T. Gaynor and Edward H. Gaynor, and smaller sums by the said Michael A. Connolly, and that the net profits of such contracts after payment of said sums and the cost of the work would be divided between the principal conspirators, Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter.

III.

The Scheme to Defraud put in Operation.

That pursuant to the scheme to defraud the United States so devised, concocted and agreed upon between the said conspirators, the said Oberlin M. Carter as such engineer officer in charge of said Savannah District, did on or about the first day of January, 1891, commence to put said fraudulent scheme in operation in said Savannah District, and to exercise the said powers and discretions of his office in favor of the said conspirators and against the United States in accordance with said fraudulent scheme, and continued so to do as successive contracts were to be let and were let from time to time by said Oberlin M. Carter as such engineer officer in charge as aforesaid until on or about July 20th, 1897, when the said Oberlin M. Carter as such engineer officer in charge as aforesaid was relieved from duty and superceded. And each of the conspirators aforesaid, commenced on or about the first day of January, 1891, to do and perform their parts in the accomplishment and carrying out of said fraudulent scheme to defraud the United States and continued so to do as successive contracts were to be let and were let in said Savannah District from time to time, in the suppression of competition in the letting of the contracts, in the obtaining of the contracts in the name of some one of the conspirators or of some other person or corporation, for the benefit of said conspirators at high, exorbitant and fraudulent prices, in putting into the construction under the contracts poor, cheap and inferior material and work not in accordance with the specifications of the

contracts, in the rendering of accounts against the United States for such poor, cheap and inferior material and work not in accordance with the specifications as aforesaid and at said high exorbitant and fraudulent prices fixed in said contracts so fraudulently obtained for the benefit of said conspirators as aforesaid, and in the approval and payment of said accounts by the said Oberlin M. Carter as engineer officer in charge, and in the division of the said moneys so paid between the said conspirators and the concealment thereof, not only until the said Oberlin M. Carter was relieved from duty as such engineer officer in charge of said Savannah District on or about July 20, 1897, as aforesaid, but thereafter continued and have continued until this date to aid and abet each other in the concealment of the moneys so fraudulently obtained from the United States, through the operation of said scheme and in their endeavor to obtain additional moneys from the United States for work alleged to have been done under such contracts so fraudulently obtained at the exorbitant and fraudulent prices secured in said contracts by the operation of said fraudulent scheme, and for the poor, cheap and inferior material put into said constructions, not in accordance with the specifications.

IV.

Description of the Engineering Work.

That the principal expenditures made by the United States in river and harbor improvements in said Savannah District both under General Q. A. Gilmore, the predecessor of the said Oberlin M. Carter in charge of said district and under the administration of the latter were in the construction of spur dams and training walls, commonly included under the generic term of "jetties" and being a kind of a dam or wall constructed of "logs and brush and stone" or of "brush and stone," so placed as to narrow the channel or so placed in reference to the channel as to effect the flow of the current, and as a result of the increased flow of water to cause an increase in the depth of the channel.

Prior to the formation of the scheme to defraud the United States, formed on about January 1st, 1891, as aforesaid, the brush or logs and brush used in these jetties in the Savannah

District were put into the construction principally in three ways:

Fascines. One of the principal materials used in the construction of jetty work was the brush fascine.

These fascines were usually among other things specified to be made of live brush, well trimmed, the butts of the brush to be placed in alternate directions, and the fascine to be closely choked by ties of wire or tarred rope at intervals of every two or three feet, so as to form an artificial log of the diameter of from 9 to 15 inches at the choke, and from 12 to 20 feet in length, according to the specifications for the particular contract. The form of construction of a fascine being illustrated by Drawing Exhibit A filed herewith.

(1) There were the training-walls and spur-dams built up of fascines, placed in the training-wall or dam by the contractor separately; that is to say, each fascine being put in place one at a time. Prior to the formation of said fraudulent scheme as aforesaid the prevailing contract prices for fascines so put in the works in the District ranged from 89 cents to \$1.10 per cubic yard. That is to say, the fascines were piled up on top of each other and measured, and the fascine material contained in a square yard of surface, and of the depth of one yard, cost the Government when placed in the work only from 89 cents to \$1.10, according to locality.

(2) **The Brush Mattress.** In the contracts let prior to the formation of the said scheme to defraud, where the contract provided for the construction of training-walls or spur-dams to be built up of fascines, it was provided that the engineer officer in charge could require the fascines to be placed in the jetty either singly or in mats, and when made into mats and so placed, the mats were paid for by the amount of fascine material composing them, at the contract price of fascines per cubic yard, ranging from 89 cents to \$1.10 per cubic yard as aforesaid. These fascine mattresses were usually constructed of a layer of fascines placed side by side, upon a layer of traverse poles spaced at intervals of about 6 feet apart, and upon top of the layer of fascines were placed another layer of poles similarly spaced at intervals, the upper and lower poles being joined by ties of wire or tarred rope, so as to form a flexible mattress.

The form of construction of such a mattress is illustrated by drawing, Exhibit B, filed herewith.

In some of the contracts the fascines rest upon a grillage of poles instead of upon a single layer of poles at the bottom,

and also there was a corresponding grillage of poles on top of the fascines. By a grillage of poles is meant a layer of poles spaced a few feet apart crossed by a second layer of poles similarly spaced. The form of construction of such a mattress is illustrated by Exhibit C, filed herewith.

When a mattress is constructed as shown in drawing, Exhibit B, the fascines are said to be placed between a half grillage of poles at the bottom and a half grillage of poles at the top, as there are only half as many poles used in such a case, as where there is a full grillage of poles at the bottom and at the top as shown in drawing, Exhibit C.

When a mattress was so constructed it was towed to its place, a single mat at a time, and loaded with stone and sunk in its place. The stone used in sinking such mats or in holding down the fascines when put in separately being paid for by the government in addition to the price paid for the fascine material.

The reason that the contractor could afford to put in the fascines in mats as cheaply as when put in separately was that the extra material required in binding poles, was fully compensated for by the less labor and difficulty involved in sinking the larger number of fascines going to make up a mat at one performance.

As a consequence, the Government obtained such fascine mattresses as it used in said Savannah District prior to the formation of the conspiracy at prices ranging from 89 cents to \$1.10 per cubic yard. Equivalent for a mattress made of fascines 9 inches, or one-fourth of a yard in diameter, to 22½ to 27½ cents per square yard of mattress surface, or equivalent for a mattress made of fascines 12 inches in diameter to 29 2/3 to 36 2/3 cents per square yard. Or equivalent for a mattress made of fascines 18 inches in diameter to 44½ to 55 cents per square yard.

(3) The Log Mattress. There was also used in said Savannah District in jetty construction prior to the formation of said scheme to defraud what is commonly called a "log mattress." This is sometimes called, however, a "log and brush mattress" because both logs and brush were used in combination in its construction.

The principal design of this mattress was a raft of logs of the average diameter of 12 inches placed side by side and fastened together with cross-poles placed as binders 8 feet apart and spiked to the logs, and upon this raft was placed a top

layer of live brush, or live brush fascines, from 5 to 6 inches in thickness in the finished work, and secured in place by poles lashed to the binders of the raft, thus making a mattress 18 inches thick, exclusive of the binding poles. The form of construction of such a log mattress is illustrated in Drawing Exhibit D filed herewith.

These log mattresses were always paid for in contracts under General Gilmore and under Carter at a stipulated price by the square yard surface measure, the price averaging about 47 cents per square yard prior to the formation of the conspiracy.

Prior to the formation of said scheme to defraud, whenever specification had been drafted by Gilmore or by Carter in which it was provided that two or more different designs of mattress under the same contract should be bid on by the contractor, it was always provided that separate prices should be bid for furnishing either of the designs the engineer might call for. Or if the contract called for only one price to be bid for two or more designs, it always left it optional with the contractor to furnish that design which he could furnish the most cheaply. So that always the contractor would know precisely the thing upon which he was bidding before the contract was let, and at the time he had to put in his bid in competition with other bidders.

V.

Details of the Fraud Introduced Into and Under the Contracts.

Your orators further aver and charge that early in 1891 the said Oberlin M. Carter, as engineer officer in charge of said Savannah District, commenced to put in operation said fraudulent scheme in respect to the drafting, and by his recommendation causing to be approved by his official superiors, specifications so drawn as to enable said conspirators to consummate said fraud upon the United States.

(1) That in the drafting of the specifications for contract No. 4572 for Cumberland Sound, advertised March 17, 1891, and let May 4, 1891, to John F. Gaynor, the said Oberlin M. Carter, as such engineer officer in charge, for the purpose of carrying into effect said fraudulent scheme introduced into the specifications upon which proposed bidders would be required to base their bids for the contract, three designs of

mattress. Two of these designs were for log mattresses 16 inches thick in the finished work, similar to those provided for in the Gilmore contract of October, 1886, No. 3285, for Cumberland Sound, which allowed the contractor to use the design he preferred, but Carter provided in his specifications for a third design of brush mattress made of fascines 9 inches in diameter, and required bids for it by the square yard, instead of by the cubic yard as such mattresses had been theretofore been paid for, and he provided in the specifications that the engineer in charge should have the option of substituting the "brush mattress" for the log mattress in the construction of the work.

Having succeeded by use of said fraudulent scheme in suppressing competition and awarding said contract to John F. Gaynor at the rate of 99 cents per square yard for log mattresses, being double the price of the same theretofore prevailing, and at the rate of 97 cents per square yard for brush mattresses, being nearly four times the price of such mattresses theretofore prevailing in said Savannah District, the said Carter corruptly exercised his option in favor of said contractor and allowed him to put in all brush mattresses at the exorbitant rate of 97 cents per square yard.

(2) By a corrupt use of a similar brush mattress in the specifications in contract No. 4637 of July 20th, 1891, for jetties at Fort Clinch, let nominally to William H. Walsh, but for the benefit of said conspirators, and by providing in the specifications for a bid for mattresses per square yard and fascines per cubic yard, but leaving it optional with the engineer in charge to use either fascines separately or mattresses, and by the use of the said other means provided in said scheme for suppressing competition, the said Oberlin M. Carter succeeded in awarding the said contract as aforesaid at 99 cents per square yard for brush mattresses, equivalent to about \$3.56 per cubic yard, while the fascines themselves were awarded in the same contract at only \$1.57 per cubic yard when placed in singly and whereas theretofore such mattresses had only cost the Government the price of the fascines in them by the cubic yard. And having so awarded said contract said Carter corruptly exercised his option as Engineer in charge, by allowing said contractor to put into the work 7,744 square yards of mattresses at \$3.56 per cubic yard, and only 125 yards of fascines at \$1.57 per cubic yard.

(3) In the specifications drafted by said Oberlin M. Carter as such Engineer in charge, for the contract No. 4820 next let

to Edward H. Gaynor, September 16, 1892; the said Oberlin M. Carter in pursuance of said fraudulent scheme and corrupt agreement, introduced the following novel features by which it was placed in the power of said Carter, at his will, to shut out all competition with the said conspirators in the bidding for such contract work, and which fraudulently secured to said conspirators an increase of four times the price for brush mattresses previously prevailing for same at the same locality.

That is to say: Carter so drafted the specifications for contract 4820 which were adopted on his recommendation, as to provide for three different designs of mattresses, any one of which might be called for at his option by the engineer in charge, and to be paid for at the same price per square yard for either design furnished by the contractor.

The first design of mattress so provided for corresponded to the log-mattress 18 inches thick, Exhibit D hereinbefore referred to.

The second design of mattress so provided for corresponding to the brush or fascine mattress, Exhibit C, hereinbefore referred to, except it had an additional cross layer of fascines in it, the additional fascines being spaced the same distance apart as the cross poles.

The third design of mattress so provided for corresponding to the brush or fascine mattress 9 inches thick, Exhibit C, and being the same as the second design without addition of the cross fascines.

And while prior to the formation of said fraudulent scheme the prevailing price in said Savannah District of the first design of mattress was double that of the third design, said Oberlin M. Carter joined them in his specifications to be bid on at one price.

And when by means of suppressing competition through said fraudulent scheme said Oberlin M. Carter succeeded in awarding said contract to Edward H. Gaynor for the benefit of said conspirators, at the price of \$1.05 per square yard surface measure, equivalent to \$4.20 per cubic yard for brush material in the 3rd design, or 300 per cent. higher than the prices which had prevailed in the same locality, said Oberlin M. Carter fraudulently exercised the option reserved to him as such engineer in charge under the specifications, in the manner of which the conspirators only were apprised before the bidding, and allowed the conspirators to put in all brush mattresses of the Third and cheapest design, as aforesaid.

(4) In the specifications drafted by said Oberlin M. Carter

as such engineer in charge for the contract No. 4960 next let to the Atlantic Contracting Company October 22, 1892, known as the "Big three million dollar contract for Savannah Harbor," the said Oberlin M. Carter, in pursuance of said fraudulent scheme, put in the same three designs of mattresses to be bid on at one price, as in contract No. 4820 and giving the same option to the engineer to select after the letting of the contract any one of the three for use in the construction, and having succeeded by means of said fraudulent scheme in awarding said contract to the Atlantic Contracting Company for the benefit of said conspirators, at the exorbitant and fraudulent price of 95 cents per square yard of mattress surface, equivalent to \$3.80 per cubic yard for brush material in the 3rd Design, the said Oberlin M. Carter as such engineer in charge fraudulently exercised the option reserved to him as Engineer in charge and allowed the conspirators to put in all the mattresses of the third and cheapest design.

(5) Your orators aver and charge that not content with the fraudulent addition of about 300 per cent. to the cost of the fascine mattresses secured to the contractor in the letting of the contracts as aforesaid, the said Oberlin M. Carter under contracts Nos. 4820 and 4960, commenced about September, 1893, to allow the contractors operating said contracts for the benefit of said conspirators, to supply in lieu of the single mattress provided for in the specifications, and to put into the jetties at one time and at one launching, a construction of from 4 to 8 or more of single mats piled up one on top of the other and forming what is called a multiple mat, in which each single mat constituted a course or layer, but from which a large part of the material required by the designs of brush mattress in the specifications was omitted, and which multiple mat was very much cheaper for the contractor to put in, than the cost of putting in the single mats composing it separately, as the specifications indicated they would be put in and authorized the Engineer to require, and as other proposed bidders had to estimate for in putting in their bids.

And said Carter allowed said contractors not only to put in said material and work not in conformity even to the cheapest design of mattress provided for in the specifications, but of the poorest and cheapest and most inferior material which he could allow passed without detection of the fraud through a fraudulent and strained construction of the specifications. And said Oberlin M. Carter as such Engineer in charge, approved for payment and paid the accounts of said

contractors for such work at contract prices for said work so put in.

(6) Your orators further aver and charge that by Act of Congress passed in 1888 and repeated in Act of 1890, Supplement Revised Statutes, page 600, it was provided that river and harbor contracts shall be made "after sufficient public advertisement for proposals in such manner and form as the Secretary of War may prescribe." That Section 520 of the Army Regulations prescribed by the Secretary of War, prescribed and prescribes that the length of time for advertising for proposals for services by contractors for supplies or services should be 30 days or more or 10 days or less according to the needs of the service; large contracts for purchases or services should be 30 days or more. That section 519 of the Army Regulations prescribed that:

"Any officer charged with the duty of making a contract or purchase is responsible under the laws and regulations for his action. Permission or orders to make a contract or purchase without competition will not justify the procedure and will not be given."

And your orators aver and charge that while prior to 1890 the contractors in the Savannah District were mostly for comparatively small expenditures, from about \$15,000 to \$110,000; that after 1890 some of the contracts ran up to several million dollars each, being over \$3,000,000 for Savannah Harbor contract No. 4960 for 1892, over \$1,000,000 for Savannah Harbor contract No. 6515 for 1896, and over \$2,000,000 for the Cumberland Sound contract No. 6517 of 1896. Nevertheless said Oberlin M. Carter as such engineer in charge in pursuance of said scheme to defraud the United States and to suppress competition, did not advertise the letting of any of the contracts let by him from 1891 to 1897 inclusive for 30 days or more, but the advertisements for many of said lettings being run only for 15 to 22 days in the local papers, and for a less time in the Engineering papers in which Government advertisements were required to be published and the time said advertisements were so run, not being a sufficient public advertisement to enable contractors in different parts of the United States to ascertain the details sufficiently to intelligently put in competitive bids.

(7) Your orators further aver and charge that from 1891 to 1897, inclusive, the said Oberlin M. Carter in pursuance of said fraudulent scheme to defraud the United States, systematically withheld from applicants therefor, as far as he

could consistent with the concealment of the fraud, the specifications for contracts advertised by him, and delayed and hindered such applicants in obtaining such specifications to the end that competition with said conspirators in proposals for contracts might be and was suppressed.

(8) Your orators further aver and charge, that by applying said fraudulent scheme to the drafting of the specifications, in the manner hereinbefore described for contracts No. 4572 and 4820, each of the contracts subsequently advertised and let in said Savannah District, and by applying said fraudulent scheme in suppressing competition by shortness of advertising for proposals for contracts and by withholding specifications and delaying applicants in obtaining the same, and by giving secretly to the said conspirators information as to how the said Carter, as engineer in charge, would exercise his discretion in construing specifications purposely by him made ambiguous or uncertain, the said Oberlin M. Carter, as engineer officer in charge, succeeded in awarding at high, exorbitant and fraudulent prices, every jetty contract let by him in said Savannah District from 1891 to 1897, inclusive, to the said conspirators or to some one of them, or to some person or corporation, for their benefit, except one small contract, No. 5359, for Savannah River near Augusta, let to Albert J. Twiggs, July 5, 1893, and as to this one exception the said Carter applied such stringent and unfair construction of the specifications as to make the performance of the contract ruinous to the contractor, and thus prevented him from any further competition with said conspirators. A list and the dates of said contracts so fraudulently let at high, exorbitant and fraudulent prices, about 300 per cent. above the fair value of the same, for the benefit of said conspirators, from 1891 to 1897 inclusive, reference being had to the War Department file number, being as follows:

4,572, May 4, 1891, John F. Gaynor, Contractor, Improvement at Cumberland Sound.

4,637, July 20, 1891, W. H. Walsh Contractor Improvement at Fort Clinch.

4,655, Sep. 9, 1891, John F. Gaynor Contractor, Improvement at Savannah River, Augusta.

4,820, Sep. 16, 1891, E. H. Gaynor Contractor, Improvement at Cumberland Sound.

4,960, Oct. 22, 1892, Atlantic Contracting Co., Contractor, Improvement at Savannah Harbor.

4,963, Oct. 24, 1892, W. H. Walsh Contractor Improvement at Savannah River, Augusta.

5,127, Dec. 20, 1892, Atlantic Contracting Co., Contractor, Improvement at Darien Harbor.

5,133, Dec. 20, 1892, Atlantic Contracting Co., Contractor, Improvement at Altamaha River.

5,253, Mch. 1, 1893, Atlantic Contracting Co., Contractor, Improvement at Darien Harbor.

5,254, Mch. 20, 1893, Atlantic Contracting Co. Contractor, Improvement at Brunswick Harbor.

5,811, Nov. 15, 1894, Anson M. Bangs, Contractor, Improvement at Cumberland Sound.

6,049, Apr. 20, 1895, W. T. Gaynor Contractor, Improvement at Darien Harbor, &c.

6,515, Oct. 8, 1896, Atlantic Contracting Co., Contractor, Improvement at Savannah Harbor.

6,517, Oct. 8, 1896, Atlantic Contracting Co., Contractor, Improvement at Cumberland Sound.

Under each and all of which contracts so fraudulently let the said Oberlin M. Carter as such engineer officer in charge, in pursuance of said scheme to defraud the United States, allowed the said contractors to put in cheap and inferior material not in accordance with the specifications in the contracts, and fraudulently exercised in favor of the contractors the options so fraudulently reserved to him in the specifications as engineer in charge. And under each of which contracts, the said Oberlin M. Carter as such engineer officer in charge in pursuance of said fraudulent scheme approved for payment, and paid whenever in funds as disbursing officer, the accounts of the said contractors for such work at the high, exorbitant and fraudulent prices so provided in said contracts so fraudulently let.

VI.

The Division of the Money.

Your orators further aver and charge that the profits of every one of said contracts so fraudulently let for the benefit of said conspirators as aforesaid, from 1891 to 1897 inclusive were divided from time to time between said conspirators.

(1) That in the division between Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter, of the net profits of

the contracts so fraudulently obtained prior to the contract No. 4820 of Sept. 16th, 1892, hereinbefore referred to, your orators are unable to state exactly what share was allotted and apportioned to the said Oberlin M. Carter, but your orator avers that amounts aggregating \$16,000, were traced with reasonable certainty from the profits of said contracts back into the possession of said Oberlin M. Carter, after he had as disbursing officer paid out the same on the contracts. How much more the said Carter may have been apportioned as his share of the profits on said prior contracts is to your orators unknown.

(2) Your orator avers and charges, however, that commencing with the contract No. 4820 of September 16th, 1892, let in the name of Edward H. Gaynor, contractor, that after the payment of the cost of the work and after the payment to the other persons parties to the said fraudulent scheme as aforesaid, the profits amounting to over two million dollars (\$2,000,000), of all the aforesaid contracts so fraudulently let as aforesaid, were divided from time to time, between Oberlin M. Carter, Benjamin D. Greene and John F. Gaynor in three equal shares, one of which shares was apportioned to the said Oberlin M. Carter, as his share of the profits arising from the consummation of said scheme to defraud the United States.

(3) That said Oberlin M. Carter, as engineer officer in charge of said Savannah District, usually had funds to his credit as disbursing officer in the Merchants' National Bank of Savannah, Ga., or with the Assistant Treasurer of the United States at New York, intrusted to him by the Government for disbursement to contractors on Government contracts, and when in funds during the operation of said fraudulent scheme in said Savannah District, he usually paid the contractors at the beginning of each month for the amount of the vouchers approved by him for the work of the preceding month, reserving 10 per cent. each month until the last payment on the contract.

That the better to secure his share in the fraudulent profits of the contracts, it was usual for said Oberlin M. Carter as such disbursing officer to issue the checks for the monthly payments to the contractors in two batches. One batch was deposited in the local banks at Savannah and Fernandina and used in defraying the cost of the work, and in payments to E. H. Gaynor and W. T. Gaynor and minor agents of the principal conspirators, and the other batch of checks repre-

senting the net profits, would usually be taken by said Oberlin M. Carter in person to the City of New York, and the proceeds of said checks, after said Carter was paid therefrom \$75 for an allowance for his trip to New York, would be divided between said Benjamin D. Greene, John F. Gaynor, and Oberlin M. Carter, each getting a third as aforesaid.

That sometimes said Oberlin M. Carter did not go on to New York and carry the disbursing checks there for division, but would send the checks to the said Benjamin D. Greene, or John F. Gaynor who would, at the direction of the said Oberlin M. Carter pay over his third of the fraudulent profits as aforesaid, to Robert F. Westcott, (now deceased, the former father-in-law of said Carter) who would invest it and turn over the investment to said Oberlin M. Carter or otherwise dispose of it for the use and benefit of said Carter as said Carter directed.

(4) That although the work was authorized by act of Congress, the money for payment of the bulk of the work under contracts of Oct. 8, 1896, No. 6515 for Savannah Harbor and No. 6517 for Cumberland Sound, let in the name of the Atlantic Contracting Company, contract, was not available until July 1st, 1897. That by reason of the fact that all the profits of the previous contracts had been divided between the parties to the fraudulent scheme it became necessary that the parties interested should put up the money to carry on the work under these contracts of Oct. 8, 1896, until July 1, 1897, when the appropriation of money by Congress would be available, as the general plan of issuing disbursing checks monthly to carry on the work theretofore pursued could not be resorted to. To meet this necessity on or about the first day of January, 1897, the said persons devising said scheme as aforesaid, communicated each with the other, and agreed among themselves, that the said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter, would each respectively advance approximately one-third of the amount which it might be necessary from time to time to advance to carry on the work under said contracts, until such time as the money appropriated by Congress for payment of the work under said contracts should become available. And it was then and there further agreed between said conspirators that all of the provisions of said scheme to defraud the United States which had been in operation by and between the said parties in said district from 1891 to that time as aforesaid, should be applied in and to the execution and completion of the work under said

contracts of October 8, 1896, which had been so fraudulently let as aforesaid, and in the obtaining of the money for the fraudulent accounts which should be rendered under said contracts to the said Oberlin M. Carter as such engineer officer in charge as aforesaid, and in the division of the said moneys between the said conspirators, except that the moneys so advanced by said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter, to carry on the work, should be repaid them before the division of the profits between them as aforesaid. That in pursuance of the said scheme to defraud so modified as aforesaid, the said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter did from time to time each advance moneys to carry on the work under said contracts of October 8, 1896, until July 1, 1897, when the appropriation by Congress became available.

And the said Oberlin M. Carter as engineer did approve accounts rendered by said conspirators in the name of the Atlantic Contracting Company for large amounts charged for cheap and inferior work not done in accordance with the specifications of the contracts and at the high, exorbitant and fraudulent prices at which said contracts had been so fraudulently let, and did on or about July 6th, 1897, pay upon said accounts so approved by him the sum of \$575,749.90, which said amount less the deductions for moneys so advanced by said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter for carrying on the work, and for the shares of the lesser conspirators and for advances to further carry on the work was divided in thirds between the said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter.

And the said conspirators have continued to aid and abet each other to this day in their endeavor to obtain from the United States additional moneys for work alleged to have been done under said contracts of October 8th, 1896, so fraudulently obtained at the exorbitant and fraudulent prices secured in said contracts by the operation of said scheme to defraud, and for the cheap and inferior material and work put into said construction under said contracts not in accordance with the specifications.

VII.

Carter's Investments.

(1) Your orators aver and charge that Oberlin M. Carter started out in his career in the Savannah District, with-

out any income other than that of his salary and commutation as officer in the Corps of Engineers in the United States Army, ranging from \$2,208 per annum as Lieutenant in 1890, to \$3,269.50 per annum as Captain in 1897. In fact prior to 1891, he had great difficulty in making ends meet financially, and frequently resorted to borrowing money from Benjamin D. Greene, one of the contractors whose work he was then supervising. Following the formation of the scheme to defraud as aforesaid however in 1891, the said Oberlin M. Carter passed from the condition of a borrower to the condition of a capitalist, by the investment of the greater portion of his share of the fraudulent and illegal profits of the contracts so fraudulently let by him as Engineer in charge for the benefit of said conspirators as aforesaid.

These investments were secretly made by the said Oberlin M. Carter in stocks, bonds, loans and real estate, the particulars of which investments were not known to your orators until within the past year, because of the means taken by the said Oberlin M. Carter to conceal the same.

(2) As before stated it is not known in what proportion said Carter shared in the illegal profits of the 1891 contracts so fraudulently let by him further than that \$16,000 is traced from that source into deposits made by him from Dec. 1891, to Nov. 7th, 1892, and from which investments were made by him in stocks and bonds to the amount of \$13,438.75.

After that, however, commencing with the division of the profits under contract No. 4820 of September 16th, 1892, the division was made of the net profits, as hereinbefore set forth, between Benjamin D. Greene, John F. Gaynor, and Oberlin M. Carter, by thirds each. The following table gives in one column a statement of the dates when said divisions of the profits of said fraudulent contracts were so made, by thirds as aforesaid, and in the next column gives said Carter's share of the profits at said respective dates, and is obtained by adding to the previous shares so obtained by said Carter his share obtained at the respective date, so as to show his accumulated profits, or the aggregate of his profits at said respective dates. And in the next column gives the aggregate of said Carter's investments from said fraudulent divisions from the beginning, held by him on said respective dates.

**Statement of the Aggregate of Thirds of Divisions and of the
Aggregate of Investments held by Carter at Corresponding
Dates.**

32	July	6	722,528 02	690,301 85
				Aug. 6, 1897.

Your orators further aver and charge that the particular description of all said investments of the said Oberlin M. Carter's share of said divisions of the illegal and fraudulent profits of said contracts, and the details of the manner in which said Carter's share of each division is traced into the particular investments, are so voluminous that for convenience of pleading your Orator has filed herewith as Exhibit E to this bill an outline of the same as bill of particulars, to which the usual leave of reference is prayed as often as may be desired.

(3) Your orators further aver and charge the investments made by said Oberlin M. Carter of the funds intrusted to him as disbursing officer and which were so returned to him by the said conspirators as his share of the fraudulent fruits of the contracts so fraudulently let by him were invested from time to time by said Carter to a large extent in investments which made to him good returns in income.

The following table gives a statement at different dates of said Carter's income from this source as far as ascertainable and from his salary and commutation as an officer in the United States Army compared with his personal expenditures (not investments) as far as ascertainable at corresponding periods:

Comparison of Carter's Income and Expenditures.

1890	Gross expenditures	\$ 4306.60
"	Gross income from salary and securities	2208.
		<hr/>
1891	Gross expenditures	5897.83
"	Gross income from salary and securities	2836.91
		<hr/>
1892	Gross expenditures	8354.24
"	Gross income from salary and securities	3269.50
		<hr/>
1893	Gross expenditures	14982.74
"	Gross income from salary and securities	8882.
		<hr/>
1894	Gross expenditures	14410.88
"	Gross income from salary and securities	16155.50
		<hr/>
1895	Gross expenditures	20113.92
"	Gross income from salary and securities	23390.50
		<hr/>
1896	Gross expenditures	28611.57
"	Gross income from salary and securities	28501.05
		<hr/>

From which it will be seen that said Carter spent but a very little more (comparatively speaking) than the income from his share of the trust funds so fraudulently divided between the contractors and himself.

The 8th Avenue Property.

(4) Your orators further aver and charge, that among the investments so made by the said Oberlin M. Carter, from said fund so intrusted to him as such disbursing officer and so diverted to his own use through said fraudulent scheme as aforesaid as traced in Exhibit E aforesaid, was the purchase for \$39,763.75 by the said Oberlin M. Carter through Robert F. Westcott of certain property on 8th avenue in the Borough of Manhattan, City of New York, and which was conveyed to the said Oberlin M. Carter by Robert F. Westcott and wife, by deed dated January 7th, 1895, recorded on the records of the Register of said City and County of New York, in Liber 49, p. 456, for Section 3, and which is more particularly described as follows: "All that certain lot or parcel of land known and distinguished on a map of certain property of Henry Eckford, made by Daniel Ewen, City Surveyor, in September, 1829, on file in the office of the Register of the City and County of New York, by lot number 298, bounded and described as follows:

"Beginning at a point on the easterly side of 8th avenue in the Borough of Manhattan, City of New York, at the centre line of the block between 24th and 25th streets, running thence easterly and parallel with 24th street 100 feet, thence southerly and parallel with 8th avenue 24 feet 8 1-4 inches thence westerly and parallel with 24th street, 100 feet to the easterly side of 8th avenue and thence northerly along the easterly side of 8th avenue 24 feet 8 1-4 inches to the point or place of beginning, being premises known by the street number 286 Eighth avenue."

Your orators aver and charge that by reason of the fact that the said 8th avenue property was so purchased by the said Oberlin M. Carter, with the fund so intrusted to him as a disbursing officer as aforesaid, and so fraudulently diverted to his own use as aforesaid, the said Oberlin M. Carter took the title to the property under the implied trust to account to your orators for the same and to turn over, deliver and convey the same to your orators upon demand.

The Beirne Gordon Notes.

(5) Your orators further aver and charge that among the investments so made by the said Oberlin M. Carter, from said fund so intrusted to him as such disbursing officer and so diverted to his own use through said fraudulent scheme as aforesaid as traced in Exhibit E, as aforesaid, was a loan of \$10,000 made by the said Oberlin M. Carter to Bierne Gordon of Savannah, Ga., made party defendant hereto, evidenced by a note of the said Bierne Gordon, dated November 4th, 1896, and due 5 years and 57 days after date thereof, and for said Carter's convenience Westcott having no interest therein, made payable to R. F. Westcott, for the principal sum of \$10,000, and by similar interest notes for \$300 each except the first one which was for \$93.70, for the interest installments thereon falling due semi-annually, and which said principal note was thereafter endorsed by the said Westcott "without recourse" and delivered up to the said O. M. Carter, so endorsed. And which said principal note so endorsed was in the possession of L. Laflin Kellogg, one of the attorneys of said conspirators as late as the month of October, 1900, and by him produced in Court on October 3d, 1900, on the preliminary hearing had before Commissioner Shields in New York for removal of said Benjamin D. Greene et al. to Georgia for trial on the charge of conspiracy to defraud the United States as hereinafter more fully set forth.

That said loan so made by the said Oberlin M. Carter to the said Beirne Gordon as aforesaid, was secured, among other things, by a Life Insurance Policy, No. 219282, known as an Endowment policy of the Mutual Life Insurance Company of New York, for the sum of \$5,000, which policy was delivered to the said Carter as such security, and said Carter, as your orators are informed, retained the possession of the same himself.

That, by reason of the fact that the said loan was so made by the said Oberlin M. Carter with the fund so intrusted to him as a disbursing officer as aforesaid, and so fraudulently diverted to his own use, as aforesaid, the said R. F. Westcott, to whom said notes were payable, and Oberlin M. Carter, to whom said notes were assigned without recourse, took title to the said notes and to the said insurance policy under the implied trust to account to your Orators for the same, and to deliver the same, or the proceeds thereof, to your orators upon demand. Your orators aver and charge, on

information and belief, that said insurance policy has matured, and that the said Mutual Life Insurance Company of New York who holds the surrender-value of said policy of insurance, merely as a stakeholder, is about to pay over the same with the consent of said Beirne Gordon to the holder of the said \$10,000 note of the said Beirne Gordon, for the said Oberlin M. Carter, and will do so unless forthwith restrained by the summary orders and process of this honorable Court, and if allowed to be done, it will result in great loss and injury to your Orators.

Your Orators further aver and charge on information and belief that the said Beirne Gordon is willing and anxious to pay over to the proper party entitled, the entire balance due by him for the \$10,000 loan made to him by the said O. M. Carter as aforesaid, when the proper person shall have been ascertained and decreed by a Court of competent jurisdiction, to afford him protection by its decree, and that he stands ready and willing as a stakeholder to stand to and abide such decree.

Orange, New Jersey, Property.

(6) Your Orators further aver and charge that, among the investments so made by the said Oberlin M. Carter, from said funds so intrusted to him as such disbursing officer, and so diverted to his own use through said fraudulent scheme aforesaid traced in Exhibit E aforesaid, was the purchase by the said Oberlin M. Carter, at the cost of \$63,020.35 for land and improvements, through said Robert F. Westcott, of a half interest in certain real estate situate in Orange, Essex County, New Jersey, the half undivided interest in said land having been conveyed to said Oberlin M. Carter by deed made to him on January 25th, 1897, by Robert F. Westcott and wife, recorded in the office of the Register of Deeds for the County of Essex, New Jersey, in Book "S 30," page 550, and which said real estate and improvements were afterward divided and Carter's interest therein was conveyed to him in severalty by a partition deed made by the said Robert F. Westcott to the said Oberlin M. Carter, dated June 9th, 1899, and which said property so conveyed to said Oberlin M. Carter in severalty as aforesaid, being more particularly described as follows:

"Those two certain parcels or tracts of land situate in the

city of Orange, County of Essex and State of New Jersey described as follows:

Parcel No. 1. Beginning at the intersection of the southerly side of Highland avenue with the easterly side of Berkeley avenue, and running thence in an easterly direction along the line of Highland avenue 100 feet more or less, thence in a southerly direction 225 feet more or less to a point 75 feet east of the easterly line of Berkeley avenue, thence in a westerly direction 75 feet more or less to the easterly side of Berkeley avenue, thence in a northerly direction along the easterly side of Berkeley avenue 225 feet more or less to the point or place of beginning.

Parcel 2. Beginning at a point on the southerly side of Highland avenue distant 349 feet, more or less, easterly from the intersection of the southerly side of Highland avenue with the easterly side of Berkeley avenue, and running thence easterly along the southerly side of Highland avenue 247 feet more or less to land now or formerly belonging to J. H. Noyes, thence in a southerly direction along said land of said Noyes 225 feet more or less to land now or formerly belonging to Zadie W. W. Grant, thence in a westerly direction along the land of said Grant 247 feet more or less to a point 315 feet more or less from the easterly side of Highland avenue, thence in a northerly direction 225 feet more or less to the point or place of beginning."

Your orators further aver and charge that by reason of the fact that the said above described property was so purchased and paid for by the said Oberlin M. Carter, with the funds so intrusted to him as a disbursing officer as aforesaid, and so fraudulently diverted to his own use as aforesaid, the said Oberlin M. Carter took the title to the property under the implied trust to account to your orators for the same and to turn over, deliver and convey the same to your orators upon demand.

Other Investments.

(7) Your orators further aver and charge that among the other investments so made by the said Oberlin M. Carter from said fund so intrusted to him as such disbursing officer and so diverted to his own use through said fraudulent scheme as aforesaid as traced in Exhibit E as aforesaid, were large amounts of stocks, bonds and notes, the description of which is set forth in said Exhibit E, a large part of

which is out of the territorial jurisdiction of this Court or otherwise concealed or converted into other property by those holding the same for the benefit of said Oberlin M. Carter, and all of which is held by those holding the same with notice of the fraud under the implied trust to account to your orators for the same or for the proceeds thereof, and to turn over, deliver and convey the same to your orators upon demand.

(8) Your orators further aver and charge on information and belief, that among the investments so made by the said Oberlin M. Carter from said funds so intrusted to him as such disbursing officer and so diverted to his own use through said fraudulent scheme as traced in Exhibit E as aforesaid were large amounts of stock and bonds and notes which either specifically or through the proceeds of the sale of the same, the said Oberlin M. Carter, about the time of the confirmation of his sentence by the President as hereinafter mentioned, and shortly thereafter, caused to be delivered to his brother, the said I. Stanton Carter, and to his uncle, the said Lorenzo D. Carter, for concealment and safe keeping for the benefit of the said Oberlin M. Carter. And that the said I. Stanton Carter, and Lorenzo D. Carter, thereupon agreed with the said Oberlin M. Carter to co-operate with him and together, in the holding and concealment from your orators of the said securities and proceeds thereof.

That in pursuance of said agreement the said I. Stanton Carter and the said Lorenzo D. Carter from time to time secretly brought from New York and elsewhere into the State of Illinois the investments and proceeds thereof aforesaid and the rents of the property on 8th avenue, New York City, and in Orange, New Jersey, aforesaid, and that said I. Stanton Carter and Lorenzo D. Carter now hold the said securities or the proceeds thereof, and the rents so collected for the benefit of the said Oberlin M. Carter, but with full notice of your orators' rights and equities therein, and with the duty imposed upon them by law to account to your orators for the same as a trust fund.

\$23,000 Raised by Mortgage on 8th Avenue Property.

(9) Your orators further charge on information and belief that on or about October 8th, 1900, the said I. Stanton Carter under power of attorney from said Oberlin M. Carter, hereinafter mentioned, received from the American Mort-

gage Company of New York, the sum of \$23,000.00 as a loan to the said Oberlin M. Carter secured on said property on 8th avenue, New York City, and now holds the same or the investment thereof concealed from your orators.

That while said loan was made under circumstances, as set forth in paragraph VIII subdivision (5) of this bill, which put the said American Mortgage Company upon notice of your orators' rights in said properties, yet your orators are informed that the said American Mortgage Company will contend that they are protected in making the loan by a State Statute of New York protecting purchasers and mortgagees of the legal title where a record of *lis pendens* is not filed in the office provided by that enactment. That that matter is now pending for adjudication in the principal suit filed in the Circuit Court of the United States for the Southern District of New York by your orators against the several defendants named in this bill and against the said American Mortgage Company, to which suit this bill is auxiliary. That in equity and good conscience, it is the right and duty of your orators to have held up and to preserve through the processes of this court the said sum of \$23,000 so held and concealed by the said I. Stanton Carter and to have the same or the part thereof, if any, recovered, applied by the decree of this court to your orators' claim against the said Oberlin M. Carter, and in any event should the mortgagees aforesaid be decreed in the suit pending as aforesaid to have taken said mortgage free from the rights of your orators, to have the same applied to your orators' claim by the decree of this court.

Rents Collected by I. S. Carter.

(10) Your orators further aver and charge on information and belief, that, acting under the power of attorney from Oberlin M. Carter, as set forth in paragraph IX of this bill, the said I. Stanton Carter also collected some \$3,000.00, or other large sum, as net rents and profits of the property on the 8th avenue, New York, and in Orange, New Jersey, before mentioned.

Coupons Collected by I. S. Carter.

(11) That on or about June 27th, 1901, the said I. Stanton Carter collected through the firm of N. W. Harris & Company at Chicago, Illinois, coupons matured upon the following described securities constituting part of the investments made with said trust funds by said Oberlin M. Carter, as shown on Exhibit E, so received and held by him for account of said Oberlin M. Carter, to-wit:

July, 1900, coupons on 5 Joliet & No. Indiana R. R. bonds, Nos. 318 to 322, @ \$35.....	\$175.00
Aug., 1900, coupons on 10 N. Y. Lackawanna & Western R. R. bonds, Nos. 1171 to 1180, @ \$25.....	250.00
Sept., 1900 coupons on 15 Delaware & Hudson R. R. Bonds, Nos 8283, 121 to 125, 293, 528, 593, 840, to 842, 1648 to 1649, @ \$35.....	525.00
	<hr/> \$950.00

Which collection or a large part thereof your orators aver and charge now stands to the credit of the said I. Stanton Carter upon the books of the said N. W. Harris & Co., who are made parties defendant hereto in order that the said fund may be held up pending this proceeding and that they may be bound by the final decree of this court herein.

Rents Collected by L. D. Carter.

(12) Your orators further aver and charge on information and belief, that the said Lorenzo D. Carter, in pursuance of the agreement made between him and Oberlin M. Carter and I. Stanton Carter, aforesaid, collected some \$2,200.00 or other large sum as net rents and profits of the property on 8th avenue, New York, and in Orange, New Jersey, before mentioned.

L. D. Carter Sells Securities.

(13) That among the securities constituting a part of the investments into which the said trust funds had been so diverted by the said Oberlin M. Carter, as engineer officer and disbursing officer as set forth in Exhibit E, the said Lorenzo D. Carter, in pursuance of the agreement between him and the said Oberlin M. Carter and I. Stanton Carter, received and

sold, thus converting into money, the following securities, sold as follows:

Through J. F. Harris—Broker—Chicago:
 Sept. 12, 1900, 10 M.-N. Y. Lackawanna & Western Construction Mortgage 5 per cent. bonds, Nos. 1171 to 1180, net proceeds deposited by said L. D. Carter to his credit in the Oakland (Ill.) National Bank\$11,883.54
 Through 2nd National Bank of Charleston, Illinois:
 Oct. 11, 1900, 2 M Milwaukee, Lake Shore & Western 6 per cent. bonds, Nos. 697-847, proceeds.....\$2,649.60
 Oct. 17, 1900, 2 M Milwaukee, Lake Shore and Western 6 per cent. bonds, Nos. 698, 699, Proceeds....\$2,650.00
 Through Oakland (Ill.) National Bank:
 Oct. 15 and 22, 1900, 4 M Milwaukee, Lake Shore and Western 6 per cent. bonds, Nos. 839, 843, 844 and 846, proceeds\$5,315.00
 Through 1st National Bank of Charleston, Ill.:
 Oct. 19, 1900, 2 M Milwaukee, Lake Shore & Western 6 per cent. bonds, Nos. 845 and 848, proceeds. .\$.2,654.00

L. D. Carter Invests in Other Securities.

(14) That from the proceeds of said moneys in his hands being managed for said Oberlin M. Carter, as aforesaid, the said Lorenzo D. Carter, on or about February 13th, 1901, purchased through the said N. W. Harris & Co. at Chicago, Illinois, securities as follows:

21 M bonds, 4 per cent. Kentucky Central Ry. Co.,
 Nos. 3776—3782 to 3798—5960 to 5961, 5964, cost..\$20,884.35
 which bonds and the profits and the income thereof the said L. D. Carter holds under the implied trust to account to your orators for the same and to turn over and deliver the same to your orators upon demand.

I. S. Carter Invests in Other Securities.

(15) That from the proceeds of said moneys in his hands being managed for said Oberlin M. Carter, as aforesaid, the said I. Stanton Carter, on or about March 11, 1901, purchased through said N. W. Harris & Co. at Chicago, Illinois, bonds as follows:

Bill of Complaint.

1 M bond, 5 per cent., Michigan Telephone Co., No. 2472, cost	\$1,010.00
1 M bond, 4 per cent., Kentucky Central Ry. Co., No. 5119	990.00
Interest advance	17.07
	<hr/> \$2,017.01

Which bonds and the profits and income thereof the said I. Stanton Carter holds under the implied trust to account to your orators for the same and to turn over and deliver the same to your orators upon demand.

VIII.

The Board of Inquiry.

(1) Your orators further aver and charge that it having been determined by the new Chief of Engineers, General John M. Wilson, who succeeded to that office about February, 1897, to make a general change of the officers in the Corps of Engineers from one district to another for the general good of the service, and that fact becoming known to the said Oberlin M. Carter, he succeeded in causing himself to be appointed as Military Attache to the court of St. James, and also a member of the Nicaragua Canal Commission, and the said O. M. Carter being superseded as engineer officer in charge of the Savannah District only July 17, 1897, his successor, Captain Cassius E. Gillette, took charge of the district July 20th, 1897.

Within two weeks after taking charge of the Savannah District facts began to come to the attention of Captain Gillette showing irregularities in the administration by said Carter of the affairs of the district of the gravest character.

It was developed that a large number of the official files and documents of the office had been with a great deal of his private papers packed up by Carter in a file case, which he caused to be boxed and which he directed to be shipped to him. This box was detained.

This state of affairs led to the appointment by the president of a board of inquiry, of which Colonel George L. Gillespie (now General Gillespie) was president.

In the meantime the said Oberlin M. Carter hurried back from England. Arriving in New York City early in September

ber, 1897, said Carter expected to be arrested, and took out of his safety deposit box securities of the cost value of \$414,437.50 which he had there, constituting a part of the investments described in Exhibit E, which he had made from his share of the illegal profits of the contracts as aforesaid, and turned them over to the said Benjamin D. Greene and John F. Gaynor at the Hoffman House for safe keeping.

These securities were in a day or two delivered by said Benjamin D. Greene to the said Robert F. Westcott for safe keeping for said Carter, and Westcott placed them in his safety deposit vault. Shortly thereafter the facts in regard to Carter's guilty connection with said Benjamin D. Greene and John F. Gaynor in the contracts began to be given publicity in the newspapers and the said Robert F. Westcott, upon the advice of his counsel and in the presence of his counsel, delivered back to Carter all of the aforesaid securities so turned over to Westcott by said Greene, and took said Carter's receipts for the same in detail, which receipts are dated respectively October 11, 1897, and October 29, 1897, and which original receipts came to the knowledge and into the possession of your orators on or about the month of July, 1900, and are held subject to the inspection of the court.

Your orator further avers and charges that said Board of Inquiry appointed to inquire into the propriety of Court-Martial proceedings met in Savannah on September 21, 1897, and the said detained file case was opened by the said Oberlin M. Carter in the presence of said Board, and in it were found a large mass of incriminatory evidence tending to show conspiracy between the said Benjamin D. Greene, John F. Gaynor and Oberlin M. Carter in such contract work, aforesaid in Savannah District, and showing that said Carter's personal expenditures had run up from about \$4,300 per annum in 1890 to \$28,611.67 in 1896, as hereinbefore set forth, and showing that the income so spent by said Carter was derived from a large amount of securities which Carter was handling during said period. And said Carter in order to explain his possession of said securities, and his spending of the income from the same, caused the said Benjamin D. Greene and said John F. Gaynor to come before said Board and make statements in his presence to the effect that neither the said Oberlin M. Carter nor the said Robert F. Westcott had been in any way beneficially interested in any of said contracts let in said Savannah District, and the said Carter himself made before the said Board a like statement, and further

stated that the large income so spent by said Carter from securities was from gifts given him by the said Robert F. Westcott, his former father-in-law, from the private fortune of said Westcott, to whom the securities belonged and in which Carter had no interest. Your orators further aver and charge that after due investigation said Board of Inquiry recommended the convening of a Court Martial to try said Oberlin M. Carter on the charge, among other things, of conspiracy with the said Benjamin D. Greene, John F. Gaynor and others to defraud the United States as hereinbefore set forth, although at that time the details by which the said conspiracy was carried out and the money divided between the conspirators as hereinbefore set forth was not fully known.

The Court Martial.

(2) Your orators further aver and charge that in due course a Court Martial was duly constituted and convened at Savannah on the 12th day of January, 1898, of which General Elwell S. Otis was president, and the other members being all distinguished engineers or officers distinguished in other branches of the military profession. The trial of Captain Carter before this Court Martial on the charges was continued through three months and attracted more attention and was given great publicity through the newspapers and otherwise than any other similar event in the history of the country, and the details of the evidence published every day in almost every important newspaper throughout the United States gave a notoriety to the facts in issue in the case such as probably no similar case has ever had.

Before this Court Martial the said Carter and the said Benjamin D. Greene were volunteer witnesses in behalf of said Carter, and again stated that neither said Robert F. Westcott nor the said Carter had been interested beneficially in said contracts, and that the said securities handled by said Carter were the securities belonging to the private fortune of the said Robert F. Westcott, which said Carter had no personal interest, but the income from which had been given him by said Westcott. Your orators further aver on information that the said Oberlin M. Carter endeavored to induce the said Robert F. Westcott to appear before said Court Martial and testify falsely to the same effect, but the latter

while he did not desire to testify against the husband of his dead child, would not consent to go upon the stand otherwise than to tell the truth of the transaction, and to disclaim any interest in these securities and investments. To avoid testifying against his said son-in-law, said Robert F. Westcott departed to Europe and remained away during the Court Martial proceedings.

The said Oberlin M. Carter however induced his brother-in-law, Robert E. Westcott to voluntarily appear before said Court Martial and to testify in his behalf as to said Robert F. Westcott having given "money" to said Oberlin M. Carter, to create the impression that the income so spent by said Oberlin M. Carter had been gifts from his father-in-law, although the said Robert F. Westcott had told the said Robert E. Westcott that this was not true.

The said Oberlin M. Carter also induced his own brother, I. Stanton Carter, defendant to this bill, who had been an inspector under said Oberlin M. Carter on the said contract work in Savannah District, and who was familiar with the fraudulent character of the work done, to testify in his behalf before the said Court Martial as to seeing Robert F. Westcott hand over money to said Oberlin M. Carter. And the said I. Stanton Carter was present at said Court Martial during said trial and was fully apprised of the fact that said Oberlin M. Carter then fully disclaimed any interest in said securities and investments other than in the income spent, which he claimed as having been given him by the said Robert F. Westcott.

Your orators further aver and charge that, by reason of the fact that the said Court Martial had no power to compel civilian witnesses to testify, and no power to compel such witnesses to produce books and papers, the evidence before said Court Martial did not develop the divisions of the money paid on said contracts, between the conspirators nor trace and locate the specific funds so divided into specific securities, as has since been done and set forth in this bill. Nevertheless the evidence of conspiracy to defraud the United States, entered into between the said conspirators in the letting of the contracts and in the doing of the work under them, and the possession by Carter of so large an amount of securities from which he was enjoying the income without any satisfactory explanation furnished proof so plain of the guilt of said Oberlin M. Carter that he was convicted by said Court

Martial and sentenced to dismissal from the army, to pay a fine of \$5,000 and to be imprisoned at hard labor for five years.

The Appeal.

(3) Your orators further aver and charge, that an appeal was made by said Oberlin M. Carter to the President of the United States to review the judgment of the said Court Martial. That on account of the presence of public business consequent upon the pendency of the war with Spain, there was some delay in the disposition of said appeal, and the Attorney-General to whom a review of the evidence was referred by the President, did not reach a conclusion confirming said judgment until about the 29th day of September, 1899, and this was followed by the confirmation of the judgment by the President, following which the said Oberlin M. Carter was placed in confinement, and after some preliminary efforts made by him to obtain release by habeas corpus proceedings he was imprisoned in said Penitentiary at Fort Leavenworth, Kansas.

The Indictment of Greene and the Gaynors et al.

During the pendency of said appeal such original documents and evidence throwing light upon the frauds committed as aforesaid were in the possession of the President or the Attorney-General for him. As soon as the said appeal was disposed of, the said evidence was turned over to the District Attorney for the Southern District of Georgia, who forthwith proceeded to put said evidence before the Grand Jury for said District, and on the 8th day of December, 1899, said Grand Jury returned a true bill of indictment against the said Benjamin D. Greene, John F. Gaynor, William T. Gaynor, Edward H. Gaynor, Michael A. Connolly and Oberlin M. Carter, charging them with conspiracy to defraud the United States by and through said scheme to defraud as substantially set forth in this bill.

The Hearing for Removal.

(4) The said Benjamin D. Greene, John F. Gaynor, William T. Gaynor and Edward H. Gaynor were arrested in New York City on December 11th, 1899, on warrants issued by

John A. Shields, United States Commissioner for the Southern District of New York, based upon said indictment and affidavit thereto, and being in due course identified by evidence as the defendants therein, were committed in default of bail to await a warrant of removal from his Honor, Judge Addison Brown, the District Judge, to Georgia for trial. The Judge who held the matter under advisement some months, on June 26th, 1900, made an order referring the case back to the Commissioner to take evidence on the merits as to the guilt or innocence of the accused for the purpose of establishing probable cause of guilt.

On July 6th, 1900, the hearing was renewed before Commissioner Shields, and with some short recesses was proceeded with, and a large amount of oral and documentary evidence on all features of the case was put in on both sides and until December 23, 1900, when the case was submitted to the Commissioner for his finding on the evidence. On March 21, 1901, the Commissioner, who had the voluminous record under consideration in the meantime, made his finding of probable cause of guilt and again committed said defendants into custody for removal to Georgia for trial.

On the 23rd day of May, 1901, his Honor Judge Brown made an order affirming the finding of said Commissioner and directing the removal of the said defendants to Georgia for trial.

Your orators further aver and charge that while said hearings were being proceeded with your orator's agents and attorneys, by great labor and strenuous efforts, were enabled through the greater effectiveness of the processes of the Civil Courts, to obtain a large amount of documentary and other evidence from banks, brokers and others, unknown to your orators until then, demonstrating the division of the fruits of the said fraudulent scheme between the said conspirators as set forth in this bill.

The said Robert F. Westcott too had returned to the United States, and the case against his son-in-law Carter having been ended by his imprisonment under sentence in the penitentiary, expressed his willingness to testify as against the other conspirators to the facts within his knowledge and turn over to the Government all his checks, check books and documents bearing upon questions in issue. This the said Westcott did, and it was found by the Government's expert accountant, as testified to at said hearing, that while

a considerable part of the proceeds of said divisions of the profits of said contracts had passed through said Westcott's hands, and while a large part had been handled through the banks in Westcott's name under powers of attorney held by said Carter, that said Westcott had retained no part of the same, but that the same or the investment of the same almost immediately after division found its way into the possession of said Oberlin M. Carter, who proceeded to enjoy the income therefrom.

Notice to American Mortgage Company.

(5) The testimony of said Robert F. Westcott on said hearing before the said Commissioner, which was concluded October the 5th, 1900, was a notable event, and on account of the great interest which had been excited over the case throughout the country, and the testimony of the said Westcott denying that he had ever had any interest in these contracts, or ever had any pecuniary interest in the securities and investments aforesaid, and particularly in the said 8th avenue property and Orange, New Jersey, property, was given wide publicity through the newspapers and otherwise.

So that the said American Mortgage Company, party defendant hereto, whose principal officers are attorneys practicing law in the City of New York, had, as your orators are informed, believe and so charge, by the notorious character of the case, and by reason of the fact that said mortgage was executed by said Oberlin M. Carter while in prison, and otherwise full, actual and constructive notice, at and before October the 8th, 1900, the date they took said mortgage, that said Oberlin M. Carter held the title to said 8th avenue property in fraud and under the implied trust to account to your orators for the same, as aforesaid.

Nevertheless, the said American Mortgage Company with full notice of your orators rights as aforesaid, on October the 8th, 1900, while said hearing was in progress and accounts of the same were being published from day to day in the newspapers, accepted from said Oberlin M. Carter a mortgage on said 8th avenue property for the alleged consideration of \$23,000 then and there alleged to have been loaned, which mortgage on its face put the said company on notice that it was executed by the said Oberlin M. Carter, while in the penitentiary at Fort Leavenworth, Kansas, as aforesaid.

By reason whereof your orators aver that said American Mortgage Company acquired no right in and through said mortgage as against the right and equity of your orators in said 8th avenue property as aforesaid.

IX.

Lorenzo D. Carter and I. Stanton Carter Join the Conspiracy.

(6) Your orators further aver that the said Lorenzo D. Carter, party defendant hereto, is an uncle of the said Oberlin M. Carter, and that Lorenzo D. Carter from the time of Oberlin M. Carter's conviction by said Court Martial up to this time has taken a strong and active part in endeavors to gain the said Oberlin M. Carter's freedom, and he as well as the said I. Stanton Carter have been from said time of Carter's conviction fully cognizant of the fact that the said Oberlin M. Carter had no interest in any of the aforesaid securities or investments, except such as he had acquired in pursuance of said scheme to defraud your orators as aforesaid. Nevertheless the said Lorenzo D. Carter and the said I. Stanton Carter did on or about the time of the confirmation of said Court Martial proceeding aforesaid, join said conspiracy to defraud the United States as aforesaid and agree with said Oberlin M. Carter to aid and abet him in holding and concealing from your orators the assets into which the said Oberlin M. Carter had so diverted the funds intrusted to him as disbursing officer as aforesaid.

Power of Attorney to I. Stanton Carter.

(7) In pursuance of said agreement the said I. Stanton Carter on or about the 2d day of October, 1899, accepted from said Oberlin M. Carter as your orators are informed, believe and so charge, a power of attorney from the said Oberlin M. Carter, authorizing the said I. Stanton Carter to convey or dispose of any of the aforesaid assets by and in the name and stead of the said Oberlin M. Carter, and especially designed to convey the said 8th avenue property in the City of New York, and the said Orange, New Jersey property, which Power of Attorney is recorded in the office of the Register of Deeds in and for the County of New York, in Liber 9, of Powers of Attorneys, page 314, on January 9th, 1901. And

your orators charge that said Power of Attorney is a cloud upon the title and menace to the interest of your orators in said property and in equity and good conscience should be cancelled.

8th Avenue Property Conveyed to Lorenzo D. Carter.

(8) That in pursuance of said agreement the said Oberlin M. Carter, by I. Stanton Carter, under said Power of Attorney, did on November 15th, 1900, by deed convey to the said Lorenzo D. Carter, and the latter did accept for the alleged consideration of \$10,000, the equity of redemption in said 8th avenue property, which deed is recorded in the records of the Register's office of said City and County of New York, in Liber 74, Folio 158 Section 3, and that Lorenzo D. Carter holds the same with full notice of your orator's rights therein and under the implied trust to account to your orator for the same on demand.

Orange, N. J., Property Conveyed to Lorenzo D. Carter.

(9) Your orators further aver and charge that on the 23d day of October, 1900, the said Oberlin M. Carter by the said I. Stanton Carter under the aforesaid power of attorney by deed conveyed to Frank P. Blair of Chicago, Illinois, the aforesaid Orange, New Jersey property, which had been previously conveyed to said Oberlin M. Carter by deed of June 9th, 1899, as hereinbefore mentioned for the alleged consideration of one dollar, which deed is recorded in the office of the Register of Deeds of Essex County, New Jersey, in Liber "U. 33," p. 213. That said Frank P. Blair was one of the attorneys for said Oberlin M. Carter in the said Court Martial proceedings, and took the title to said property with full notice of the fraud by which the said Oberlin M. Carter had acquired the same, and took the same for the purpose of holding the same for the said Oberlin M. Carter. That notwithstanding said conveyance to said Frank P. Blair as aforesaid the said Oberlin M. Carter by said I. Stanton Carter under the aforesaid power of attorney by deed dated January 25th, 1901, and recorded in the office of the Register of Deeds for said County of Essex, New Jersey, in book "B. 34, p. 53," conveyed to said Lorenzo D. Carter of Oakland, Illinois, the same aforesaid Orange, New Jersey, property which had been so conveyed to said Frank P. Blair aforesaid

for the alleged consideration of \$100.00. That the said Lorenzo D. Carter took the said conveyance to hold the said property for the benefit of said Oberlin M. Carter in pursuance of the aforesaid agreement he had made with said Oberlin M. Carter and with full knowledge of the fraud by which the Oberlin M. Carter had acquired the same as aforesaid.

That thereafter on May 13th, 1901, by quitclaim deed for the alleged consideration of one dollar, the said Frank P. Blair and Florida Blair, his wife, conveyed to the said I. Stanton Carter of Chicago, Illinois, the same Orange, New Jersey, property, which had been so conveyed to the said Frank P. Blair on October 23, 1900, as aforesaid, and the said I. Stanton Carter took the said conveyance to hold the said property for the benefit of said Oberlin M. Carter, and with full knowledge of the fraud by which the said Oberlin M. Carter had acquired the same as aforesaid.

Your orators further aver and charge that by reason of the premises the said Lorenzo D. Carter and the said I. Stanton Carter hold the title to the said Orange, New Jersey, property so conveyed to them under the implied trust to account to your orators for the same, and to turn over, deliver and convey the same to your orators upon demand.

X.

Your orators further aver and charge that the said I. Stanton Carter and the said Lorenzo D. Carter have been and are collecting the rents, issues and profits of the said property on 8th avenue in New York City, and of the said Orange, New Jersey property aforesaid, and removing and secreting the same. That in case of the destruction of the improvements on said property by fire your orators' interest in said property would be entirely swept away and lost, and that it is necessary for the protection of the interests of your orators that a receiver be forthwith appointed by this court to take charge of, hold and protect until the further order of the Court, all of the aforesaid properties within the jurisdiction of this Court, and to take charge of and hold such other of the properties or proceeds thereof, in the jurisdiction of this Court, into which the funds so intrusted to said Oberlin M. Carter as a disbursing officer have been so fraudulently diverted and invested, as aforesaid, and that in due course the appointment of such receiver should be made permanent.

XI.

Forasmuch as your orators can have no adequate relief except in this Court, and to the end, therefore, that the defendants may, if they can show why your orators should not have the relief hereby prayed for, and full, true, direct and perfect answers make to the matters herein before stated and charged, but not under oath, answers under oath being hereby expressly waived, your orators pray as follows:

(1) That this Court will forthwith appoint a temporary receiver to take charge of the aforesaid property within the jurisdiction of this Court as hereinbefore set forth until a hearing can be had on rule nisi to be issued in this cause.

(2) That in due course such receiver shall be appointed pendente lite.

(3) That the Court will in due course by its final decree declare all of the aforesaid investments within the jurisdiction of the Court, into which the funds so intrusted to said Oberlin M. Carter as disbursing officer and so fraudulently diverted to his own use as aforesaid, in the hands of the defendants and of all persons holding the same for the benefit of said Oberlin M. Carter, or taking the same with notice of the fraud, are properties held in trust for orators and will decree a delivery of the same or proceeds thereof to your orators or a conveyance of the same to your orators, on a sale of the same and the delivery of the proceeds to your orators as the nature of the case and justice may require.

(4) That the Court will decree a cancellation of said power of attorney given by said Oberlin M. Carter to said I. Stanton Carter.

(5) That the Court will grant a restraining order and injunction in due course restraining any and all parties to this suit their agents and attorneys from in any manner conveying away, disposing of or incumbering pendente lite any of the properties described on Exhibit E to this bill, or the re-investments thereof.

(7) That whenever other and additional persons within the jurisdiction of this Court shall become known holding with notice of the fraud any of said properties into which said fund so intrusted to said Oberlin M. Carter as disbursing officer has so fraudulently been diverted, and the details of the concealment of said properties shall have been sufficiently

developed, that your orators may be allowed to make them parties hereto by suitable amendment with apt allegations and prayers.

(8) May it please your Honors to grant unto your orators the Court's most gracious writ of subpoena, directed to the said Oberlin M. Carter, at present residing in the Penitentiary at Fort Leavenworth, in the State of Kansas, to the said Lorenzo D. Carter, residing at Oakland, Coles County, Illinois, to the said I. Stanton Carter, residing at Chicago, Illinois, and N. W. Harris and Company, residing at Chicago, Illinois.

(9) Inasmuch as the defendants Oberlin M. Carter, and Lorenzo D. Carter, are not to be found in the territorial jurisdiction of this Court. Your orators pray that the Court will make a suitable order for service upon them by publication in accordance with the statute in such case made and provided.

(10) May it please your Honors to grant unto your orators such other and further relief as the nature of their case may require and to the Court may seem meet and appropriate.

(11) Your orators on the 30th day of July, 1901, filed in the Circuit Court of the United States for the Southern District of New York a bill of complaint of a similar tenor and effect to this bill, against the said Oberlin M. Carter, Lorenzo D. Carter, I. Stanton Carter, The American Mortgage Company of New York and others, seeking to subject to like equities the properties in that jurisdiction constituting the investments made by said Oberlin M. Carter of the funds intrusted to him as a disbursing officer which bill is now pending, and a temporary receiver has been appointed by that court to take charge and preserve said properties until the further order of the court.

Your orators pray that this bill be taken as auxiliary to said bill so pending in New York as aforesaid.

MARION ERWIN,
Special Assistant Attorney General
Solicitor for Complainant.

S. H. BETHEA,
U. S. Atty., Of Counsel.

Bill of Complaint.

United States of America,
Northern District of Illinois. } ss.

On this 27th day of August, 1901, before the undersigned personally comes Edward I. Johnson, who being duly sworn, deposes and says that he is a bank examiner by profession that he has for two years and over been engaged under employment by the United States in working out through the accounts and documents in the Engineer's office for the Savannah District, and the accounts of Oberlin M. Carter, Benjamin D. Greene, John F. Gaynor, R. F. Westcott and others, in the banks and brokers' offices in New York and elsewhere, the details of the frauds set forth in the foregoing bill; that he has read the testimony of the witnesses in the court Martial proceedings therein referred to, and in the proceedings for removal of Benjamin D. Greene et al., therein referred to, and he has read the said bill and is familiar with the facts set forth in said bill, and that the facts therein stated are true to the best of his knowledge, information and belief.

EDWARD I. JOHNSON.

Subscribed and sworn to before me this 27th day of August, 1901.

S. W. BURNHAM,
Clerk.

Endorsement: Filed Aug. 27, 1901, S. W. Burnham, Clerk.

MAP(S) IS/ARE TOO LARGE TO BE FILMED

And on to-wit: the 27th day of August, 1901, in the July term, 1901, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof.

ORDER APPOINTING TEMPORARY RECEIVER AND
RULE TO SHOW CAUSE.

The United States of America }
vs. }
Oberlin M. Carter *et al.* }

Upon consideration of the sworn allegations of the foregoing bill, and the evidence submitted in support thereof, it is ordered by the Court:

(1) That the defendants, Oberlin M. Carter, Lorenzo D. Carter, I. Stanton Carter and N. W. Harris & Company show cause before the United States Circuit Court for the Northern District of Illinois at the United States Court Rooms in the City of Chicago at ten o'clock A. M., October 22nd, 1901, or as soon thereafter as the cause can be heard, why injunction should not issue and Receiver be appointed pendente lite prayed;

(2) It further appearing to the Court that the Defendants, Oberlin M. Carter and Lorenzo D. Carter are not to be found within the territorial jurisdiction of this court, and that there is property within this jurisdiction, the status of which it is necessary to preserve until the parties can be heard;

It is ordered by the Court, that Max H. Whitney, of Chicago be, and he is hereby, appointed temporary Receiver to take possession of such of the personal and other property into which the funds intrusted to said Oberlin M. Carter as a disbursing officer of the Government have been traced as set forth in said bill or the proceeds thereof in the hands of the said Lorenzo D. Carter and I. Stanton Carter or in the hands of any other person in the jurisdiction of this court taking the same with notice of.

MARSHAL'S RETURN ON CERTIFIED COPY OF ABOVE ORDER.

United States of America, }
Northern District of Illinois. } ss.

I have served this writ within my district in the following manner to wit:

Upon N. W. Harris and Company by reading the same to and within the presence and hearing of A. W. Harris one of the co-partners doing business as N. W. Harris and Company and at the same time delivering to him a true copy thereof, this 29th day of August, 1901.

Also upon I. Stanton Carter by leaving a true copy thereof at his usual place of abode, with Minnie B. Carter, an adult person who is a member of his family at the same time informing her of the contents thereof the 29th day of August, 1901.

JOHN C. AMES,
U. S. Marshal.
By G. H. VOSS,
Deputy.

Filed Sept. 10, 1901, S. W. Burnham, Clerk.

And on to wit: the 27th day of August, 1901, in the July term 1901 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge Presiding, there was made by the Court, the following order and entry thereof.

ORDER FOR SERVICE BY PUBLICATION, ETC.

The United States of America	} In Equity. Bill, etc.
vs.	
Oberlin M. Carter et al.	

The complainants having commenced in this court a suit as above entitled to enforce a legal and equitable lien upon and claims to, and to remove incumbrances, liens and clouds upon the title to personal property within the district, more particularly described in said bill, and the defendants, Oberlin

M. Carter and Lorenzo D. Carter, not being inhabitants of or found within the said district, and not voluntarily appearing thereto.

It is ordered by the court that said above named defendants shall appear, plead, answer or demur to said bill on or before the 22nd day of October, 1901, at which time, or as soon thereafter as the case can be heard, the question of the appointment of a receiver and issue of injunction pendente lite will be heard.

Let a copy of this order be served upon the said defendants, if practicable, wherever found, and upon the person or persons in possession or charge of said property.

Let a copy of this order be published once a week for six consecutive weeks prior to the date fixed herein for the appearance of said defendants in the Chicago Legal News, newspaper, of Chicago.

RETURN OF MARSHAL ON CERTIFIED COPY OF ABOVE ORDER.

U. S. Marshal's Return.

Received this writ at Topeka, Kansas, September 21, 1901, and executed the same at Fort Leavenworth, Leavenworth County, Kansas September 23, 1901, by delivering to the within named Oberlin M. Carter, personally, a certified copy of this writ with all the endorsements thereon.

W. E. STERNE,
U. S. Marshal.

DOCKET ENTRY AS TO RECEIVER'S BOND.

Aug. 27, 1901, filed and entered Bond of Receiver.

And on to wit: the 28th day of August, 1901, there was issued out of the clerk's office of said Court a certain subpoena, which with the marshal's return thereon are in the words and figures following to wit:

CHANCERY SUBPOENA.

United States of America }
 Northern District of Illinois } ss.
 Northern Division.

The United States of America To Oberlin Carter, Lorenzo D. Carter, I. Stanton Carter, N. W. Harris & Co., Greeting:

We again Command You and Every of You, That you appear before our Judges of our Circuit Court of the United States of America, for the Northern District of Illinois, at Chicago, in the Eastern Division of said District, on the first Monday in the month of October next, to answer the bill of complaint of The United States of America lately filed in the Clerk's office of said Court, in said City of Chicago, then and there to receive and abide by such judgment and decree as shall then or thereafter be made, upon pain of judgment being pronounced against you by default.

To the Marshal of the Northern District of Illinois, to Execute:

Witness, the Hon. Melville W. Fuller, Chief Justice of the United States of America, at Chicago, aforesaid, this 28th day of August in the year of our Lord one thousand nine hundred and one and of our Independence the 26th year.

S. W. BURNHAM,

(Seal)

Clerk.

MEMORANDUM.

The above named defendants are notified that unless they and each of them shall enter their appearance in the Clerk's office of said Court, at Chicago, aforesaid, on or before the day to which this Writ is returnable, the complainant's bill, will be taken against them as confessed and a decree entered accordingly.

S. W. BURNHAM,

Clerk.

**MARSHAL'S RETURN TO ABOVE WRIT OF SUB-
POENA.**

United States of America }
Northern District of Illinois } ss

I have served the within writ within my District in the following manner to wit:

Upon N. W. Harris and Company by delivering a true copy thereof to A. W. Harris one of the firm of N. W. Harris & Co., this 28th day of August A. D 1901

And upon I Stanton Carter by leaving a true copy thereof at his usual place of abode with Minnie B. Carter an adult person who is a member of his family, at the same time informing her of the contents thereof, on August 28th A. D. 1901.

Oberlin Carter and Lorenzo D. Carter not found in my District.

JOHN C. AMES,
U. S. Marshal,

Filed Aug. 29, 1901, S. W. Burnham, Clerk.

And on to wit: the 12th day of September 1901 came Horace G. Stone, and entered his appearance in said Cause for defendants Lorenzo D. Carter and I. Stanton Carter, in words and figures following to wit:—

APPEARANCE.

United States of America }
vs. } Gen. No. 25980
Oberlin M. Carter *et al.* }

I hereby enter my appearance in the above entitled Cause as solicitor for Lorenzo D. Carter and I. Stanton Carter, two of the defendants.

HORACE G. STONE.

Filed Sept. 12, 1901. S. W. Burnham, Clerk .

And on to wit: the 23 day of September, 1901, came Max H. Whitney, Receiver, and filed in the clerk's office of said court, in said entitled cause a Report in the words and figures following to wit:

REPORT OF MAX H. WHITNEY OF DEMANDS MADE
FOR ASSETS, AND OF THE RESPONSES MADE BY
L. D. CARTER AND I. S. CARTER.

In the United States Circuit Court, Northern District of
Illinois, Northern Division.

United States of America
v. { No.
Oberlin M. Carter *et al.* }

To the Honorable, The Judges of said Court:—

The report of Max H. Whitney, appointed temporary receiver in the above entitled cause by order of this court of August 27th, 1901, respectfully shows unto your honors:—

1:—That on August 27th, 1901, your receiver delivered at the residence of said I. Stanton Carter, 308 North State Street, Chicago, Illinois, to the wife of said Carter, who at the same time informed your receiver that the said Carter was absent from the city of Chicago, a demand for the delivery of assets to your receiver, a copy of which demand is hereto attached and marked "Exhibit A".

2:—That on August 30th, 1901, your receiver delivered to said Lorenzo D. Carter in person, in the city of Chicago, a demand for the delivery of assets to your receiver, a copy of which demand is attached hereto and marked "Exhibit B"; upon which exhibit the said Lorenzo D. Carter on said August 30th, 1901, personally acknowledged receipt of service as appears by said exhibit.

3:—That on September 5th, 1901, your receiver caused to be mailed to said I. Stanton Carter to his address, 308 North State Street, Chicago, Illinois, and also to said Lorenzo D. Carter to his address, Oakland, Coles County, Illinois, a demand a copy of which is hereto attached and marked "Exhibit C"; and that said Lorenzo D. Carter has in person acknowledged to your receiver that the said demand was received by said Lorenzo D. Carter, through the mails.

4:—That on September 18th, 1901, your receiver delivered

in person to said I. Stanton Carter, at his residence, 308 North State Street, Chicago, Illinois, a demand, a copy of which is hereto attached and marked "Exhibit D"; and that on September 19th, 1901, your receiver delivered to said Lorenzo D. Carter at Oakland, Coles County, Illinois, a like demand and received from said Lorenzo D. Carter an acknowledgment of the receipt thereof written at the bottom of said exhibit "D" as appears from the endorsement thereon.

5:—Your receiver further reports that he has not received from either of said defendants, I. Stanton Carter or Lorenzo D. Carter, any of the assets so often demanded of them as hereinbefore set forth.

6:—Your receiver further reports that in purported response to the demands made in said exhibit "D", the said Lorenzo D. Carter in person delivered to your receiver on the 20th day of September, 1901, a writing, a copy of which is hereto attached and marked "Exhibit E"; whereupon your receiver notified said Lorenzo D. Carter that said response was not satisfactory and demanded from said Lorenzo D. Carter an itemized statement of the disposition made by him of the assets aforesaid.

7:—Your receiver further reports that on said 20th day of September, 1901, said I. Stanton Carter, through his attorney, E. G. Stone Esq., in purported response to the demands made in said exhibit "D", delivered to your receiver a writing a copy of which is hereto attached and marked "Exhibit F"; whereupon your receiver notified said attorney that said response was not satisfactory and that your receiver required an itemized statement of the disposition by the said I. Stanton Carter of the assets aforesaid.

Your receiver makes this report in order that the court may be advised in the premises and that the parties at interest may take such steps in the premises as the nature of the case may require.

MAX H. WHITNEY

Receiver as aforesaid.

Max H. Whitney makes oath and says that the foregoing instrument subscribed by him, is true.

MAX H. WHITNEY

Subscribed and sworn to before me this 23rd day of September, 1901.

S. W. BURNHAM,
Clerk.

EXHIBIT A.

Chicago, August 27, 1901.

I. Stanton Carter Esq.,
Chicago, Illinois.

Sir:—

Having been appointed receiver by the circuit court of the United States for the Northern District of Illinois in the case of United States of America vs. Oberlin M. Carter, et al., to take possession of certain securities mentioned in the bill in said cause, and of the proceeds and re-investments thereof in your hands; the same and all of the same are hereby demanded from you—and you are particularly called upon to deliver at once to me, Michigan Telephone Company bond No. 2472, and Kentucky Central Ry. Company bond No. 5119; also the proceeds or re-investment thereof of the \$23,000 loan raised by mortgage October 8th, 1900, on the property on 8th Avenue, New York City; also to deliver to me all moneys, stocks, bonds and securities which are in your power, custody or control, whether in bank, bank box, safety deposit box or elsewhere, from the assets or proceeds thereof caused to be turned over to you by the said Oberlin M. Carter or for his account; to be held by me as such receiver subject to the order of the court in said cause.

Very respectfully,

MAX H. WHITNEY,
Recr. as above.

EXHIBIT B.

August 29th, 1901.

Lorenzo D. Carter Esq.,
Oakland, Coles County, Illinois.

Sir:—

Having been appointed receiver by the Circuit Court of the United States for the Northern District of Illinois in the case of the United States of America vs. Oberlin M. Carter et al., and also by the United States Circuit Court for the Southern District of Illinois in the case of United States of America vs. Oberlin M. Carter, et al., to take possession of certain securities mentioned in the respective bills in each of said causes, and of the proceeds and reinvestments thereof in your hands; the same and all of the same are hereby demanded of you—and you are particularly called upon to deliver to me at once,

Kentucky Central Ry. Company bonds Numbers 3776—3782 to 3798 both inclusive—5960, 5961 and 5964, in all 21 bonds of \$1000 each; also the proceeds or reinvestment thereof of the sale by you of 10 N. Y., Lackawanna & Western Construction Mortgage 5% bonds Nos. 1171 to 1180 both inclusive; two Milwaukee Lake Shore & Western bonds Nos. 697 and 847; two Milwaukee Lake Shore & Western bonds Nos. 696 and 699; 4 Milwaukee Lake Shore & Western bonds Nos. 839, 843, 844 and 846; two Milwaukee Lake Shore & Western bonds Nos. 845 and 848; also to deliver to me all monies, stocks, bonds and securities which are in your power, custody or control, whether in bank, bank box, safety deposit box or elsewhere, from the assets or proceeds caused to be turned over to you by the said Oberlin M. Carter or for his account; to be held by me as such receiver subject to the order of the said court for the Southern District of Illinois, in said cause therein pending.

Very respectfully,

MAX H. WHITNEY,
Receiver as above.

Service acknowledged this 30th day of August, 1901.

L. D. CARTER.

EXHIBIT C.

Chicago, September 5th, 1901.

To I. Stanton Carter, Chicago, Illinois. L. D. Carter, Oakland, Coles County, Illinois, and Frank P. Blair, Borden Block, Chicago Illinois, their attorney:

Sirs:—

As receiver appointed by the U. S. Circuit Court for the Northern District of Illinois in the cause of United States of America v. Oberlin M. Carter, et al., and also as receiver appointed by the U. S. Circuit Court for the Southern District of Illinois in cause of same title; I hereby demand of you that you immediately furnish me with itemized statements of all the assets and property of every kind, nature or description belonging to said Oberlin M. Carter or described or referred in the respective bills in said suits, which were in your respective possession, custody or control at the dates of the filing of said respective bills, or have since come to your possession, custody or control.

Yours truly,

MAX H. WHITNEY,
Receiver as above.

EXHIBIT D.

In the United States Circuit Court, Northern District of
Illinois, Northern Division.

United States of America }
v. } No.
Oberlin M. Carter *et al.* }

To I. Stanton Carter, 308 N. State St., Chicago, Illinois.
Lorenzo D. Carter, Oakland, Coles County, Illinois.

Sirs:—

As receiver appointed by the Circuit Courts for the Northern and for the Southern District of Illinois, in the case of United States of America v. Oberlin M. Carter, et al., I here make demand upon you and each of you, and renew previous demands made by me upon you, for delivery at once to me of Michigan Telephone Co. bond No. 2472 and Kentucky Central Ry. Company bond No. 5119, and the proceeds or reinvestments thereof; also the \$23,000, loan raised by mortgage October 8th, 1900, on the property on 8th Avenue, New York City, mentioned in the above stated bill; also Kentucky Central Railway Company bonds No. 3776, numbers 3782 to 3798 both inclusive, numbers 5960, 5961 and 5964; also proceeds, or reinvestments thereof, of the sale of 10 N. Y. Lackawanna & Western Construction Mortgage 5% bonds numbers 1171 to 1180 both inclusive; two Milwaukee, Lake Shore & Western bonds No's 697 and 847; two Milwaukee, Lake Shore & Western bonds No's 698 and 699; 4 Milwaukee, Lake Shore & Western bonds No's 839, 843, 844, and 846; two Milwaukee, Lake Shore & Western bonds No's 845 and 848; also that you deliver to me at once all monies, stocks, bonds and securities which are in your power, custody or control, whether in bank, bank box, safety deposit box or elsewhere, from the assets or proceeds caused to be turned over to you or either of you by the said Oberlin M. Carter, or for his account; to be held by me as such receiver subject to the orders of the Court.

Unless I get a satisfactory response from you in the meantime, notice is hereby given you that on Monday, September 23rd, 1901, at the hour of 10 A. M. or as soon thereafter as counsel can be heard, I shall move before Judge Kohlsaat, or before such other Judge as may be sitting in his place and stead, in the United States Circuit Court room on the 3rd

floor of the Monadnock Block, Chicago, Illinois, for a rule against you for contempt of Court.

MAX H. WHITNEY,
Receiver as above.

Rec'd a copy of above. Sept. 19, 1901.

L. D. CARTER.

EXHIBIT E.

In the United States Circuit Court, Northern District of
Illinois, Northern Division.

United States of America. }

v.

Oberlin M. Carter *et al.* }

To Max H. Whitney, Temporary Receiver in the above entitled cause.

Dear Sir: —

In answer to your demand made September 16th, to turn over certain property, I state as follows:—

None of the property mentioned in your demand is either in my possession or under my control, except one bond of the Michigan Telephone Company for one thousand dollars (\$1000.00) and one bond of the Kentucky Central Railway Company for one thousand dollars (\$1000.00). These two bonds are my individual property, purchased entirely with my own private funds, and now belong and have always belonged to me solely and individually.

The order appointing you receiver was made without notice to me and without giving me an opportunity to say to the court that these two bonds belonged to me individually. The United States has no claim whatever upon these bonds, and to compel me to deliver up these bonds to you under the circumstances would be depriving me of property without due process of law, contrary to the Constitution of the United States.

My time to answer in the above entitled cause has not expired, and I have had no sufficient opportunity to make any motion to vacate or modify the order appointing you temporary receiver so as to obtain an adjudication by the court as to whether these two bonds should be turned over to you as receiver. If, however, the court, upon consideration of this answer to your demand, requires that the said two bonds

shall be turned over to you, I will turn them over at once, but under protest that I have not had due process of law, and that I have not had an opportunity to be heard, or had my day in court.

(Signed) I. STANTON CARTER.

EXHIBIT F.

In the United States Circuit Court, Northern District of Illinois, Northern Division.

United States of America }
 vs. }
Oberlin M. Carter, *et al.* }

To Max H. Whitney, temporary receiver in the above entitled cause:

Dear Sir: In answer to your demand made September 17th, to turn over certain property, I state as follows:

None of the property mentioned in your demand is either in my possession or under my control. At one time some of that property was turned over to me under an agreement by which I was to use the property, or its proceeds in paying the expenses of the defense of Captain Oberlin M. Carter in the various proceedings brought against him by the United States, and to indemnify me against any obligation which I might incur in such matters, and to pay any expenses or obligations which I might incur in any proceedings brought by said Captain Oberlin M. Carter.

All of the property which I have ever received has been disposed of and the proceeds applied for the above purposes. Prior to commencement of this suit.

(Signed) LORENZO D. CARTER.

Endorsement: Report of Max H. Whitney, receiver, filed Sept. 23, 1901. S. W. Burnham, Clerk.

And on to-wit: the 23 day of September, 1901, came the United States by Marion Edwin, special assistant to the attorney general, and S. H. Bethea, U. S. attorney, and filed in the clerk's office of said court a motion for a rule, in the words and figures following, to-wit:

MOTION FOR RULE FOR CONTEMPT.

In the Circuit Court of the United States, for the Northern
District of Illinois.

United States of America	} In Equity. Bill, Etc.
<i>vs.</i>	
Oberlin M. Carter, <i>et al.</i>	

Motion for Rule.

And now comes the United States of America by Marion Erwin, special assistant attorney general, and by S. H. Bethea, United States attorney, and moves the court for a rule against Lorenzo D. Carter and I. Stanton Carter, defendants in the above stated cause, requiring them to forthwith make an accounting to the receiver appointed by the court in this cause for the assets which have come into their hands from the properties of Oberlin M. Carter, or claimed by him, and the income thereof, and re-investments thereof, and requiring said defendants to forthwith deliver such properties in their power, custody or control, or the proceeds or re-investments thereof to the receiver; and in default thereof that said Lorenzo D. Carter and I. Stanton Carter be required to show cause at an early day why they should not be adjudged in contempt of the court.

In support of this motion moveants refer (1) to the sworn allegations of the bill of this cause. (2) The report of the receiver appointed by the court this day filed in this cause, and to the evasive answers made by the said defendants to the demands of said receiver, for such accounting and for such assets, copies of which demands and answers are attached to said receiver's report. (3) To the affidavits now to the court shown. (4) To the order of the court appointing the receiver in this cause.

MARION ERWIN,
Special Assistant Attorney General.
S. H. BETHEA,
U. S. Attorney.

Filed Sept. 23, 1901. S. W. Burnham, Clerk.

And on to-wit: the 23rd day of September, 1901, in the July term, 1901, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohl-saat, judge presiding, there was made by the court, the following order and entry thereof.

ORDER TO DELIVER ASSETS OR SHOW CAUSE FOR
CONTEMPT.

United States of America	}	In Equity. Bill, Etc. Rule.
vs.		
Oberlin M. Carter, <i>et al.</i>		

Upon consideration of the motion of the United States of America made by Marion Erwin, special assistant attorney general, and by S. H. Bethea, United States attorney, and of the evidence submitted in support thereof. And the defendants, L. D. Carter and I. Stanton Carter, appearing by H. G. Stone, their solicitor of record.

It is ordered by the court that Lorenzo D. Carter and I. Stanton Carter, defendants in the above stated cause, do forthwith make an accounting to the receiver appointed by the court in this cause for the assets which have come into their hands from the properties of Oberlin M. Carter or claimed by him and the income thereof, and re-investments thereof, and forthwith deliver such properties in their power, custody or control, and the proceeds thereof, or re-investments thereof, to the receiver. And in default thereof the said Lorenzo D. Carter and I. Stanton Carter, be required to show cause before the said Circuit Court of the United States at the United States court rooms in the City of Chicago, on October 22nd, 1901, at 10 o'clock a. m. why they should not be punished for a contempt of court for any disobedience to this order.

The said defendants shall file their answers to this rule on said 22nd day of October, 1901, and the matter shall stand for trial as soon thereafter as the same can be heard, or upon such day as the parties may agree upon with the approval of the court.

And on to-wit: the 9th day of October, 1901, came Frank P. Blair, and entered his appearance in said cause for defendant, Oberlin M. Carter, in words and figures following, to-wit:

APPEARANCE.

United States of America
vs.
Oberlin M. Carter, *et al.* } Gen. No. 25980.

I hereby enter my appearance as attorney for the defendant,
O. M. Carter, in the above entitled cause.

FRANK P. BLAIR.

Filed Oct. 9, 1901. S. W. Burnham, Clerk.

And on to-wit: the 21st day of October, 1901, came the
defendant, Oberlin M. Carter, by Frank P. Blair and Horace
G. Stone, his solicitors, and filed in the clerk's office of said
court a demurrer to the bill of complaint in said entitled
cause in the words and figures following, to-wit:

DEMURRER OF O. M. CARTER TO BILL.

In the Circuit Court of the United States for the Northern
District of Illinois, Northern Division.

United States of America,
Complainant,
against
Oberlin M. Carter, *et al.*,
Defendants. } In Equity.

The demurrer of Oberlin M. Carter, one of the defendants,
to the bill of complaint of the United States of America, the
above named complainant.

This defendant, by protestation not confessing any or all
of the matters and things in the complainant's bill of com-
plaint contained to be true in such manner and form as the
same is therein set forth and alleged, doth demur to the said
bill, and for cause of demurrer, sheweth:

First: That the complainant hath not in and for its said
bill made or stated such a case as entitles it in a court of
equity to any relief against this defendant, and the said bill
contains no matter of equity whereon this court can grant
any decree in favor of the complainant, or give any relief
whatever as to the matters contained in said bill or in any
of such matters.

Second: That if the said complainant be entitled to any relief against this defendant on account of the matters and things set forth in the said bill of complaint, it has a plain and adequate remedy at law.

Third: That the complainant hath not in the said bill made or stated any cause entitling it to any relief against this defendant by way of injunction or receiver because the bill states that the complainant is out of possession of the real estate therein described and by the prayer of said bill attempts to recover possession of said real estate. The question herein involved is a dispute about the title to real estate, and the complainant has a full, adequate and complete remedy at law.

Fourth: That the complainant hath not in the said bill made or stated any cause entitling it to any relief in this court against this defendant because the allegations of the bill show that the complainant asserts a legal title to real estate, and it cannot invoke the jurisdiction of this court in equity as against persons in possession claiming adversely but must resort to an action of ejectment, and the circumstance that the complainant seeks at the same time relief in the nature of removing clouds upon the title does not authorize the intervention of equity.

Fifth: The discovery sought by said bill is in aid of a criminal suit.

Sixth: That the said bill of complaint against this defendant, and the several other defendants, contains separate and distinct and independent matters and causes which have no relation to each other and which do not effect all of the parties defendant in said bill, and if the complainant is entitled to any relief by reason of said matters alleged it should have sued at law upon the said several causes, and the said several matters and causes have been improperly united and the said bill of complaint herein is altogether multifarious.

Wherefore; and for divers other good causes of demurrer appearing in the said bill this defendant doth demur thereto and humbly demands the judgment of this honorable court whether he shall be compelled to make any further or other answer to said bill and prays to be hence dismissed with his costs and charges in this behalf most wrongfully sustained.

FRANK P. BLAIR,
Solicitor for Defendant.

HORACE G. STONE,
Of Counsel for Defendant.

I hereby certify that the foregoing demurrer is in my opinion well founded in point of law, and proper to be filed in the above case.

HORACE G. STONE,
Of Counsel for Defendant.

State of Kansas, }
County of Leavenworth. } ss.

Oberlin M. Carter, being duly sworn, deposes and says:
I am one of the above named defendants. The foregoing demurrer is not interposed to delay the cause or any proceeding therein.

OBERLIN M. CARTER.

Sworn to before me this 19th day of October, 1901.

JOHN C. RIPLEY,
Notary Public.

My Com. expires Sept. 1st, 1904.

Endorsement: Demurrer of Oberlin M. Carter, filed Oct. 21, 1901. S. W. Burnham, Clerk.

And on to-wit: the 21st day of October, 1901, came the defendant, Lorenzo D. Carter, by Horace G. Stone and W. W. Gurley, his solicitors, and filed in the clerk's office of said court, a demurrer to the bill of complaint, in said entitled cause, in the words and figures following, to-wit:

DEMURRER OF L. D. CARTER TO BILL.

In the Circuit Court of the United States for the Northern District of Illinois, Northern Division.

United States of America,
 Complainant.
 against
Oberlin M. Carter, *et al.*,
 Defendants. } In Equity.

The demurrer of Lorenzo D. Carter, one of the defendants to the bill of complaint of the United States of America, the above named complainant.

This defendant, by protestation not confessing any or all

of the matters and things in the complainant's bill of complaint contained to be true in such manner and form as the same is therein set forth and alleged, doth demur to the said bill, and for cause of demurrer sheweth:

First: That the complainant hath not in and for its said bill made or stated such a case as entitles it in a court of equity to any relief against this defendant, and the said bill contains no matter of equity whereon this court can grant any decree in favor of the complainant, or give any relief whatever as to the matters contained in said bill or in any of such matters.

Second: That if the said complainant be entitled to any relief against this defendant on account of the matters and things set forth in the said bill of complaint, it has a plain and adequate remedy at law.

Third: That the complainant hath not in the said bill made or stated any cause entitling it to any relief against this defendant by way of injunction or receiver because the bill states that the complainant is out of possession of the real estate therein described and by the prayer of said bill attempts to recover possession of said real estate. The question herein involved is a dispute about the title to real estate, and the complainant has a full, adequate and complete remedy at law.

Fourth: That the complainant hath not in the said bill made or stated any cause entitling it to any relief in this court against this defendant because the allegations of the bill show that the complainant asserts a legal title to real estate, and it cannot invoke the jurisdiction of this court in equity as against persons in possession claiming adversely but must resort to an action of ejectment, and the circumstance that the complainant seeks at the same time relief in the nature of removing clouds upon the title does not authorize the intervention of equity.

Fifth: The discovery sought by said bill is in aid of a criminal suit.

Sixth: That the said bill of complaint against this defendant, and the several other defendants, contains separate and distinct and independent matters and causes which have no relation to each other and which do not effect all of the parties defendant in said bill, and if the complainant is entitled to any relief by reason of said matters alleged it should have sued at law upon the said several causes, and the said sev-

eral matters and causes have been improperly united and the said bill of complaint herein is altogether multifarious.

Wherefore, and for divers other good causes of demurrer appearing in the said bill this defendant doth demur thereto and humbly demands the judgment of this honorable court whether he shall be compelled to make any further or other answer to said bill and prays to be hence dismissed with his costs and charges in this behalf most wrongfully sustained.

HORACE G. STONE,
Solicitor for Defendant.

W. W. GURLEY,
Of Counsel for Defendant.

I hereby certify that the following demurrer is in my opinion well founded in point of law, and proper to be filed in the above case.

W. W. GURLEY,
Of Counsel for Defendant.

State of Illinois, }
County of Coles. } ss.

Lorenzo D. Carter, being duly sworn, deposes and says:

I am one of the above named defendants. The foregoing demurrer is not interposed to delay the cause or any proceeding therein.

LORENZO D. CARTER.

Sworn to before me this 19th day of October, 1901.

FRANK C. WINKLER,
Notary Public.

Endorsement: Demurrer of Lorenzo D. Carter filed Oct. 21, 1901. S. W. Burnham, Clerk.

And on to-wit: the 21st day of October, 1901, came the defendant, I. Stanton Carter, by Horace G. Stone and W. W. Gurley, his solicitors, and filed in the clerk's office of said court, a demurrer to the bill of complaint in said entitled cause in the words and figures following, to-wit:

DEMURRER OF I. STANTON CARTER TO BILL.

an action of ejectment, and the circumstance that the complainant seeks at the same time relief in the nature of removing clouds upon the title does not authorize the intervention of equity

Fifth: The discovery sought by said bill is in aid of a criminal suit.

Sixth: That the said bill of complaint against this defendant, and the several other defendants, contains separate and distinct and independent matters and causes which have no relation to each other and which do not effect all of the parties defendant in said bill, and if the complainant is entitled to any relief by reason of said matters alleged it should have sued at law upon the said several causes, and the said several matters and causes have been improperly united and the said bill of complaint herein is altogether multifarious.

WHEREFORE, and for divers other good causes of demurrer appearing in the said bill this defendant doth demur thereto and humbly demands the judgment of this honorable court whether he shall be compelled to make any further or other answer to said bill and prays to be hence dismissed with his costs and charges in this behalf most wrongfully sustained.

HORACE G. STONE,
Solicitor for Defendant.

W. W. GURLEY,
Of Counsel for Defendant.

I hereby certify that the foregoing demurrer is in my opinion well founded in point of law, and proper to be filed in the above case.

W. W. GURLEY,
Of Counsel for Defendant.

State of Illinois }
County of Cook } ss

I, Stanton Carter, being duly sworn, deposes and says:

I am one of the above named defendants. The foregoing demurrer is not interposed to delay the cause or any proceeding therein.

I. STANTON CARTER.

Sworn to before me this 21st day of October, 1901.

OLIVER A. MERTZ,
Notary Public.

Endorsement Demurrer of I. Stanton Carter to bill, filed Oct 21, 1901 S. W. Burnham Clerk.

And on towit: the 21st day of October 1901 came the defendant Oberlin M. Carter, and filed in the clerk's office of said court his answer to the rule to show cause why a receiver should not be appointed pendente lite, in the words and figures following towit:

ANSWER OF O. M. CARTER TO RULE TO SHOW
CAUSE FOR APPOINTMENT OF RECEIVER.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America	} In Equity.
<i>v</i>	
Oberlin M. Carter, <i>et al.</i>	

The defendant, Oberlin M. Carter, in answer to the order in the above entitled cause to show cause why a receiver should not be appointed and an injunction issued, states as follows:

(1) At the time of the filing of the bill herein, the complainant applied ex parte and obtained an order appointing a temporary receiver herein, and said receiver has qualified and has taken possession of all the property of this defendant which he could find.

(2) The bill of complaint in the above entitled cause is only verified on information and belief, and it is contrary to the practice of this court to appoint a receiver or issue an injunction on a bill so verified, especially as in this case where there are no original exhibits which proved any allegations of the bill, but all the exhibits are either alleged photographs of materials or work or are unintelligible and unusual charts or diagrams giving the opinions as to certain facts of the person who verified the bill on information and belief. Furthermore the information and belief of the person verifying the bill is based upon a reading of testimony taken before the court martial, and the reading of testimony taken since that time in the application for a requisition for John F. Gaynor, et al. This defendant is advised that none of the testimony used in the court martial proceedings can be used in this cause for the reason that testimony in court martial proceedings is not taken in the same way, or subject to the same rules, as testimony taken

in suits in equity. With regard to the testimony taken in the application for requisition for John F. Gaynor, et al., this defendant was not a party to that application and was not represented therein and had no opportunity to cross-examine witnesses who testified therein, and hence the testimony taken in that case is not admissible against this defendant in this case.

This defendant is informed that the person verifying said bill of complaint based his verification largely upon the testimony of one Robert F. Westcott, and upon books of account of said Westcott and of certain banks and of other persons either taken in said requisition case, or examined by the person verifying the bill, and that said person so verifying the bill had no personal knowledge of any fact with regard to this case, but that his information and belief is solely a matter of opinion on his part based upon testimony etc. which he has heard given or read, and hence he is not entitled to determine what said evidence means or shows, and make affidavit thereto, but the same is a matter for the determination of this court, and hence his verification of this bill is of no weight whatever.

(3) It is admitted in said bill that in the proceedings before the court martial it was not shown that this defendant ever received any money whatever which ever belonged to the United States, either directly or indirectly, but that the court martial acted solely upon the alleged evidence of conspiring to assist the contractors, and upon the failure of this defendant to show where he received all the money of which he was ever the owner or possessor.

(4) This defendant is advised that upon the face of said bill the complainant has shown no equity and is not entitled to recover, and this defendant has demurred to said bill on that and other grounds, and pending the determination of said demurrer this defendant submits that no receiver ought to be appointed or injunction issued.

(5) There is no claim on the part of the complainant that it has ever obtained any judgment against this defendant, or that it has ever made any effort to do so, but that the sole object of said bill seems to be to obtain the property of this defendant without ever obtaining any judgment against him, as is shown by the fact that no special relief is asked against this defendant, but the special relief prayed for is that the property of this defendant be decreed to be-

long to the complainant without regard to whether the complainant has any claim against this defendant therefor.

(6) This defendant states that his only connection with the complainant was that of Captain of Engineers in the United States Army, and that as such captain he acted as the agent of the United States in carrying on certain work referred to in said bill. That as such agent his duties are defined by law and he is only liable for fair good faith and fair diligence in performing his duties, and that in the performance of all of said duties he exercised entire good faith and all of the diligence and ability which he possessed, and if, notwithstanding, the complainant has been damaged, this defendant is not to be blamed therefor and is not pecuniarily liable therefor.

(7) This defendant states that he never received from the contractors or from anybody else, either directly or indirectly, any money or property referred to in said bill of complaint which ever belonged to the United States in any way, shape or manner. That he never received any reward, gratuity, benefit or advantage from said contractors, or from any of the same. That he never conspired with said contractors, or with any of the same, with regard to any of the matters referred to in said bill, or with regard to anything else. That he is advised by counsel that the court martial sentence was not based upon the receipt by him of any money belonging to the United States, but was based upon a statute of the United States which makes an officer liable for embezzlement in case he pays out money to a third person by mistake, or where a third person is not entitled to the same. That the money that he paid to said contractors he paid under contracts made with them by his superior officer for materials furnished and labor done exactly in accordance with said contracts. That he never favored said contractors, but in all his work required the performance of each and every contract and every part thereof as he thought was for the best interests of the complainant. That the money and property which he now has belongs to him personally, and the United States never had any interest in said money or property, and never had any interest in any money or property, of which the said money or property is partly or wholly the proceeds. This defendant states that he either paid out for the benefit of the United States, or returned to the United States all the money which he ever received from or on account of the United States, and that he accounted to

the United States, so far as he knows, for all the property of the United States which was ever in his hands, and that after having paid out the moneys referred to in said bill of complaint in connection with work done by and under him as an engineering officer of the United States, he never received any of the same back again directly or indirectly.

OBERLIN M. CARTER.

State of Kansas }
County of Leavenworth } ss

Oberlin M. Carter, being first duly sworn on oath deposes and says that the foregoing answer is true in substance and in fact, except as to those matters therein stated to be on information, and as to those matters he believes the same to be true.

OBERLIN M. CARTER.

My Com. expires Sep. 1st, 1904.

Endorsement Answer of O M Carter to rule to show cause
Filed Oct 21, 1901 S. W. Burnham Clerk.

And on towit: the 21st day of October 1901 came the defendant Lorenzo D. Carter, and filed in the clerk's office of said Court his answer to the rule to show cause why a receiver should not be appointed pendente lite, in the words and figures following towit:—

**ANSWER OF L. D. CARTER TO RULE TO SHOW
CAUSE FOR APPOINTMENT OF RECEIVER.**

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America }
v. } In Equity.
Oberlin M. Carter *et al.* }

The defendant Lorenzo D. Carter, in answer to the order in the above entitled cause entered August 27th, 1901, to

show cause why a receiver should not be appointed and injunction issue, hereby adopts as his answer to said order the answer made and filed in the above entitled cause to the same order by Oberlin M. Carter.

LORENZO D. CARTER

Endorsement Answer of Lorenzo D Carter to order of August 7, 1901 to show cause. Filed Oct 21, 1901 S. W. Burnham Clerk.

And on towit: the 21st day of October 1901, came the defendant I. Stanton Carter, and filed in the clerk's office of said court his answer to the rule to show cause why a receiver should not be appointed pendente lite, in the words and figures following towit:

ANSWER OF I. STANTON CARTER TO RULE TO SHOW
CAUSE FOR APPOINTMENT OF RECEIVER.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America	} In Equity.
<i>v.</i>	
Oberlin M. Carter <i>et al.</i>	

The defendant I. Stanton Carter, in answer to the order in the above entitled cause entered August 27th, 1901, to show cause why a receiver should not be appointed and injunction issue, hereby adopts as his answer to said order the answer made and filed in the above entitled cause to the same order by Oberlin M. Carter.

I. STANTON CARTER.

Endorsement Answer of I Stanton Carter to order of August 27, 1901 to show cause. Filed Oct 21, 1901 S W Burnham Clerk.

And towit: on the 21st day of October 1901 came the defendant Lorenzo D. Carter, and filed in the clerk's office of said court his answer to the rule to show cause why he should not be punished for contempt, in the words and figures following towit:

ANSWER OF L. D. CARTER TO RULE TO SHOW
CAUSE, ON CONTEMPT.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America }
v. } In Equity.
Oberlin M. Carter *et al.* }

The defendant, Lorenzo D. Carter, in answer to the order in the above entitled cause to show why he should not be attached for contempt of court for not making an accounting to the receiver appointed by the court for the assets which have come into his hands from the properties of Oberlin M. Carter, or the proceeds thereof, states as follows:

(1) This defendant is advised that the order appointing a temporary receiver in this case did not require this defendant to make any accounting to said receiver, but required this defendant to turn over to said receiver any property which he might have in his hands mentioned in said bill belonging to the defendant Oberlin M. Carter. That in answer to the demand made by said receiver for said property, he answered in writing that he had no property in his possession or under his control as that mentioned or described in said bill, and hence was unable to turn over any such property. That at one time he did receive some property from said Oberlin M. Carter for the purpose of using and paying out the same for the expenses and attorneys' fees in the various suits in which said Oberlin M. Carter was interested, and that he had in fact paid out and used all of said property for such purposes prior to the filing of the bill herein and had nothing remaining in his hands.

(2) This defendant is advised that the bill filed in this case is by its terms a bill to recover property which the bill alleges was embezzled by Oberlin M. Carter, and which this defendant and others conspired with said Oberlin M. Carter to conceal, or in other words, the said bill charges this defendant with conspiring to receive and conceal stolen property, and this defendant is advised he is not bound to furnish any evidence against himself in any such a proceeding, and that he is not bound to answer any questions or produce any evidence which might tend to criminate him, and if this defendant was guilty of receiving stolen property as alleged

in said bill he is not bound to answer any questions or make any accounting as to what he did receive, because such evidence would tend to criminate him.

(3) If the court shall be of opinion that the bill filed against this defendant is not a bill charging him with conspiracy to receive and conceal stolen property, then this defendant is advised it is a bill for an accounting, and that he has by law a certain length of time in which to plead, answer or demur to said bill, which time has not yet expired. That he is entitled to test the sufficiency of said bill by demurrer before he is called upon to make any accounting, and he has made and filed his demurrer to said bill, and until said demurrer is disposed of he submits that he is not bound to make any accounting.

(4) This defendant is advised that the complainant has no judgment at law against Oberlin M. Carter and that it cannot pursue proceedings supplementary to execution until it obtains a judgment against said Oberlin M. Carter, which it has not done.

(5) This defendant never had any notice or knowledge, or even suspicion, that any property that he may have received from, or belonging to said Oberlin M. Carter, was ever embezzled or was the proceeds of any property ever embezzled, or was ever wrongfully obtained from said complainant, or was the proceeds of any property ever wrongfully obtained from said complainant, and he states that in all his transactions whatever they may have been, he acted in entire good faith and in the full belief that he had a legal right to do whatever he has done.

This defendant is aware of the fact that certain persons representing the complainant have extensively advertised in the newspapers the proceedings which they have carried on against said Oberlin M. Carter, and have extensively advertised in the newspapers their side of the case and their opinion that the said Oberlin M. Carter was guilty of various wrongful acts, but this defendant has never seen the slightest evidence of any wrongful acts on the part of the said Oberlin M. Carter, and has never had any reason to believe or suspect that the said Oberlin M. Carter ever committed any wrongful acts whatever, and this defendant submits that the various interviews published in the newspapers and the various other things published in the newspapers, even though this defendant may have read a small fraction of the same, were not notice to this defendant of any wrongdoing

on the part of the said Oberlin M. Carter, and were not in effect a *lis pendens* preventing this defendant from doing any further business for said Oberlin M. Carter except at his own peril. That the first civil suit ever brought against said Oberlin M. Carter by the complainant was commenced on the 30th day of July, 1901, and this defendant submits that he is not affected by the alleged multitude of interviews, etc., published in the newspapers with regard to the said Oberlin M. Carter.

(6) This defendant again states that he has no money or property in his hands, or under his control belonging to Oberlin M. Carter, or to the complainant, or mentioned or described in said bill of complaint.

(7) This defendant refers to the answer of Oberlin M. Carter to the rule upon him to show cause why a receiver should not be appointed and an injunction issue.

(8) This defendant, therefore, submits that the rule upon him should be vacated and discharged and he be permitted to defend in this case in the usual course of practice.

LORENZO D. CARTER.

Endorsement Answer of Lorenzo D. Carter to order to show cause. Filed Oct 21, 1901 S. W. Burnham Clerk.

And towit: on the 21st day of October 1901, came the defendant I Stanton Carter, and filed in the clerk's office of said court his answer to the rule to show cause why he should not be punished for contempt, in the words and figures following towit:

ANSWER OF I. STANTON CARTER TO RULE TO
SHOW CAUSE, ON CONTEMPT.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America	} In Equity.
v.	
Oberlin M. Carter <i>et al.</i>	

The defendant, I. Stanton Carter, in answer to the order in the above entitled cause to show cause why he should not be attached for contempt of court in not making an accounting to the receiver appointed by the court for the assets

which have come into his hands from the properties of Oberlin M. Carter, or the proceeds thereof, states as follows:

(1) This defendant is advised that the order appointing a temporary receiver in this case does not require this defendant to make any accounting to said receiver, but required this defendant to turn over to said receiver any property which he might have in his hands, mentioned in said bill, belonging to the defendant Oberlin M. Carter. That in answer to the demands made by said receiver for said property he answered in writing that he had no such property in his possession or under his control except two bonds which were his personal property, and as to those he expressed his willingness to turn the same over to the court if the court upon due consideration of his answer and the facts should order him to do so, and he, therefore, asks the judgment of the court as to whether upon his answer to the receiver's demand and upon the bill he should turn over said two bonds.

(2) This defendant is advised that the bill filed in this case is by its terms a bill to recover property which the bill alleges was embezzled by Oberlin M. Carter, and which this defendant and others conspired with said Oberlin M. Carter to conceal, or in other words, the said bill charges this defendant with conspiring to receive and conceal stolen property, and this defendant is advised he is not bound to furnish any evidence against himself in such a proceeding, and that he is not bound to answer any questions or produce any evidence which might tend to criminate him, and if this defendant was guilty of receiving stolen property as alleged in said bill he is not bound to answer any question or make any accounting as to what he did receive, because such evidence would tend to criminate him.

(3) If the court shall be of opinion that the bill filed against this defendant is not a bill charging him with conspiracy to receive and conceal stolen property, then this defendant is advised it is a bill for an accounting, and that he has by law a certain length of time in which to plead, answer or demur to said bill, which time has not yet expired. That he is entitled to test the efficiency of said bill by demurrer before he is called upon to make any accounting, and he has made and filed his demurrer to said bill, and until said demurrer is disposed of he submits that he is not bound to make any accounting.

(4) This defendant is advised that the complainant has no judgment at law against Oberlin M. Carter and that it

cannot pursue proceedings supplementary to execution until it obtains a judgment against said Oberlin M. Carter, which it has not done.

(5) This defendant never had any notice or knowledge, or even suspicion that any property that he may have received from, or belonging to said Oberlin M. Carter, was ever embezzled, or was the proceeds of any property ever embezzled, or was ever wrongfully obtained from said complainant, or was the proceeds of any property ever wrongfully obtained from said complainant, and he states that in all his transactions whatever they may have been, he acted in entire good faith and in the full belief that he had a legal right to do whatever he has done.

(6) This defendant again states that he has no money or property in his hands or under his control belonging to Oberlin M. Carter or to the complainant mentioned or described in said bill of complaint, except said two bonds aforesaid, which property is his own individual property.

This defendant, therefore, submits that the rule upon him should be vacated and discharged and he be permitted to defend in this case in the usual course of practice.

I. STANTON CARTER.

Endorsement Answer of I. Stanton Carter to order to show cause, filed Oct 21, 1901 S W Burnham Clerk.

And on towit: the 28th day of October 1901 in the July term 1901 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaet Judge presiding, there was made by the Court, the following order and entry thereof.

STIPULATION AND ORDER CONTINUING RECEIVER.

United States of America	} In Equity.
<i>v.</i>	
O. M. Carter <i>et al.</i>	

It Is Agreed between the parties to the above entitled cause, that:

The hearing of the question as to the appointment of receiver pendente lite is adjourned to a day to be fixed by the giving of a ten days notice of such hearing by either party

Motion for Master Postponed.

to the other, the original appointment of a receiver until hearing to continue until such hearing and decision thereon, and that this agreement be submitted for approval of the court. But such postponement shall not affect the right of the complainant, or of the receiver, to take any legal steps or press any legal proceeding in the meantime to obtain possession of any of the assets claimed to belong to the alleged trust fund, and is not to affect the right of the defendants to resist the same on any other ground than the fact that there has been no hearing on the appointment of a receiver.

MARION ERWIN

*Sp. Asst. Attorney General,
Solicitor for Complainant.*

HORACE G STONE

*Solicitor for Defendants O.
M., L. D., & I. S. Carter.*

The above agreement is approved and made an order of the court.

And on towit: Monday the 28th day of October 1901 in the July term 1901 of said court came the complainant and moved before the Hon. Christian C. Kohlsaad Judge presiding for the appointment of a master for certain purposes, and thereupon the following entry was made and entered upon the dockets of the said Court:

HEARING ON MOTION FOR REFERENCE TO MASTER
POSTPONED.

United States
vs.
O. M. Carter *et al.* }

Motion of complainant for reference to master postponed to Wednesday A. M.

And on towit: the 6th day of November 1901 in the July term 1901 of said Court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohl-saat Judge presiding, came the parties by their Solicitors of record, and filed in said cause a stipulation which with the order of the court made and entered thereon, are in the words and figures following towit:

STIPULATION OF NOVEMBER 6th, 1901.

United States }
of America } ss.

United States of America }
v. } In Equity.
Oberlin M. Carter *et al.* }

Pending on bill and auxiliary bills in the Circuit Courts for the Southern District of New York, District of New Jersey, Southern District of Georgia, Southern District of West Virginia, Northern District of Illinois and Southern District of Illinois.

AGREEMENT

It is agreed between the United States, complainants, and Oberlin M. Carter, I. Stanton Carter and Lorenzo D. Carter, defendants in the above entitled cause, as follows:

(1) The issue as between the United States and Oberlin M. Carter as to the fraudulent diversion of funds, intrusted to him as disbursing officer, into the assets as charged in complainant's bills pending in the several districts, shall be brought to final decree first in the Circuit Court of the United States for the Northern District of Illinois, and the final decree of that Court, unless reversed by the appropriate appellate court on appeal shall be conclusive on all questions determined therein, and shall be made effective by appropriate decrees on the bills in the other districts if deemed necessary by either party.

But this clause shall not be construed to operate to the prejudice or delay of the Government in any proceeding against other parties for accounting in districts other than the Northern District of Illinois, who may be claiming for themselves any part of said assets.

(2) That as to the assets claimed by the Government as assets into which it charges the funds intrusted to Oberlin M. Carter as disbursing officer was diverted, with the proceeds, income and re-investments thereof where the form of the investments have been changed, and which assets have or may be hereafter traced into the possession, custody or control of said defendants, and have not heretofore been *bona fide* disposed of by them and therefore beyond their control, shall be forthwith by the said defendants turned over to the receiver appointed in this cause. But the court will determine whether the one Kentucky Central bond and one Michigan Telephone bond charged in the bill to be re-investments of said alleged trust fund, and which bonds are claimed by I. Stanton Carter, should be held by the receiver pending the litigation.

(3) The said defendants shall waive their privilege and give all the information they can with regard to what property has been disposed of and its disposition, but no evidence which may be given by the said Carters in this case shall ever be used against them in any criminal proceedings, unless on a charge of perjury committed in this case. And nothing in this agreement shall be construed as affecting the right of the Government if any it has to recover any part of said assets disposed of by the said defendants and not turned over to the receiver.

(4) L. D. Carter and I. Stanton Carter will forthwith dismiss their demurrers and file answers disclaiming any personal interest in the aforesaid assets in controversy in this litigation, including the real estate on 8th Avenue, New York, and at Orange, New Jersey, except as to the two bonds claimed by I. S. Carter as above.

(5) Oberlin M. Carter shall dismiss all demurrers and exceptions and shall file promptly his answers to the bills and amended bills pending in said several districts.

(6) All private books, papers, etc., of Oberlin M. Carter turned over to the Court Martial shall be subject to the inspection of the counsel for said Carter, and his chief counsel shall have the right to have made at the expense of the fund turned into court, a copy of any documentary evidence which has ever been used or referred to as evidence in the Court Martial or Greene-Gaynor proceeding, or in this proceeding.

(7) From said fund to be accounted for to the receiver the sum of \$5,000.00 shall be left in the hands of H. G. Stone,

chief counsel of said Oberlin M. Carter, from which to compensate and cover the expense of employment of local counsel in any of the districts in which local counsel have been or may be employed in any branch of this case.

(8) From said fund to be accounted for to the receiver, there shall be paid:

(a) The fees, traveling expenses and other expenses of Oberlin M. Carter's Chief Counsel and of his attorney at Chicago, to be fixed and allowed by the Court.

The importance of the case, and the means and methods taken to bring the same to a just determination speedily and not the length to which the proceedings may be protracted, to be considered as the elements of merit in fixing such fees.

(b) Also the fee of his attorney for representing said Carter in case of any criminal trial in Georgia, if Carter should be placed on trial there prior to the final disposition of this case.

(c) The expenses of taking evidence on behalf of said Carter, including the services of an accountant at not exceeding ten dollars per day for his services when needed and actually employed, plus his expenses, if any.

(d) And if before the final determination of this cause the said Oberlin M. Carter shall be liberated from prison, he shall be allowed his reasonable personal expenses incurred by him while engaged in work in this cause, including the taking of evidence, but with no compensation for his time. Such expenses to be determined by the court and paid out of the monies in court.

Payments and allowances under Paragraph numbered "8" of this agreement to be determined by the Court from time to time on petition with the right of the United States to contest the same as unreasonable, or that any expense was not incurred as stated.

(9) The assent of the United States to paragraphs numbered "(1)", "(7)" and "(8)" of this agreement, is predicated upon the understanding that the said defendants will turn over to the receiver at least substantially all of the assets turned over to I. Stanton Carter, and L. D. Carter, by J. H. Paul and R. E. Westcott and James Bragg, or their proceeds and re-investments, except such as has been, prior to the receivership, bona fide paid out or pledged by them for attorneys fees or as expenses in defense of Carter, or expended by them legitimately in the handling of said prop-

Order as to N. W. Harris & Co.

erties, or which has not already been taken possession by receivers in this cause.

ORDER

The foregoing agreement is approved & ordered spread of record in said cause

Endorsement Agreement & order to spread same of record Entered. Filed Nov 6, 1901 S. W. Burnham Clerk

And on towit: the 11th day of November 1901 in the July term 1901 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaatt Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER THAT N. W. HARRIS & CO. TURN OVER ASSETS TO RECEIVER AND FOR RECEIVER TO INCREASE HIS BOND.

United States of America, }
v } No.
Oberlin M. Carter *et al.* }

And now comes the complainant by Marion Erwin and S. H. Bethea, its solicitors, and the defendants by Horace G. Stone, their solicitor, and it appearing to the court that there has or is about to come to the hands of the receiver herein bonds and other securities of the face value of between seventy and seventy-five thousand dollars; by agreement of parties

It Is Ordered that the said receiver file herein within two days an additional bond in the sum of eighty thousand dollars, with sureties to be approved by the court.

By agreement of parties, it is also Ordered that N. W. Harris & Company turn over to the receiver herein all monies in their hands standing in the name of I. Stanton Carter or to which he was entitled which are being held by said N. W. Harris & Company, in pursuance of order herein entered on August 27th, 1901.

And on to-wit: the 22nd day of January, 1902, in the December term, 1901, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaas, judge presiding, there was made by the court, the following order and entry thereof by consent of parties:

ORDER DISMISSING DEMURRERS OF OBERLIN M. CARTER, L. D. CARTER AND I. S. CARTER.

The United States of America	}	In Equity. Bill, Etc. Auxiliary Bill.
vs.		
Oberlin M. Carter, <i>et al.</i>		

By agreement of parties, it is ordered by the court that the demurrers of Oberlin M. Carter, L. D. Carter and I. Stanton Carter, be dismissed, and that the said defendants be given until the first Monday in February, 1902, to file their answers to the bill pending in this court in the above stated cause.

We consent to the above.

MARION ERWIN,
Special Asst. to Atty. Genl.
HORACE G. STONE,
for the Carters.
S. H. BETHEA,
U. S. Attorney.

And on to-wit: the 1st day of February, 1902, came the defendant, Oberlin M. Carter, by Horace G. Stone and Frank P. Blair, his solicitors, and filed in the clerk's office of said court his answer to the bill of complaint in said entitled cause, in the words and figures following, to-wit:

ANSWER OF OBERLIN M. CARTER TO THE BILL.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America

vs.

Oberlin M. Carter, *et al.*

The answer of Oberlin M. Carter, defendant, to the bill of the United States, complainant.

This defendant now and at all times hereafter, saving and reserving unto himself all benefit and advantage of exception which can or may be had or taken to the many errors, uncertainties and other imperfections in the said complainant's said bill of complaint contained, for answer thereunto, or for so much and such parts thereof as this defendant is advised it is or are material or necessary for him to make answer unto, answering says.

This defendant admits he is a citizen of the State of Ohio and is at present confined by the complainant in the United States penitentiary at Fort Leavenworth, in the State of Kansas.

This defendant denies each and every allegation and every part of each thereof contained in said bill of complaint herein under the large heading, "Carter's Duties, Powers and Discretions," and alleges the facts in that behalf to be as follows:

He admits that from about May 1, 1888, until the 20th day of July, 1897, he was continuously an officer of the Corps of Engineers, U. S. Army, stationed at Savannah, Georgia, and that he was during that period the engineer officer in local charge of the "Savannah District."

(a) He denies that he was vested with power, duty or discretion in proposing from time to time to his superiors for adoption, projects for the improvement of the rivers or harbors in said Savannah District.

He admits that when specifically ordered by his military superiors to propose, that is, to prepare and submit, a plan or project for the improvement of any particular river or harbor, it then became his duty to obey such orders. Any plan of improvement thus submitted by him in obedience to

direct orders was considered by his military superiors, approved by them in whole or in part, or entirely disapproved. When such revised plan finally received the sanction of the War Department, it then became official.

(b.) He admits that when once a plan or project for the improvement of any river or harbor had been approved by the War Department and officially assigned to him as local engineer for execution, and that when funds for work thereunder became available, he was ordered—and it then became his duty—to submit to his military superiors for their consideration and approval or disapproval, a working plan for the expenditure of the funds available.

(c.) He admits that when once a plan or project for the improvement of any river or harbor had been approved by the War Department and officially assigned to him as local engineer for execution, and that when funds for work thereunder became available, he was ordered—and it then became his duty—to prepare and to submit to his military superiors for their consideration and approval or disapproval, specifications for the work proposed, when such work was to be done by contract.

(d.) He admits that when ordered by his military superiors to submit for their consideration and approval or disapproval, specifications for work proposed to be done by contract, it was necessary to submit also for consideration a form of advertisement for giving notice to the public that competitive bids would be received for the execution of the proposed work.

(e.) He denies that he was vested with power, duty or discretion in causing to be fixed or fixing the time such advertisements would be published prior to the opening of bids.

He admits that when ordered to submit for consideration a form of advertisement, it became necessary for him to propose a time for the opening of proposals for the work, but the approval or disapproval of his suggestion rested with the War Department, by whose orders he was governed.

(f.) He denies that he was vested with power, duty or discretion in causing to be fixed or fixing for such contracts to be let, the time designated in the specifications within which the successful bidder would be required to commence work. The component paragraph of the specifications prescribing the time within which a successful bidder would be required to commence work, is approved or disapproved by

the Chief of Engineers, who alone is vested with the power to fix the time aforesaid.

(g.) and (h.) He admits that he was vested with power, duty and discretion in giving out information in regard to contracts to be let in the Savannah District, and in receiving proposals for and recommending to his military superiors the award of contracts for which proposals were received.

(i.) He admits that he was vested with power, duty and discretion in approving or rejecting the bonds required to be given by contractors, his action being subject to approval or disapproval by his military superiors.

(j.) He admits that he was vested with power, duty and discretion in superintending the work done by contractors on contracts under his supervision, and in approving and accepting, or rejecting, the work done by such contractors according as the same was in accordance with the requirements of the contracts or not.

(k.) He denies that he was vested with power, duty or discretion in approving modifications of contracts; but he admits that it was his duty to suggest for the consideration of his military superiors any modifications which seemed to him advisable, but he was governed entirely by their orders in the matter.

(l.) and (m.) He admits that he was vested with power, duty and discretion in approving or rejecting the accounts rendered to him by such contractors for material furnished and work done, according as such accounts should be fair and honest, or false and fraudulent; and when in funds, paying or refusing to pay such accounts, according as they were fair and honest or false and fraudulent.

This defendant denies as a whole and denies in every part, both generally and in detail, that he ever conspired to do or attempted to conspire to do or that he ever did or attempted to do, or discussed doing or ever thought of doing, either alone or in connection with others, or ever aided or advised or permitted others to do or attempt to do, or ever knew of others doing or attempting to do or discuss or conspire doing or attempting to do all or any of the acts or things or any part of any thereof which are described in said bill of complaint herein as follows:

(a.) Under the heading, "The scheme devised to defraud."

(b.) Under the heading, "The scheme to defraud put in operation."

(c.) Under the heading, "Details of the fraud introduced into and under the contracts."

(d.) Under the heading, "The division of the money."

This defendant denies each and every allegation and every part thereof under the large heading, "Description of the Engineering Work," and alleges the facts in that behalf to be as follows, and not otherwise:

When this defendant was assigned to duty in the Savannah District, in 1884, he was placed under the immediate orders of Lieut. Bailey, who was an assistant to General Gillmore, the officer then in charge.

The work of construction consisted for the most part in building training walls and spur dams designed to train and concentrate the flow of the water in the channel whose improvement was desired, and in the revetment of caving banks. In the execution of such work logs, brush, fascines and stone were employed. In the upper reaches of the rivers the works of improvement were constructed of brush fascines, which were usually placed in the work singly and secured by stakes or by a load of stone, or by both. When the water was too deep to permit of placing the fascines in the work singly, they were made into mattresses for the purpose of holding them together until in place to receive their securing load of stone. Inasmuch as the number of fascines sunk in the form of mattresses was entirely insignificant in comparison with the number sunk as single fascines, the contractor was not asked to submit a bid for mattresses, the price for which would have been excessive, but was required to perform this more expensive work, so small in amount, at the cost only of the fascines composing it, which under the circumstances he was willing to do. Fascines and stone were paid for separately at the prices bid and according to the amounts used of each.

In the tidal estuaries the works of improvement were constructed of log and brush mattresses. Those mattresses were composed of a raft of pine logs held together by transverse binding poles spiked to them, and covered with loose brush so spread over the logs as to break the force of the stone thrown upon them, and to prevent the logs from being torn loose from the binders. The brush was small in amount—about 6" in the finished mattress—and was not intended to and did not give any final height in the wall or dam. The log mattresses floated in the water and were towed to the place of use by tugs and weighted with sufficient stone to sink them where required. Upon each mattress so sunk another

was superimposed until the crest was at the desired height, when it was covered with the finishing layer of stone. Stone and mattresses were paid for separately at the respective contract prices and according to the quantity used of each. As a matter of economy, no stone was desired except on the top mattress, but in default of any other practicable method of sinking, such amounts as were necessary were used on the lower courses as well.

The inflexible nature of the log mattress led to much under-scour of the soft bottom and to settlement. It was impossible to fill those irregular gaps with log mattresses, and hence flexible brush fascines were resorted to. Those fascines are entirely different from the rigid fascines used for military purposes, and are sometimes called "engineering fascines." The object being to check the flow of the silt-laden current and make it deposit its burden, thus causing the river to assist in building its own improvement works, as much fine brush, twigs and leaves were desired as could be placed in a properly constructed fascine, and the specifications were designed with that end in view, as is always customary in similar work. Those fascines were paid for by the cubic yard. Occasionally a hole was encountered too deep to permit of single fascines being used, and as in the up-river work, the contractor was then required to bundle fascines together into a mattress to hold them in place until they could receive their securing load of stone. The cost of such work was much greater than to put in the fascines singly, and bids for brush mattresses were not called for inasmuch as the price would have been excessive, but as the number of fascines thus sunk was entirely insignificant in comparison with the number sunk as single fascines, the contractor was required to perform the more expensive work, so small in amount, at the price of the fascines composing it. The ordinary log mattress having been patented, a second design similar thereto, but avoiding the patent, was set forth in the specifications, and permission was given to substitute it for the ordinary design and at the same price, in order that the owner of the patent might not have a monopoly of the work. Various plans were considered looking toward the feasibility of substituting a flexible mattress of brush fascines for the unsatisfactory, rigid mattress of logs, but brush mattresses not floating so well as log mattresses, and hence being more expensive to handle, prevented. Finally, after numerous experiments, it became possible to construct and sink mattresses of brush fascines at

about the same cost as those of logs, and then for the first time were brush mattresses called for in the specifications for contract work in the Savannah District.

This defendant alleges that all the said work let in said Savannah District from about May 1, 1888, when this defendant took charge of said district up to July 20, 1897, when this defendant was transferred elsewhere was always let to the lowest bidder; that all bidders were treated alike in every way; that all bids received were treated alike; that all contractors were treated alike. There was no discrimination in anything or in favor of anybody. No secret information was given to anybody and no advantage given to anybody.

This defendant denies that any work was ever let on his recommendation or by or through him at prices higher than had been previously paid for similar work, except where there had been changes in values justifying the same.

This defendant alleges that all specifications drawn by him for any of said contracts were so drawn as to be easily understood by proposed bidders who knew anything about such work.

This defendant alleges that wherever the United States was given the option under any of said contracts to require either one thing or another at the same price, that said option was inserted in said contract or contracts for the sole benefit of the United States and was always exercised by this defendant for the sole benefit of the United States and not otherwise, and this defendant alleges that it is the universal custom in such contracts to insert such an option and for contractors to bid on such an option.

This defendant denies that any contract let in said Savannah District while this defendant had charge thereof was ever let on advertisement less than required by law, and he alleges that in every instance the time for advertising was not fixed by this defendant, but by his superior officers.

This defendant denies that in any contract with the United States let while defendant was in charge of said Savannah District the price of anything contracted for was higher than the fair cash market value of the same at the time and place of delivery.

This defendant denies that in the performance of any of said contracts with the United States while this defendant was in charge of said Savannah District that any material or other thing contracted for was received or paid for of a

quality inferior or of a different kind than that contracted for in said contract or otherwise different from the requirements of said contract.

This defendant denies that he ever furnished or caused to be furnished to any contractor or contractors with the United States any money or property for any purpose whatever.

This defendant denies that any money or the proceeds thereof ever paid by the United States to any of its contractors was ever traced directly or indirectly to this defendant.

This defendant denies that he ever at any time, directly or indirectly, made or caused to be made the investments described in said bill of complaint under the large heading, "Carter's Investments," etc., or any of the same or any part of any thereof except as follows:

(a) During the absence of his father-in-law, R. F. Westcott, in Europe, this defendant acted as agent for said Westcott under the written powers of attorney in handling the money and property of said Westcott, and as such agent this defendant bought or received on behalf of said Westcott about \$139,186 of bonds and notes which were all paid for with the private funds of said Westcott, and on each return from Europe of said Westcott this defendant promptly delivered all of said bonds and notes to said Westcott and fully accounted to said Westcott for this defendant's said agencies, and this defendant had no interest, direct, or indirect, legal or equitable, in any of said bonds or notes so bought or received.

(b) This defendant bought the Propellor Towboat stock and the Savannah Brewing Company stock and the Savannah Lighterage and Trust Company stock and the Brush Electric Light Company stock, referred to in said bill of complaint, and paid for the same substantially all out of money donated to this defendant or to his wife by his father-in-law, the late Robert F. Westcott, the remainder being paid out of this defendant's salary as an officer of the United States army.

This defendant denies that the sum of \$1,575 or any other sum was ever paid or allowed to him directly or indirectly in connection with his trips to New York or otherwise by any contractor or contractors with the United States, or by anybody for any of them.

This defendant denies that he was ever a party to or interested in or a beneficiary of, or had any knowledge of any division of any money ever received on contracts with the United

States, or that he ever received directly or indirectly any of the proceeds of any such division, or that it was ever understood or agreed that he should receive directly or indirectly any of the money or the proceeds thereof ever paid or agreed to be paid by the United States to any person or corporation except his own salary and allowances as an officer of the army.

This defendant denies that he ever received or had directly or indirectly in himself or through any other person or corporation any interest or beneficial advantage in or to any of the contracts mentioned in said bill of complaint or in any of the proceeds thereof, or that he ever received or had any of the proceeds of any of said contracts or ever received or had any money or property or valuable consideration by reason of the making or carrying out of said contracts or that he ever received or had from any of the contractors directly or indirectly any money, property, benefits, advantage or consideration.

This defendant denies that there was ever any division directly or indirectly of any money or anything else by thirds or on any other basis between this defendant and Benjamin D. Greene and John F. Gaynor or between this defendant and either said Greene or said Gaynor.

This defendant denies that while in charge of said Savannah District that he ever borrowed or caused to be borrowed any money from Benjamin D. Greene or from any other contractor with the United States or that he received any benefit or advantage or gift or gratuity from any of said contractors either directly or indirectly.

This defendant denies that he ever made any investments in stocks or bonds or loans or real estate or in anything else secretly, or that he ever made any investments of any kind, except out of his own money or as agent for others, and denies that he ever made any investments either for himself or for others out of money belonging to the United States or coming in whole or in part from any contracts or contractors with the United States.

This defendant denies that he ever at any time owned or claimed to own, either directly or indirectly, or that anyone else held for him in trust or otherwise or that he ever possessed or held, except as agent for others, money, property and things of pecuniary value of \$10,000 over and above what was given to him from time to time as a pure donation by his father-in-law, the late Robert F. Westcott.

This defendant denies that he ever had any interest direct or indirect in any contract ever let or performed in said Savannah District, or in any part of any thereof, or that he ever received any benefit or advantage of any kind out of any of said contracts or from any person or corporation owning, or claiming or carrying out any of said contracts.

This defendant admits that from the year 1890 this defendant expended for his personal expenses more than his salary as an officer in the United States army, but he denies that any of his said personal expenses were paid directly or indirectly out of any money or property received by him or by anyone else either directly or indirectly from any work or contracts under his charge or from any work done for or contracts with the United States. This defendant alleges in that behalf that substantially all his income during said period not derived from his salary as said officer was received by him from his father-in-law, Robert F. Westcott, as a pure and original donation from the private funds of said Westcott, and not from any other source.

This defendant denies that he ever paid or caused to be paid anything whatever towards the purchase of the property described in said bill of complaint under the large heading "The 8th Avenue Property," either from any money ever intrusted to him as disbursing officer or otherwise, or from any other source or from his own money or property, or that he ever invested anything therein, either directly or indirectly, but alleges the facts to be on the contrary that the sole and only interest in said property which this defendant ever had was received from his father-in-law, the late Robert F. Westcott, who gave him said property as a pure and original donation.

This defendant denies that he ever paid or caused to be paid anything whatever towards the loan described in said bill of complaint under the large heading "The Beirne Gordon Notes," either from any money ever intrusted to him as disbursing officer or otherwise, or from any other source or from his own money or property, or that he ever invested anything therein, either directly or indirectly, except that he acted as agent for his father-in-law, Robert F. Westcott, in lending said Westcott's own money to said Gordon on said loan, and the sole and only interest which this defendant ever had in said loan was received by him from the said Westcott, his father-in-law, in October, 1897, who then gave all of said loan

then uncollected to this defendant as a pure and original donation.

This defendant denies that he ever paid or caused to be paid anything whatever towards the purchase of the property described in said bill of complaint under the large heading, "Orange, New Jersey, Property," either from any money intrusted to him as disbursing officer or otherwise, or from any other source or from his own money or property, or that he ever invested anything therein, either directly or indirectly, but he alleges the facts to be on the contrary that his sole and only interest in said property was received from his father-in-law, the late Robert F. Westcott, who gave him the only interest he ever had in said property as a pure and original donation, except that a part of the money given by said Westcott to this defendant's wife may have been used to partly pay for said property.

This defendant denies that he ever paid or caused to be paid anything whatever towards the loan described in said bill of complaint as made to T. M. Cunningham for \$10,000 either from any money ever intrusted to him as disbursing officer or otherwise, or from any other source, or from his own money or property, or that he ever invested anything therein either directly or indirectly except that he acted as agent for his father-in-law, Robert F. Westcott, in lending said Westcott's own money to said Cunningham on said loan during said Westcott's absence in Europe, and the sole and only interest which this defendant ever had in said loan was received by him from said Westcott, his father-in-law, in October, 1897, who then gave all of said loan then uncollected to this defendant as a pure and original donation.

This defendant denies that "he succeeded in causing himself to be appointed as military attache to the Court of St. James and also a member of the Nicaragua Canal Commission" or either of the same.

This defendant admits that when he left Savannah to go to London as military attache that he packed up some of his private correspondence in a letter file case belonging to the United States and left it at Savannah for safe keeping until his return, when he intended to transfer such correspondence to such other place in the United States as he might be assigned to, and he denies that there was anything wrongful or unusual in such a transaction.

This defendant admits that he was succeeded at Savannah by one Captain Cassius E. Gillette, who has more than once

attacked the good faith and motives of his brother officers. That said Gillette immediately on arriving at Savannah commenced attacking this defendant, but did so secretly and without this defendant's knowledge until he, the said Gillette, had by falsehoods and subornation of perjury created serious suspicions in the minds of this defendant's superior officers, all during the absence of this defendant in Europe, and on this defendant's return from Europe he heard of these things for the first time and at once demanded a court of inquiry, which was selected by Gen. John M. Wilson, the recently appointed chief of engineers, who for a long time prior thereto had been hostile to this defendant. Said court of inquiry consisted of three engineer officers, a majority of whom were so prejudiced against this defendant that they refused to even examine the work done by this defendant, and who recommended that this defendant be tried by a court martial. Thereupon a court martial was ordered, consisting of thirteen members, only two of whom were engineer officers or engineers, notwithstanding the fact that the work done by this defendant in said Savannah District was river and harbor work requiring the highest engineering skill and experience and with which work eleven of said thirteen members of said court martial had little, if any, knowledge and no experience whatever.

Before said court martial the said Gillette et al. made thirty-seven charges against this defendant, upon all of which except three this defendant was acquitted either by the court martial or by the president, and on the said three charges the Hon. George F. Edmunds, to whom the matter was referred by the president and who spent two months considering the same, reported to the president that this defendant was not guilty and should be acquitted. The said three charges were but one act divided into three parts so as to look larger, with simply a charge that this defendant by arrangement with the contractors received and paid for certain materials which were inferior to those called for by the contract. All the other false and groundless charges were made in furtherance of a conspiracy between said Gillette and others to ruin this defendant by making so many charges that this defendant would not be able to meet and overcome them all at once.

As to the one act charged against this defendant, i. e., that materials were received and paid for which were inferior to the contract, but one officer of the United States army

was found who would testify to that effect, and that officer was the said Cassius E. Gillette.

On the contrary, nine of the ablest and highest engineer officers of the United States army testified in favor of this defendant that the materials were in full compliance with the contract, and that the work was of the very best. And in addition thereto ten of the ablest and most reliable expert engineers in the United States also testified that the materials were in full compliance with the contract and that the work was of the very best.

Said Gillette was not corroborated except by some of his subordinates, one of whom admitted on the witness stand that he would testify to almost anything to save his job, and others of whom had been former employes under this defendant and who had certified on their honor to this defendant that the materials were in accordance with the contracts, and who then turned around at the instigation of said Gillette et al. and testified exactly the other way.

Notwithstanding the testimony of said nineteen army and expert engineers in this defendant's favor and only one engineer to the contrary, the court martial disregarded the testimony of the nineteen and a majority thereof acted upon the testimony of the one and this defendant was accordingly convicted.

The action of the court martial was not influenced by any charge or evidence that this defendant ever received any money or benefit from any of the work done under his charge because at that time no such charge was made, said latter charge being made by an entirely different set of men at a subsequent date.

This defendant denies as grossly false the allegation on "information" in said bill of complaint that he solicited said Robert F. Westcott to testify falsely before said court martial.

This defendant admits that the trial of this defendant before said court martial "was given great publicity through the newspapers," and alleges that this publicity consisted principally of false charges and suspicions and interviews by said Gillette et al.

This defendant denies that said Robert F. Westcott departed for Europe to avoid testifying before said court martial "against his said son-in-law" or against "the husband of his dead child," as the said court martial had no power to compel said Westcott to testify at all.

This defendant is advised that he is not bound to answer any allegations as to what said Robert F. Westcott would have testified to or as to what he did testify to in proceedings other than this, and hence without confessing any of said allegations he makes no answer thereunto anywhere herein except that if it is necessary or material for him to make answer thereunto he denies each and every of said allegations and every part of each thereof, but not otherwise.

This defendant denies that in September, 1897, or at any other time this defendant took out of his safety deposit box or from anywhere else any securities described in Exhibit E or elsewhere, or that at that time or at any other time he turned any securities over to Benjamin D. Greene and John F. Gaynor, or to either at the Hoffman House or anywhere else for safe keeping, or for any other purpose or that any securities were ever delivered by said Greene and Gaynor or by either of them to Robert F. Westcott for safe keeping for this defendant or for any other purpose, or that said Westcott delivered back any securities to this defendant at any time, or that any of the securities described in said receipts of October 11, 1897, and October 29, 1897, ever belonged to this defendant or that he ever had any interest therein directly or indirectly until the same were respectively given to this defendant as a pure and original donation by said Westcott at the time of said respective receipts in October, 1897.

This defendant admits that said Benjamin D. Greene and said John F. Gaynor and this defendant all testified before said board of inquiry or said court martial that this defendant never had any beneficial interest in any of said contracts let in said Savannah District, and that the same was and is true in substance and in fact, and that this defendant testified before said board of inquiry and before said court martial that the expenditures of this defendant since 1890 were largely from gifts to this defendant by his father-in-law, said Robert F. Westcott, and that the same was and is true in substance and in fact.

This defendant is informed that he was indicted at Savannah in connection with others on the ground that the material furnished by the contractors was inferior to the requirements of the contracts, but he is advised that an indictment by a grand jury in Savannah is not evidence in an equity suit in Chicago.

This defendant knows nothing except by hearsay of the

matters alleged in said bill of complaint under the large heading, "The Hearing for Removal." This defendant was not a party to said proceedings or represented therein. This defendant is advised that such matters are not admissible in evidence in this suit in equity, and that such allegations are therefore not proper in this suit, and this defendant leaves it to the complainant to explain the purpose and object of including such matters in the bill of complaint herein.

This defendant is advised that the incarceration of this defendant in a military prison by sentence of a court martial is not in and of itself notice to those dealing with this defendant that this defendant's title to his private property may be eventually attacked by the United States.

This defendant admits that Lorenzo D. Carter is his uncle and that I. Stanton Carter is his brother, and that he employed each of them to help him and gave a power of attorney and other authority to I. Stanton Carter and also gave authority to Lorenzo D. Carter to act for this defendant, and both Lorenzo D. Carter and I. Stanton Carter have so acted for this defendant and have fully accounted to this defendant for all their said acts and neither said Lorenzo D. Carter nor I. Stanton Carter have any money or property now in their hands or under their control belonging to this defendant or described in said bill except as stated by them in their answers filed herein.

This defendant denies that either Lorenzo D. Carter or I. Stanton Carter entered into any conspiracy with this defendant or with any one else to receive or conceal or dispose of any stolen or fraudulently acquired property or that either of them ever took any property with notice of any infirmity in the title thereof or with notice of any trust in favor of anybody.

This defendant denies that said Lorenzo D. Carter or I. Stanton Carter ever acted for this defendant or for any one else except in good faith and without any notice of any wrongdoing by this defendant.

This defendant admits that the "8th Avenue Property" and the "Orange, N. J., Property" were conveyed to Lorenzo D. Carter and that the "Orange, N. J., Property" was at one time conveyed to Frank P. Blair, who reconveyed it to I. Stanton Carter, who conveyed it to Lorenzo D. Carter.

This defendant denies each and every allegation of said bill of complaint herein and each and every part of each thereof not hereinbefore specifically admitted or denied.

And this defendant denies all and all manner of unlawful combination and confederacy wherewith he is by the said complainants charged, without this, that there is any other matter, cause or thing in the said complainant's said bill of complaint contained, material or necessary for this defendant to make answer unto, and not herein and hereby well and sufficiently answered, confessed, traversed, avoided or denied, is true to the knowledge or belief of this defendant, all of which matters and things this defendant is ready and willing to aver, maintain and prove, as this Honorable Court may direct, and humbly prays to be dismissed with his reasonable costs and charges in this behalf most wrongfully sustained.

OBERLIN M. CARTER.

HORACE G. STONE AND }
FRANK P. BLAIR, }

Solicitors for said Oberlin M. Carter.

United States of America, }
Northern District of Illinois, }
Northern Division. }

State of Kansas, }
County of Leavenworth. } ss.

Oberlin M. Carter, being first duly sworn, on oath deposes and says that he is one of the defendants in the above entitled cause; that he has read the foregoing answer and knows the contents thereof, and as to all matters therein stated as done or not done or known or not known by this defendant, the said answer is true in substance and in fact, and as to all other matters he is informed and believes the same to be true in substance and in fact.

OBERLIN M. CARTER.

Subscribed and sworn to before me this 31 day of January, 1902.

(Notarial Seal)

JOHN C. RIPLEY,
Notary Public.

My Com. Expires Sept. 1st, 1904.

Endorsement: Answer of Oberlin M. Carter, defendant, to the Bill of the United States, complainant. Filed Feb. 1, 1902. S. W. Burnham, Clerk.

And on to wit: the 1st day of February, 1902, came the defendant Lorenzo D. Carter, by Horace G. Stone, his solicitor, and filed in the clerk's office of said Court his Answer to the Bill of Complaint, in said entitled cause, in the words and figures following to wit:

ANSWER OF LORENZO D. CARTER TO BILL.

In the Circuit Court of the United States, Northern District of Illinois, Northern Division.

United States of America

vs.

Oberlin M. Carter *et al.*

}

The answer of Lorenzo D. Carter, defendant, to the bill of the United States, complainant.

This defendant now and at all times hereafter, saving and reserving unto himself all benefit and advantage of exception which can or may be had or taken to the many errors, uncertainties and other imperfections in the said complainant's said bill of complaint contained, for answer thereunto, or for so much and such parts thereof as this defendant is advised it is or are material or necessary for him to make answer unto, answering says:

This defendant admits that he is a citizen of the State of Illinois and that he is an uncle of the defendant Oberlin M. Carter.

This defendant adopts as part of his answer herein the answer this day filed herein by Oberlin M. Carter, one of the defendants herein.

This defendant denies that he ever joined, or took part in, or knew of, or discussed or suspected or had reason to suspect any scheme or conspiracy to defraud the United States or to conceal any property or the proceeds thereof ever derived from contracts or contractors with the United States or from any other source.

This defendant admits and alleges that at the request of said Oberlin M. Carter, he assisted said Oberlin M. Carter in this efforts to defend himself and to obtain justice and that in so doing he received certain money and property from said Oberlin M. Carter, and paid it all out on behalf of said Oberlin M. Carter, and accounted to him for all of the

same and all of this defendant's said acts and doings were then and there approved and ratified by said Oberlin M. Carter.

This defendant denies that he ever had any notice, knowledge, information or suspicion that any money or property ever received by this defendant from said Oberlin M. Carter, directly or indirectly, was ever obtained by him or by anybody else by or through any fraud or wrong doing whatever, and this defendant alleges that he always acted in all things referred to in said bill of complaint and in everything else in the utmost good faith.

This defendant admits that the "8th Avenue Property" and the "Orange, New Jersey, Property" were conveyed to this defendant, but that by an agreement between this defendant and the complainant made since the filing of the bill herein this defendant agreed to disclaim any interest in either of said properties, and to account for all property ever in his hands claimed by said Oberlin M. Carter, which latter he has done, and in consideration of which this defendant was to be finally dismissed from this suit, and he hereby offers to carry out his part of that contract.

This defendant admits that he has not turned over to the receiver appointed herein twenty-one Kentucky Central bonds of \$1,000.00 each, described in said bill of complaint, because the said bonds belong to him personally, as he paid out his own money on behalf of said Oberlin M. Carter to the value of said bonds and took the said bonds as payment thereof, and has accounted under said agreement with the complainant with regard to said disbursements.

This defendant denies each and every allegation of said bill of complaint herein and each and every part of each thereof not hereinbefore specifically admitted or denied.

And this defendant denies all and all manner of unlawful combination and confederacy wherewith he is by the said complainants charged, without this, that there is any other matter, cause or thing in the said complainant's said bill of complaint contained, material or necessary for this defendant to make answer unto, and not herein and hereby well and sufficiently answered, confessed, traversed, avoided or denied, is true to the knowledge or belief of this defendant, all of which matters and things this defendant is ready and willing to aver, maintain and prove, as this Honorable Court may direct, and humbly prays to be dismissed with his rea-

sonable costs and charges in this behalf most wrongfully sustained.

LORENZO D. CARTER,
By H. G. STONE,
His Solicitor.

HORACE G. STONE,
Solr. for L. D. Carter.

Endorsement: Answer of Lorenzo D. Carter to Bill of the United States. Filed Feb. 1, 1902. S. W. Burnham, Clerk.

And on to wit: the 1st day of February, 1902, came the defendant I. Stanton Carter by Horace G. Stone, his solicitor, and filed in the clerk's office of said court, his Answer to the Bill of Complaint, in said entitled cause, in the words and figures following to wit:

ANSWER OF I. STANTON CARTER TO BILL.

In the Circuit Court of the United States, Northern District of Illinois, Northern Division.

United States of America }
 vs. }
Oberlin M. Carter *et al.* }

The answer of I. Stanton Carter, defendant, to the bill of the United States, complainant.

This defendant now and at all times hereafter, saving and reserving unto himself all benefit and advantage of exception which can or may be had or taken to the many errors, uncertainties and other imperfections in the said complainant's said bill of complaint contained, for answer thereunto, or for so much and such parts thereof as this defendant is advised it is or are material or necessary for him to make answer unto, answering says:

This defendant admits he is a citizen of the State of Illinois and that he is a brother of the defendant Oberlin M. Carter.

This defendant adopts as part of his answer herein the answer this day filed herein by Oberlin M. Carter, one of the defendants herein.

This defendant denies that he ever joined, or took part in or knew of, or discussed or suspected or had reason to suspect any scheme or conspiracy to defraud the United States

or to conceal any property or the proceeds thereof ever derived from contracts or contractors with the United States or from any other source.

This defendant admits that he took a power of attorney and other authority from said Oberlin M. Carter to act for said Carter and that in pursuance thereof he did so act.

This defendant admits and alleges that at the request of said Oberlin M. Carter he assisted said Oberlin M. Carter in his efforts to defend himself and to obtain justice, and that in so doing he received certain money and property from said Oberlin M. Carter and paid it all out on behalf of said Oberlin M. Carter and accounted to him for all of the same and all of this defendants said acts and doings were then and there approved and ratified by said Oberlin M. Carter.

This defendant alleges that since the filing of this bill this defendant made an agreement with the complainant by which this defendant was to account for all property ever in his hands claimed by said Oberlin M. Carter, which he has done, in consideration of which this defendant was to be finally dismissed from this suit.

This defendant denies that he ever had any notice, knowledge, information or suspicion that any money or property ever received by this defendant from said Oberlin M. Carter, directly or indirectly, was ever obtained by him or by anybody else by or through any fraud or wrong doing whatever and this defendant alleges that he always acted in all things referred to in said bill of complaint and in everything else in the utmost good faith.

This defendant admits that he has not turned over to the receiver appointed herein two bonds of \$1,000.00 each, known as a Kentucky Central bond and a Michigan Telephone bond, and described in said bill of complaint, because the said bonds belong to him personally as he paid out his own money on behalf of said Oberlin M. Carter to the value of said bonds and took said bonds in payment and has accounted under said agreement with the complainants with regard to said disbursements.

This defendant admits that he testified before the said Court Martial that he saw Robert F. Westcott give money to said Oberlin M. Carter.

This defendant denies each and every allegation of said bill of complaint herein and each and every part of each thereof not hereinbefore specifically admitted or denied.

And this defendant denies all and all manner of unlawful combination and confederacy wherewith he is by the said complainants charged, without this, that there is any other matter, cause or thing in the said complainants' said bill of complaint contained, material or necessary for this defendant to make answer unto, and not herein and hereby well and sufficiently answered, confessed, traversed, avoided or denied, is true to the knowledge or belief of this defendant, all of which matters and things this defendant is ready and willing to aver, maintain and prove, as this Honorable Court may direct, and humbly prays to be dismissed with his reasonable costs and charges in this behalf most wrongfully sustained.

I. STANTON CARTER,
By H. G. STONE,
His Solicitor.

HORACE G. STONE,
Solr, for I. S. Carter.

Endorsement: Answer of I. Stanton Carter to Bill of the United States. Filed Feb. 1, 1902. W. S. Burnham, Clerk.

And on to wit: the 3rd day of March, 1902, came the complainant, by Marion Erwin, its solicitor of record, and filed in the clerk's office of said court, a replication in the words and figures following to wit:

REPLICATION TO ANSWERS TO BILL.

In the Circuit Court of the United States for the Northern District of Illinois.

March Rules 1902.

United States of America	} In Equity, Bill, etc. Replication.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

The replication of the above named complainant to the answers of Oberlin M. Carter, Lorenzo D. Carter and I. Stanton Carter.

This repliant, saving and reserving to itself all and all manner of advantage of exception which may be had and taken to the manifold errors, uncertainties and insufficiencies of the answer of said defendant, for replication thereunto says

that it does and will ever aver, maintain and prove its said bill to be true, certain and sufficient in the law to be answered unto by said defendant, and that the answer of said defendants are very uncertain, evasive and insufficient in the law to be replied unto by this repliant; without that, that any other matter or thing in the said answer contained material or effectual in the law to be replied unto, confessed or avoided, traversed or denied as true; all of which matters and things this repliant is ready to aver, maintain and prove as this Honorable Court shall direct. And humbly prays as in and by its said bill it has already prayed.

MARION ERWIN,
Special Assistant Attorney General.
Solicitor for Complainant.

Endorsement: Filed Mar. 3, 1902. S. W. Burnham, Clerk.

And to wit: on the 29th day of April, 1902, came the complainant by its solicitors of record, and filed in the clerk's office of said Court, a petition and affidavit for extension of time to take testimony, and a stipulation of counsel in respect thereto, the words and figures following to wit:

PETITION OF UNITED STATES FOR EXTENSION
OF TIME FOR TAKING TESTIMONY.

United States of America, }
Southern District of New York, } ss.

Marion Erwin, Special Assistant to the Attorney General, being duly sworn in the Equity cause of the United States vs. Oberlin M. Carter et al. pending on bill and auxiliary bills, in the Southern District of New York, District of New Jersey, Southern District of Georgia, Southern District of West Virginia, Southern District of Illinois and Northern District of Illinois, being duly sworn deposes and says:—

It is necessary in order to prevent repetition of labor and expense, that the testimony to be taken in said causes should be taken so as to be made available and applicable to all the defendants to the bills in each district. That there are a large number of witnesses on part of the United States whose testimony is material and which it will be necessary to take in different parts of the United States.

That owing to the fact that Messrs. Kellogg & Rose original

counsel of record for O. M. Carter, in the said bills pending in New York and New Jersey, withdrew from the said cases, and said O. M. Carter was without local representation in New York and New Jersey, at the request of H. G. Stone, Esq., of Chicago, principal counsel for said O. M. Carter, I. S. Carter and L. D. Carter, the counsel for the United States granted said defendants time to file answers in said districts, so that the answers when finally filed were put at issue at different times in the several districts, and in case of the bill pending in New Jersey not until April Rules 1902. That the cases are now at issue in all of the Districts, except in the Southern District of Georgia, where a demurrer is still pending filed by Mackall & Anderson charged in the bill to be holding for O. M. Carter certain of the assets in dispute (most of which assets have since been delivered to the receiver). That this demurrer will be disposed of as soon as a hearing can be obtained, and that then all the causes will be in a condition for taking the testimony, once for all the said cases, at a great saving of time, and expense for all parties.

That owing to the fact that affiant has had charge of the criminal prosecution in the Southern District of Georgia, against Benjamin D. Greene, John F. Gaynor alleged co-conspirators of O. M. Carter et al. in the frauds charged in said bills, and that pending their trial the said Benjamin D. Greene and John F. Gaynor have recently forfeited their recognizances and fled from justice, affiant's time has been so much taken up that he is unable to proceed to take said testimony immediately, and that affiant has been notified by said H. G. Stone, counsel for the said O. M. Carter, that he desires to inspect certain papers and documents in the custody of the Government before proceeding to take testimony, and that as far as the same is proper affiant is desirous of complying with said request, believing that it will tend to speed the cause and promote the ends of justice.

For the above stated reasons, affiant makes this affidavit for the purpose of obtaining from the court an order extending the time to take testimony for six months from this date.

MARION ERWIN.

Sworn to and subscribed before me this 25th day of April, 1902.

(Seal)

JOHN A. SHIELDS,
U. S. Commissioner.

STIPULATION.

United States of America	}	Bill, Auxiliary Bills, &c.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

Pending in So. Dist. of New York, Dist. of New Jersey, So. Dist. of Georgia, So. Dist. of West Va., So. Dist. of Illinois and Northern Dist. of Illinois.

It is agreed by counsel of O. M. Carter, I. S. Carter and L. D. Carter, and counsel for the United States, that the time for taking testimony in the above stated causes be extended for six months from this date, without prejudice to the right of either party, to move the court for additional time, should the circumstances then require it.

April 28, 1902.

MARION ERWIN,
Special Asst. to Atty. Genl.
HORACE G. STONE.

Endorsement: Petition of U. S., filed April 29, 1902. S. W. Burnham, Clerk.

And on to-wit: the 29th day of April, 1902, in the December term, 1901, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following order and entry thereof:

ORDER EXTENDING TIME FOR SIX MONTHS TO
TAKE TESTIMONY.

United States of America	}	In Equity
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		Bill &c.

It is ordered by the court, that the time for taking testimony in the above stated cause be extended for six months from this date.

And on to-wit: the 15th day of September, 1902, in the July term, 1902, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following order and entry thereof.

ORDER EXTENDING TIME, AND FOR METHOD OF
TAKING TESTIMONY IN OTHER DISTRICTS.

United States of America,	} In Equity.
Complainant.	
vs.	
Oberlin M. Carter, et al.,	
Defendants.	} Bill, Etc.
	} No. 25,980.

On motion of the complainant's solicitors, it is ordered, that the limitation of time for taking testimony by any of the parties to said cause which under the order of this court heretofore made, would expire October 29th, 1902, be and is hereby extended for three months from said date.

It is further ordered that the testimony may be taken in any district in which the witnesses may be, before any examiner of the Circuit Court of the United States for such district, after reasonable notice to the opposite party, and also testimony of witnesses in New York may be taken before Clarence A. Parsons, the special examiner appointed for that purpose by the Circuit Court for the Southern District of New York. Testimony so taken shall be taken and reported to this court agreeably to the provisions of the 67th equity rule.

The method provided by this order for taking testimony shall not be taken as cutting off the right of the parties to take testimony by commissioner or by any other method authorized by law.

And on to-wit: the 15th day of October, 1902 in the July term, 1902, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following order and entry thereof:

ORDER OF REFERENCE TO WM. M. BOOTH, SPECIAL MASTER.

United States of America

vs.

Oberlin M. Carter, *et al.*

} In Equity. 25980.

Upon motion of complainant's solicitor:

It is ordered by the court that William M. Booth be and is hereby appointed special master in the above entitled cause, to take and report evidence and his findings of fact thereon on the following matters hereby referred to him:

(1) What assets or proceeds thereof, or re-investments thereof, charged by the complainant to have been a part of the trust funds diverted by O. M. Carter, and in the possession, power or control of I. Stanton Carter, and Lorenzo D. Carter on the date of notice to them of the appointment of Max H. Whitney, receiver, or since then coming into the hands of either of them, if any, is yet properly to be accounted for to the receiver and yet to be turned over to the receiver by them and either of them respectively, under the orders of the court in the premises and the terms of the agreement of November 6th, 1901, approved by this court on that date.

(2) Whether said Lorenzo D. Carter and I. Stanton Carter have turned over to the receiver herein

"Substantially all of the assets turned over to I. Stanton Carter and L. D. Carter by J. H. Paul and R. E. Westcott and James Bragg, or their proceeds and reinvestments except such as has been prior to the receivership bona fide paid out or pledged by them for attorneys' fees or as expenses in defense of Carter, or expended by them legitimately in the handling of said properties, or which has not already been taken possession of by receivers in this cause." And if any thereof has not been turned over, or properly accounted for by them, or either of them respectively, then to report what has not been so accounted for.

(3) That if I. Stanton Carter and Lorenzo D. Carter have not already turned over to or accounted to the receiver for such assets which ought to be so accounted for, that said master shall before reporting his findings, afford them an opportunity to appear before him and to properly account if they can for such assets as should be so accounted for to the receiver by them.

Said master shall have all the usual powers of a master in chancery in carrying out the foregoing reference and may employ a stenographer to take and report the evidence and proceedings before him. The parties and the master shall proceed promptly in this reference and the master shall make his report as soon as possible.

And on to-wit: the 26th day of January, 1903, in the December term, 1902, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following order and entry thereof.

ORDER TAKING OFF TIME LIMIT AS TO TAKING
TESTIMONY.

The United States of America	} In Equity.
<i>vs.</i>	
Oberlin M. Carter, <i>et al.</i>	} Bill, Etc.

Order as to Testimony.

It is ordered by the court that the time limit heretofore fixed within which the parties were to take testimony is extended to allow the parties further reasonable time to take their testimony, with the right of any party to move later for fixing a time limit if they fail to agree among themselves in reference thereto.

Assented to:

MARION ERWIN,

Sp. Asst. to Atty. Genl. Solr. for Complt.

HORACE G. STONE,

Solr. for Carters.

And on to-wit: the 7th day of January, 1904, in the December term, 1903, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following interlocutory decree, in the words and figures following, to-wit:

The United States of America
 against
 Oberlin M. Carter, *et al.* } Bill, &c. 25980.

Report of master under reference order of October 15th, 1902. Exceptions to report.

INTERLOCUTORY DECREE.

The above stated cause came on to be heard before the court, the Honorable Christian C. Kohlsaat, judge presiding, upon the respective exceptions of the complainants and of the defendants respectively to the report of W. M. Booth, special master in the above stated matter and upon the pleadings and proofs, and was argued by counsel. Whereupon it is considered, adjudged, ordered and decreed by this court this 7th day of January, 1904, as follows:

(1) That so much of said master's report as allows salaries as such to I. Stanton Carter and Lorenzo D. Carter and sets the same off against the assets for which they are accountable to the receiver, be and the same is hereby set aside. The question of the right of the said defendants to set up said claims for salaries as against the funds turned over to the receiver, or for which they may be held accountable, being hereby reserved for the hearing on final decree with the other issues on the merits of the main controversy between the United States and the defendants, O. M. Carter, I. S. Carter and L. D. Carter.

(2) And it appearing to the court that at the time of notice to them of the appointment of the receiver, September 1st, 1901, and of the agreement and order of November 6th, 1901, there were in the hands of said I. S. Carter and L. D. Carter certain bonds with coupons attached, being part of the re-investments of said funds claimed by the United States to be part of the diverted trust funds in controversy, which have not been all turned over to the receiver, to-wit:

In the hands of I. Stanton Carter:

1 Michigan Telephone Company bond, par value \$1,000.00, being a five per cent. bond, coupons payable January and July and numbered 2472.

1 Kentucky Central bond, par value \$1,000.00, being a four per cent. bond, coupons payable January and July, and numbered No. 5119.

In the hands of L. D. Carter:

21 Kentucky Central bonds, par value \$1,000.00 each, being four per cent. bonds, coupons payable January and July, and numbered 3776, 3782 to 3798 inclusive, 5960 to 5961 and 5964.

And it further appearing from the receiver's receipt of March 13th, 1903, and master's report that after the first draft of the master's report the said L. D. Carter turned over to the receiver ten of said Kentucky Central bonds with the coupons from July, 1903, inclusive attached thereto, said bonds being numbered from 3789 to 3798, inclusive.

It is ordered and decreed that said I. S. Carter shall forthwith turn over and deliver to the receiver, the said One Michigan Telephone Company bond and One Kentucky Central R. R. Co. bond, with the coupons maturing after September 1st, 1901, thereon, or proceeds of said coupons if collected.

It is further ordered and decreed that said L. D. Carter shall forthwith turn over and deliver to the receiver the said eleven Kentucky Central bonds remaining in his hands, with the coupons maturing after September 1st, 1901, thereon, or proceeds of said coupons, if collected, together with the coupons of the ten Kentucky Central bonds maturing January and July, 1902, and January, 1903, or the proceeds thereof, if collected, which bonds were turned over to the receiver on March 13th, 1903, without said coupons of January and July, 1902, and January, 1903, so maturing after the agreement and order of November 6th, 1901.

(3) It is further ordered and decreed that when I. Stanton Carter and Lorenzo D. Carter shall have complied with the foregoing provisions of this decree, that they will have sufficiently accounted to the receiver as far as they should be required on this interlocutory proceeding for the assets remaining in their hands, to put in operation clauses One (1), Seven (7) and Eight (8) of the agreement of November 6th, 1901.

(4) The questions raised on the exceptions of the United States to alleged excess expenses allowed by the master to I. S. Carter and L. D. Carter, and exceptions to the alleged excess of credit allowed by the master to L. D. Carter for amounts claimed as paid to J. H. Winkler, and exceptions as to the liability to the United States of I. S. Carter and L. D. Carter to account for assets in controversy traced into their hands and which they claimed before the master not then

to have, as well as the questions raised by the exceptions of defendants to certain items of debit charged by the master to them, and to certain items of credits which they claim in their exceptions that the master should have given them in stating their account, and the proper restatement of said account, are all not finally passed on herein, but are reserved for the decree of the court on the merits of the cause on final hearing, and further argument of counsel, with leave to either party to take and offer additional evidence.

And on to-wit: the 7th day of January, 1904, in the December term, 1903, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the court, the following order and entry thereof:

ORDER APPOINTING R. H. WYMAN SPECIAL
EXAMINER.

United States of America	}	In Equity.
against		
Oberlin M. Carter, <i>et al.</i>		

Bill, Etc.

It is ordered by the court, that Richard H. Wyman, Esq., of Chicago, Illinois, be and he is hereby appointed a special examiner to take and report such evidence as either party may offer before him agreeably to the provision of Sixty-seventh Equity Rule. Said Special Examiner may take said evidence stenographically and report the same in type-writing. It shall not be necessary to have the witnesses whose examination is taken sign the testimony so reported, but either party may before the said testimony is reported to the court recall any witness for the purpose of taking his further examination, correcting any errors claimed to have been made. Assented to:

MARION ERWIN,

Sp. Asst. Atty. Gen'l. for Complt.

HORACE G. STONE,

Solr for Carters.

And on towit: the 28 day of November 1905 in the July term 1905 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER APPOINTING GEORGE W. BURGOYNE SPECIAL EXAMINER.

United States of America, }
 vs. } Bill etc. No. 25980.
Oberlin M. Carter, *et al.* }

Present: Hon. Christian C. Kohlsaat.

By agreement of parties it is ordered by the court that George W. Burgoyne, of Chicago, be and he is hereby appointed a special examiner in said cause, with authority to take and report the evidence agreeably to the 67th Equity Rule, in the above stated cause, the intent of this order being to enable said George W. Burgoyne to assist Richard H. Wyman as the examiner heretofore appointed in said cause, in the taking and reporting of testimony herein, the said testimony to be taken stenographically and reported, it being further intended that the one examiner may conduct the examination in the absence of the other, so that the testimony can be taken up and reported rapidly by the said examiners alternating in the work. Said testimony may be embodied in one record and covered by a joint certificate from the said examiners.

Agreed to

MARION ERWIN

Special Asst to Atty Gen'l

HORACE G. STONE

Solr for Carters

And on towit: the 8th day of December 1905 came the complainant by Marion Erwin its Solicitor, and filed in the clerk's office of said court a petition in the words and figures following to-wit:—

PETITION FOR LEAVE OF ABSENCE OF COMPLAIN-
ANT'S SOLICITOR, AND FOR LEAVE TO WITH-
DRAW DOCUMENTS TEMPORARILY FOR USE IN
CRIMINAL TRIAL.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

The United States	} In Equity, Bill & C.
<i>vs</i>	
O. M. Carter <i>et al.</i>	

To the Judges of said Court.

The petition of the United States by Marion Erwin, Special Assistant to the Attorney General, its Solicitor of record respectfully shows:—

(1) That since September 18th last to the present time, some two months and a half, the defendant O. M. Carter, has been engaged almost continuously from day to day (with the exception of two intermissions, aggregating about three weeks) in taking testimony on part of the defense in the above stated case before an Examiner of this Court, and has during that period taken a large mass of testimony. That on December 4, instant, defendant's counsel notified Petitioner's Counsel of his intention of announcing the closing of taking evidence for the defense when the cross-examination of the last witness being cross-examined by complainant should be completed, said notification being tentative and with reservations.

That it is expected that this cross-examination will be completed to-day.

(2) That it will be necessary for the complainant to take in rebuttal, the testimony of a number of different witnesses, mainly army officers, whose residences are widely scattered over the United States.

(3) That on October 7th last, Benjamin D. Greene and John F. Gaynor, who are charged criminally on indictments pending in the Southern District of Georgia, with fraud and conspiracy with O. M. Carter, in and about the same matters involved in the above stated cause, were extradited from Canada, and lodged in Jail at Savannah, Georgia, to await trial. That said Greene and Gaynor have been held in Jail either in Canada, or since then in the United

States, ever since March 4th last. That the trial of said criminal case has been set for trial in the United States District Court, at Savannah, for January 9th, proximo.

(4) That petitioner's Attorney, Marion Erwin, has been in charge of said criminal proceedings from their first institution and his attendance to conduct said trial as prosecuting attorney is essential to the due administration of justice in said criminal proceedings.

(5) That there is a large mass of documentary evidence which has been offered in Evidence in the above stated Civil Cause which it is essential in the due administration of justice, should be offered in evidence on the part of the prosecution of said criminal cases in said District Court. That most of said documentary evidence has been transcribed into the record of this cause by the several Examiners and the original documents held subject to inspection, by agreement of counsel in this cause have been left in the custody of Mr. Edward I. Johnson, who was appointed Custodian of the Court-Martial Proceedings and Records by the Attorney General on his review of that Record and who has been Official Custodian for the Government of all the Records pertaining to the case ever since that time.

(6) Therefore Petitioner Prays:—

(a) That the Court will grant leave of absence to its Solicitor, Marion Erwin so as to be excused from taking testimony in said Civil Cause until he can conclude said criminal trial set for January 9th, proximo.

(b) That the Court will permit Mr. Edward I. Johnson as Custodian for the Government to withdraw from Chicago for use at said criminal trial, the original documents pertaining to said case, said documents to be brought back to Chicago for the further purposes of these civil proceedings when said criminal trial is concluded.

Dec. 8th, 1905.

MARION ERWIN,
Special Asst. to Atty. Gen'l.
Comp's. Solicitor.

Endorsement Filed Dec 8, 1905 Marshall E. Sampsell,
Clerk.

And on towit: the 8th day of December 1905 in the July term 1905 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER GRANTING LEAVE OF ABSENCE TO COMPLAINANT'S SOLICITOR, AND LEAVE TO WITHDRAW PAPERS FOR USE IN CRIMINAL CASE, AND ORDER TO CLOSE TESTIMONY.

The United States of America
vs.
 Oberlin M. Carter *et al.* } Chancery 25980.

Now come the parties by their solicitors and leave is given the complainant to withdraw certain papers introduced in evidence herein for use in a certain criminal case, pending in Georgia, and on motion of the defendant's counsel the United States is ruled to close its rebuttal proofs herein by January 9th, 1906, the defendant's solicitor having announced in open court that their testimony has been substantially closed with the exceptions of certain documentary evidence to be offered herein.

And on towit: the 11th day of December 1905 in the July term 1905 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER APPOINTING R. H. WYMAN EXAMINER TO SIT IN OTHER DISTRICTS.

United States of America
vs.
 Oberlin M. Carter *et al.* } In Equity

Bill &c. Pending Northern District of Illinois auxiliary bills pending in other Districts

On agreement of parties it is ordered by the Court that Richard H. Wyman, appointed Special Examiner by this court by order entered January 7th, 1904, be and is hereby

authorized and empowered to have his sittings and exercise the powers of such examiner in taking and reporting evidence for use in said cause in the Southern District of New York and at such other places outside of the Northern District of Illinois which the parties may agree upon, as may be convenient for taking such evidence. This order is not intended to prevent the parties from taking testimony before other officers or other authority as heretofore, but merely to be cumulative.

Consented to Dec 9th 1905

MARION ERWIN

Sp. Asst to Atty Genl Compt Sol.

HORACE G. STONE

Solr for Carters

And on towit: the 8th day of May 1906 came the defendants by H. G. Stone their solicitor and filed in the clerk's office of the said court, a notice in the words and figures following towit:—

NOTICE TO COMPLAINANT'S SOLICITOR OF INTENTION TO MOVE SETTING OF CAUSE FOR TRIAL.

In the Circuit Court of the United States, Northern District of Illinois, Eastern Division.

United States of America	}	In Equity.
Complainant,		
vs.		
Oberlin M. Carter <i>et al.</i>		
Defendants.		

To Marion Erwin, Solicitor for the Complainant:

Please take notice that on Tuesday the Eighth day of May, 1906, before his Honor Christian C. Kohlsaat, Circuit Judge of said Court at his court room in the City of Chicago at Ten (10) o'clock in the forenoon, or as soon thereafter as counsel can be heard, I shall apply for an order setting the above entitled case for trial at a day certain, and for an order requiring the examiner to proceed forthwith to correct the testimony of the witnesses Oberlin M. Carter, William H. Bixby, Lyman E. Cooley, Charles McPherson and

Order as to Setting Case for Trial.

Robert Nelson, and for an order on the examiner to report the entire testimony and evidence without delay.

Said motion will be based upon the following:

- (a) Upon your delays in said cause.
- (b) Upon the facts that you have made many charges in said bill of complaint which you have abandoned, and which said charges ought to be disposed of at once.
- (c) Upon the fact that some of the chief witnesses for the complainant appear upon the record to have perjured themselves over and over again, and any delay would result in shielding said witnesses and in injuring the defendants.

Dated Chicago April 28, 1906.

HORACE G. STONE,
Solicitor for Defendants Carter.

Received a copy of the above notice this 28th day of April A. D. 1906.

C. B. MORRISON,
United States Atty.
Per J. F. WESTALL,
Clerk.

Endorsement Filed May 8, 1906 Marshall E. Sampsell
Clerk

And on to wit: the 8th day of May 1906 in the December term 1905 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian G. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER SETTING CAUSE FOR FINAL HEARING FOR
JUNE 12, 1906.

United States of America,	}	Chancery. 25980.
<i>vs</i>		
Oberlin M. Carter.		

On motion of the defendant's solicitor and upon notice to the complainant's counsel, It Is Ordered that this cause be set for final hearing on June 12th next.

And on towit: the 24th day of July 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaasat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER POSTPONING HEARING TO AUGUST 29th, 1906.

The United States of America	}	25980. Chancery.
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

By agreement of counsel, It Is Ordered that the final hearing of this cause be postponed to August 29th, 1906.

And on towit: the 28th day of August 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaasat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER POSTPONING HEARING TO SEPTEMBER 18th,
1906.

United States of America	}	25980
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

Upon motion of the complainant, the defendant being present, it is ordered by the court that the hearing of this cause on pleadings and proofs be postponed until Tuesday, September 18th, 1906, at 10 o'clock A. M.

And on towit: the 18th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaasat Judge presiding, there was made by the Court, the following order and entry thereof:

HEARING IN PART AND POSTPONEMENT TO SEP- TEMBER 19th, 1906.

United States of America }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now come the parties by their solicitors and thereupon this cause is set down for hearing on pleadings and proofs, and the same being heard in part is postponed until tomorrow morning.

And on towit: the 19th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas, Judge presiding, there was made by the Court, the following order and entry thereof:

HEARING IN PART AND POSTPONEMENT TO SEP- TEMBER 20th, 1906.

United States of America, }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now again come the parties by their solicitors and the trial of this cause is resumed; and the time for adjournment having arrived the further hearing of this cause is postponed until tomorrow morning.

And on towit: the 20th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

HEARING IN PART, POSTPONEMENT TO SEPTEMBER 21ST, 1906.

United States of America, }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now again come the parties by their solicitors and the trial of this cause is resumed, and further evidence being heard the trial of this cause is postponed until tomorrow morning.

And on to-wit: the 21st day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof.

HEARING IN PART AND POSTPONEMENT TO SEP-
TEMBER 26TH, 1906.

United States of America, }
 vs. } Chancery. 25980.
Oberlin M. Carter, *et al.* }

Now again came the parties by their solicitors and the trial of this cause is resumed and further arguments being heard and not concluded the trial of this cause is postponed until Wednesday morning next.

And on towit: the 26th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

HEARING IN PART AND POSTPONEMENT TO SEP-
TEMBER 27TH 1906.

United States of America, }
 vs. } Chancery. 25980.
Oberlin M. Carter *et al.* }

Now again come the parties by their solicitors and the hearing of this cause is resumed and not being concluded when the hour for adjournment arrived, the further hearing is postponed until tomorrow morning.

And on towit: the 27th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

HEARING IN PART AND POSTPONEMENT TO SEPTEMBER 28TH, 1906.

United States of America, }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now again come the parties by their solicitors and the further hearing of this cause is resumed and not being concluded when the adjourning hour arrived, the further hearing is postponed until tomorrow morning.

And on towit: the 28th day of September 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof:

HEARING IN PART AND POSTPONEMENT TO OCTOBER 1ST, 1906.

United States of America, }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now come the parties by their solicitors and the trial of this cause is resumed, and further arguments being heard the trial of this cause is postponed until Monday next at two o'clock P. M.

And on towit: the 1st day of October 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof.

HEARING IN PART AND POSTPONEMENT TO OCTOBER 2ND, 1906.

United States of America, }
vs. } Chancery. 25980.
 Oberlin M. Carter *et al.* }

Now again come the parties by their solicitors and the trial of this cause is resumed, and further arguments being heard and not concluded when the adjourning hour arrived, the further hearing is postponed until tomorrow morning.

And on towit: the 2nd day of October 1906 in the July term 1906 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

**HEARING CONCLUDED. ORDER TAKING CAUSE
UNDER ADVISEMENT.**

United States of America }
 vs. } 25980.
 Oberlin M. Carter *et al.* }

Now again come the parties by their attorneys and the trial of this cause is resumed, and the arguments of counsel being heard and concluded, and the Court not being sufficiently advised in the premises, takes time to consider.

And on towit: the 10th day of February 1908 in the December term 1907 of said Court, in the record of proceedings thereof; in said entitled cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof:

HEARING ON SETTLEMENT OF DECREE.

Motion to enter decree extended to Feby. 11, 1908.

And on towit: the 21 day of February 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof:

HEARING ON SETTLEMENT OF DECREE.

Motion of complainant to settle decree heard in part and postponed until 10 A. M. February 24, 1908.

And on towit: the 24th day of February 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof:

HEARING ON SETTLEMENT OF DECREE.

Motion to settle decree heard in part and continued.

And on towit: the 13th day of April 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said Entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court the following order and entry thereof:

HEARING ON SETTLEMENT OF DECREE CONCLUDED.

Hearing of arguments as to fees concluded, decree to be prepared.

ADMINISTRATIVE ORDERS, ETC.

And on towit: the 22nd day of November 1902 in the July term 1902 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY MAX H. WHITNEY, RECEIVER, \$1000.

United States of America	} No.
<i>v.</i>	
Oberlin M. Carter <i>et al.</i>	

Upon motion of the receiver herein, Max H. Whitney, and in pursuance of the consent of the solicitors of the complainant and defendants herein given in open court,

It Is Ordered that the said receiver be, and he is hereby, authorized to pay to himself out of the funds in his hands as such receiver, the sum of one thousand dollars on account of receiver's fees herein.

And on to wit: the 18th day of December, 1902, in the December term, 1902, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY G. R. LEONARD, STENOGRAPHER,
\$235.45.

United States of America	}	Bill, etc.
vs.		
Oberlin M. Carter <i>et al.</i>		

Reference to William M. Booth, Esq., Special Master. Order as to payment of stenographers' fees.

G. Russell Leonard, stenographer, having rendered his bill, approved by the above named special master, for taking and reporting testimony on the above reference, as follows:

For taking and reporting testimony for Master	\$141.00
For copy furnished to counsel for United States	42.30
For copy furnished to counsel for defendants (2)	52.15

Total	\$235.45
-------	----------

it is, by agreement of counsel, ordered by the court that the said sum of \$235.45 be paid by the receiver out of the fund in his hands to the said G. Russell Leonard, and his receipt therefor be filed with the receiver.

It is further ordered, by agreement of counsel, that the adjustment of the said payments as between the parties be reserved for future consideration and action of the court.

Consented to

And on to wit: the 6th day of February, 1904, in the December term, 1903, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY MAX H. WHITNEY, RECEIVER, \$1000.

United States of America

v.

Oberlin M. Carter *et al.*

} No.

Upon motion of the receiver herein, Max H. Whitney, and in pursuance of the consent of the solicitors of the complainant and defendants herein given in open court,

It Is Ordered that the said receiver be, and he is hereby, authorized to pay to himself out of the funds in his hands as such receiver, the sum of one thousand dollars on account of receiver's fees herein.

And on to wit: the 10th day of February, 1904, came Horace G. Stone, Solicitor for O. M. Carter, and filed in the clerk's office of said court, a petition in the words and figures following to wit:

PETITION OF H. G. STONE FOR ALLOWANCE
OF ATTORNEYS FEES ON ACCOUNT.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America,	} In Equity.
Complainant	
—against—	
Oberlin M. Carter <i>et al.</i> , Defendants.	

To the Honorable Christian C. Kohlsaat, Judge of said Court:

Your petitioner, Horace G. Stone, respectfully shows unto your Honor that since and prior to the sixth day of November, 1901, he has been at all times, and now is, the Chief Counsel for said Defendant, Oberlin M. Carter in the above entitled cause, and in the other causes pending in equity elsewhere between the same parties. That during said period he has spent a large part of his time in the above entitled causes, and has done everything possible to look after the interests of his client, and at the same time to expedite the final disposition of the case.

Your petitioner further shows that the complainant has just closed its evidence in the above entitled cause, and that the taking of said evidence has not only been a matter of great labor for the complainant, but has also been a matter of great labor for your petitioner. The testimony, exhibits, etc., already introduced in evidence by the complainant amount, as near as your petitioner can estimate, to an equivalent of more than twenty thousand ordinary pages, which include several hundred exhibits, some of which are the creations of the witnesses for the complainant and are very large in size, very complicated in their structure, and very extensive in the number of sheets therein, and your petitioner has been obliged to examine substantially all of the same with the greatest care, and it has taken great labor.

Your petitioner could give numerous instances indicating the great amount of labor in the said cause, but your Honor is more or less familiar with the same, and your petitioner does not deem it necessary to do so.

Your petitioner further shows that on November 6th, 1901, the complainant of the one part, and the defendant, Oberlin M. Carter, of the other part made a written agreement which

has since its date become an order of court herein, by the terms of which certain money and property belonging to said Oberlin M. Carter should be turned over to the Receiver herein to abide the decision of this Court, and that said Oberlin M. Carter agreed therein to do certain other things. Since the making of said agreement the same has been complied with, so as to put in operation certain provisions of said agreement, by the terms of which, among other things, your petitioner is entitled to be paid from time to time for his services as Chief Counsel for said Oberlin M. Carter in said litigation out of said fund in court.

Your petitioner has not received any pay for his services since the making of said contract of November 6th, 1901, and respectfully requests that the Court allow to him at the present time a reasonable sum on account of his said services, but not in full for his services to present date or to any other date.

Dated Chicago, February 10th, 1904.

HORACE G. STONE.

Endorsement: Filed February 10, 1904, Marshall E. Sampsell, Clerk.

And on to wit: the 10th day of February, 1904, came Frank P. Blair, attorney for O. M. Carter and filed in the Clerk's office of said Court a petition in the words and figures following to wit:

PETITION OF FRANK P. BLAIR FOR ALLOWANCE OF
ATTORNEY'S FEES.

United States of America	} In Chancery.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	} 25980.

The Petition of Frank P. Blair, Esq., local solicitor for the above named Oberlin M. Carter in this jurisdiction, for compensation.

To the Hon. C. C. Kohlsaat, Judge of the Circuit Court of the United States for the Northern District of Illinois, Northern Division.

Your petitioner, Frank P. Blair, respectfully shows unto your Honor that heretofore in December, 1897, he was retained by the above named Oberlin M. Carter, who was then

a Capt. of the U. S. Engineer Corps, to defend him, the said Carter, in certain proceedings before a Court Martial of the U. S. Army to be convened at Savannah, Ga. That pursuant to said retainer, your petitioner repaired to said City of Savannah and on or about the 12th day of January, 1898, entered into the defense of said Carter before a Court Martial of the United States Army, duly convened at said City of Savannah, at said date. That your petitioner conducted the defense of said Carter before said Court Martial during the period of about four months. That said Court Martial convicted the said Carter and sentenced him to pay a fine of \$5,000.00 to be dismissed from service and degraded and to suffer an imprisonment of five years. That thereafter your petitioner in conjunction with the Hon. Wayne MacVeagh appeared before the then attorney General of the United States at the suggestion of the late Pres. McKinley, whose consent thereto was procured largely by your petitioner, and made elaborate argument before said Attorney General to the end that the proceedings in said Court Martial should be set aside and annulled. That thereafter the verdict of said Court Martial having been affirmed, your petitioner prepared certain proceedings in habeas corpus before the Circuit Court of the United States for the Eastern District of Kansas; whereat your petitioner made an elaborate argument before the Hon. Judges Thayer and Hook; and the said Carter having been remanded, your petitioner appealed said cause to the Supreme Court of the United States and there argued the same at length.

Your petitioner further avers that in the trial of said cause many questions arose involving recondite principles of hydraulic engineering, particularly with respect to the South Eastern Coast of the United States. That petitioner was somewhat prepared to meet such questions by reason of the fact that he is a graduate of the United States Military Academy at West Point; and that he was constantly coached during said Court Martial trial by the said Carter.

By reason of the foregoing, petitioner respectfully suggests unto your Honor that he is peculiarly familiar with the evidence and the various phases of the case against said Carter now pending in this Court.

Petitioner further says that since the contract and order of this court, entered on or about Nov. 6, 1901, he has been in constant communication, verbally and otherwise, with said Carter, and with the leading counsel in this cause, Horace

G. Stone, Esq.; that he has at all times rendered to said Stone such information with respect to said case as was within his knowledge; that he has had numerous consultations with said Stone, and together he and petitioner have gone over many phases of said case.

Petitioner further avers that during all of said time since Nov. 6, 1901, he has diligently prepared himself for the trial of said cause, and has devoted thereto, roughly speaking, about 1/4 of his working time.

Wherefore, the premises being considered, petitioner respectfully shows unto your Honor that he verily believes his services heretofore rendered since said contract and order are reasonably worth the sum of not less than \$5,000.00; which he prays may be allowed him.

And your petitioner will ever pray.

FRANK P. BLAIR,
Solicitor for Defendant, O. M. Carter.

Endorsement: Filed Feby. 10, 1904. Marshall E. Sampsell, Clerk.

And on to wit: the 13th day of February, 1904, came the complainant by Marion Erwin, its solicitor, and filed in the clerk's office of said Court, an answer to the petition of Frank P. Blair, in the words and figures following to wit:

ANSWER OF UNITED STATES TO PETITION OF F. P. BLAIR.

In the Circuit Court of the United States for the Northern District of Illinois.

The United States of America	}	In Equity.
<i>v.</i>		Bill, etc., 25,980.
Oberlin M. Carter <i>et al</i>		

Answer of United States to Petition of Frank P. Blair for fees.

The answer of the United States of America, by Marion Erwin, Special Assistant to the Attorney General, to the petition of Frank P. Blair for allowance of fees as Attorney for Oberlin M. Carter, avers:

(1) These respondents to said petition admit, that said Frank P. Blair was one of the attorneys who represented said

Oberlin M. Carter in the Court Martial trial referred to in said petition, but they aver that he was not the only attorney who represented said Carter in said Court Martial trial; that said Carter was represented also in said trial by Abram J. Rose of the firm of Kellogg & Rose, attorneys of New York, by W. G. Charlton of the firm of Charlton, Mackall & Anderson, attorneys of Savannah, Georgia, who were all paid separately large fees.

(2) These respondents admit that said Frank P. Blair was one of the attorneys who appeared for O. M. Carter before the Attorney-General on the proceedings to review said Court Martial findings, and it admits that Wayne McVeigh also appeared for said Carter in that proceeding. But these respondents aver from information derived from R. E. Westcott and J. H. Paul, the agents of said O. M. Carter, in New York, and from the entry on the books of account of said R. E. Westcott, now to the Court shown, of Wayne McVeigh's check returning the money, that the said McVeigh, after the affirmation of said Court Martial sentence by the President, returned said fee which had been so paid him by said Carter to said Carter's agents.

(3) These respondents admit that said Frank P. Blair was one of the attorneys who represented said O. M. Carter in the Habeas Corpus proceedings at Kansas City and on the appeal of same to the Supreme Court of the United States.

(4) But these respondents aver that said Frank P. Blair received as compensation for his services in the various proceedings in which he represented said Carter, over Forty Thousand Dollars, from the proceeds of Government funds, fraudulently diverted to his own use by the said O. M. Carter, as charged in complainants' bill, and as is now fully shown by the evidence already taken in this cause, and which the complainants are ready to submit to the Court for its final judgment on the merits, as soon as the said defendants are ready, recognizing the right of the defendants, however, to have a reasonable time to meet the Government's case, if they can.

Respondents attach hereto as Exhibit "A" an abstract from a statement rendered to these respondents (after certain proceedings had in this Court), by the said Blair from his books; and from the affidavits of said Blair in the record, now to the Court shown, showing that the said Blair has received said sum of over Forty Thousand Dollars. And complainants

now tender for the inspection of the Court in this proceeding all the evidence already taken in the cause, showing that said sum—exceeding Forty Thousand Dollars—so received and retained by said Blair was from the proceeds and re-investments made by said Carter from the funds of the Government so fraudulently diverted by him as aforesaid.

(5) That said Blair not only had a knowledge of the frauds perpetrated upon the Government by the said Carter, as charged in complainants' bill, but he had actual notice that Carter testified in said Court Martial proceeding (which is in evidence in this cause) that he (Carter) had no property or income except his income as officer of the Government, and a small amount he made on outside engineering work, and a small amount (something in excess of \$1000.00) he received from his father's estate, all of which was not sufficient to make him self-supporting so far as his family was concerned—save and except the gifts he claimed he had received from his father-in-law, Robert F. Westcott, mainly after the death of Carter's wife.

Respondents aver that said Blair was present at a portion of the commitment trial had before Commissioner John A. Shields, in New York, in the summer of the year 1900, for removal of Benjamin D. Greene and John F. Gaynor to answer, in Georgia, for the crime of conspiracy with Oberlin M. Carter in the frauds charged in complainants' bill,—the record and evidence in which proceeding is now in evidence in this cause. That on January 26th, 1901, the said Blair published and circulated a printed pamphlet, a copy of which is now to the Court shown, in which the said Blair undertakes to review the testimony of said R. F. Westcott before the said Commissioner, in which testimony said Robert F. Westcott flatly denied that he had given said O. M. Carter the large sums of money claimed by said Carter as having been received as gifts from said Robert F. Westcott, and in which circular the said Blair takes the position that said testimony of said Robert F. Westcott is "unqualifiedly false."

And these respondents say, that whether the said Blair believed that the testimony upon which said Carter was convicted by the Court Martial was false; whether he believed the testimony of said Robert F. Westcott to be false; whether he believed that the finding of probable cause of guilt by the Commissioner was based on false testimony, is immaterial so far as the said proceedings must be held to be sufficient to charge the said Blair with notice of the claims of the Govern-

ment, and to subject all his rights and dealings with the property as of a person with full notice, to the final adjudication of this Court on the merits of the case, when the Court shall be ready to decide the main issues on the merits.

(6) And these respondents aver that even after September 29, 1899, the date of the confirmation of the said Court Martial sentence by the Attorney-General and the President, the said Blair received and retained over Twenty Thousand Dollars from the proceeds of said diverted funds, over Ten Thousand Dollars of which was received by said Blair after the testimony of said Robert F. Westcott was given.

(7) And these respondents further aver that, while these respondents were engaged in establishing, in the Greene-Gaynor removal proceedings in New York, the identity of the particular securities in which said Oberlin M. Carter had invested his share of the funds of the Government so fraudulently diverted by him, a large part of said securities aggregating over Four Hundred Thousand Dollars which were then in the hands of J. H. Paul, Carter's agent in New York (though the fact was then unknown to your orators) were secretly, on May 23, 1900, turned over to said Oberlin M. Carter's two brothers, D. P. Carter, of Huntington, West Virginia, and I. Stanton Carter, in Chicago. That the said securities were divided between the said two brothers to be held for the said Oberlin M. Carter, then in the penitentiary.

That the said Blair proceeded to act as agent for the said I. Stanton Carter in marketing in his, Blair's, name a large quantity of the said securities, retaining from the proceeds thereof large sums of money as fees for himself. The following transactions with said securities were had by the said Blair as admitted by him in his affidavit in the record, and otherwise shown in the record.

On May 29, 1900, he sold of said securities, in his own name, through A. O. Slaughter & Co., Chicago, bonds, the proceeds of which were \$11,950.00, retaining himself for fees and charges claimed to be due him, \$6,200.00, and turning over to said I. Stanton Carter, \$5,750.00.

On September 4, 1900, he sold of said securities, in his own name, through A. O. Slaughter & Co., Chicago, bonds, the proceeds of which were \$20,362.50, retaining himself for fees and charges claimed to be due him \$5,000.00, and turning over to said I. Stanton Carter, \$15,362.50.

On October 15, 1900, he sold of said securities, in his own name, through Knight, Donnelley & Co., Chicago, bonds, the

proceeds of which were \$11,007.50, all of which proceeds were turned over to one C. W. Colehour for his note payable to I. Stanton Carter, secured by an assignment of a judgment, after numerous other assignments of the same had already been made to other persons, and which these respondents are informed by the receiver is practically worthless, or of problematical value—the said Colehour being at the time and now, as these respondents are informed, a client of the said Blair.

With all these larger amounts of said securities converted into cash, and the proceeds (not used by said Blair) held by I. Stanton Carter in safety vaults in Chicago, as shown by the evidence already taken in this cause, and with over \$146,000.00 of the securities held by the other brother in West Virginia, sold and converted into gold certificates and hid in a bank vault in Huntington, West Virginia, as shown by the evidence in this cause:—the said Blair aided the said Oberlin M. Carter in negotiating a loan of \$22,005.27 by a mortgage on a certain piece of real estate in New York, referred to in the bill in this cause, as “The 8th Avenue property,” then standing in the name of O. M. Carter, and, on November 23, 1900, the said Blair deposited to his own credit in the Northern Trust Company of Chicago the money so borrowed, \$22,005.27, and retained therefrom \$2,005.27 for fees and charges claimed by him, turning over the balance thereof to I. Stanton Carter.

On May 15, 1901, the said Frank P. Blair received from L. D. Carter, uncle of said Oberlin M. Carter, \$6,000.00, from the proceeds of certain of the said securities put by I. Stanton Carter in the hands of the said uncle, and the said Blair retained the same on claim of fees and charges due him.

(8) By reason whereof these respondents say that the said Frank P. Blair now illegally retains or has spent over Thirty Thousand Dollars of the funds rightfully belonging to these respondents, which were received by him since the conviction of said Oberlin M. Carter, and since the said Blair was put on full notice of the fraudulent diversion of said funds by the said Oberlin M. Carter.

And these respondents pray that the amount of said trust funds so appropriated by the said Frank P. Blair, with notice of said frauds and of the rights of these respondents, be set off against any and all claims, if any he has, on the fund in Court now awaiting the final judgment of this Court on the merits for its proper disposition, and that these respondents

have judgment against the said Blair in and for the same to the full extent of the fund so appropriated by him.

(9) And for further answer to said petition, these respondents say and aver, that Section '8' and clause "a" thereof in the agreement of November 6, 1901, fairly construed, means:

(a) (1) That the traveling and other expenses of counsel while engaged in work on the case are to be paid from time to time as they occur, and accounts therefor are rendered, and determined to be just by the Court.

(a) (2) That the fees of counsel for services in the cause to be rendered after the date of the agreement, were to be paid out of the fund when the cause reached a determination on its merits, and were to be fixed in amount according as the record showed that means and methods were adopted by counsel to ensure a speedy and just determination.

And these respondents say and aver that the name of Frank P. Blair does not appear upon any pleading filed in this cause since the agreement of November 6, 1901. Nor has the said Blair attended any of the proceedings before this Court since November 6, 1901 (except on this application for fees) or before any master or examiner taking evidence during the hearings for taking testimony in the cause, nor has the said Blair attended any such hearing in any of the collateral proceedings in other districts. The said Blair did, after certain of the funds had been traced into his possession, give his own affidavit taken before a notary, giving his statement and explanation of his own transactions.

By reason whereof these respondents say that, aside from the right of these respondents to have the aforesaid setoff, against any claim of the said Blair on the fund in Court, that there is nothing in the agreement of November 6, 1901, and the facts now to the Court shown, which would warrant the Court in making an allowance of fees to said Blair at this stage of the proceedings.

Wherefore, these respondents say that the relief asked for in said petition should be denied.

MARION ERWIN,
*Special Assistant to the Atty.-Gen'l., Solicitor for Compls.,
Respondents Herein.*

Endorsement Answer of the United States to the petition of Frank P. Blair for fees. Filed Feb 13, 1904 Marshall E. Sampsell Clerk.

And on towit: the 15th day of February 1904 in the December term 1903 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER ALLOWING H. G. STONE, COUNSEL FOR O.
M. CARTER, \$6000.

United States of America
vs.
Oberlin M. Carter *et al.* } In Equity. Bill

In view of the agreement of record in this cause of November 6, 1901, on motion and petition of Horace G. Stone, chief counsel for defendant Oberlin M. Carter, and counsel for the United States not resisting, the allowance on account to said Horace G. Stone of a reasonable attorney's fee out of the fund in Court claimed both by the United States and by said Oberlin M. Carter, to enable said Horace G. Stone properly to make defense of the claims of said Carter to said fund, but without prejudice as to the proper construction of said agreement on future similar applications;

The said allowance to be made at this time is fixed by the Court at the sum of Six Thousand Dollars, and the Receiver, Max H. Whitney, is directed to pay the said sum to the said Horace G. Stone out of the fund in Court.

And on towit: the 28 day of April 1904 in the December term 1903 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohl-saat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY WYMAN, EXAMINER, \$406.

The United States of America, }
vs
Oberlin M. Carter *et al.* }

By consent of parties, it is ordered by the Court that there be allowed the sum of Four Hundred and Six Dollars (\$406.-00) to Richard H. Wyman, Special Examiner, for services as per account rendered to date.

And the Receiver herein is authorized and directed to make payment of same to said Special Examiner out of the funds

in his hands in said cause, this payment to be made subject to adjustment between the parties as costs, on final decree.

Consented to

Endorsement Filed May 2, 1904 Marshall E. Sampsell
Clerk.

And on to wit: the 2nd day of May, 1904, in the December term, 1903, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$1089.94.

The United States of America	} In Equity. Bill, &c.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

H. G. Stone, chief counsel of record of O. M. Carter in the above stated cause, having rendered and filed herewith an account for his expenses in connection with services rendered in the cause under terms of the agreement of record of November 6, 1901, amounting to One Thousand and Eighty-nine 94/100 Dollars (\$1,089.94), the correctness of the items of said account having been conceded by counsel for the United States, the receiver is hereby ordered to pay said sum to the said H. G. Stone. This allowance is without prejudice to the right of said Stone to hereafter present certain other claims for allowance covering the same period which are not presented in the present account by reason of certain objections made by counsel for the United States.

Assented to May 2, 1904.

MARION ERWIN,

Special Asst. Atty. Gen'l.

And on to wit: the 20th day of June, 1904, in the December term, 1903, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof.

ORDER FOR RECEIVER TO SELL MICHIGAN TELEPHONE CO. BOND.

United States of America	} 25980.
—against—	
Oberlin M. Carter <i>et al.</i>	

By consent of counsel the Receiver herein, Max H. Whitney, is authorized and empowered to sell for Nine Hundred

and Twenty-five Dollars (\$925.00), less the brokerage commission, the One Thousand Dollar Certificate for Michigan Telephone Company bond now in his possession as such Receiver.

HORACE G. STONE,

*Solicitor for Oberlin M. Carter,
I. Stanton Carter and L. D.
Carter.*

MARION ERWIN,

*Solicitor for the United States,
Sp. Asst. Atty. Gen'l.*

And on to wit: the 9th day of August, 1904, in the July term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO REFUND H. G. STONE PREMIUM PAID ON
INSURANCE POLICY.

United States of America	} In Equity. Bill, &c. 25980.
<i>vs.</i>	
O. M. Carter <i>et al.</i>	

Order as to Insurance Premium.

It appearing to the Court, that H. G. Stone has advanced and paid the sum of \$453.00 Four Hundred and Fifty-three Dollars, premium due June 7, 1904, on policy No. 743,543, on the life of O. M. Carter in the Equitable Life Assurance Society of New York: It is ordered that Max H. Whitney, Receiver, refund to said H. G. Stone the said sum out of the funds in his hands as receiver, upon delivery to him of the premium receipt.

The payment to be made without prejudice to the adjustment of the amount so paid between the parties to the suit, hereafter.

Agreed to August, 1904.

MARION ERWIN,

Special Asst. to the Atty. Gen'l.

And on to wit: the 12th day of October, 1904, came the defendant O. M. Carter and filed in the clerk's office of said court his petition with account annexed in the words and figures following to wit:

PETITION AND ACCOUNT OF O. M. CARTER FOR
PERSONAL EXPENSES.

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America }
—against— } In Equity.
Oberlin M. Carter *et al.*

Petition of Oberlin M. Carter for Payment of His Personal
Expenses.

To the Honorable Christian C. Kohlsaat, Judge of Said Court:
Your petitioner, Oberlin M. Carter, the principal defendant herein, shows unto your Honor, as follows:

On or about August 28th, 1901, while your petitioner was confined at Fort Leavenworth, Kansas, the complainant herein commenced various suits against your petitioner, claiming that certain monies were received by your petitioner from Greene, Gaynor *et al.*, who were contractors with the United States at the time your petitioner was engineer officer in charge of the performance of said contracts at Savannah, Georgia, and vicinity. Without making any demand on your petitioner, and without notice to your petitioner, the complainant secured the appointment of receivers of the property of your petitioner located at various places and took possession of part thereof. Thereupon your petitioner voluntarily entered into an agreement with the complainant by the terms of which, among other things, it was provided that your petitioner should turn over to said receivers all property of every description which was in controversy, which was all of the property belonging to your petitioner, except a few personal effects, and your petitioner thereupon performed said agreement and turned over to said receivers all of said property. In consideration of said agreement it was agreed by the complainant, among other things, that your petitioner should receive out of the money and property so turned over to said receivers, certain payments which in-

cluded payments for his proper defense of said suits and which further provided as follows: "If before the final determination of this cause the said O. M. Carter shall be liberated from prison, he shall be allowed his reasonable personal expenses incurred by him while engaged in work in this cause, including taking of evidence, but with no compensation for his time." Said agreement being dated November 6th, 1901, and being subsequently made an order of court herein.

Your petitioner further says that he was liberated from prison on the twenty-eighth day of November, 1903, and under instructions from his counsel, came direct to Chicago where he has since remained and where he still remains.

Your petitioner further says that as soon as he arrived in Chicago he commenced giving his entire time and efforts towards work in this case and has so continued up to the present time and still continues.

Your petitioner further says that he was confined in prison either at Governor's Island, New York, or at Fort Leavenworth, Kansas, from September 29th, 1899, to November 28th, 1903, being four years and two months, which with ten months allowed your petitioner for good time, completed his sentence of five years.

Your petitioner further says that all the clothing which your petitioner had at the time of his confinement, September 29th, 1899, had at the time of his release on November 28th, 1903, substantially all become out of date or lost, or of no use to your petitioner, and it became necessary for your petitioner to buy new clothing, and as he had no money or property except said personal effects referred to, he obtained the money to buy said clothing from his said counsel Horace G. Stone, which amounts for said clothing are embraced in the bills hereinafter submitted.

At the time of his confinement on September 29th, 1899, the clothing of your petitioner was stored in New York, and on your petitioner being liberated November 28th, 1903, he came to Chicago and had said clothing sent to him from New York by express rather than freight because he needed it at once. He was unable without going to New York to determine exactly which box it was in, and hence was obliged to have more than one box sent in order to be sure he would get what clothing he needed, and the expressage on said stuff was \$17.80, plus \$5.75, making a total of \$23.55,

which was paid by his counsel Horace G. Stone. The extra expense being due to the fact that said clothing was packed with books, papers, etc., which altogether made said expressage amount to \$23.55 as aforesaid.

Your petitioner further says that his salary and position were such before he was imprisoned as aforesaid that he was used to living in first class style and used to having all the conveniences and many of the luxuries of life, and that during his said confinement he lived upon the fare which his fellow prisoners lived upon, and the change was so great that notwithstanding the fact he was well treated and well cared for in said penitentiary at Fort Leavenworth, he emerged therefrom seriously broken in health and in need of more than the usual necessities and conveniences of life, and upon consulting with his counsel he was advised that it would be proper for him under the terms of said contract, so long as he was at work in this case, to rent a small furnished flat and hire a cook in order that he might have such articles of diet as would help rebuild his shattered health, and in pursuance thereof, he did hire a furnished flat in the City of Chicago in the same building with that of his brother, and hired a cook to purchase the necessary supplies and cook the same for your petitioner. The cost of renting said furnished flat plus the services of said cook were \$60.00 per month, with extra pay to said cook for laundering house linen. Said flat contained sufficient room so that your petitioner could have his books and papers in this flat and work there on this case without going to the extra expense of hiring office rooms.

Your petitioner further says that he authorized the said cook to pay the gas, ice and similar bills, which she did.

Your petitioner further says that he needed, and purchased for his table, a small amount of wine and other drinkables, costing an average of about nine cents per day, which he needed to help build up his health.

Your petitioner further says that he has purchased reading matter, magazines, etc., at an expense of about twelve cents per day.

Your petitioner further says that he has, upon being urged so to do by his counsel, been to a few places of amusement, amounting altogether in nine months to \$44.80.

Your petitioner further says that said furnished flat so rented by your petitioner was lacking in a few essentials for housekeeping and was entirely lacking in facilities for

your petitioner working on this case, such as desks, tables, etc., and your petitioner, under the advice of said counsel, expended \$72.20 for such purpose.

Your petitioner further says that it was necessary for him to take more or less exercise, and under advice of his counsel, he thereupon joined the gymnasium of the Young Men's Christian Association at a cost of \$18.00.

Your petitioner further says that he has expended for medicine \$23.30 and doctor's bill \$11.00 since his liberation up to September 1st, 1904, and he still owes a doctor's bill at the present time to Dr. Ely, the same not having rendered his bill.

Your petitioner further says that the said rooms in said flat where your petitioner has been at work in this case since his liberation are not in the business district, so that it is generally necessary for your petitioner to travel on street cars between said flat and the offices of your petitioner's said counsel, or to the place in the Monadnock Block in said City where the private papers of your petitioner are held by the complainant. And it is also necessary for your petitioner to get his lunch down town, the expense for which has been an average of about seventy cents per day.

Your petitioner further shows that he had no money at all upon his liberation from Fort Leavenworth and that his entire expenses and disbursements since that time have been advanced to him by his counsel, Horace G. Stone, out of his private funds, and your petitioner is desirous of repaying the same as soon as possible.

Your petitioner submits herewith his said expense account to September 1st, 1904, amounting to \$1741.20 and prays the Court to have the same allowed to him, and that an order may be made by the Court directing the Receiver herein to pay said sum of money to your petitioner as aforesaid.

Dated, Chicago, September 13th, 1904.

OBERLIN M. CARTER,
Petitioner.

Endorsement: Petition of Oberlin M. Carter for payment of his personal expenses filed Oct. 12, 1904. Marshall E. Sampsell, Clerk.

And on to-wit: the 12th day of October, 1904, came the United States by Marion Erwin, its solicitor, and filed in the clerk's office of said Court, its answer to the petition of O. M. Carter for payment of personal expenses in the words and figures following, to-wit:

ANSWER OF UNITED STATES TO PETITION OF O. M.
CARTER FOR PAYMENT OF PERSONAL EXPENSES
OCT. 12, 1904.

In the Circuit Court of the United States for the Northern
District of Illinois, Northern Division.

The United States of America

vs.

Oberlin M. Carter, *et al.*

} In Equity, Bill &c.

Answer of the United States to Petition of O. M. Carter for
Payment of Personal Expenses.

And now comes the United States, by Marion Erwin, Special Assistant to the Attorney General, and for answer to the foregoing petition say:—

1. It is not true that Receivers *pendente lite* were appointed, in the suits instituted by the United States against O. M. Carter in the several districts where suits were brought, without notice to O. M. Carter. On the contrary while the appointment of temporary receivers was obtained to hold custody of the property claimed, until O. M. Carter, who was then in the penitentiary, could be given notice and be heard, that immediately thereupon notice was published in each case according to law, and personal service thereof given said O. M. Carter, and a day fixed by the Court on which said Carter could be heard as to the propriety of appointing a receiver *pendente lite*, and that in each instance said O. M. Carter appeared by counsel at or before the return day and consented to a continuance of the receiver *pendente lite*, in preference to proceeding with the hearing offered. This was notably true as to the bill filed in the Northern District of Illinois, the record showing that after full notice and appearance at the time set for hearing, the Government being ready and pressing for hearing, the said O. M. Carter and his co-defendants L. D. and I. S. Carter, came in and consented to a continuance of the receivership *pendente lite*. And this was prior to the agreement of Nov. 6, 1901, under which said Carters undertook to turn over and account for the assets claimed by the Government still in their hands, which agreement of Nov. 6, 1901, was made while certain proceedings for contempt were on the calendar pending for hearing, for failure of said Carters to turn over said assets to the receiver previously appointed as aforesaid. The said agreement of Nov. 6, 1901, is therefore

to be construed in the light of the proceedings pending at the time the agreement was made.

2. It is admitted that the agreement of Nov. 6, 1901, contains the following clause:

(d) "And if before the final determination of this cause the said Oberlin M. Carter, shall be liberated from prison, he shall be allowed his reasonable personal expenses incurred by him while engaged in work in this cause, including the taking of evidence, but with no compensation for his time, such expenses to be determined by the Court and paid out of the monies in court."

It is submitted by the Government, that the expression "personal expenses incurred by him while engaged in work in this cause" should have the usual meaning applied to it that any business man would give it in a contract between a merchant and travelling salesman, or as is given it by the Government in contracts or statutes for payment of the personal expenses of its agents, attorneys or judges, viz: That it applies to board and lodging and travelling expenses, while attending hearing to take testimony, or while at work in the conduct of the case. The payment to Carter of any compensation for his time is expressly negatived, and there is nothing in the clause authorizing the application of any part of the fund in Court, to the purchase of a personal wardrobe, for the defendant, or for general reading matter, or for theatres or other amusement, or for religious dues. In fact even such personal expenses as were provided for were only those "incurred while engaged in work in this cause" which negatives the idea that any expense was provided for, other than those relating to the cause.

(3) For the foregoing reasons, the Government objects to the following items in the account attached to said petition:

Item 2—Express on clothing from New York.....	\$ 23.55
Item 3—Reading matter	31.75
(Not an expense pertaining to the cause.)	
Item 6—Medicines	24.50
(Not an expense pertaining to the cause.)	
Item 7—Doctor's bill	11.00
(Not an expense pertaining to the cause.)	
Item 8—Y. M. C. A. Dues.....	18.00
(Not an expense pertaining to the cause.)	
Item 11—Drinkables for table.....	24.55
(Not an expense pertaining to the cause, and charge too indefinite.)	

Item 12—Clothing	108.35
(Not an expense pertaining to the cause.)	
Item 13—Laundering	68.40
(Not an expense pertaining to the cause.)	
Item 14—Amusements	44.80
(Not an expense pertaining to the cause.)	
Item 15—Outfitting office and living rooms.....	72.20
(Not an expense pertaining to cause and no specifications of payments.)	
Item 16—Outing trip	6.20
(Not an expense pertaining to the cause.)	
Item 17—Underclothing	6.40
(Not an expense pertaining to the cause.)	

Total \$439.70

The following items are objected to because too indefinite no particulars are given and there is no reason why the charges should not have been itemized day by day in the account presented, precisely as a travelling salesman would itemize his account or an agent of the Government would itemize his personal expenditures:

Item 4—Luncheons, &c, 9 months.....	\$177.80
(No details.)	
Item 9—Ice, gas, laundering house linen, 9 months....	103.15
(No details or vouchers.)	
Item 10—Groceries, meats	463.05
(No details or vouchers.)	

\$744.00

Item 1—Is not objected to.....	\$ 17.50
Item 5—Rent &c not objected to provided vouchers for rent from person to whom rent was paid are filed...	540.00

In view of the want of detail and vouchers in the account, it is respectfully submitted that the account should be referred to a special master, to pass upon the same.

And having fully answered the said United States submits to the judgment of the Court.

October 12, 1904.

MARION ERWIN,
Special Asst. to the Atty. Gen'l,
Complts. Solicitor.

And on to wit: the 12th day of October, 1904, in the July term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY O. M. CARTER \$1,000 AND RESERVING
OBJECTIONS.

The United States of America

vs.

O. M. Carter, *et al.*

} In Equity, Bill &c.

The said O. M. Carter having filed a petition, praying payment out of the fund in court, under terms of the agreement of Nov. 6, 1901, of record in said cause, of certain personal expenses claimed to have been paid out by him during the nine months ending August 31, 1904, aggregating \$1741.20,

And the United States of America having filed objections to the payment of various items of said account:—

By agreement of parties it is ordered that the Receiver Max H. Whitney is directed to pay to said O. M. Carter out of any moneys in his hands as such Receiver, the sum of One thousand Dollars, on account,

And the questions raised by the said objections of the United States to said petition and account are reserved for further consideration and disposition, when Counsel can be heard.

Consented to Oct. 6, 1904.

MARION ERWIN,

Sp. Asst. to Atty. Genl.

HORACE G. STONE,

Solicitor for said Carters.

And on to wit: the 13th day of February, 1905, in the December term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof.

ORDER TO PAY MAX H. WHITNEY, RECEIVER, \$500.

United States of America

v.

Oberlin M. Carter *et al.*

}

On motion of the receiver herein, Max H. Whitney, and in pursuance of the consent of the solicitors for the complainant and defendants herein given in open court

It Is Ordered that the said receiver be, and he is hereby, authorized to pay to himself out of the funds in his hands as such receiver, the sum of Five Hundred dollars on account of receiver's fees herein.

And on to wit: the 13th day of February, 1905, in the December term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER FOR RECEIVER TO SELL CERTAIN BONDS.

The United States of America,
Complainant,

vs.

Oberlin M. Carter *et al.*,
Defendants.

} In Equity
} Bill &c.
} 25980.

It appearing to the Court that there are not sufficient cash funds in the possession of Max H. Whitney, Receiver, in the above stated cause, necessary to be used in carrying out the administrative orders of the Court, it is ordered by the Court that said Receiver is hereby authorized and directed to sell at private sale at current market price the following described securities now in his hands as Receiver in said cause, to wit:

Five (5) Hocking Valley Railway First Consolidated General 4½ per cent. bonds Numbers 4757, 4758, 4759, 4760, and 4761, with coupons attached commencing July 1905.

And to hold the proceeds for disbursement under the orders of this Court made or to be made in said cause.

And on to wit, the 13th day of February, 1905, in the December term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$5,000 ON ACCOUNT AND
ALLOWING O. M. CARTER \$150 PER MONTH.

United States of America,	} In Equity.
Complainant,	
vs.	
Oberlin M. Carter <i>et al.</i> ,	
Defendants.	} Bill &c.

Horace G. Stone, solicitor for Oberlin M. Carter in the above stated cause, having submitted to the court an account for his expenses incurred as solicitor for O. M. Carter in said cause, and by petition praying an allowance to him from the fund in court for reimbursement for said expenses, and also an allowance for attorney's fees, under the agreement of parties made of record Nov. 6, 1901, also submitted an account for personal expenses claimed to have been incurred and paid by said O. M. Carter while engaged in work in this cause, and praying the payment of the same out of the fund in court, under said agreement of November 6, 1901.

And Marion Erwin, solicitor for complainant, having objected to the allowance of said expense accounts as not sufficiently proved and that certain items thereof are not chargeable under the agreement. And by reason of the engagements of the court in other matters, and the engagements of counsel in the work in the main cause—it being impracticable to dispose of said matters by a full hearing at this time, but it being admitted by counsel for the United States that it is in the discretion of the court to make an allowance to said H. G. Stone out of the fund in court, as a payment on account of his fees as attorney for said O. M. Carter, under the agreement of November 6, 1901, and the court having determined that an allowance of \$5,000.00 to said Stone at this time, as payment on account of fees as aforesaid is reasonable,

It is ordered that said allowance of \$5,000.00 be made, and that the same be paid by the Receiver, Max H. Whitney, out of the fund in court.

It is further ordered that the sum of one hundred and fifty dollars per month from November 28, 1903, be allowed to O. M. Carter, out of the fund in court as an advance prior to the adjustment of his expense account on account of his personal expenses while engaged in work in the case to be paid by said Max H. Whitney monthly at the of each month, less the sum of one thousand dollars heretofore advanced to said O. M. Carter under the order of the court, and that the receiver continue to pay said monthly allowance of \$150.00 to said O. M. Carter until said expense accounts are adjusted, unless hereafter otherwise ordered by the court.

And on to wit: the 20th day of April, 1905, in the December term, 1904, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohl-saat, Judge presiding, there was made by the Court, the following order and entry thereof.

ORDER TO PAY R. H. WYMAN, EXAMINER, \$770.

The United States of America

vs.

Oberlin M. Carter *et al.*

By consent of parties, it is ordered by the Court that there be allowed the sum of Seven Hundred and Seventy Dollars (\$770.00) to Richard H. Wyman, Special Examiner, for services as per account rendered to date.

And the Receiver herein is authorized and directed to make payment of same to said Special Examiner out of the funds in his hands in said cause, this payment to be made subject to adjustment between the parties as costs.

O. K.

HORACE G. STONE,

Solr. for Defts. O. M. Carter,

& L. D. & I. S. Carter.

MARION ERWIN,

Sp. Asst. to Atty. Gen'l.

Carter et al., for taking testimony on the part of the defendants, under 67th Equity Rule, and under agreement of Counsel, to be paid out of the fund in Court, for use in the Districts in which bills are pending, is just and true; that the services therein charged for were duly performed, as therein stated, and that he has received no compensation for said services.

W. R. HEWLETT.

Sworn to and subscribed before me this November 23rd, 1904.

S. F. B. GILLESPIE,

(Seal)

Deputy Clerk U. S. Cir. Ct. So. Dist. Ga.

And on to wit: the 25th day of September, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaatt, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$4,250 AND GUNTROP-
WARREN CO. \$977.60 AND TO SELL CERTAIN SEC-
URITIES.

United States of America,	}	25980.
Complainant,		
—against—		
Oberlin M. Carter et al.,		
Defendants.		In Equity.
		Bills, &c.

Whereas under Paragraph "7" of the agreement between the parties of November 6th, 1901, of record in this cause, it is provided as follows:

"(7) From said fund to be accounted for to the receiver, the sum of \$5,000.00 shall be left in the hands of H. G. Stone, Chief Counsel of said Oberlin M. Carter, from which to compensate and cover expense of employment of local counsel in

"any of the districts in which local counsel have been or may be employed in any branch of this case."

And whereas in the accounting had in this cause before Wm. M. Booth, Special Master, L. D. Carter in accounting for funds in his hands held for account of Oberlin M. Carter, claimed credit for the sum of Seven Hundred and Fifty Dollars (\$750.00) by said L. D. Carter paid over to said H. G. Stone by check of February 14th, 1902, and which amount was on February 18th, 1902, paid over by said H. G. Stone to Abram J. Rose, local counsel for the said Carters in the auxiliary suits pending in New York and New Jersey; and credit for which amount by the Master was allowed L. D. Carter in the accounting. And whereas the counsel for the United States contends that the Seven Hundred and fifty dollars (\$750.00) should be deducted from said Five Thousand Dollars (\$5,000.00), which was to be left in the hands of said H. G. Stone for the purpose aforesaid, while the said H. G. Stone, defendants' counsel, contends the reverse.

It is Ordered that the Receiver, Max H. Whitney, shall out of the fund in his hands as Receiver in this cause now pay over to said H. G. Stone the sum of Four Thousand Two Hundred and Fifty Dollars (\$4,250.00), being the difference between said sum of Five Thousand Dollars (\$5,000.00) and the Seven Hundred and Fifty Dollars (\$750.00).

The said payment to be without prejudice to the rights of said defendants, if any they now have, to further contend in this cause for the payment of said Seven Hundred and Fifty Dollars (\$750.00), and to be without prejudice of the rights of the United States, if any they now have, to contend that there has not been a full accounting for the assets to be turned over to the Receiver.

And whereas the said H. G. Stone, counsel for said Oberlin M. Carter et al., has caused to be printed by the Gunthorp-Warren Printing Company, certain pleadings and O. M. Carter's direct testimony in this cause, bills for which aggregate Nine Hundred and Seventy-seven Dollars and Sixty Cents (\$977.60), proof of the necessity for the printing which or the propriety of paying which from the fund in court is waived by the counsel of the United States without prejudice to the right to object to similar bills in future.

It is Ordered that said Max H. Whitney, Receiver, shall out of the fund in his hands as Receiver in this cause pay said bills amounting to Nine Hundred and Seventy-seven Dollars

and Sixty Cents (\$977.60) to the said Gunthorp-Warren Printing Company, filing their receipts as vouchers. Such payment to be subject to adjustment as costs between the parties on final decree.

If said Receiver has not a sufficient amount of money in his hands available for the payment of the above amounts ordered to be paid by him, he is authorized and directed to sell a sufficient number of the Kentucky Central 4% bonds in his hands, at current market price, as may be necessary to raise the additional amount required.

Assented to

MARION ERWIN,
Special Asst. to Atty. Gen'l,
Complts. Sol.

HORACE G. STONE,
Solr. for Carters.

And on to wit: the 6th day of October, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, EXAMINER, \$300.

United States of America	} Bill, etc.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

It is ordered by the Court that Richard H. Wyman, Examiner in the above stated cause, be paid by the Receiver out of the funds in his hands the sum of Three Hundred Dollars (\$300.00) on account, the said amount to be adjusted as costs between the parties hereafter.

Consented to

MARION ERWIN,
Special Assistant to the Attorney General,
Complainant's Solicitor.

HORACE G. STONE,
Solicitor for O. M. Carter.

And on to wit: the 23rd day of October, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, EXAMINER, \$300.

United States of America	} Bill, etc.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	} 25980.

It is ordered by the Court that Richard H. Wyman, Examiner in the above named cause, be paid by the Receiver out of the funds in his hands the sum of Three Hundred Dollars (\$300.00) on account, the said amount to be adjusted as costs between the parties hereafter.

Consented to Oct. 20, 1905.

MARION ERWIN,
Special Assistant to the Attorney General,
Complainant's Solicitor.

HORACE G. STONE,
Solicitor for O. M. Carter.

And on to wit: the 6th day of November, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, EXAMINER, \$600.

United States of America	} Bill, etc.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	} No. 25980.

It is hereby ordered by the Court that Richard H. Wyman, Special Examiner in the above stated cause, be paid by the Receiver out of the funds in his hands the sum of Six Hundred Dollars (\$600.00) on account, the said sum to be adjusted as costs between the parties hereafter.

Nov. 6th, 1905.

Consented to

M. ERWIN,
Special Assistant to the Attorney General,
Complainant's Solicitor.

HORACE G. STONE,
Solicitor for Oberlin M. Carter.

And on to wit: the 8th day of November, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY WHITNEY, RECEIVER, \$500.

In the United States Circuit Court, Northern District of Illinois, Eastern Division.

United States of America	} No.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

On motion of the receiver herein, Max H. Whitney, and in pursuance of the consent of the solicitors for the complainant and for the defendants herein in open court:

It Is Ordered that the said receiver be, and he is hereby, authorized to pay to himself out of the funds in his hands as such receiver, the sum of Five Hundred Dollars on account of receiver's fees herein.

Consented to Nov. 7, 1905.

MARION ERWIN,
Sp. Asst. to Atty. Gen'l.
 HORACE G. STONE,
Solr. for Carters.

And on to wit: the 27th day of November, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, EXAMINER, \$500.

United States of America	} Bill, etc. No. 25890.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

It is ordered by the Court that Richard H. Wyman, Examiner in the above stated cause, be paid by the Receiver out

of the funds in his hands the sum of Five Hundred Dollars (\$500.00) on account, the said amount to be adjusted as costs between the parties hereafter.

Consented to Nov. 26, 1905.

MARION ERWIN,

*Special Assistant to the Attorney
General, Complainant's So-
licitor.*

HORACE G. STONE,

Solicitor for O. M. Carter.

And on to wit: the 11th day of December, 1905, came Horace G. Stone, Solicitor of O. M. Carter, and filed in the clerk's office of said Court a petition in the words and figures following to wit:

PETITION OF H. G. STONE FOR ALLOWANCE OF
FEES.

In the Circuit Court of the United States, Northern District
of Illinois Eastern Division.

United States of America,	} In Equity.
Complainant,	
—against—	
Oberlin M. Carter <i>et al.</i> ,	
Defendants.	

Petition of Horace G. Stone for a payment on account of Solicitor's fees under the contract of November 6th, 1901.

To the Honorable Christian C. Kohlsaat, Circuit Judge of
Said Court:

Your petitioner, Horace G. Stone, respectfully shows unto your Honor that he has been the Chief Counsel for said Oberlin M. Carter in the above entitled cause for more than four years, and during that time he has spent a very large part of his time in examining and meeting the enormous amount of testimony and documentary and other evidence introduced in said cause by said complainant, and in preparing, examining and introducing in evidence the testimony and evidence for the defendants. That the complainant has introduced in evidence in said cause many thousands of pages of testimony and many more thousands of pages of exhibits, substantially all of which are immaterial in this cause, but

the defendant has been obliged to thoroughly examine and meet and overcome the same by a very extraordinary amount of work and labor in said cause, especially in view of the fact that a very considerable percentage of such documentary evidence introduced by said complainant was false and misleading.

Your petitioner further shows that a year ago he notified the Solicitor for the complainant in writing that this petitioner would close his case in January, 1905, and be ready for trial in February, 1905, and was ready, willing and anxious so to do. But your petitioner shows that the complainant and its solicitors have evaded and avoided the trial of said case on various pretexts constantly for the greater part of the last year. That the solicitor for the complainant promised time and again during said period to go ahead with said case, and kept your petitioner constantly waiting for him to proceed, and then in every instance said complainant's solicitor avoided going ahead with said case between February, 1905, and the latter part of September, 1905, and even after said September, 1905, complainant's solicitor was absent about a month.

Your petitioner expected said complainant's solicitor to take up said case from time to time as agreed, and kept in constant readiness to proceed in said cause, and owing to the immense amount of testimony and exhibits in said cause your petitioner was not able to lay aside said case and go ahead with other work without having to go over again a large amount of said work, and hence your petitioner during the last year has devoted his entire time and attention to said case, excepting not exceeding five days altogether.

Your petitioner further shows that he is now ready for trial in the above entitled cause, but the complainant's solicitor seeks to postpone the trial of said cause for several months.

Your petitioner further shows that said contract of November 6th, 1901, did not contemplate that your petitioner should wait for the payment of his solicitor's fees and disbursements until the case was closed, but it expressly provided that your petitioner might apply from time to time for the payment of his solicitor's fees and his disbursements.

Your petitioner, therefore, prays that the Receiver in the above entitled cause be authorized and instructed to pay to your petitioner the sum of Fifteen Thousand (15,000) Dollars on account of solicitor's fees due to your petitioner, and

if such Receiver has not sufficient money on hand to pay the same that said Receiver is authorized to apply to the Court ex-parte for the sale of such securities as he may think proper to sell for the payment of said amount.

Dated Chicago, December 11th, 1905.

HORACE G. STONE.

Endorsement: Filed Dec. 11, 1905. Marshall E. Sampsell, Clerk.

And on to wit: the 11th day of December, 1905, came the complainant by Marion Erwin, its solicitor, and filed in the clerk's office of said Court, an answer to the petition of H. G. Stone for allowance of fees, in the words and figures following, to wit:

ANSWER OF THE UNITED STATES TO PETITION OF
H. G. STONE FOR FEES.

In the Circuit Court of the United States, Northern District of Illinois, Eastern Division.

United States of America	} In Equity.
Compt.	
vs.	
Oberlin M. Carter <i>et al.</i> , Deft.	

Answer of United States to petition of H. G. Stone for additional allowance for fee.

The answer of the United States to the petition of H. G. Stone filed Dec. 11, 1905, in said cause for allowance of additional attorney's fees to him out of the fund in court, respectfully shows:

(1) That by agreement of parties of record, the depositions of certain witnesses taken before the Court Martial which tried Captain Carter, and the depositions of certain witnesses in the proceedings had before Commissioner Shields in New York for removal of B. D. Greene *et al.* were considered as taken in this cause each party furnishing to the other, a list of the witnesses whose said depositions for the complainant or for the defendants as the case may be, were to be so used.

(2) Complainant took all additional depositions of wit-

nesses on part of complainant which complainant deemed relevant and closed its case prior to Feb. 15th, 1904.

(3) That on Feb. 15th, 1904, this Court allowed said H. G. Stone out of the fund in Court as an allowance for own counsel fees \$6,000.00. And on May 3rd, 1904, this Court allowed said H. G. Stone on account of a bill of expenses by him \$1,089.94.

(4) That from Feb. 15, 1904, to September, 1904, said Stone took no testimony although complainant's counsel was ready all during said period to attend the taking of said testimony, and kept the documents relating to said cause which were in the custody of the Government constantly on hand in Chicago, subject to defendants inspection from day to day. And complainant's counsel remained in Chicago a large part of said period ready and anxious for the defendants to proceed with the taking of their testimony.

(5) That at different times between September, 1904, and Feb. 23, 1905, the defense took some testimony in Savannah, Ga., and Chicago. And on Feby. 13th, 1905, this Court by order allowed said H. G. Stone, the sum of \$5,000—out of the fund in Court, as an allowance to him on account of his own counsel fees.

(6) That from about March 1, 1905, to September 15th, 1905, about six months and a half, the counsel for the United States having obtained in the presence of defendant's counsel, a leave of absence from this Court, and leave to withdraw for the special purpose, the original documents used by the complainants in this cause, was absent in Canada conducting certain extradition proceedings against B. D. Greene and John F. Gaynor, charged with conspiracy, etc., with O. M. Carter in and about the matters involved in this cause.

On September 15, 1905, complainants having obtained the original documents used before the Courts in Canada, the counsel returned to Chicago and the taking of evidence by the defense was resumed before the Examiner. And with the exception of about three weeks, the examination of defendant's witnesses has been constantly proceeding from day to day, until this day when the defense has finally announced closed.

(7) That on September 25th, 1905, this Court by order paid over to said H. G. Stone the sum of \$4250—being the balance of \$5000—provided to be paid over to him under clause "7" of the agreement of Nov. 6, 1901, from which to

compensate and cover expenses of employment of local counsel for defense.

(8) That exclusive of said last mentioned sum of \$5000—and said allowance of \$1089.94 expenses, said H. G. Stone has been paid \$11,000.00 on account out of the fund in Court for personal compensation.

(9) That prior to the agreement of Nov. 6, 1901, complainant had already placed in the hands of receivers' in other districts the bulk of the properties involved in this litigation and that proceeding were at the time of said agreement pending in this district to force I. Stanton Carter and L. D. Carter to turn over to the receiver of this Court certain assets claimed by the United States to have been traced into their possession. In pursuance of the agreement the defendants turned over to the receiver of the Court in this cause, certain bonds aggregating face value of \$60,000—a note of one Cole-hour face value of \$11,000—and evidence of the fact that certain other notes and mortgages and stocks traced to him had already been tied up by the complainants' suit filed in Georgia by injunction against Mackall & Anderson. On a reference made by this Court to Special Master Booth, \$23,000 additional bonds were required to be turned over to the receiver, by order of this Court, which was done, but the sum of about \$27,000, which said Special Master found has been traced to I. S. Carter and not accounted for, has not been turned over—and in the order of this Court the question as to whether the defendants have complied with the agreement in that particular has been reserved for consideration on the final argument.

(10) That the terms of the agreement of Nov. 6, 1901, clause (9), it is expressly provided that:

"The assent of the United States to paragraphs "1", "7" and "8" of this agreement is predicated upon the understanding that the said defendants will turn over to the receiver at least substantially all of the assets turned over to I. Stanton Carter and L. D. Carter by J. H. Paul and R. E. Westcott and James F. Bragg, or their proceeds and re-investments, except such as has been, prior to the receivership bona fide paid out or pledged by them for attorneys fees or as expenses in defense of Carter, or expended by them legitimately in the handling of said properties or which has not already been taken possession by receiver in this cause."

(11) That clause (8) of said agreement contemplated the payment from time to time of certain specified expenses there-

in specifically enumerated, but it never was contemplated by said agreement, that the Court would go into the merits of the services rendered by defendants chief counsel in advance of a final hearing in the cause.

That with the allowance of said \$11,000—already made said Stone out of said fund and \$5,000—paid to him for local counsel for defense, to make to the said Stone an allowance for an additional sum in advance for the final hearing, would make said sum all out of proportion to the amount brought into Court under said agreement.

Wherefore the complainant not admitting the allegations of said petition in regard to the manner in which the litigation has been conducted objects to any additional allowance to said counsel at this time.

Respectfully submitted,

MARION ERWIN,

Sp. Asst. to Atty. Gen'l., Comp. Solr.

Endorsement: Filed Dec. 11, 1905. Marshall E. Sampsell,
Clerk.

And on to wit: the 11th day of December, 1905, in the July term, 1905, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaatt, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$2,500, AND FOR RECEIVER TO SELL SECURITIES.

United States

vs.

Oberlin M. Carter *et al.*

} 25980.

Petition of H. G. Stone for allowance on account of fees, Order.

Upon reading and filing the above petition, It Is Ordered that the Receiver in the above entitled cause, Max H. Whitney, pay to Horace G. Stone, the sum of Twenty-five Hundred Dollars, out of the money in his hands as such Receiver, and if he has not on hand a sufficient amount of money to pay the same, then he is authorized and directed to apply to the Court for an order authorizing him to sell such securities as he may deem proper for the puprose of paying the same.

And on to-wit: the 12th day of December, 1905, in the July term, 1905, of said court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaas, judge presiding, there was made by the court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, EXAMINER, \$500.

United States of America,	}	Bill, etc. No. 25890.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

It is ordered by the court that Richard H. Wyman, examiner in the above stated cause, be paid by the Receiver out of the funds in his hands the sum of Five Hundred Dollars (\$500.00) on account, the said amount to be adjusted as costs between the parties hereafter.

Consented to Dec. 11, 1905.

MARION ERWIN,

*Special Assistant to the Attorney General, Com-
plainant's Solicitor.*

H. G. STONE,

Solicitor for O. M. Carter.

And on to-wit: the 14th day of January, 1907, came Horace G. Stone and filed in the clerk's office of said court a notice of application for allowance to him of attorneys' fees, and came the complainant and filed objections to such allowance, in the words and figures following, to-wit:

NOTICE OF H. G. STONE OF APPLICATION FOR FEES.

In the Circuit Court of the United States, Northern District
of Illinois, Eastern Division.

United States of America }
against }
Oberlin M. Carter. }

To Marion Erwin, Esquire, Solicitor for Complainant.

You will please take notice that on Monday, January 14th, 1907, at 10:00 o'clock in the forenoon, or as soon thereafter as counsel can be heard, I shall apply to his Honor, Christian C. Kohlsaat, Circuit Judge in the above entitled cause, for an allowance on account of fees under the contract of November 6th, 1901.

Dated Chicago, January 12th, 1907.

HORACE G. STONE,
Solicitor for Defendant.

Received copy of the above notice, this 12th day of January, 1907.

MARION ERWIN,
Special Asst. to Atty. General.

'ANSWER OF UNITED STATES.

In the Circuit Court of the United States, Northern District of
Illinois, Eastern Division.

United States of America, }
vs. } In Equity, Bill, etc.
O. M. Carter, et al. }

Application of H. G. Stone, Solicitor for O. M. Carter, for allowance of additional counsel fees on account.

Answer of the United States, by Marion Erwin, Special Assistant to the Attorney General.

In answer to the above application; in view of the allowances heretofore made by the Court to the said solicitor for defendant on account of fees; and in view of the fact that the case has been submitted on argument, and now only awaits the action and decree of the Court on the merits of the case;

It is respectfully submitted that the allowance of further counsel fees should await the decree of the Court on the merits of the case.

January 12, 1907.

MARION ERWIN,
Special Assistant to the Attorney General, Solicitor for Complainant.

And on to-wit: the 14th day of January, 1907, in the December term, 1906, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaas, judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$2,500 ON ACCOUNT OF FEES, AND TO SELL CERTAIN BONDS.

United States of America, }
 vs. }
Oberlin M. Carter, *et al.* }

On consideration of application of H. G. Stone, Solicitor for Oberlin M. Carter, *et al.*, in the above stated cause, it is ordered by the Court that Max H. Whitney, receiver in the above stated cause, pay over to H. G. Stone the sum of \$2,500.00, as an allowance to him on account of solicitor's fees.

It is further ordered that said receiver be authorized to sell \$3,000.00 par value of Kentucky Central bonds, at the market price thereof, for the purpose of disbursement on this and such orders of the Court as have been or may hereafter be entered in said cause.

And on to-wit: the 7th day of August, 1907, came the complainant, by Marion Erwin, its solicitor, and filed in the clerk's office of said court an answer to notice of defendant's counsel of application for allowance of fees, in the words and figures following, to-wit:

ANSWER OF UNITED STATES TO NOTICE OF APPLICATION OF H. G. STONE FOR ALLOWANCE OF FEES, AND NOTICE.

In the Circuit Court of the United States for the Northern District of Illinois, Northern Division.

The United States of America }
 vs. } In Equity. Bill, &c.
Oberlin M. Carter, *et al.* }

And now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and says:

That complainant's counsel has been served by mail with a notice that on the 7th day of August, 1907, at the Chambers of

His Honor, Judge Christian C. Kohlsaatt, in Chicago, Hon. H. G. Stone, principal counsel for defendants, would make an application for an allowance to himself on counsel fees. And for answer to said notice this complainant says:

First: That it has not been served with any petition to the Court setting forth the grounds upon which allowance is asked, nor of the nature of the services rendered, nor of the amount of allowance asked or to be asked, nor otherwise stating any facts which would entitle the defendant or his counsel to ask any allowance in advance of a decision of the Court on the merits of said cause. By reason of which this complainant is unable to answer to any special facts upon which the movant may intend to rely for obtaining such allowance at this time.

Second: That it appears from the record of said cause that upon special petition setting forth defendant's claim of services rendered pendente lite, the Court has heretofore made and allowed to said H. G. Stone amounts which aggregate large sums, and which complainant says were intended to cover all allowances up to final decision on the merits of the cause, when the full value of the compensation of said counsel was to be determined on the whole case.

Third: That the cause having been finally argued and submitted to the Court and having been taken under consideration by the Court for several months, there is every reason to believe that the final decree on the merits of the cause will be rendered by the Court within the next sixty days, and it would not promote the orderly conduct of said cause for the Court to go at this time into the merits of further allowances to defendant's counsel in advance of such decision on the merits of the cause. And that in view of the large allowances already made, the Court should be fully advised and come to a conclusion on the merits of the cause before making additional allowances.

Fourth: Wherefore this complainant says that at this time no further allowance to said defendant's counsel should be made by the Court on account of fees, and objects thereto.

MARION ERWIN,

Special Assistant to the Attorney General, Complainant's Solicitor.

NOTICE.

In the Circuit Court of the United States. Northern District
of Illinois, Eastern Division.

United States of America }
vs. }
Oberlin M. Carter *et al.* }

To Marion Erwin,

Solicitor for Complainant:

You Will Please Take Notice, that on Wednesday, August 7th, 1907, I shall apply to his Honor Christian C. Kohlsaat, Circuit Judge of the above Court, at his Chambers in the Federal Building, Chicago Illinois, at 10 o'clock A. M. or as soon thereafter as counsel can be heard for an order directing the Receiver herein, Max H. Whitney, to pay to me, out of the funds in his hands, the sum of \$2500.00, on account of my services in the above entitled cause, in accordance with the Contract of November 6th, 1901.

Dated, Chicago, July 26, A. D. 1907.

HORACE G. STONE.

Endorsement. Answer to notice. Filed Aug 7, 1907 H. S. Stoddard Clerk.

And on to-wit: the 7th day of August, 1907, in the July term, 1907, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY H. G. STONE \$1,500 ON ACCOUNT OF
FEES, AND TO SELL SECURITIES.

United States of America, }
—vs— } Order.
Oberlin M. Carter *et al.* }

On due consideration of the petition of Horace G. Stone for an allowance on account of solicitor's fees in the above entitled cause, under the Contract of November 6, 1901,

It Is Ordered, that the said petition is granted, and the Receiver herein, Max H. Whitney, is ordered to pay said sum of Fifteen Hundred (\$1500.00) dollars to said Horace G. Stone as aforesaid, out of any moneys in his hands as such Receiver, and in case that said Receiver considers it necessary, he may sell one or more bonds in his hands for the purpose of realizing said money.

And on towit: the 1st day of April 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO PAY R. H. WYMAN, REPORTER, \$226.85.

United States of America,	} No. 25,980.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

It is ordered by the Court that Richard H. Wyman, Court Reporter in the above stated cause, be paid by the Receiver out of the funds in his hands, the sum of Two Hundred Twenty-six Dollars and Eighty-five Cents (\$226.85) in full for his services and expenses to this date; the said amount to be adjusted as costs between the parties.

Consented to April 1 1908.

MARION ERWIN

And on towit: the 1st day of April 1908 came Horace G. Stone and filed in the clerks office of said court a petition in the words and figures following towit:

PETITION OF H. G. STONE FOR ALLOWANCE OF
FEES.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25980.
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

Petition of Horace G. Stone for Allowance of Solicitor's
Fees Under Contract of November 6, 1901, Approved by the
Court.

To the Hon. Christian C. Kohlsaat,
Circuit Judge of said Court:

Your petitioner Horace G. Stone, respectfully shows and states to your Honor as follows: On November 6, 1901, a contract was made between the complainant of the one part and the defendants Oberlin M. Carter, Lorenzo D. Carter and I. Stanton Carter of the other part, by which it was agreed among other things, that there should be paid out of the money in controversy, the solicitor's fees of the chief counsel for said Oberlin M. Carter, regardless of whether said Carter won or lost in said case. Said contract being in part as follows:

"The fees, traveling expenses and other expenses of Oberlin M. Carter's Chief Counsel and of his attorney at Chicago, to be fixed and allowed by the Court."

Subsequent to the making of said contract it was approved by the Court in the above entitled cause.

Among other things agreed in said contract, it was provided in effect, that the litigation as to all the money and property in controversy between the complainant and the defendants in other suits pending in other courts of the United States should be litigated and settled in the above entitled cause, so that all said money and property in litigation here

and elsewhere, was put under the exclusive jurisdiction of this court. The amount claimed by the complainant in all said suits was about \$700,000. and all thereof was in litigation in the above entitled cause, as the contract provided that the final order in the above entitled cause should be the final order in all said suits. Said contract did not limit the solicitor's fees of said chief counsel to any per cent. of the amount involved, nor did it fix any maximum amount for said fees, but it left it to said chief counsel to determine what work he thought necessary to defend said suits, and agreed that he should be paid in full therefor out of the money in controversy.

Your petitioner further says: I have been chief counsel for the defendant Oberlin M. Carter in said cases, since October 5, 1901, a period of about 2,000 working days. As soon as I commenced I found that the important transactions involved were so numerous and so complicated, that I must give it practically all of my time, which I did. I often worked at night on it and overtime, and what I did outside the Carter case was more than offset by the night work and overtime work. So that I have spent substantially as much as 2,000 days regular work on these cases. The complainant desired to introduce the testimony and original exhibits before the Board of Engineers and before the Court Martial and before the Court at New York in the Removal Proceedings against Greene & Gaynor, and I had to go over all of those extensive records with great care, and then all of such testimony and evidence was admitted and used in the present cases, except the testimony of two witnesses, and it had to be carefully considered in handling the present cases, and with the new evidence taken in the present cases, the court estimates the record as "covering about 50,000 pages," and the court says that so much work was done upon it by both sides "that the court is relieved of the burden of several years of reading." I was the only attorney for the defendants who went through the entire record, and took the responsibility of selecting such parts of it as ought to be particularly presented to the court, and to do that on a record of 50,000 pages required great labor and careful attention. The questions at issue involved great and complicated works of harbor engineering and involved the most complicated questions of expert accounting with regard to vast sums covering a period of ten years, all of which questions I had

to study out with great care and thoroughness and with the very best efforts which could be brought to bear, so that I could examine the witnesses and present it to the court intelligently and properly.

In taking evidence in the case I saved the complainant much labor and expense and expedited matters by admitting in evidence *ex parte* affidavits obtained by the complainant from numerous sources, instead of insisting as I might, on taking testimony in the usual way, and at all times I have tried to expedite the case as much as possible. The outcome of the case justified all the labor which I put upon it, and the result thereof was of inestimable value to the principal defendant, Oberlin M. Carter.

The case was tried before the court in September and October, 1906, and the labor and strain in such a trial and in the preparation for it was so great that a long rest thereafter was absolutely necessary. Then in 1907 the court asked each side to submit what was equivalent to a condensed reargument of the entire case, and after that was done a decision was expected and I had to review the case preparatory to proceedings after the decision, and besides with a record of 50,000 pages, to throw it off my mind and take up other important work was practically impossible, and not even advisable, when a decision might be rendered any day, or the court might ask for additional abstracts, etc., and so I was compelled to give my time to this case from the trial until now, except a few trifling matters. The complainant realized the necessity of constant attention here by keeping Mr. Johnson here most of the time.

As to the value of my services per day, I realize that it was for a long period and hence that the rate per day should be less than for a short period, but the necessities of the work required me to throw aside practically all business which would have naturally come to me. My receipts from my profession for the five years ending about the time I took up the present cases were considerably more than an average of \$15,000 per year, i. e. \$50 per day. Since then such receipts have been very little comparatively, because I could not take other business and do my full duty to the present cases.

Under such circumstances, I consider \$50 per day only one-half what my services were worth, considering my practice when I commenced the present cases, and the loss of that practice and the frightful strain for the past six years in carrying a record of 50,000 pages with the prestige and force

238 *Petition of H. G. Stone for Final Compensation.*

of the Government against me, and the decisions of the Board of Engineers and Court Martial and the President, and the decisions in the Greene & Gaynor cases against me; but I am willing to take \$50 per day for said 2,000 days if I get it without a contest, but if there is a contest I claim \$100 per day and ask leave to produce witnesses as to the full value of my said services and as to the reasons which compelled me to do a large amount of extra work in said cases.

Respectfully submitted,

HORACE G. STONE.

Dated Chicago, February 19, 1908.

Endorsement: Filed April 1, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 9th day of April, 1908, came the said H. G. Stone and attached to said petition and filed in the clerk's office of said Court certain affidavits in the words and figures following, to-wit:

AFFIDAVIT OF H. G. STONE.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States	}	Gen. No. 25980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

State of Illinois,	}	ss.
Cook County.		

Horace G. Stone, being first duly sworn on oath deposes and says, that he rendered all of the services described in the foregoing petition, dated February 19, 1908, that he did so in pursuance of and relying upon said contract of November 6, 1901, which contract and the order of court ratifying and approving the same this affiant refers to and makes a part hereof.

This affiant further says, that it was necessary in order to properly defend said case, to render all the said services described in said petition, and this affiant did render said services in good faith, in the full belief that he was doing his duty in the premises.

This affiant further says that the fair value of said services

was at least one hundred thousand dollars, which said amount is justly due and owing to this affiant, less seventeen thousand five hundred dollars heretofore received by this affiant on account of said services.

HORACE G. STONE.

Subscribed and sworn to before me this 9th day of April, A. D. 1908.

(Seal)

MARY L. DOWNES,
Notary Public.

AFFIDAVIT OF W. W. GURLEY.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States
vs.
Oberlin M. Carter, *et al.* } Gen. No. 25,980.

State of Illinois, }
County of Cook. } ss.

William W. Gurley being first duly sworn on oath deposes and says:

That he is now and for over 30 years has been a practicing lawyer in the City of Chicago, and for at least the last 20 years of that period he has been familiar with the amount and value of solicitors' fees in important litigation. Deponent further says:

I have read the petition dated February 19, 1908, in the above entitled cause, of Horace G. Stone for solicitor's fees under the said contract of November 6, 1901. I have personal knowledge of much of Mr. Stone's work in the said cause, as we occupied the same law offices for the eleven years ending May 1, 1906, and we have occupied offices in the same building since that date. I have known Mr. Stone intimately for over a third of a century and am familiar with his law practice during that period, as we have mutually discussed our cases and have had many important cases together. From such mutual discussion of the Carter case and from other sources I am generally familiar with his work in said Carter case, and with the facts stated in his said petition, and in my opinion he is entitled to receive either \$50 per day from Oc-

tober 5, 1901, to the present time, i. e., about \$15,000 per year, or if his services are reckoned by the day for each day actually given to said case, then his said services are worth \$100 per day. From my knowledge of the case I think Mr. Stone was fully justified in giving all his time to said case from October 5, 1901, as the record of 50,000 pages and the great and intricate questions involved and other matters of importance, made it necessary for him, in order to do his duty to his client, to practically lay aside all other business and devote his entire time to said case.

WILLIAM W. GURLEY.

Subscribed and sworn to before me this 10th day of March, 1908.

WILL H. CLARKE,
Notary Public.

(Seal)

AFFIDAVIT OF JOHN J. HERRICK.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States	} Gen. No. 25980.
<i>vs.</i>	
Oberlin M. Carter, <i>et al.</i>	

State of Illinois,	} ss.
County of Cook.	

John J. Herrick, being first duly sworn, on oath deposes and says:

That he is now, and for over thirty-six years past has been, a practicing lawyer in the City of Chicago, and for at least the last thirty years of that period, he has been familiar with the amount and value of attorneys' fees in important litigation; that he has read the petition, dated February 19, 1908, in the above entitled cause, of Horace G. Stone, for attorney's fees under the said contract of November 6, 1901; that he has also read the affidavit of William W. Gurley in said cause, subscribed and sworn to by said Gurley on the 10th day of March, 1908; that he has also had a personal acquaintance with said Stone for many years past, and has a personal knowledge as to the ability, and character of the work, of said Stone as an attorney, by reason of

such acquaintance and his professional relations with said Stone, and from briefs prepared by said Stone which he has had occasion to read; that, assuming that the facts as to the nature and character of the legal services rendered by said Stone are correctly set forth in said petition, affiant is of the opinion that said Stone is entitled to receive either \$50 per day from October 5, 1901, to the present time, i. e. about \$15,000 per year, or if his services are reckoned by the day for each day actually given to said cause, then his said services are worth \$100 per day.

JOHN J. HERRICK.

Subscribed and sworn to before me this 11th day of March,
A. D. 1908.

FRANK JULIUS SMITH,
Notary Public.

AFFIDAVIT OF N. C. SEARS.

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

Nathaniel C. Sears being first duly sworn deposes and says, that he has been a practicing lawyer in the City of Chicago for more than thirty years last past, except for such part of said period as was covered by his service on the Bench of the Superior Court of Cook County, or the Appellate Court for the First District of Illinois; that he is familiar with the customary and reasonable charges of practicing attorneys in large and important cases in this jurisdiction; that he has read the petition, dated February 19, 1908, of Horace G. Stone, Esquire, for attorney's fees in the above entitled cause under contract of November 6, 1901; that he has also read the affidavit of William W. Gurley, Esquire, filed in support of said petition; that he has had a personal acquaintance with the said Horace G. Stone, Esquire, for many years past and has personal knowledge of the ability of the said Horace G. Stone, Esquire, as a lawyer; that he has been engaged in the above entitled cause as attorney of said Oberlin M. Carter in Chicago in assisting the said Horace G. Stone,

Esquire, chief counsel of the said Oberlin M. Carter in said cause; that he has thus become familiar to a considerable extent with the nature, character and extent of the legal services rendered by said Horace G. Stone, Esquire, in said cause; from the said knowledge of affiant, and assuming in connection therewith that the facts as to the nature, character and extent of the legal services rendered by the said Horace G. Stone, Esquire, are correctly set forth in his said petition, this affiant is of opinion that a customary and reasonable charge for the legal services of said Horace G. Stone, Esquire, would be not less than One Hundred Dollars (\$100) per day for the time actually expended in such legal services, and that a charge of \$15,000.00 per year, that is to say \$50.00 per diem, covering the entire time of the engagement of said Horace G. Stone, Esquire, in said litigation from October 5, 1901, would be an exceedingly reasonable charge for said services, and that in the opinion of affiant, said Horace G. Stone, Esquire, is entitled to receive at least the above specified amounts as fees.

NATHANIEL C. SEARS.

Subscribed and sworn to before me this 16th day of March,
A. D. 1908.

FRED L. BLACKINGTON,
Notary Public.

(Seal)

AFFIDAVIT OF JOHN S. MILLER.

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25,980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		
State of Illinois,	}	ss.
County of Cook.		

John S. Miller, being first duly sworn, on oath says, that he is now and for upwards of thirty years last past has been a practicing lawyer in the City of Chicago, in said County, District and State, and that he is familiar with the reasonable and customary charges of practicing attorneys in said City of Chicago in cases of importance; that he has

read a copy of the petition in this case of Horace G. Stone, dated February 19, 1908, for the allowance of solicitor's fees, and has also read the affidavits of Messrs. Gurley, Sears and Herrick in support of said petition; that affiant has for many years had personal acquaintance with the said Horace G. Stone and with his standing at the bar of Chicago; that from the facts known to affiant as aforesaid, and those appearing in the said petition, this affiant is of the opinion that a reasonable and customary charge for the professional legal services of said Horace G. Stone in the case and matter therein referred to would be one hundred dollars per day for the time actually expended by him in such legal services, and that a charge of fifteen thousand dollars per year for the entire time of the engagement of said Stone in said litigation from October 5, 1901, to the termination thereof would be a very reasonable and moderate charge for said services.

JOHN S. MILLER.

Subscribed and sworn to before me this 18th day of March, A. D. 1908.

R. E. SCHREIBER,
Notary Public.

AFFIDAVIT OF JOHN P. WILSON.

In the Circuit Court of the United States, for the Northern District of Illinois.

United States	}	Gen. No. 25980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

State of California,	}	ss.
County of Los Angeles.		

John P. Wilson, being first duly sworn, on oath deposes and says:

That he is now, and for over forty years past has been, a practicing lawyer in the City of Chicago, and that for many years he has been familiar with the amount and value of attorney's fees in important litigation; that he has read the petition, dated February 19th, 1908, in the above entitled cause, of Horace G. Stone, for attorney's fees under the said contract of November 6th, 1901; that he has also read the

affidavit of William W. Gurley in said cause, subscribed and sworn to by said Gurley on the 10th day of March 1908; that he has also had a personal acquaintance with said Stone for many years past and has a personal knowledge as to the ability and character and the work of said Stone as an attorney; that, upon the assumption that the facts as to the nature and character and amount of the legal services rendered by the said Stone are correctly set forth in said petition, affiant is of the opinion that fifteen thousand dollars per year from October 5th, 1901, to the present time would be no more than a reasonable compensation for his professional services in the above entitled cause.

JOHN P. WILSON.

Subscribed and sworn to before me this 26th day of March, A. D. 1908.

(Seal)

S. G. CRUICKSHANK,

Notary Public in and for the County of Los Angeles, State of California.

And on to-wit: the 8th day of April, 1908, came the United States by Marion Erwin, its solicitor, and filed in the clerk's office of said court an answer to the petition of H. G. Stone, filed April 1, 1908, for allowance of fees, in the words and figures following, to-wit:

ANSWER OF UNITED STATES TO PETITION OF H. G. STONE FOR ALLOWANCE OF FEES.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States

vs.

Oberlin M. Carter, *et al.*

} Gen. No. 25980.

Petition of Horace G. Stone for allowance of solicitor's fees.
Answer of the United States to said petition.

And now comes the United States, by Marion Erwin, special assistant to the attorney general, and for answer and response to the petition of Horace G. Stone in the above stated matter says:

(1)

Respondent admits that there was an agreement made between complainant on the one part and the defendants,

Oberlin M. Carter, Lorenzo D. Carter and I. Stanton Carter, on the other part, on November 6, 1901, which was reduced to writing, approved by the Court, and made a part of the record of the above entitled cause, and it refers to said written agreement for a more accurate statement of the terms thereof and the construction which should be placed upon it than is stated in said petition.

Respondent admits that said H. G. Stone has been chief counsel for the said Oberlin M. Carter from about October 5, 1901, to the present time in the civil suits, brought by the government, referred to in said agreement.

(2)

Respondent denies that there has been such full compliance on the part of said Oberlin M. Carter, Lorenzo D. Carter, and I. Stanton Carter with the terms of said agreement of November 6, 1901, as entitles the said defendants or their counsel to invoke the said clause of said agreement numbered "(8)", under which said petition is brought: In this, that said agreement in its second paragraph provided among other things:

"(2) That as to the assets claimed by the Government as assets into which it charges the funds intrusted to Oberlin M. Carter as disbursing officer was diverted, with the proceeds, income and re-investments thereof where the form of the investments have been changed, and which assets have or may be hereafter traced into the possession, custody or control of said defendants and have not heretofore been bona fide disposed of by them and therefore beyond their control, shall be forthwith by the said defendants turned over to the receiver appointed in this cause."

And the fourth paragraph provided

"(4) L. D. Carter and I. Stanton Carter will forthwith dismiss their demurrers and file answers disclaiming any personal interest in the aforesaid assets in controversy in this litigation, including the real estate on 8th Avenue, New York, and at Orange, New Jersey, except as to the two bonds claimed by I. S. Carter as above."

(Another clause of the agreement provided for the determination by the Court as to whether I. S. Carter purchased the two bonds with his own funds.)

That the said agreement in the eighth paragraph provided among other things:

"(8) From said fund to be accounted for to the receiver there shall be paid:

(a) The fees, traveling expenses and other expenses of Oberlin M. Carter's chief counsel and of his attorney at Chicago, to be fixed and allowed by the Court. The importance of the case, and the means and methods taken to bring the same to a just determination speedily, and not the length to which the proceedings may be protracted, to be considered as the elements of merit in fixing such fees."

That said agreement by its ninth paragraph provided:

"(9) The assent of the United States to paragraphs numberer "(1)", "(7)" and "(8)" of this agreement, is predicated upon the understanding that the said defendants will turn over to the receiver at least substantially all the assets turned over to I. Stanton Carter and L. D. Carter by J. H. Paul and R. E. Westcott and James Bragg or their proceeds and re-investments, except such as has been, prior to the receivership, bona fide paid out or pledged by them for attorneys' fees or as expenses in defense of Carter, or expended by them legitimately in the handling of said properties, or which has not already been taken possession by the receivers in this cause."

(3)

That prior to the agreement of November 6, 1901, there had been already tied up in the hands of the receivers in the auxiliary suits in the other districts assets claimed by the Government aggregating at cost and proceeds in money (See Decree March 21, 1908) as follows:

Southern District of New York under order of July

30, 1901 \$29,294.71

District of New Jersey under order of July 31,

1901 52,567.13

Southern District of West Virginia under order of

September 16, 1901..... 190,571.58

And by injunction against the companies in Southern District of Georgia under bill filed and order of August 6, 1901:

Propellor Towboat Company stock

cost \$12,275.00

Savannah Lighterage & Transfer

Company stock cost..... 1,450.00

Savannah Brewing Company stock

cost 2,188.50 15,913.50

\$288,346.92

And respondent says that at the time of the agreement of November 6, 1901, it was well known to both parties that the complainant had knowledge of the fact that R. E. Westcott, J. H. Paul and James F. Bragg of New York had acted as agents for Oberlin M. Carter in the handling of a large part of the assets in controversy, and had remitted rents and proceeds of the real estate to I. Stanton Carter and L. D. Carter, and had on or about May 23, 1900 turned over stocks, bonds and other choses in action claimed by the complainant aggregating at par \$349,475.00 to O. M. Carter's two brothers, Ditson P. Carter of the Southern District of West Virginia and defendant, I. Stanton Carter of Chicago. The receipt of said I. Stanton Carter and Ditson P. Carter dated May 23, 1900, being in evidence as Exhibit 3 before Booth, special master, with the affidavit of J. H. Paul dated October 15, 1901, thereto attached, which receipt and affidavit had been by complainant exhibited to this Court in the hearing had on October 28, 1901, before the Court on a motion to appoint a special master to take of transcripts of the accounts of Frank P. Blair in certain banks in Chicago, for use in the rule then pending before the Court against I. Stanton Carter and L. D. Carter for contempt of court for failure to turn over assets to the receiver, and respondent says that the said agreement is to be interpreted in the light of the then existing conditions. That of said securities described in said receipt of May 23, 1900, the complainants had already tied up in other districts all but \$161,275.00 par value of the said securities and choses in action.

That it was to bring into the hands of the receiver the balance of the aforesaid assets and proceeds and reinvestments thereof claimed by the Government as described in Exhibit E to complainant's bill, together with \$23,000 proceeds of a mortgage on the 8th Avenue, New York, property, charged to have been received by I. Stanton Carter as described in paragraph (9) of the bill, some \$3,000 rents collected by I. Stanton Carter through J. F. Bragg from the 8th Avenue, New York, property, and Orange, N. J. property as described in paragraph (10) of the bill, and some \$950.00 of coupons collected by I. Stanton Carter as described in paragraph (11) of the bill, some \$2,200.00 of rents collected by L. D. Carter through J. F. Bragg from the 8th Avenue, New York, property, and Orange, N. J., property, as described in paragraph (12) of the bill, that the rule for contempt against the defendants, I.

Stanton Carter and L. D. Carter for failure to turn over assets to the receiver, was then pending upon the calendar of this Court, the said assets at a maximum not exceeding \$190,425.00.

(4)

And respondent says that the essence of the assent of the United States to the 7th and 8th clauses of the agreement, as stated in the 9th paragraph of said agreement, was that the assets claimed by the Government, in its said suits, which were turned over to I. Stanton Carter and to L. D. Carter by J. H. Paul, R. E. Westcott and James Bragg, and the proceeds and re-investments thereof, in the custody or control of said defendants, and which had not therefore been bona fide disposed of by them and therefore beyond their control, should be forthwith by the said defendants turned over to the receiver, thus relieving the Government of the expenses, delays, and the incidents attendant upon judicial proceedings to force from the defendant into the possession of the receivers, the assets which they were withholding, and at the same time to secure said assets to answer the final judgment of the Court.

And respondent says that by the 9th clause of the agreement, it is made plainly to appear that the consideration to the United States for its assent to clause 8 of the agreement was the turning over to the receiver forthwith the aforesaid assets and proceeds aggregating some \$190,425.00 or so much thereof as had not been bona fide paid out or disposed of and so placed beyond the power, custody and control of said defendants.

And deponent says that the said defendants did not in fact forthwith turn over the said assets to the receiver which by their said agreement they undertook to do, but on the contrary they withheld a large part of said assets from the receiver, so that complainant was forced to obtain an order of reference to Special Master Booth in his cause, to take evidence and report on the assets so withheld, and to go through extended judicial proceedings lasting through many months, before under the rulings of the master and the decree of the Court the said I. Stanton Carter and L. D. Carter surrendered to the receiver \$21,000.00 of Kentucky Central bonds claimed specifically in the bill as a re-investment of the proceeds of said assets and which by said agreement they were forthwith to surrender to said receiver, free from

all claims of said I. Stanton Carter and L. D. Carter. That instead of filing answers to the bill as provided in the 4th paragraph of the bill disclaiming any personal interest in the aforesaid assets in controversy the said I. Stanton Carter and L. D. Carter set up before the said Master alleged liens for salaries alleged to be due them from O. M. Carter aggregating \$22,000.00 against the assets in their hands, and continued to contend for the same until the final decree of this Court on the merits.

That in addition the said defendant, I. Stanton Carter has never yet paid over the sum of \$11,454.18 of the proceeds of said assets so found by the Special Master and by the decree of this Court to have gone into his hands and never accounted for from the funds which by the agreement and orders of the Court he was to turn over to the receiver, in addition to \$6,750.00 credited by the Master as salary. And in addition the said defendant, L. D. Carter, has never yet paid over the sum of \$7,577.04 of the proceeds of said assets so found by the Special Master to have gone into his hands and never accounted for, but as against which under the finding of the special master he was allowed to offset a salary claim due him by said O. M. Carter. By reason of the premises respondent says that the said I. Stanton Carter and L. D. Carter have not complied with the conditions entitling the defendants and their counsel to the benefits of paragraphs (7) and (8) of said agreement of November 6, 1901. But instead thereof a very large part of the claims for fees now made by the said chief counsel for the defendants for fees, is for services rendered in fighting the delivery to the receiver of said assets which were by said agreement forthwith to be delivered to the receiver, and in asserting personal claim in behalf of said L. D. Carter and I. Stanton Carter against said assets, thereby forcing complainant to proceed to judicial process to obtain through long delays, trouble and expense that which by said agreement was to be forthwith voluntarily surrendered, as a consideration for the provisions of paragraphs (7) and (8) of said agreement.

And respondent says that in the interlocutory decree of this Court, rendered January 7, 1904, on exceptions to said Special Master's report, this Court decreed that when I. Stanton Carter and L. D. Carter should surrender to the receiver the Kentucky Central bonds and coupons thereon, and the Michigan Telephone Company bond and coupons thereon which they had withheld, that "They will have sufficiently

accounted to the receiver as far as they should be required on this interlocutory proceeding for the assets remaining in their hands to put in operation clauses one (1), seven (7) and eight (8) of the agreement of November 6, 1901."

But said decree expressly reserved for the final decree on the merits the questions raised by both sides by exceptions to the Master's report, as to whether there had been a full accounting by said I. S. Carter and L. D. Carter for the assets for which they were accountable under said agreement and the orders of the court and the question of their right to claim salaries against the funds turned over to the receiver or for which they might be held accountable. That by reason of the premises, respondent says that this Court has not yet decided whether there has been such a full compliance with the terms of the agreement of November 6, 1901, as entitles the defendants to invoke paragraphs (7) and (8) of the said agreement.

(5)

And this respondent says that in any event as it is advised it would be unconscionable to charge against any part of the fund decreed to belong to complainant the attorneys fees of defendants' counsel in the extended judicial proceedings incident to the reference to Special Master Booth and growing out of the same, made necessary by the refusal of the defendants L. D. Carter and I. S. Carter to turn over, as provided by paragraphs (2) and (9) of said agreement, all the assets they so agreed to turn over, especially since as a result of said proceeding they were compelled at the end of the proceeding to surrender \$23,000.00 of bonds held back from the receivers, and \$11,454.18 of said assets were held by the master and this court not yet accounted for by I. Stanton Carter.

(6)

And for further response to said petition this respondent says that of the said assets aggregating \$190,425.00 which, or as much of which as had not been bona fide paid out or disposed of so as to be beyond the control of the said defendants, which it was contemplated by said agreement of November 6, 1901, the said defendants were to turn over to the receiver before the assent of the United States to paragraphs (7) and (8) of said agreement was to be binding, the said defendants turned over to the receivers in said cause assets as follows:—

		Par Value	Cost
1901	(In Southern Dist. of Illinois)		
Nov. 11th	10 Missouri Pacific bonds	\$10,000	11,396.25
	10 Gen. Reading R. R. "	10,000	8,703.75
	10 Wabash 2nds "	10,000	10,357.50
	10 Peoria & East. "	10,000	9,012.50
	15 Ches. & Ohio 4½ "	15,000	14,981.25
	5 Hocking Valley "	5,000	4,987.50
	Note of C. W. Colehour	11,660	11,000.00
		<hr/>	<hr/>
		\$71,660	\$70,438.75

Defendants attorney, W. W. Mackall of Savannah, Ga., turned over to the receiver of the Court for that District from assets not tied up by the suit previous to the agreement of November 6, 1901—

		Par Value	Cost
1901			
Dec. 7th	5 shares Cotton Mill stock	\$ 500.00	\$ 532.50
	25 " Seaboard Co. "	2,500.00 (Estimated)	2,500.00
	1 " Greenwich Park Assn.	100.00	100.00
1902			
Feb. 15	Proceeds of Hunting Island investment—	\$ 6,500.00	\$ 5,760.66
	" of Thomas Martin note and interest	8,284.03	6,000.00
		<hr/>	<hr/>
		\$17,884.03	\$14,893.16

Thus making in all brought into Court by assent of the defendants, not already tied up prior to the agreement of November 6, 1901:

	Par Value	Cost
Assets	\$89,544.03	\$85,331.91

There was also turned over to the receivers by or through W. W. Mackall, attorney for O. M. Carter, certificates for the following stocks which stocks were previous to the agreement of November 6, 1901, tied up by injunction against the companies issuing same:—

		Par Value	Cost
1901			
Dec. 7	25 shares Savannah Brewing Company stock	\$2,500.00	\$ 2,188.50
	150 " Towboat Company stock	15,000.00	12,275.00
	15 " Savannah Lighterage "	1,500.00	1,450.00
		<hr/>	<hr/>
		\$19,000.00	\$15,913.50

There was also subsequently paid over to the receivers by defendants other than O. M. Carter, L. D. Carter, and I. S. Carter, certain collections from assets tied up by injunction prior to the agreement in the suits instituted by the complainant, to wit:—

From Bierne Gordon loan secured by Life Insurance Policy, tied up July 31, 1901 by injunction in New York against Ins. Co. (Notes of Bierne Gordon turned over by Mackall to receiver Dec. 7, 1901)

1902				Cost
Feb. 5	Collection by Receiver in Georgia	\$4,884.33		
1903				
Mar. 31	“ “ “ “ New York	5,437.63		

\$10,321.96 \$10,000.00

That as a result of the extended judicial proceedings, resisted by the defendants before Special Master Booth and before the Court as hereinbefore set forth, the defendants turned into hands of the receivers additional assets theretofore withheld, as follows:

		Par Value	Cost or Proceeds
(After findings of Special Master Booth)			
1903			
Mch. 13	10 Kentucky Central bonds	\$10,000.00	\$9,944.93
1904	(After interlocutory decree of this court of Jan. 7, 1904)		
Jan. 8	1 Ky. Central bond	1,000.00	997.56
	1 Mich. Tel. bond (certf.)	1,000.00	1,019.45
“ 13	11 Ky. Central bonds	11,000.00	10,939.42
“ 15	Proceeds coupons on Mich. Tel. bond and Ky. Central bonds collected by I. S. and L. D. Carter after Nov. 1, 1901 withheld by them	1,825.00	1,825.00
		<hr/>	<hr/>
		\$24,825.00	\$24,726.36

Thus making of the said assets of every character brought into the hands of the receivers from all sources after the agreement of November 6, 1901, in the aggregate,

Par Value	Cost or Proceeds
\$142,890.99	\$135,971.77

(7)

And for further answer to said petition, this respondent says that even if the Court shall hold that there had been such compliance on the part of said defendants with the requirements of the agreement of November 6, 1901, as entitles them and their chief counsel to be paid out of the funds in the hands of the Court in this cause, as a consideration for turning over to the receivers the \$190,425.00 of assets or what remained of it in their control not already in the hands of the receivers or tied up by injunction in other hands as aforesaid, that whether the allowance of fees is considered in connection with the \$85,331.91 cost value of assets actually turned over to the receivers, in pursuance of the agreement without contest, or in connection with the additional \$24,726.36 cost value of assets forced from the defendants after said extended judicial proceeds, or in connection also with the additional assets aggregating less than some \$25,913.50 at cost as aforesaid tied up in the hands of other defendants prior to the agreement, and received in kind or proceeds afterwards, that the claim of said Chief Counsel for defendants for \$100,000.00 attorneys fees for himself is exorbitant, extravagant and as respondent is advised, unconscionable, and the surrounding circumstances show could never have been in contemplation of the parties at the time of the agreement. That said agreement expressly provides that said allowances were to be "from said fund to be accounted for to the receiver."

(8)

And for further response to said petition, this respondent says that the basis on which the said petitioner has estimated what ought to be his compensation viz. 2,000 working days, covering every working day from October 5, 1901 to final decree, at \$50 per day, is not only unfair because the rate per day for such alleged continuous service is exorbitant, and the time alleged to have been devoted to the work, was not required for its proper performance, but that the very clause of the agreement itself which is invoked by the petitioner provides that the elements of merit in the fixing of such fees by the Court, should not be "the length to which such proceedings may be protracted."

Respondent says that at the time of the making of said agreement of November 6, 1901, the said Oberlin M. Carter

was serving a term in the penitentiary (which was not completed until about the last of November, 1903). That it was well known to all parties to the agreement that the special counsel of the United States in charge of these civil suits, had also in charge proceedings (then pending in the Supreme Court of the United States) for removal from New York to Georgia of Benjamin D. Greene, John F. Gaynor and others, charged in indictment with conspiracy with said Oberlin M. Carter in the contract work out of which these civil suits grew, and also that said attorney for the complainant would have charge of the said criminal prosecutions in Georgia should said removal proceedings be successful, and that Carter himself as stated in clause (b) of said paragraph (8) of said agreement might be tried on the said indictment in Georgia. That the provision in clause (a) of paragraph (8) of said agreement providing that the length of time to which the proceedings might be protracted was not to be considered as the element of merit was placed therein among other things, because it was expected that there might be and probably would be extended interruptions in the pressing of said civil proceedings, both by reason of said Carter's confinement in the penitentiary and of the necessity of conducting the other proceedings on the part of the Government heretofore referred to, and the fact that the same large amount of documentary evidence required in the civil causes, had to be used in the said criminal prosecutions.

Respondent says that the following is an epitome from the records of the days on which proceedings were had before the court and in taking testimony, etc., before the masters, examiners and commissioners in said cause, on which appearances were made by said H. G. Stone.

1901 October 22; return day for rule for permanent receiver, also of rule for contempt.

“ 28; order by consent continuing receivership pendente lite subject to notice for dissolution.

“ “ 28; there was a hearing before this Court on motion of complainant for a master to take off the accounts of F. P. Blair in certain banks in Chicago, for use on hearing of rule for contempt pending against I. S. and L. D. Carter for failure to turn over assets.

Respondent says that the answers of said defendants to said civil suits were filed February 1, 1902. Replication was filed March 1, 1902. That in February, 1902, the said Benjamin D. Greene and John F. Gaynor having been put to plead to said indictment in Georgia, the said Special Attorney of the United States in said civil suits, being also in charge of said prosecutions, about the latter part of said month forfeited their bonds and fled to Canada.

That said Special Attorney of the United States was sent by the Attorney General of the United States to Canada to effect the extradition of said fugitives, and was engaged in that special work almost continuously until about September, 1902, by reason of which orders were passed by agreement of parties extending the time for taking testimony.

That on October 15, 1902 on motion of Complainant's solicitor an order was granted referring to Booth, special master, the questions raised by the complainant as to the failure of I. S. and L. D. Carter to account for the assets which they were required to turn over to the receiver under the orders of the Court and the agreement of November 6, 1901, and the hearings were had and testimony was taken before Special Master Booth October 21, 23, 24, 25, December 2 and 9, 1902, when the taking of evidence before said Master was closed. On Dec. 20, 1902 a stipulation of record was entered into between the parties for the use in the civil proceedings of the testimony taken in the O. M. Carter court martial proceedings and the testimony taken before Board of Officers which investigated Carter, and the testimony before Commissioner Shields in the removal proceedings instituted against Greene & Gaynor in New York with certain limitations and restrictions.

By this agreement both parties were relieved from the trouble, difficulties and expense of taking the bulk of the evidence upon which the main issues in the civil suits depended.

On February 25, 26, 27, 28 and March 2, 1903, testimony was taken under notice before Commissioner W. R. Hewlett at Savannah, Ga., on the part of the complainant and Carter was represented at said hearing by said chief counsel H. G. Stone.

On April 15, 1893 Special Master Booth filed his report, and both sides filed exceptions to it.

On September 15, 17 and 18, 1903, hearing and testimony on the part of the complainant before C. A. Parsons, Special

Examiner in the city of New York, at which the defense was represented by said H. G. Stone.

On Jan. 7, 1904 hearing and interlocutory decree by this court on exceptions to Report of Booth, Special Master.

On Jan. 22, Feb. 4, 5, 15 and 16, 1904 hearing and testimony taken before Wyman, Examiner at Chicago, on the part of complainant in which the defense was represented by said H. G. Stone. Testimony on direct on part of complainant closed.

On Oct. 7, 1904 hearing and testimony taken on part of defense before C. A. Parsons, Special Examiner in New York City in which defense was represented by said H. G. Stone.

On Oct. 27 and 28, 1904 hearing and testimony taken under notice on part of defense before W. R. Hewlett, Commissioner, at Savannah, Ga., at which defense was represented by said H. G. Stone.

On Jan. 9, 10, 11, 16, 17, 18, 19, 20, 26, 27, 30, Feb. 10, and 13, 1905, hearing and testimony taken before Wyman, Examiner at Chicago, on part of defendant at which defense was represented by H. G. Stone.

On Feb. 13, 1905, there was a hearing had before this court on petition of H. G. Stone for payment of his expenses and allowance of attorney's fees, and on petition of O. M. Carter for payment of his expenses, and order of court thereon.

During the period from Feb. 14, 1905 to Sept. 18, 1905, complainant's Special Counsel in charge of the said civil suits was absent, conducting in Canada the extradition proceedings against Greene & Gaynor, which had been resumed following the decision of the British Privy Council therein. The taking of testimony in the civil proceedings was entirely suspended during that seven months.

On Sept. 18, 21, 25, 26, 27, 28, 29; Oct. 2, 3, 4, 5, 6, 11, 12, 13, 16, 17, 18, 19, 20, 23, 25, 26, 27, 28, 30, 31; Nov. 1, 2, 3, 6, 7, 8, 21, 24, 25, 27, 28, 29, 30; Dec. 1, 2, 4, 5, 6, 7, 8, 9, 11, 1905, hearings and testimony taken on part of defense before Wyman, Examiner at Chicago, defense represented by said H. G. Stone and defense closed.

On Dec. 29 and 30, 1905, hearing and testimony in rebuttal for complainant before Examiner Wyman at New York City, defense represented by said H. G. Stone, testimony was closed for both sides.

From Dec. 30, 1905 to June 12, 1906, complainant's Special Counsel in charge of the civil suits was absent engaged in

the prosecution of the indictments against Greene & Gaynor in the Southern District of Georgia. During that period under order of this court Dec. 8, 1905, most of the original documents introduced in evidence in the civil suits, were withdrawn temporarily from the files in Chicago for use in the said criminal prosecutions, and proceedings in said civil suits were suspended.

On June 12, 13, 14, 15, 16, 18, 1906 the correcting of clerical errors in the testimony taken by Examiner Wyman, was taken up before the Examiner at Chicago, and completed; the defense was represented by said H. G. Stone.

On Sept. 18, 19, 20, 21, 26, 27, 28, Oct. 1 and 2, 1906, arguments were heard before the U. S. Circuit Court at Chicago on the merits of the cause and the cause submitted.

From Oct. 2, 1906 to Jan. 9, 1908, the cause was held in deliberation by the presiding judge, and other than the passing of a few orders for payment of fees, nothing was done in Court except that in May, 1907, the judge called for the submission by counsel of requests for findings which were submitted by counsel for both parties *ex parte* prior to June 11, 1907.

During the period from Oct. 2, 1906 to the latter part of May, 1907, complainant's special counsel was engaged in other litigation for the Government, principally on the appeal, preparation of briefs, hearings and arguments before the Circuit Court of Appeals in the Greene & Gaynor litigations, and from June 11, 1907 to Jan. 9, 1908 complainant's counsel was also engaged in other litigations for the Government. Other than the preparation of requests as aforesaid, which were submitted without argument, there was nothing for defendant's counsel to do in the procedure of said cause from Oct. 2, 1906 to Jan. 9, 1908.

On Jan. 9, 1908 the court handed down its interlocutory decree on the merits, and postponed the taking up of the settlement of the decree for thirty days.

On Feb. 10, 14, 21, 24, 1908, hearings were had before the court at Chicago on settlement of decree. Arguments were heard and briefs and supplemental briefs submitted. The defense was represented by H. G. Stone.

On March 17, 1908, the court handed down its interlocutory opinion for settlement of decree.

On March 19 and 20, 1908, further hearings were had be-

fore the court on the settlement of decree, at which the defense was represented by said H. G. Stone.

On March 21, 1908 the decree having been drafted and its form agreed on to conform to the opinions of and views expressed by the court, the same was signed by the court.

And this respondent says that the foregoing statement of the time spent before the Masters and Examiners and Commissioners in hearing to take testimony, includes all days in which the counsel for defense appeared for taking testimony whether testimony was taken or not, and includes all days in which hearings were had before the court for interlocutory or final decrees, as the same appears on the records of the court, and as respondent is advised and believes. The above does not include the days on which were entered consent or ex parte orders without hearings.

Recapitulation by Years.

(9)

Respondent further says that it appears by the expense bills filed by said H. G. Stone that he was absent from Chicago on business connected with said civil suits, as follows:

		Days (Estimated)
1901	Sept. 27, trip to Ft. Leavenworth and return	3
	Nov. 4, " "	3
	" 26, " "	3

1906	Jan. 1, trip to New York and return, Testimony taken by Complainant Dec. 29, 30,	5
Total		114

Of which 13 days were included in the above hearings had in New York and Savannah.

The said time of absence of said H. G. Stone from Chicago being estimated by respondent from the data stated in said expense bills of said H. G. Stone being in all 114 days, Respondent says that during the time, about six and one-half years, during which said suit has been pending, and for

which the said defendants' chief counsel claims that all the working days, 2,000, were devoted to work in said cause, that only about 114 days were spent away from his place of business at Chicago. That during a very large part of the balance of the time, the proceedings in the cause were suspended as hereinbefore stated, so that nothing active could be done in the cause.

(10)

Respondent admits that said chief counsel for the defendant O. M. Carter, by agreement admitted in evidence numerous accounts from bankers' and brokers' books, (known by both parties to be correct), verified by affidavit, reserving other objections, and that the same was done on part of complainant, and respondent admits that the said H. G. Stone did everything that could be reasonably expected, to facilitate proceedings in the cause, with the exception of turning over all the assets, and the resistance offered resulting in the reference and proceedings before Special Master Booth, and the long delays incident thereto.

That the said O. M. Carter and H. G. Stone, were fully cognizant of the testimony taken before the Board of Officers, the Court Martial and the Removal proceedings before Commissioner Shields, before they entered into the agreement of Dec. 20, 1902, by which that testimony was to be used in said civil causes. That said agreement was entered into for the convenience of both parties to the cause, and by it the trouble and expense was saved to both parties of taking the same testimony again, and at the same time it left comparatively but a small amount of testimony, principally that of said O. M. Carter and the expert accountants which thereafter was taken, other than that taken on the Booth reference.

Respondent says that other than the testimony taken before Booth, Master, as aforesaid, and a small amount of testimony, five days in February and March, 1903, before Hewlett, as aforesaid, and four days in September, 1903, before Parsons as aforesaid, that the taking of testimony by complainant on the merits for reasons hereinbefore stated was not commenced until Jan. 22, 1904, and testimony on the direct for complaint was closed Feb. 16, 1904. And the defendant did not commence to take its testimony until Oct. 7, 1904. The period from Feb. 16, 1904, to October, 1904, the defense took to get ready for putting in their testimony on the merits, and

Mr. Johnson was left in charge at Chicago of the Government's original documentary evidence in the case, subject to inspection of said Carter and his attorney. A small amount of testimony was taken on part of defense on one day in New York and on Oct. 27, 28, 1904 in Savannah, but the defense did not commence actively to take testimony on the merits until Jan. 9, 1905, which was interrupted by complainant's solicitor being called away to Canada as aforesaid, and the taking of testimony on part of defense was not resumed until Sept. 18, 1905 as aforesaid, and was closed Dec. 11, 1905, and rebuttal testimony on part of complainant was closed Dec. 30, 1905, when the proceedings were again interrupted by the absence of complainant's counsel in Savannah trials as aforesaid. And respondent says that while the major part of these delays are in no way to be charged to the defendants or their counsel, that the time consumed by such delays occasioned either by the defense or the Government was by no means necessary to the conduct of said civil suits, or to be reckoned as time devoted to the said suits.

That besides having the management and practically the exclusive control of the conduct of the said civil suits against the said defendants, that the said Special Counsel for the United States, conducted the Removal proceedings against Greene & Gaynor in New York to its close in January, 1902, had control and management for the Government of the extradition proceedings instituted in Canada against Greene & Gaynor, requiring his personal presence there the greater part of the years 1902 and 1905, and brought to a successful end the criminal prosecutions against the same defendants in Georgia, requiring his constant attention during the first six months of 1906, and also had exclusive management for the Government of said criminal case in the U. S. Circuit Court of Appeals, which covered evidence almost as voluminous as that in the civil suits, and requiring briefs even more extensive, and also had charge for the Government of the certiorari proceedings before the Supreme Court of the United States; all of which proceedings were conducted and brought to a successful conclusion by said Solicitor for complainant during parts of the same period that he was in charge of and was conducting for the Government the said civil suits against O. M. Carter, the defense of which it is claimed in said petition took practically all the time of said chief counsel for the defense.

During the same period said special counsel for the Govern-

ment also instituted and has been conducting other suits in other districts against Benjamin D. Greene and John F. Gaylor which have not yet been brought to a conclusion similar in character to these suits against said O. M. Carter.

Respondent says that it does not deny that the said chief counsel for the said defendant has devoted a great deal of time very properly to said defense, but respondent is informed and believes that said counsel for defendant was not without a private practice, and that he has continued to conduct such practice during all of said period from Nov. 6, 1901 to the present time, and respondent says that the comparatively short time that the proceedings in this cause took him away from Chicago, his place of business, and the comparatively short time consumed in the actual taking of testimony, and in the proceedings in Court, compared with the much greater time when no proceedings were actively going on or when the work to be done was merely office work, as shown by the record of this cause, would not have seriously interfered with the regular practice of any good practitioner.

(11)

Respondent says that said petition tends to leave a wrong impression of the voluminousness of the record. That the statement of the court in its opinion that the record consisted of some 50,000 pages, was based upon the statement of Mr. Sears, of counsel for Carter in his argument, and was not intended as a finding of fact; the testimony in the record as shown by the record itself being as follows:

Testimony not taken but admitted by agreement.

Before Board of Officers

Typewritten pages
1051

(Also there were certain exhibits thereto consisting of maps, compilations, proposals and contracts, etc., which were referred to therein, most of which were exhibits in the Court Martial and subsequent record.)

Before the Court Martial

4626

(Most of the documentary exhibits were copied in the type-written record, but there were a number of Exhibits consisting of disbursing checks, contracts and proposals, maps and compilations and photographs, which were not copied, but referred to in the record, most of which were introduced again in the subsequent records.)

Answer to Petition of Stone for Fees.

263

Before Shields, Commissioner, Removal Proceedings 4555
(Volume of contracts and proposals, also 2 volumes
of accounts from books of bankers, brokers, etc., com-
pilations, drawings of mattresses, etc., referred to
in the testimony)

10232

Testimony taken in present cause:

Before W. M. Booth, Master 275

(Also exhibits of accounts, checks, etc.)

Before C. A. Parsons, Examiner 216

(Also exhibits of accounts, etc.)

Before Howlett, Commissioner, 161

(Also exhibits of drawings, contracts, etc.)

Before Wyman, Examiner, including letters and
other documents copied into the record. 4852

(Also Exhibits of accounts, compilations, check
stub books, deposit books, checks, bills, referred to
not copied)

5504

By agreement for convenience of reference certain river
and harbor proposals, contracts, etc., were printed in a vol-
ume and substituted in the record for the loose contracts, but
that tended to shorten the record.

Respondent says that 25,000 type written pages would be
a very liberal estimate of the pages in said record if all the
exhibits not typewritten could be reduced to typewritten form
of the usual size.

(12)

Respondent says that the time given by this court to com-
plainant's solicitor for preparing complainant's brief on the
merits, after the closing of testimony in this cause, and after
complainant's solicitor was relieved from the conduct of the
criminal prosecutions in Georgia, was from June 12, 1906, to
Oct. 2, 1906, which included the time to the end of the hear-
ing on the merits, a little less than four months, complain-
ant having the burden of the case to make out. That de-
fendant's solicitor having had from Jan. 1, 1906, to Sept. 18,
1906, eight and one-half months, without anything else to do
in said cause, ought reasonably to have been able to prepare
said brief without serious interference with his office practice.

(13)

Respondent further says that there were in said cause no new or intricate issues of law involved, the main law points raised being a few questions on the admissibility and effect of evidence, and the application to the facts of the case of the well established rules of law as to tracing trust funds.

That the case was one almost entirely upon the weight, effect and bearing of the evidence, which by reason of the fact that the charges of fraud in the engineering work extended over several years, and under several contracts, and by reason of the fact that in the suits the complainant undertook to trace the investments of the profits of the contracts through its successive changes for a period of ten years, made the record very voluminous, as hereinbefore stated.

Respondent admits that in the handling of the evidence for the defense, and in the preparation of briefs of the evidence, it took great care, skill and labor on the part of the defendant's solicitor (as it did on the part of complainant's solicitor) to properly perform his duty to his client, but respondent says, that the record discloses the fact that it was practically impossible for defendants' counsel to have been devoting but a comparatively small part of the time claimed in said petition to work in this cause, and that in any event but a small part of the time actually claimed in said petition, was reasonably necessary to be devoted by any competent attorney, to work in said cause.

Respondent further says, that it admits that said cause was one of importance, involving as it did the right of the complainant to subject to its claims, some \$400,000.00 of assets tied up in the hands of the agents of said O. M. Carter, on the ground that said assets were a trust fund, arising from illegal profits of river and harbor contracts, under the supervision of said O. M. Carter, but respondent says that the express consideration for the (7) and (8) clauses of the said agreement of Nov. 6, 1901, by which defendants' attorneys' fees, etc., were to be paid out of the fund, was the delivery forthwith into the hands of the receivers, (to be fought for) of the assets claimed by the Government to have gone into the hands of I. S. and L. D. Carter which had not been already tied up, some \$190,425.00 or so much thereof as had not been already disposed of so as to be beyond their control, and that the allowance of attorney's fees under any circumstances must be reasonably proportioned to the amount of assets turned into

court in consideration of the allowance to be made. The agreement itself providing that it was from the fund "to be accounted for to the receiver" that the allowance was to be made. And respondent admits that the amount so turned over subsequent to the agreement of Nov. 6, 1901, by the defendants to the receivers of any of the districts is to be considered as if turned over to the receiver in this district.

But respondent says, that the payment out of said fund so surrendered to the receiver, of \$5,000 for local counsel in other districts, \$6,000 to local counsel at Chicago, \$7,800 on O. M. Carter's personal expenses, besides costs of testimony, printing, etc., and \$100,000.00 claimed by his chief counsel would be disproportionate to even the \$135,971.77 of assets turned over to the receiver, subsequent to the agreement and certainly no intention that the court should make such unreasonable allowances out of the fund can be inferred to have been contemplated by the parties when the agreement was made.

(14)

Respondent in further response to said petition of said chief counsel for defendant, O. M. Carter, says that should the court hold, that there has been such compliance on the part of the defendants with the terms of the agreement of Nov. 6, 1901, as entitles the said defendants and their counsel to invoke the provisions of paragraphs (7) and (8) of said agreement, and if the court shall fix what is a reasonable amount of fees to be paid out of the fund accounted for to the receivers under the agreement of Nov. 6, 1901, to said chief counsel of said O. M. Carter and his local attorney at Chicago, that nevertheless, this defendant says, that the said amounts which may be awarded, would be a charge first upon any and all the assets in the hands of the receivers which have been or may be decreed to be the property of O. M. Carter, and that until such part of the assets are exhausted in the payment of the expenses, attorneys' fees, etc., provided for in paragraphs (7) and (8) of the agreement, none of the assets held to be the property of the Complainant should in any event be applied thereto.

(15)

And respondent says that at sundry times since the agreement of Nov. 6, 1901, this court has advanced from the fund in court to said O. M. Carter for personal expenses, and for

bills of printers, and to his chief counsel, allowances, by orders in which the court reserved until its final decree the adjustment of the same between the parties, to-wit:

To O. M. Carter, per reports of receiver		\$7,800.00	
For printing bills of O. M. Carter			
(order of Sept. 5, 1905)			
To Gunthorpe-Warren Printing Company	\$977.60		
" (order June 18, 1906)	\$1,540.00	\$2,517.60	
To H. G. Stone, account of expenses			
(order Apr. 27, 1904)			\$1,089.94
" Allowance on fees (order Feb. 15, 1904)	6,000.00		
" " " (order Feb. 13, 1905)	5,000.00		
" " " (order Dec. 11, 1905)	2,500.00		
" " " (order Jan. 14, 1907)	2,500.00		
" " " (order Aug. 7, 1907)	1,500.00	\$17,500.00	
To Gunthorpe-Warren Printing Company			
(order Apr. 1908)		\$1,486.90	
To Charles McPherson expert accountant			
(order Apr. 1908)		\$1,580.73	

And respondent says that in the final decree adjusting the cost and allowances if any, which are to be made on the assets in the hands of the receiver, the court should provide in its decree that not only such amounts as the court may award under paragraphs (7) and (8) of said agreement but all of the above items already paid out to said Oberlin M. Carter shall be satisfied first out of the assets in the hands of the receiver belonging to O. M. Carter and next out of the said assets in the hands of the receivers belonging to the Government if the court holds that the defendants have sufficiently complied with the agreement of Nov. 6, 1901, as to making said expenditures in Carter's behalf a charge upon the entire assets.

THE UNITED STATES OF AMERICA,
By MARION ERWIN,
Special Asst. to the Atty. Gen'l.

Before the undersigned personally comes Marion Erwin, Solicitor for Complainant in the above stated cause, who, being duly sworn, deposes and says, that he has had charge personally of the conduct of said cause from its beginning to the present time and is familiar with all the details of the proceedings in said cause; that the facts stated in the foregoing

response so far as they are stated as being within his own knowledge are true, and in so far as they are stated from information derived from the record of said cause he believes the same to be true.

MARION ERWIN.

Subscribed and sworn to before me this 8th day of April, 1908.

H. H. STODDARD,
Clerk Cir. Ct. of the U. S., Northern Dist of Illinois.

Endorsement: Filed April 8, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 11th day of April, 1908, came Horace G. Stone, and filed in the clerk's office of said court certain bills for disbursements with his affidavit thereto attached, in the words and figures following, to-wit:

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

State of Illinois,	}	ss.
Cook County.		

Horace G. Stone, being first duly sworn on oath deposes and says, that he actually paid out the foregoing sums of money amounting to \$2,251.31 as stated in said foregoing bills. That he did so in the bona fide opinion that the same were all authorized by the contract of November 6, 1901. That no part thereof has been repaid to him, and there is justly due to him said sum of \$2,251.31.

HORACE G STONE

Subscribed and sworn to before me this 11th day of April,
A. D. 1908.

MARY L DOWNES
Notary Public.

(Seal)

Endorsement Filed April 11, 1908 H. S. Stoddard Clerk

And on towit: the 8th day of April 1908 came the United States by Marion Erwin its solicitor and filed in the clerk's office, objections to the payment of expense bills of H. G. Stone, in the words and figures following towit:—

OBJECTIONS OF UNITED STATES TO ALLOWANCE
OF BILLS OF H. G. STONE FOR EXPENSES &C.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States	}	In Equity No. 25980.
<i>vs.</i>		
O. M. Carter <i>et al.</i>		

And now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and for objection to the payment of the bills of H. G. Stone for his expenses claimed as chief counsel for said defendant, O. M. Carter, to wit:—

"Bill of Dec. 1, 1904, already filed	\$1,289.39
Bill of Dec. 1, 1904, to date	271.23
Items on bill of March 1, 1904 left until final decree	308.69
Balance allowance O. M. Carter	282.00

\$2,251.31"

says:—

(1)

Respondent denies that there has been such compliance on the part of said defendants I. Stanton Carter, L. D. Carter and Oberlin M. Carter with the terms of said agreement of November 6, 1901, as entitles them and their counsel to invoke the (7) and (8) paragraphs thereof.

And for specifications of the details in which the said defendants have failed to comply with the terms of said agreement respondent refers to its response of file in the record to the petition of H. G. Stone, chief counsel for defendants for final compensation for services as such chief counsel, which response is made a part of these objections, as if incorporated therein.

Respondent says that by its interlocutory decree of January 7, 1904 this court held that there had been sufficient compliance on the part of said defendants with the terms of the agreement of Nov. 6, 1901 as to put in operation paragraphs (7) and (8) of said agreement for interlocutory purposes, reserving decision of the question as to whether there had been complete compliance for the final decree of the court on the merits.

That the said H. G. Stone presented his petition to the court for the allowance of certain alleged expenses during 1901, 1903 to Feb. 17, 1904, aggregating \$1,461.91

That the complainant filed objections to said bill of expenses, on the ground among other things that there were items of expenditure on said bill aggregating \$374.74 which were wholly without the purview of said agreement.

Thereafter the said H. G. Stone rendered a second account for \$1,089.94 covering the same items as were in the above bill, omitting items objected to, which by order of May 2, 1904, were paid from the fund in court

\$1,089.94

Leaving the balance objected to for determination on final decree.— \$ 371.97

And respondent now renews and urges the same objections.

(2)

That thereafter said H. G. Stone rendered a third expense bill covering expenditures alleged to be within the purview of the agreement of Nov. 6, 1901, covering items from Feb. 4, 1904 to Nov. 29, 1904 and petitioned for payment of same \$1,289.39

To the allowance of said bill and petition the complainant filed objections, on the grounds among other things that said expense accounts were not sufficiently proved, and that certain items thereof were not chargeable under the agreement. On Feb. 13, 1905 the court made an order making an allowance to said H. G. Stone for fees, and reserving the passing upon said expense account until final decree.

(3)

That said H. G. Stone has since presented an expense bill covering the period from Dec. 1, 1904 to Jan. 16, 1908 for payment \$ 271.23

Respondent objects to the items on this bill on the grounds among other things that the items thereof are not sufficiently proved, and seem to be exorbitant, for instance items for rent of typewriter aggregating for twelve months \$60.80, whereas typewriting machines usually rent for \$3. per month. Such machines usually can be purchased for \$100. Besides, most of the items do not appear on the face of the account to be within the purview of the agreement of Nov. 6, 1901. Among other things there are items for subscriptions to newspapers. Respondent says that the intent of said agreement was that the said fund to be brought into court should be charged only with the traveling and other personal expenses of said H. G. Stone, as counsel, and not his office expenses, and not other expenditures he might make even though they were made in the conduct of the case, such expenses for the conduct of the case as were to be chargeable to the fund having been specifically provided for by other clauses of the agreement.

(4)

Respondent says that the claim of said attorney for \$282.00 alleged to have been paid by him to O. M. Carter is not a charge within the purview of the agreement. Moreover there is no proof of anything in reference thereto which would show that said disbursement was an expense of said Stone within the purview of said agreement.

(5)

Respondent says that clause (d) of paragraph (8) reads: "And if before the final determination of this cause the said Oberlin M. Carter shall be liberated from prison, he shall be allowed his reasonable personal expenses incurred by him while engaged in work in this cause, including the taking of evidence, but with no compensation for his time, such expenses to be determined by the court and paid out of the monies in court."

That said O. M. Carter did render certain accounts of alleged expenses from Nov. 28, 1903 (when he was released from prison) up to Sept. 1, 1904 and petitioned the court for payment of same. That said bill so rendered averaging a little less than \$150.00 per month, included alleged expenditures, for tickets to theatres, Y. M. C. A. dues, magazines and reading matter, clothing, fitting up office, office rent, stenographers, typewriting machines and various other expenditures, aggregating some \$773.90, which were not within the purview of said agreement of Nov. 6, 1901, and none of said items as presented were supported by vouchers.

That complainant filed objections to the payment of said account.

By agreement of parties the court on October 6, 1904, allowed said O. M. Carter to be paid \$1,000.00 on account of the expenses claimed, reserving the passing upon the objections for future consideration. Thereafter the court by its order of Feb. 13, 1905, allowed said Carter \$150.00 per month as an advance on his expenses commencing from Nov. 28, 1903, payments to be continued by the receiver at that rate, until the expense accounts of said Carter should be adjusted but the \$1,000.00 already advanced to be deducted from said allowance.

That under said orders of the court the said O. M. Carter has been advanced \$7,800.00.

And the said Carter has never rendered any other expense bills since those already mentioned, ending Sept. 1, 1904.

And respondent says that said claim of said H. G. Stone for \$382.00 for alleged sums paid by him to said O. M. Carter is an attempt to charge upon the fund in court an additional amount for said Carter for which no expense accounts have been rendered by said Carter and in excess of the \$150.00 per month allowed said Carter as advance under the order of Feb. 13, 1905.

And respondent objects to the same for that reason, and because said charge is not within the terms of the agreement, and for all the reasons hereinbefore urged.

(5)

And respondent says that in any event whatever allowances have been or which may be paid out of the fund in court to the said H. G. Stone for expenses or to said O. M. Carter, should be decreed by the court to be a charge first upon the assets in court which are held to be the property of O. M. Carter and secondarily only as a charge on the assets held to be the property of complainant.

THE UNITED STATES OF AMERICA

By MARION ERWIN

Special Asst to the Atty Genl

Before the undersigned personally comes Marion Erwin, Solicitor for Complainant in the above stated cause, who, being duly sworn, deposes and says, that he has had charge personally of the conduct of said cause from its beginning to the present time and is familiar with all the details of the proceedings in said cause; that the facts stated in the foregoing response so far as they are stated as being within his own knowledge are true, and in so far as they are stated from information derived from the record of said cause he believes the same to be true.

MARION ERWIN

H. S. STODDARD

*Clerk Cir. Ct. of the U. S. Northern
Dist of Illinois.*

Endorsement Filed April 8, 1908 H. S. Stoddard Clerk

And on towit: the 1st day of April 1908 came Nathaniel C. Sears, and filed in the clerk's office of said Court his petition in the words and figures following towit:

PETITION OF N. C. SEARS FOR ALLOWANCE OF
FEES, AND AFFIDAVITS ATTACHED.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States

vs.

Oberlin M. Carter *et al.*

} Gen. No. 25980.

Petition of Nathaniel C. Sears for Allowance of Solicitor's
Fees Under Contract of November 6th, 1901.

To the Honorable Christian C. Kohlsaat,

Circuit Judge of said Court:

Your petitioner, Nathaniel C. Sears, respectfully represents and states to your Honor, as follows: That a contract was entered into in the above entitled cause between complainant and the defendant, Oberlin M. Carter *et al.*, by which it was agreed that there should be paid out of the money in controversy solicitors' fees of chief counsel for said Oberlin M. Carter and also fees for his attorney at Chicago,—said contract being in part as follows:

“The fees, traveling expenses and other expenses of Oberlin M. Carter's chief counsel and of his attorney at Chicago, to be fixed and allowed by the court.”

Your petitioner is informed and believes that the said contract was afterwards approved by the court in the above entitled cause.

Your petitioner further states that he was engaged by said Oberlin M. Carter as his attorney at Chicago to render professional services in connection with Horace G. Stone, Esq., chief counsel of said Oberlin M. Carter in the above entitled cause; that, among other things, your petitioner was engaged to participate in the oral argument upon the trial of said cause; that in order to prepare for such argument your petitioner was obliged to familiarize himself with the record in said cause (except as to certain matters pertaining to certain funds) and that your petitioner did, in order to familiarize himself with the facts in said cause, and to be able to take part in the oral argument upon the trial of said cause, spend a large amount of time in reading and studying the record in said cause; that your petitioner was engaged in said work during a considerable portion of the months of July, August and up to the 18th day of September, A. D. 1906; that on

the 18th day of September, 1906, the trial of said cause was commenced and your petitioner attended as one of the attorneys in said cause during the days occupied by such trial and took part in the oral argument of the said cause; that after the trial of said cause your petitioner has been called upon to render further professional services in said cause in connection with the final disposition of said cause, and as attorney, during the months of September and October, 1906, and during the months of February and March, 1908, rendered professional services in that behalf; that in consideration of the litigation, the amounts and interest involved and the amount of time which petitioner has been obliged to devote to said cause, your petitioner is of the opinion that an allowance of Six thousand (\$6000) Dollars, for his services would be a very reasonable allowance and would certainly not be in excess of the usual, reasonable and customary fees charged by members of the legal profession in the City of Chicago for professional services in litigation of like importance.

Wherefore your petitioner respectfully prays that he may be allowed, in accordance with the provisions of said contract, the sum of Six thousand (\$6000.) Dollars for his fees in this behalf.

Respectfully submitted,

NATHANIEL C. SEARS

Dated, Chicago, March 25th, A. D. 1908.

AFFIDAVIT OF JOHN S. MILLER.

In the Circuit Court of the United States, For the Northern District of Illinois, Eastern Division.

United States

vs.

Oberlin M. Carter *et al.*

} Gen. No. 25980.

State of Illinois, }
County of Cook. } ss.

John S. Miller, being first duly sworn, deposes and says that he is a practicing lawyer in the City of Chicago; that he is familiar with the reasonable and customary charges of practicing attorneys in the said city in cases of importance; that he has read a copy of the petition in the above entitled cause of Nathaniel C. Sears, dated March 25th, 1908, for the allowance of solicitors' fees; that he is acquainted

and has been for many years with said Nathaniel C. Sears; that from the facts known to affiant, and appearing in the said petition, this affiant is of the opinion that a reasonable and customary charge for the professional legal services of said Nathaniel C. Sears, as set forth in the said petition, would be not less than Six thousand (\$6000.) Dollars.

FRANK JULIUS SMITH,
Notary Public.

Endorsement Petition of N. C. Sears with affidavits attached. Filed April 1, 1908 H S Stoddard Clerk

And on towit: the 13th day of April 1908 came N. C. Sears and attached to the foregoing petition and filed in the clerk's office of said Court, his affidavit in the words and figures following towit:—

AFFIDAVIT OF N. C. SEARS.

In the Circuit Court of the United States, For the Northern District of Illinois, Eastern Division.

United States	}	Gen. No. 25,980.
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		
State of Illinois	}	ss.
Cook County		

Nathaniel C. Sears, being first duly sworn, deposes and says that he has rendered the professional services set forth in the foregoing petition; that he did so in pursuance of the request of Horace G. Stone, Esq. as Chief Counsel of said Oberlin M. Carter, and at the request of the said Oberlin M. Carter.

This affiant further says that, in the services rendered and time expended as indicated in said petition, this affiant did no more than he believed to be reasonably necessary in order to enable him to render the services requested by said Stone and said Carter; that the time expended in the examination of the record in this cause was necessarily expended to the end before set forth; that the court attendance was only when specifically requested by said Stone or said Carter, or both; that the fair and reasonable value of the services rendered by this affiant is not less than six thousand dollars (\$6000); and that this affiant has been paid nothing on account of said services.

NATHANIEL C. SEARS.

Subscribed and sworn to before me this 11th day of April, A. D. 1908.

M. E. SHIELDS,
Notary Public, Cook County, Illinois.

Endorsement Filed April 13, 1908 H. S. Stoddard Clerk.

And on towit: the 8th day of April 1908 came the complainant by Marion Erwin its solicitor and filed in the clerk's office of said Court, a response to the petition of Nathaniel C. Sears, for allowance of fees, in the words and figures following towit:

ANSWER AND RESPONSE OF UNITED STATES TO
PETITION OF N. C. SEARS FOR ALLOWANCE OF
FEES.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25980.
vs.		
Oberlin M. Carter <i>et al.</i>		

Response of the United States to Petition of Nathaniel C. Sears, For Allowance of Solicitor's fees.

And now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and for answer and response to the petition of Nathaniel C. Sears for the allowance under the agreement of Nov. 6, 1901 of \$6,000.00 from the fund in court to him for services rendered by him in said cause as the Attorney for said Oberlin M. Carter at Chicago, says:—

(1)

Respondent denies that there has been such compliance on the part of said defendants I. Stanton Carter, L. D. Carter, and Oberlin M. Carter, with the terms of said agreement of Nov. 6, 1901, as entitles them and their counsel to invoke the (7) and (8) paragraphs thereof.

And for specifications of the details in which the said defendants have failed to comply with the terms of said agreement, respondent refers to its response of file in the record, to the petition of H. G. Stone, chief counsel, for defendants, for final compensation for services as such chief counsel, which response is made a part of the response to the petition of said Sears as if incorporated herein.

(2)

Respondent says that the appearance of said Nathaniel C. Sears was never entered at, nor did he ever take part in

any of the hearings to take testimony in said cause, or proceedings before Examiners or the Master. Nor does it appear that he ever took part in any of the proceedings before this court other than at the hearing on the merits in September, 1906, to make an argument for about an hour on September 28, 1906 (reported in 38 pages of typewriting) before this court in said hearing. But his appearances were entered at the hearings before the court on September 18, 19, 20, 21, 26, 27, 28, Oct. 1 and 2, 1906.

That in the petition of the said H. G. Stone, chief counsel for said O. M. Carter, et al, for allowance of fees heretofore referred to, the following statement appears:—

“I was the only attorney for the defendants who went through the entire record and took the responsibility of selecting such parts of it as ought to be particularly presented to the court.”

That it appears from the petition of said Sears that his employment by said Carter for which compensation is claimed was only for the purpose of making an oral argument in said cause.

(3)

Respondent further says that the allowance of Six Thousand Dollars as compensation to said Sears as local attorney for Carter in said cause at Chicago, would as respondent is advised, be a very exorbitant allowance in any event, and far beyond what was clearly contemplated by the agreement of Nov. 6, 1901, even if there had been full compliance by defendants with the terms of said agreement.

That by the agreement of Nov. 6, 1901, the sum of \$5,000.00 was to be retained by said chief counsel for the aggregate compensation of all local counsel of said defendants in all the other districts, in which auxiliary bills were pending to wit:—New York, New Jersey, West Virginia, Georgia and Southern District of Illinois, and it was clearly contemplated that the local attorney in Chicago who might be required to look after formal proceedings in the absence of said H. G. Stone should be compensated on the same basis as the local counsel in the other districts, and that the attorneys' fees for the conduct of the case, chargeable on the fund in court, would be that of one chief counsel for said defendants, with only an allowance to such local attorney at Chicago, for the kind of formal services to be performed by the local counsel in other districts.

(4)

By reason of the premises respondent says that whether said agreement of Nov. 6, 1901, can be invoked by said defendants and their counsel and attorneys or not, that the fee claimed by said Sears is unreasonable and exorbitant, considering the limited extent and character of the services rendered, and the amount turned into the hands of receivers out of which all of the allowances provided for in the (7) and (8) paragraphs of the agreement were to be paid.

THE UNITED STATES OF AMERICA

By MARION ERWIN

Special Asst to the Attorney General

Before the undersigned personally comes Marion Erwin, Solicitor for Complainant in the above stated cause, who, being duly sworn, deposes and says, that he has had charge personally of the conduct of said cause from its beginning to the present time and is familiar with all the details of the proceedings in said cause; that the facts stated in the foregoing response so far as they are stated as being within his own knowledge are true, and in so far as they are stated from information derived from the record of said cause he believes the same to be true.

Endorsement Filed April 8, 1908 H. S. Stoddard Clerk.

And on towit: the 11th day of April 1908 came H G Stone Solicitor and filed in the clerk's office of said Court, a claim of Lyman E. Cooley for fees as expert Engineer and witness for defendant, with affidavit thereto attached in the words and figures following towit:

CLAIM OF LYMAN E. COOLEY.

The Carter CaseMemoranda of Services by Lyman E. Cooley.

Two interviews, of several hours each, with Attorney Stone—
Examination of Record, 10 days—

Dec. 2, 1905—Witness stand, all of morning session,

Dec. 4, 1905—Witness stand to 1 P. M.—

Dec. 13, 1905—Reading and correcting testimony—

Dec. 16, “ “ “ “ “ “

Sixteen days, at \$100 per day \$1600.00

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

United States

vs.

Oberlin M. Carter, *et al.*

} No. 25980.

State of Illinois,

County of Cook. } ss.

Lyman E. Cooley, being first duly sworn, on oath deposes and says:

That he rendered the service described in the foregoing and attached bill, and that the said services were reasonably and fairly worth the amount charged in said bill, and that no part thereof has been paid to this affiant, and the full amount of said bill is reasonably and justly due to this affiant.

LYMAN E. COOLEY.

Subscribed and sworn to before me this 3rd day of April,
A. D. 1908.

(Seal)

MARY L. DOWNES,
Notary Public.

Endorsement: Filed April 11, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 8th day of April, 1908, came the complainant by Marion Erwin, its solicitor, and filed in the clerk's office of said court, objections to the payment of the claim of Lyman E. Cooley, in the words and figures following, to-wit:

OBJECTIONS OF UNITED STATES TO CLAIM OF
LYMAN E. COOLEY.

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

United States	}	In Equity No. 25980.
<i>vs.</i>		
O. M. Carter, <i>et al.</i>		

And now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and for objection to the bill of Lyman E. Cooley for services rendered in said cause as an expert witness on engineering for the defense, which has been presented to the court by H. G. Stone, chief counsel, for Oberlin M. Carter, for payment, says:

(1)

Respondent makes the same objection to the payment of said bill, of non-compliance by the defendants with the terms of said agreement of Nov. 6, 1901, that respondent has already made to the petition of said H. G. Stone for counsel fees.

(2)

Respondent says that if said defendants should be held to have so sufficiently complied with the agreement of Nov. 6, 1901, as to entitle them to invoke paragraph (8) of said agreement, that nevertheless the payment for the expert services of a civil engineer, for time in studying the record, and qualifying himself to testify as an expert on the engineering feature of the case, and in payment for his time as an expert witness on the same and in correcting his testimony, at the rate of \$100.00 per day, is wholly without the scope of said agreement of Nov. 9, 1901.

That the provision for the services of an expert accountant, shows, under the application of the rule "*Inclusio Unius est,*

exclusio alterius," that it was never contemplated, the hire expert witnesses in other features of the case, was to be made a charge upon the fund.

That moreover the only charges of the said Cooley taxable against the fund under the agreement for taking testimony would have been the usual witness fees at the rate of \$1.50 per day for attendance at the hearings.

Wherefore respondent objects to the payment of said bill out of the fund in court.

THE UNITED STATES OF AMERICA,
By MARION ERWIN,
Special Asst. to Atty. Gen'l.

Endorsement: Filed April 8, 1908. H. S. Stoddard, Clerk.

Before the undersigned personally comes Marion Erwin, Solicitor for Complainant in the above stated cause, who, being duly sworn, deposes and says, that he has had charge personally of the conduct of said cause from its beginning to the present time and is familiar with all the details of the proceedings in said cause; that the facts stated in the foregoing response so far as they are stated as being within his own knowledge are true, and in so far as they are stated from information derived from the record of said cause he believes the same to be true.

MARION ERWIN.

Subscribed and sworn to before me this 8th day of April, 1908.

H. S. STODDARD,
Clerk Cir. Ct. of the U. S., Northern Dist. of Illinois.

Endorsement: Filed April 8, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 11th day of April, 1908, came H. G. Stone, solicitor, and filed in the clerk's office of said court a claim of the International Audit Co. with affidavit thereto, in the words and figures following, to-wit:

CLAIM OF INTERNATIONAL AUDIT CO. FOR SERVICES OF ROBERT NELSON, EXPERT ACCOUNTANT, FOR DEFENSE.

In the Circuit Court of the United States, Northern District of Illinois, Northern Division.

United States of America, <i>Complainant.</i> against Oberlin M. Carter, <i>et al.</i> <i>Defendants.</i>	}	In Equity.
---	---	------------

March 25, 1908.

To the International Audit Company, Chicago.

Fee for services of our Manager, Robert Nelson, C. A., Examining Government and Defendant's Exhibits as regards financial transaction, examining record, consultations with defendants and attorneys and giving evidence before Examiner Wyman, \$1,000.00.

State of Illinois, }
County of Cook. } ss.

Robert Nelson being duly sworn says he is Manager of the International Audit Company, the claimant named in the claim hereunto attached; that the several items therein mentioned are just and true, that the services charged therein were rendered as therein charged, that the charge made is reasonable, and that there is now due and unpaid to said International Audit Company, after allowing all just credit, the sum of One thousand dollars.

ROBERT NELSON.

Subscribed and sworn to before me this 2nd day of April, A. D. 1908.

HENRY W. BORCHES,
Notary Public.

(Seal)

Endorsement: Filed April 11, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 8th day of April, 1908, came the complainant by Marion Erwin, complainant's solicitor, and filed in the clerk's office of said court objections to the claim of the International Audit Co., in the words and figures following, to-wit:

OBJECTIONS OF UNITED STATES TO CLAIM OF INTERNATIONAL AUDIT CO. FOR SERVICES OF ROBERT NELSON.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States	}	In Equity No. 25980.
<i>vs.</i>		
O. M. Carter, <i>et al.</i>		

And now comes the United States of America by Marion Erwin, Special Assistant to the Attorney General, and for objection to the bill of The International Audit Company, of Chicago, for services rendered by Robert Nelson, expert accountant, for \$1,000.00, which has been presented to the Court by H. G. Stone, chief counsel for Oberlin M. Carter, for payment, says:

(1)

Respondent makes the same objection to the payment of said bill, of non-compliance by the defendants with the terms of said agreement of Nov. 6, 1901, that respondent has already made to the petition of said H. G. Stone for counsel fees.

(2)

Respondent says that if said defendants should be held to have so sufficiently complied with the agreement of Nov. 6, 1901, as to entitle them to invoke paragraph (8) of said agreement, that nevertheless clause (c) of said paragraph limited the allowance to be made to the "expenses of taking evidence" "including the services of an accountant at not exceeding ten dollars per day for his services when needed and actually employed, plus his expenses, if any."

That by the agreement it was to include an allowance to one expert accountant only.

That the said defendants employed and fully used to the end

of the case, Charles McPherson as such accountant, and the court has already allowed and paid said McPherson the sum of \$1,580.73 for his services as such accountant out of the fund in court.

That in the taking of the testimony for the defense the said Nelson was used only as expert witness to corroborate the accounts and compilations of said McPherson as an expert accountant.

That the services of said Nelson to the said defendants were rendered entirely outside of the scope of said agreement of Nov. 6, 1901.

(3)

That the bill for the services of said Nelson, is not even rendered in accordance with, or at the rates provided for the compensation which was to be paid for the one accountant who was to be employed under the agreement.

(4)

Wherefore this respondent objects to the payment of said bill or any part thereof from the fund in court.

THE UNITED STATES OF AMERICA,
By MARION ERWIN,
Special Asst. to the Atty. Genl.

Before the undersigned personally comes Marion Erwin, Solicitor for Complainant in the above stated cause, who, being duly sworn, deposes and says, that he has had charge personally of the conduct of said cause from its beginning to the present time and is familiar with all the details of the proceedings in said cause; that the facts stated in the foregoing response so far as they are stated as being within his own knowledge are true, and in so far as they are stated from information derived from the record of said cause he believes the same to be true.

MARION ERWIN.

Subscribed and sworn to before me this 8th day of April, 1908.

H. S. STODDARD,
Clerk Cir. Ct. of the U. S., Northern Dist of Illinois.

Endorsement: Filed April 8, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 8th day of April, 1908, came the complainant and filed in the clerk's office of said court, a motion to have the compensation of Max H. Whitney, receiver, fixed, with agreement attached thereto, in the words and figures following, to-wit:

MOTION TO FIX COMPENSATION OF MAX H. WHITNEY, RECEIVER.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States	}	In Equity No. 25980.
vs.		
O. M. Carter, <i>et al.</i>		

And now comes the United States by Marion Erwin, Special Assistant to the Attorney General, its solicitor, and moving the court to fix the amount of the allowance of fees to Max H. Whitney, receiver in the above stated cause pursuant to the agreed state of facts, made between the parties and said Max H. Whitney, hereto attached, says:

That for the purposes of fixing the compensation of said receiver, it appears by said agreement, that:

The value of the personal estate, including all choses in action which went into the hands of the receiver, including coupons and interest subsequently collected, was: \$111,541.76

That said assets handled by the receiver consisted mainly of railroad bonds; that there was no real estate which went into the hands of the receiver.

That the services of the receiver have consisted of taking care of said assets, collecting the coupons or interest, selling through brokers under orders of the court certain of the said securities, and in paying out under the orders of the court, from the moneys in his hands, allowances made by the court from the fund.

That all costs and expenses incident to his administration including costs of receiver's bond, the receiver has already taken credit for in his reports.

While recognizing that the fixing of receiver's compensation in this cause is within the judicial discretion of the court, complainant says it was informed by said receiver that

he regarded the provisions of the statute of Illinois regulating the fees to be allowed to Administrators, as a just basis upon which his allowance should be fixed, viz:

"Executors and administrators shall be allowed as compensation for their services a sum not exceeding six per centum on the amount of personal estate."

in addition to the foregoing expenses already taken credit for by the receiver in his reports.

That six per cent on \$111,541.76 is \$6,692.50

That such allowance would in the opinion of complainant be the maximum allowance which should in any event be made to said receiver.

That the said receiver has already been paid the sum of \$3,000.00 as an allowance on his compensation.

That to complete his said administration there are of said personal estate (value estimated as stated in said agreement) certain bonds and choses in action which in any event will have to be sold and the proceeds disbursed under the orders or decree of the court or paid into the Treasury as the case may be, as follows:

Bonds	\$61,000.00
Colehour note (estimated value)	3,000.00
Cash in hand	1,612.49

\$65,612.49

That under said agreement complainant moves the court to provide in any order fixing the receiver's compensation the proportion of said allowance for full compensation for all services of the receiver, which shall be withheld, until he completes administration of said assets in his hands as aforesaid.

THE UNITED STATES OF AMERICA,

By MARION ERWIN,

Spl. Ass't. to the Att'y General, Complainant's Solicitor.

AGREEMENT RELATIVE TO FIXING COMPENSATION OF MAX H. WHITNEY, RECEIVER.

In the Circuit Court of the United States, Northern District
of Illinois, Eastern Division.

The United States	} Gen. No. 25980.
<i>vs.</i>	
O. M. Carter, <i>et al.</i>	

Agreement relative to Application of Max H. Whitney, Receiver, for Compensation.

It is agreed between the parties interested in the assets which went into the hands of Max H. Whitney, receiver, in the above stated cause as follows:

(1) That the said Max H. Whitney was on the 27th day of August, 1901, appointed receiver by said Circuit Court of the United States for the Northern District of Illinois and has continued in said appointment up to the present time. That within a day or two thereafter he was appointed receiver under the auxiliary bill filed by the complainant against the same defendants in the Southern District of Illinois and has continued in said appointment up to the present time. That such of the assets as the defendants may have held in the Southern District of Illinois were delivered to the said Max H. Whitney, receiver, in the Northern District of Illinois under the said bill filed in the said Northern District of Illinois and were inventoried by him in said cause and that none of the assets were delivered to him as receiver for the Southern District of Illinois.

(2) That on November 11, 1901. there was turned over by I. Stanton Carter, defendant, to the said Max H. Whitney, receiver, in pursuance of the agreement of November 6, 1901, between the parties, and the orders of the court, railroad bonds of the par value of

Also one note, C. W. Colehour, due October 17, 1903, which the receiver has not been able to collect, but it has an estimated value of possibly \$3,-000.00; par value \$11,660.00;	\$60,000.00
Cash received from N. W. Harris & Co., defendant, March 13, 1903, from attorneys of Lorenzo D. Carter, defendant, ten Kentucky Central bonds, par value	3,000.00 770.40 10,000.00

January 8, 1904, one Kentucky Central bond, par value	1,000.00
One Michigan Telephone Company bond certificate, par value	1,000.00
January 13, 1904, from attorneys of Lorenzo D. Carter, eleven Kentucky Central bonds, par value,	11,000.00
January 15, 1904, received from attorneys of Lorenzo D. and I. Stanton Carter, cash proceeds of certain coupons collected by them after the appointment of a receiver, aggregating	1,825.00
	<hr/>
	\$88,595.40

For the purpose of estimating the receiver's fees the par value of said bonds may be taken as a basis of their real value, and the Colehour note estimated at \$3,000.00

(3) That in addition to the above the said receiver has collected coupons and interest on the foregoing assets which came into his hands as such receiver for the Northern District of Illinois in the sum of \$22,946.36.

Also that the said receiver has sold under the orders of the Court, of the aforesaid securities, twenty-two bonds of the par value of \$22,000.00, receiving therefor net proceeds amounting to \$22,287.67.

(4) Also that the said receiver from the cash funds which came into his hands as aforesaid has disbursed under the orders of the court the sum of \$46,216.94.

(5) That the said receiver under the orders of the court has been advanced on account of his compensation from time to time from said cash funds in his hands, sums aggregating \$3,000.00.

(6) That there is now remaining in the hands of the said receiver for the Northern District of Illinois sixty-one of the aforesaid bonds of the par value of \$61,000.00 and also the said Colehour note, and \$1,612.49, in cash.

(7) It is agreed between the parties that the compensation to be fixed by the Circuit Court of the Northern District of Illinois for the services of said Max H. Whitney, shall be in full for his services as receiver under the bills filed in the Circuit Courts of the Northern District of Illinois and under the auxiliary bill filed as aforesaid in the Southern District of Illinois.

(8) It is agreed that the compensation which the said Max

H. Whitney may be entitled to receive as receiver under the auxiliary bill filed in the Southern District of Georgia in which he was appointed receiver by that court and for the handling of the assets tied up by proceedings there, put in the hands of the receiver, shall be left open for that court to fix and determine.

(9) It is agreed that the parties to the said cause consider that the said Max H. Whitney has properly and satisfactorily performed his services as receiver.

(10) It is agreed between the said receiver and the said parties that the said Circuit Court of the Northern District of Illinois may fix the said receiver's fees on the assumption that there will be no appeal and to include the sale or collection of the said assets, bonds and note, still remaining in his hands as aforesaid and to include the disbursements of the said funds in his hands or which may come into his hands from such sale or collection and the compensation so fixed for said receiver shall be in full for all services to be rendered by him in the case except for the services of receiver in the Southern District of Georgia, as aforesaid. But this agreement shall not preclude any of the parties to said cause from appealing from the compensation fixed by said court for such receivership if they should see proper to do so. If the said parties or either of them should appeal said cause without either appealing from the compensation fixed for the receiver, a reasonable proportion of the compensation so fixed for said receiver shall be held up as representing compensation which the receiver would be estimated to be entitled to for the services connected with the handling of the assets remaining in his hands.

(11) Nothing in this agreement shall be construed as cutting off the right of any of the parties to said cause to appeal from any order or decree in said cause.

Dated this April 2, 1908.

MARION ERWIN,
Special Asst. to Atty. Genl., Sol. for Complainant.

HORACE G. STONE,
Solr. for Defts.

O. K. MAX H. WHITNEY,
As Receiver as Above.

It is understood that the foregoing agreement is not to be used as bearing in any way on the claim of defendant's chief

counsel for fees from any or all of the assets in any of the districts in which the bills or auxilliary bills are pending.

April 2, 1908.

MARION ERWIN,
Sp. Asst. to the Atty. Genl., for Complt.
HORACE G. STONE,
Solr. for Defts.

Endorsement: Motion and agreement as to fixing compensation of Max H. Whitney, receiver, filed April 8, 1908. H. S. Stoddard, Clerk.

RECEIVERS REPORTS OF RECEIPTS AND DISBURSEMENTS.

And on towit: the 14th day of April 1903 came Max H. Whitney Receiver, and filed in the clerk's office of said Court, his report in the words and figures following towit:

REPORT OF M. H. WHITNEY, RECEIVER, FILED APRIL 14, 1903.

In the Circuit Court of the United States, For the Northern
District of Illinois, Northern Division.

United States of America

v.

Oberlin M. Carter *et al.*

}

To the Honorable, the Judges of Said Court:

Max H. Whitney, Receiver in the above-stated cause, respectfully submits this his report in the above-stated cause:

88	Feb. 1	O. M. Carter, order of court,	150.00	\$8,424.55
Balance of cash on hand				
February 4th, 1908,				\$1,451.84

Respectfully submitted,

MAX H. WHITNEY,
Receiver.

State of Illinois, }
County of Cook, } ss.

Max H. Whitney makes oath and says that the foregoing is a true and correct report of his cash receipts and cash disbursements in the above matter from the 1st day of August, 1906, to the 4th day of February, 1908, inclusive.

MAX H. WHITNEY.

Subscribed and sworn to before me this 4th day of February, A. D. 1908.

JOHN H. R. JAMAR,
Chief Deputy Clerk.

Endorsement: Filed Feb. 4, 1908. H. S. Stoddard, Clerk.

And on to wit: the 13th day of April, 1908, came the complainant by Marion Erwin, its solicitor, and filed in the clerk's office of said Court, a motion in the words and figures following to wit:

**MOTION OF UNITED STATES AS TO ADJUSTMENT IN
FINAL DECREE OF ADVANCES TO O. M. CARTER
AND TO HIS COUNSEL.**

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

The United States of America	} Bill No. 25980, Auxiliary Bills, etc.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

Motion.

Now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and shows to the court that under the interlocutory orders and decrees of this court since the agreement of November 6, 1901, in said cause certain advances were made from the fund brought into court to the said O. M. Carter for personal expenses and in conduct of his defense for bills of printers, expert accountant, and allowances to his chief and other counsel by orders in which the court reserved until its final decree the adjustment of the same between the parties as their rights might appear, to wit:—

To O. M. Carter on account for personal expenses (under order of Feb. 13, 1905)	\$7,800.00
To Gunthorpe-Warren Printing Company for printing for defense	
Under order of Sept. 5, 1905	977.60
“ “ “ June 18, 1906	1,540.00
“ “ “ Apr. 6, 1908	1,486.90
To Charles McPherson expert accountant for defense	
Under order of April 1908	1,580.73

To Horace G. Stone chief counsel for defense			
Under order	Feb. 15, 1904	\$6,000.00	
" "	" 13, 1905	5,000.00	
" "	Dec. 11, 1905	2,500.00	
Under order	Jany. 14, 1907	2,500.00	
" "	Aug. 7, 1907	1,500.00	17,500.00
To Horace G. Stone for local counsel of defense			
in other districts			5,000.00
			<hr/>
			\$35,885.23

The said amounts were advanced from the income and proceeds of securities which came into the hands of Max H. Whitney, receiver, from the securities which have been by decrees of this court held to belong to the United States, therefore the United States moves the court that in and by the final decree of this court the above amounts advanced to the said O. M. Carter or for his defense out of the fund brought into court, together with all additional sums if any, which the court may direct to be paid out for or on account of said defense shall be decreed to be a first charge upon the assets in court which have been or may be held to be the property of the said O. M. Carter and that all said assets shall be sold and the proceeds applied first to reimburse the fund in court belonging to the United States for said expenditures made from the fund belonging to the United States and that the United States be decreed to have a judgment against the said O. M. Carter for any deficiency.

THE UNITED STATES,
By MARION ERWIN,
Sp. Asst. to the Atty. Gen'l,
Compls. Solr.

Endorsement: Filed April 13, 1908. H. S. Stoddard,
Clerk.

And on to wit: the 24th day of April, 1903, came the complainant by Marion Erwin, its attorney, and filed in the clerk's office of said Court exceptions to the report of W. M. Booth, master, in the words and figures following, to wit:

his hands and for which he is accountable to the receiver, under the findings of the master the said master gives I. Stanton Carter credit for

"Salary, 22½ months, at \$300, \$6,750."

And said master carries said credit forward in the aggregate, on page 34 of said report. And likewise carries said credit forward in the consolidated account, in which he states the aggregate balance against I. S. and I. D. Carter, on page 57 of said report. Whereby the said master diminishes the amount for which said I. Stanton Carter is properly accountable to the receiver, by the said sum of \$6,750.

And complainant assigns said findings as error, and says that the said master should have found:

"That under the terms of the order of reference of October 15, 1902, the master is required to find:

'What assets, or proceeds thereof, or reinvestments thereof, charged by the complainant to have been a part of the trust funds diverted by O. M. Carter, and in the possession, power or control of I. Stanton Carter and Lorenzo D. Carter on the date of notice to them of the appointment of Max H. Whitney, receiver, or since then coming into the hands of either of them, if any, is yet properly to be accounted for to the receiver, and yet to be turned over to the receiver by them, or either of them, respectively, under the orders of the court in the premises, and the agreement of November 6, 1901, approved by this court on that date,' etc.

That by the terms of the agreement of November 6, 1901, referred to, it is expressly provided as follows:

'Clause 2. That as to the assets claimed by the Government as assets into which it charges the funds entrusted to Oberlin M. Carter, as disbursing officer, was diverted, with the proceeds, income and reinvestments thereof, where the form of the investments have been changed, and which assets have been or may be hereafter traced in the possession, custody or control of said defendants, and have not heretofore been bona fide disposed of by them and therefore beyond their control, shall be forthwith by the said defendants turned over to the receiver appointed in this cause. But the court will determine whether the one, Kentucky Central, and one, Michigan Telephone bonds, charged in the bill to be reinvestments of said alleged trust fund, and which bonds are claimed by I. Stanton Carter, should be held by the receiver pending the litigation.'

'Clause 4. L. D. Carter and I. Stanton Carter will forth-

with dismiss their demurrers and file answers, disclaiming any personal interest in the aforesaid assets in controversy in this litigation; including the real estate on Eighth avenue, New York, and at Orange, New Jersey, except as to the two bonds claimed by I. Stanton Carter as above.'"

"That by the terms of said agreement it is immaterial whether there was a contract, valid or invalid, between I. Stanton Carter and Oberlin M. Carter, by which the latter agreed to pay the former a salary for his services, or not. Such salary could not be, under the terms of the agreement, set off against any of said assets traced into the hands of said I. Stanton Carter, as found by the master on the debit side of the account; as, under the agreement, he expressly disclaimed all personal interest in said assets claimed by the Government and traced into his hands.

"That to allow him to withhold such assets in his hands from the receiver, by setting off a salary credit against the same would be to violate an agreement which gives the defendants important and material rights and exemptions."

In support of this exception reference is made to the following testimony:

Agreement of November 6, 1901, made part of the order of reference, and which is a part of the record in the cause, showing its terms.

Reference is made to the testimony of I. Stanton Carter that he did not spend over \$150 out of his salary for personal and family expenses. (Testimony before the master, October 24, 1902, page 141.)

Again, on December 2, 1902, he says he did not spend over \$130 a month out of his salary, for his personal and family expenses. (Testimony before master, page 254.)

He further testified that his regular business was dentistry, and that he made on an average of from seven to nine dollars a day at that work. (Testimony before master, pages 256, 257.)

I. Stanton Carter testified, that he has practically no private property of his own. (Testimony before master, page 254.)

It is not an unreasonable presumption that he did spend for his private and family use the amount he claims to have spent, and that so much of it as he has so spent is out of his power to replace.

To that extent, to wit: twenty-three months, at \$150 per

month, \$3,450, we concede that I. Stanton Carter would be entitled to credit, under the second clause of the agreement of November 6, 1901, as being so much of the assets actually disposed of by him prior to the receivership, and, therefore, beyond his control.

This concession does not depend on the validity of the agreement for salary, or the legality of the payment; but simply upon the fact that the money had been paid out and consumed prior to the receivership, and, therefore, it is impossible to make him replace it.

But this does not authorize him to set off the balance of the salary alleged to be due him by O. M. Carter against the remaining assets admittedly traced into his hands, and not accounted for, in the face of his positive disclaimer of any personal interest in said assets, in the agreement of November 6, 1901.

Reference is made also to the following documentary evidence as an estoppel against I. Stanton Carter from claiming that the one, Kentucky Central, and one, Michigan Telephone bond, were bought with said salary claimed by him from said trust fund, to wit: the report of the receiver, in the record, containing the response made September 20, 1901, of I. Stanton Carter to the demand of the receiver for all the said O. M. Carter assets in his hands, claimed in the bill; and to the written reply of I. Stanton Carter thereto, as follows:

"None of the property mentioned in your demand is either in my possession or under my control, except one bond of the Michigan Telephone Company, for \$1,000, and one bond of the Kentucky Central Railway for \$1,000. These two bonds are my own individual property, purchased entirely with my own private funds, and now belong, and have always belonged to me, solely and individually."

It is in reference to that written claim of I. Stanton Carter, that the clause in the agreement of November 6, 1901, refers the question as to the custody by the receiver of those two bonds, for the decision of the court.

Reference is made to the following evidence, disproving I. Stanton Carter's claim that these two bonds were purchased with his own private funds:

"Pf. Exhibit 8, admitted in evidence, page 5, affidavit and account of I. S. Carter with N. W. Harris & Company shows the purchase of these two bonds for \$2,017.01, on March 11, 1901, by a deposit of currency for that amount by I. S. Carter.

Pf. Exhibits 14 and 15, account of I. S. Carter with Union Trust Company of Chicago, which account contained the trust funds received by him from J. H. Paul and Df. Exhibit 4, stub-check book for said bank shows that I. S. Carter withdrew \$1,700 of said fund from that company on March 11, 1901.

I. S. Carter testified on cross-examination, page 98:

'Q. Harris' account shows that on March 11th, you paid them \$2,017.01; on the same date your stub-book shows that you drew out the \$1,700 from the Union Trust Company, and that lacked something like \$300 of making up the full amount paid to Harris. You must have got the additional \$300 from some other source, did you not?

A. I surely did.

Q. Where did you get the other \$300 from?

A. I don't know now. I might have got it out of my pocket, and might have got it out of the vault.'

"Page 264, I. S. Carter testified:

"Q. When you had those safety deposit boxes in Chicago here, did you have any other place to keep these large sums of cash which you got from time to time?

A. No, sir.

Q. Always kept them in those boxes?

A. Yes, sir.

Q. Well, you had two boxes at one time, the one in the National Safety Deposit Company, in the First National Bank Building, was in the name of Stanton Carter, was it not?

A. Yes, sir.

Q. And the one in the Columbus Memorial Building, you kept your box there in the name of Isaac Carter, did you not?

A. Yes, sir.'

Page 96, I. S. Carter testified, that from November 23, 1900, he carried about \$46,356.25 in these vaults, until he contributed \$14,884.35 from it towards the purchase of the twenty-one Kentucky Central bonds, February 13, 1901.

Page 139:

'Q. Did you keep in the safety deposit vaults at any time any other money than was derived from those securities?

A. No, sir.' "

This evidence establishes the fact that the two bonds purchased March 11, 1901, were purchased with proceeds of the trust funds. They are, therefore, a reinvestment of the trust

funds, and as such, part of the assets which the court directed should be turned over to the receiver. It is true that he is not estopped by the agreement of November 6, 1901, for claiming a right to these bonds as a payment on account of salary due him by O. M. Carter, but he did not set up such a claim in the agreement of November 6, 1901, nor in his pleadings and answers, filed prior thereto, and his final right to a salary as against the claims of the United States and against the receiver in those bonds, can only be determined on final decree on the merits of the main cause, and after he has accounted for the balance of cash still in his hands. See Post, p. 27.

Second Exception.

For that the master in his findings stated as follows:

"Another item in I. Stanton Carter's account is, 'Paid expenses I. Stanton Carter (estimated), \$8,000.'

"To prove this item defendant, I. Stanton Carter, offered almost no evidence, except his own unsupported testimony, stating substantially as follows:

"He had no list of those expenses, nor the date when they were paid out, nor any memorandum of the different trips that he took when he incurred travelling expenses. He thinks New York, Washington, Leavenworth and Savannah were the only places he went. The only hotels he stopped at in New York were the Hoffman House and the New Amsterdam. Thinks he only made three or four trips to Washington, only stopped at one hotel, and thinks that hotel was the Raleigh. Was at Savannah twice before May 23, 1900, and once afterwards, and stopped at the De Soto Hotel. He took trips to Leavenworth to see Captain Carter, and saw him on every occasion except one, which was on Sunday when visitors were not admitted. He testified that he was on the road nearly all the time, traveling or moving back and forth for Captain Carter, and was scarcely home at all. Two letters from the Western Passenger Association to I. S. Carter were introduced in evidence showing that in March and September, 1901, he returned two mileage books good on roads west of Chicago, out of which mileage to the extent of 23,575 miles had been used, at two cents per mile, or a total of \$471.50.

"In opposition to this claim for \$8,000, the complainant showed by affidavits from clerks and proprietors of the various hotels named (admitted in evidence by agreement), that

during the period in question said I. Stanton Carter stopped at the said hotels only for the number of times and the total number of days, as follows:

New Amsterdam, New York, 6 times, 30 days;

Hoffman House, New York, 6 times, 34 days;

The Raleigh, Washington, 1 time, 1 day;

De Soto Hotel, Savannah, 2 times, 4 days.

"And by the evidence of E. I. Johnson that a liberal allowance for all expenses on such trips including railroad fares, meals while en route, sleeping car fares and tips to porters, hotel bills and transfers for passenger and baggage would be \$1,477.25.

"Complainant also showed by the records of the military prison, at Leavenworth, that during the period in question and up to October 7, 1902, said I. Stanton Carter visited that institution eighteen times; and by the testimony of E. I. Johnson that allowing for two days' stop at a hotel for sixteen of these visits, and three days' stop at two of them, and also allowing for two days' stop on the Sunday visit above referred to, a liberal allowance for all expenses of all such trips would be \$950.08. And that a like liberal allowance for all such trips prior to September 1, 1901, would be \$703.48. That a like liberal allowance for one such trip on September 14, 1901, would be \$49.32. And a like liberal allowance for all trips taken after November 6, 1901 (four in all), would be \$197.28.

"I. Stanton Carter also claimed to have made a trip down to 'Mexico or New Mexico,' and claims to have stayed there two weeks. If so, it seems to have made very little impression on his mind, as he could not definitely name the persons he saw, or the hotels he stopped at, except that he believed he stopped at the Palace Hotel, at 'Careus' or 'Cerens,' which place does not appear in the atlas or the United States Postal Guide.

"Complainant is willing to concede the following credits on this claim of \$8,000:

New York and Washington trips.....	\$1,276.25
Savannah trips	201.00
Leavenworth trips, prior to Sept. 1, 1901.....	703.48

Total \$2,180.73

"Inasmuch as general experience proves that the actual expenses of traveling usually amount to about double what

is estimated in advance as a liberal allowance, and in view of the fact that the defendant, I. S. Carter, may have made the alleged New Mexico trip, and possibly even others, the master would recommend that he be given credit, on this claim for expenses paid prior to September 1, 1901, for \$4,000, and that he be allowed credit for the trip taken September 14, 1901, for \$60, and for the four trips after November 6, 1901, \$240."

And complainant assigns said finding of the master as error, in this; that the master having found that the testimony showed that \$2,180.73 was a liberal allowance for the disbursements on the trips actually proved to have been made by I. Stanton Carter, the master was not justified in holding that:

"As general experience proves that the actual expenses of traveling usually amount to about double what is estimated in advance as a liberal allowance, and in view of the fact that the defendant, I. S. Carter, may have made the alleged New Mexico trip, and possibly even others, the master would recommend that he be given credit on this claim for expenses paid prior to September 1, 1901, for \$4,000, and that he be allowed credit on the trip taken September 14, 1901, for \$60, and the four trips after November 6, 1901, for \$240."

And that said doubling of the allowance for expenses beyond the proof, was without evidence to support it, and contrary to law.

Whereas, the said master should have found:

"That the said I. Stanton Carter did not produce or have in evidence any list of said expenses, nor vouchers therefor, nor was he able to state the dates when the several amounts were paid out, nor to whom the same were paid, nor any memorandum of the different trips that he took on which such expenses were incurred, showing the dates when the trips were made, the routes traveled, or other particulars.

"That said I. Stanton Carter testified, when he testified first relative to these items, on October 24, 1902, that the trips he made were only to New York, Washington, Leavenworth and Savannah. That the only hotels he stopped at in New York were the Hoffman House and the New Amsterdam Hotel; and the only hotel in Washington he stopped at was the Raleigh; and the only hotel in Savannah, The De Soto on two trips. And that on every trip he made to Leavenworth, Kansas, he visited Captain O. M. Carter in the penitentiary, except one trip which was on Sunday.

"That affidavits from the hotel men, and extracts from the records of said hotels, introduced by complainant and admitted in evidence by agreement, showed just when he was at the hotels referred to, and how long he stayed each time. And the affidavit from the keeper of the penitentiary at Leavenworth, admitted in evidence by agreement, showed the number of times he visited O. M. Carter in the penitentiary. And that the testimony of Mr. Edward I. Johnson, who had experience in traveling over the same routes, and his calculations of said expenses liberally allowed, made up from the railroad fares, sleeping car fares, etc., and a liberal hotel allowance, showed that the following would be a most liberal allowance for expenses of the trips proven to have been made, including an extra trip claimed by I. Stanton Carter to have been made to Leavenworth when he did not see Captain O. M. Carter, and of which there is no confirmatory evidence:

New York and Washington trips	\$1,276.25
Two Savannah trips	210.00
Leavenworth trips, prior to Sept. 1, 1901.....	703.48

Total to September 1, 1901.....	\$2,180.73
Leavenworth trip, Sept. 14, 1901.....	49.32
Leavenworth trips, after Nov. 6, 1901.....	197.28"

In support of the above exception reference is made to the following testimony:

The testimony of I. Stanton Carter, October 24, 1902, page 112, to the effect that the only trips he made were to New York, Washington, Leavenworth and Savannah. On pages 112 and 116, with the correction, page 198, of the testimony before the master, that the only hotels he stopped at in New York were the Hoffman House and the New Amsterdam. To his testimony, page 117, that the hotel he stopped at in Washington was the Raleigh; his testimony, page 118, that he stopped at the De Soto Hotel in Savannah, on two trips. To his testimony, page 119, that he saw Captain Carter in the penitentiary on every trip he made to Leavenworth, except one. To his testimony, on page 119, that the traveling expenses which he claimed in the account were for the trips that he made to New York, Washington, Leavenworth and Savannah only.

Reference is made to plaintiff's Exhibits 20, 21, 22 and 23, being the affidavits of the hotel men and keeper of the penitentiary, showing just what trips were made. And the consolidated statement, plaintiff's Exhibit 32, showing what

would be a liberal allowance for the trips shown to have been made. And the testimony of Edward I. Johnson before the master, pages 232 and 239, in support of said exhibits.

When brought back to the stand December 2, 1902, I. Stanton Carter testified before the master, page 253: "I think I did stop at the St. James, I think, in Washington."

And again he testified when brought back to the stand, on December 2, 1902, page 260, that he made a trip down in Mexico, which he had forgotten to mention. When pressed to mention places visited, he mentions "Cereus" or "Carius," and Albuquerque; and being asked if he meant New Mexico, he replied, yes. Page 262, he testified, that he stayed about two weeks there. He could not mention the names of the hotels at which he stopped, or whom he saw about the business; page 261, he testified, that his brother had no mining interests there at that time; that he made the trip to see about investments—about a copper mine—but accomplished nothing.

The names he attempts to mention had all been called over in L. D. Carter's testimony previously given. L. D. Carter had testified before the master, on page 26, of the Mexico trip made by him. Pages 182, 183, of a place called "Carrillis" (intended for Cerrillis), near Albuquerque, where L. D. Carter claims to have made investments. L. D. Carter had also testified, page 163, of having paid \$500 to one, Stephens, on trip to Albuquerque, Las Vegas, and one place in New Mexico, July 12, 1900. This is the trip on which L. D. Carter claims to have made the investments in the mines at or near Albuquerque.

L. D. Carter's entry on memorandum book, testimony before master, page 163, is: "Paid J. S. Short for services, \$200, rendered up to and including November 15, 1900." L. D. Carter testified, page 186: "Short was the foreman of the gang down near Albuquerque, and then I had him down to Lordsburg, and he was with us quite a while."

I. S. Carter testified, as above, that his "trip to New Mexico was for the purpose of making investments, and that his brother had none there when he made the trip." It must have been, therefore, if made at all, prior to July 12, 1900, and as he claims to have stayed there two weeks, he must have left Chicago for the trip prior to June 28, 1900. But plaintiff's Exhibit 20 shows he was in New York June 28 and 29, 1900; and plaintiff's Exhibits 14 and 15, Union Trust Company account, shows he opened his bank account (plaintiff's

Exhibit 43, offered in evidence, page 199), with that bank in Chicago, on June 12, 1900, and made deposits thereon June 12, 16 and 22, 1900.

Plaintiff's Exhibit 23 shows, I. S. Carter at Leavenworth, June 1, 1900, with F. P. Blair. Between June 1 and 12, 1900, he could not have made the trip from Leavenworth to Albuquerque and Carrillis and returned to Chicago, and stayed two weeks in New Mexico. The Lewis letter, number 6, in evidence, June 5, 1900, to I. S. Carter, acknowledges a telegram from I. S. Carter, also between June 1 and 12.

So, if he made the trip to New Mexico and stayed two weeks, as he claims it, it must have been prior to June 1, 1900.

Plaintiff's Exhibit 18, Blair's affidavit and account with check attached, shows I. S. Carter received \$5,750 on May 29, 1900, in Chicago, from proceeds of bonds sold; which bonds plaintiff's Exhibit 3 shows I. S. Carter personally had received from J. H. Paul, in New York, May 23, 1900. So that the evidence shows that if the trip to New Mexico, by I. S. Carter, was made at all, it was made prior to his having received or sold any of the securities from J. H. Paul. So that I. S. Carter's statement that he was going out there to make investments, is utterly discredited, aside from the fact that he offers no competent proof to support the claim.

I. Stanton Carter not a Credible Witness.

"Credit of a witness may be impeached either by cross-examination subject to the rule already mentioned, or by evidence that he has before done or said that which is inconsistent with his evidence on the trial; or, lastly, by contrary evidence as to the facts themselves."

Starkie on Evidence, star page 237.

Mr. Justice Story states the rule as follows:

"Where the party speaks to a fact in which he cannot be presumed liable to mistake, as in relation to the country of his birth, or his being in a vessel on a particular voyage, or living in a particular place, if the fact turn out otherwise, it is extremely difficult to exempt him from the charge of deliberate falsehood; and courts of justice under such circumstances are bound, upon principles or law, and morality and justice to apply the maxim *falsus in uno, falsus in omnibus*."

The *Santissima Trinidad*, etc., 7th Wheaton, 339.

Even where a party has pleaded a certain state of facts, which must have been at the time of pleading within their personal knowledge, they will not be allowed to amend their pleadings, and set up facts totally at variance with their origi-

nal allegations. They will not be allowed to contest the facts previously averred.

Henderson v. Louisville & Nashville R. R., 123 U. S., 61.

Contradictions of I. Stanton Carter.

In answer to demands of receiver for the assets, in controversy, I. S. Carter filed his written denial that he had any of these assets, except two bonds claimed as his own. (See receiver's report in evidence on which rule for contempt of September 23, 1901, was based.) He made the same denial in his answer to the rule, filed October 21, 1901. After we face him in court with his receipt to J. H. Paul, for \$400,000 of these assets, he admits possession and gives up securities in person to amount of \$70,000.00. See receiver's report, filed April 14, 1903.

Under item 9, claim of credit of I. Stanton Carter as follows:

"Claim paid Captain Carter, estimated \$10,000."

I. Stanton Carter testified under cross-examination on page 102, as follows:

"Q. Now, the next item that you claim credit for is, 'Paid Captain Carter, estimated, \$10,000.' When was it that you claim you paid Captain Carter that \$10,000?

A. That was on Governor's Island.

Q. At Governor's Island?

A. Yes, sir.

Q. The whole of the amount of \$10,000 that you paid him, all that credit, you claim to have paid him at Governor's Island?

A. I think I gave it all to him there.

Q. Where did you get the money to pay that over to Captain Carter?

A. I got some of it from Mr. Paul."

It is impossible that I. Stanton Carter could have paid out any such amount of money to Captain Carter, and not know the time and place of its payment. The arrest of his brother and imprisonment at Governor's Island was a notable event; the delivery of such a sum of money to Captain Carter was a notable event.

I. Stanton Carter's attention was then called (page 103 of testimony), to the fact that O. M. Carter was taken from Governor's Island and put in the penitentiary at Leavenworth on April 27, 1900. (Plaintiff's Exhibit 23.)

Also to the fact that the securities for which I. Stanton

Carter was accounting were not received by him from Paul until May 23, 1900. (Plaintiff's Exhibit 3.)

And that the total other items received by him prior to May 1, 1900 (see debit side of account item 9), and for which he charges himself amount to about \$2,750. He then admits (testimony, pages 103, 104), that it was impossible for him to have paid the \$10,000 out of the moneys for which he was accounting. So palpable was this a false claim of credit against the fund for which I. Stanton Carter was accounting that his counsel (page 110 of testimony), admits that the claim of credit ought to be abandoned, but still contended for it as against the \$2,750 received by I. Stanton Carter, prior to May 1, 1900. Although he claimed credits for other items paid out by him prior to May 1, 1900, for more than enough to have absorbed the \$2,750.

There was absolutely no proof put in to verify this \$10,000 claim of credit, it was affirmatively disproved, and the master so found.

Again,

Under Debit Item 5, claimed paid A. J. Rose \$5,000.

I. Stanton Carter endeavored to claim that he paid the Kellogg & Rose note in cash \$5,000, and that this was in addition to \$4,500 in coupons, which he delivered them, for which we gave him credit as delivered to Kellogg & Rose. (See his testimony, pages 138, 79, 80.)

At this very time he had in his possession, but held back, Kellogg & Rose's receipt, which showed that the note had been paid by \$4,500 in coupons and \$500 in cash. It was not until after the complainant went to New York and proposed to take affidavits and extracts from the letter-books, and which was there taken, that the receipt was produced, after Rose produced his copy of the receipt, and which showed conclusively that the payment had been made by I. Stanton Carter with the \$4,500 in coupons, and \$500 in cash. (See plaintiff's Exhibit 27, affidavit of Rose and statement from books of Kellogg & Rose.)

Again,

Under Item 10, I. Stanton Carter's Claim of Credit.

"Claim paid as per order of Captain Carter, estimated, \$10,000."

I. Stanton Carter, on direct examination testified as to this, pages 56 and 57, that he paid \$100 or \$150 to a woman, and gave \$8,500 to Mr. Rose for the woman.

On page 158 he testified, that he gave the money to Rose in the City, or over at Governor's Island.

Plaintiff's counsel, on page 103, called I. Stanton Carter's attention to the fact that it was impossible for him to have paid any of these large sums of money to the woman while O. M. Carter was at Governor's Island, by reason of the fact that Carter left Governor's Island on April 27, 1900, and I. Stanton Carter did not get the securities, for which he was accounting, into his hands until May 23, 1900. I. Stanton Carter then changed his testimony as to this under cross-examination, on page 106, and said that he believed that he paid the money to Rose for the woman when Carter was at Leavenworth, and on page 109, that he got the money out of the safety deposit vault in Chicago, in which he kept the proceeds of securities sold by him from those received by him from Paul, on May 23, 1900. The above testimony was given before the master on October 23, 1902; on November 6, 1902, the testimony of Mr. Rose was taken by Mr. Stone and Government's counsel by affidavit in New York, and which was admitted in evidence by agreement, page 234. Plaintiff's Exhibit 27, Rose's affidavit and transcript from Kellogg & Rose's books totally disproves this claim.

The other evidence, on which the master bases his finding that the \$10,000 was not paid to the woman at all, shows conclusively that this was an absolutely false claim.

The letters of Miss Lewis in evidence, and other evidence show conclusively that instead of I. Stanton Carter paying her any money, that the sums that were paid her were paid her directly by J. H. Paul from a different fund which he had on hand, to get her to go to Europe and stay away while the Greene and Gaynor hearing was going on in New York, and that she was then set adrift without any provisions for her, until in despair, she attempted to commit suicide. These were all claims of credits for very large amounts.

It was impossible that I. Stanton Carter could have made them by mistake of fact. They show either that they were false and perverted statements known by him to be utterly untrue at the time they were made, or else that his mind is so weak and unreliable that his testimony cannot be accepted in either event.

Again,

The Claim by him of Traveling Expenses to Mexico and New Mexico, as hereinbefore shown, is Disproved.

Again,

His claim of being away from Chicago on his brother's business, the biggest portion of his time, was shown to be utterly untrue by the evidence, and as found by the master. Under cross-examination it was reduced to a few trips, the time of which is shown by the positive evidence from the hotels at which he stopped.

The said finding of the master contravenes the following rules applicable to accounting and references.

The rule is, that no party is allowed in an accounting to clear himself by his own testimony, but he must produce vouchers, and if the other party objects, he must produce

"The affidavit or oral evidence of the person who received the money is required; and if this cannot be had, then proof be given of his signature to the voucher."

2nd Daniel's Chancery Practice, star page 1227, 6th Ed.

Harding v. Handy, 11 Wheat., 103-127.

There are certain exceptions to the general rule, but when the rule is to be departed from it must be provided for by the order of court making the reference. As stated by Mr. Daniel:

"It is to be observed, however, that it is not for the master to decide in such cases as to the propriety of departing from the ordinary course of proceeding."

2nd Daniel's Chancery Practice, star page 1231, 6th Ed.

Even where the amount to be accounted for does not exceed forty shillings, the party is not allowed to discharge himself by his own oath, unless he be creditable and uncontradicted, and then he must mention to whom paid, for what and when, and must swear positively to the fact, and not as to his belief only, and the whole of the item so established must not exceed 100 pounds.

2nd Daniel's Chancery Practice, star page 1228.

Remsen v. Remsen, 2 John. Ch., 501 (N. Y.).

Goodner v. Browning, 9 Hump. (Tenn.), 783.

"It is for the party claiming to be entitled, to establish just what is the amount he is properly entitled to, and it is not made the duty of the court, or its officers to arbitrarily guess at the amount."

Spalding v. Mason, 161 U. S., 394, 392.

And complainant excepts to the finding by said master as aforesaid of \$60 expenditure by said I. Stanton Carter for

the expenses of trip September 14, 1901, and the finding of an expenditure of \$240 for four trips after November 6, 1901; the testimony being, as hereinbefore set forth, that a reasonable expenditure for the Leavenworth trip of September 14, 1901, would be \$49.32, and for the four trips after November 6, 1901, \$197.28; there being absolutely no testimony to support the increase of said allowance over said sums, which were testified to be liberal allowances for such trips, and an inspection of Exhibit 32, taken in connection with the testimony of Edward I. Johnson, page 232 and 239 of testimony reported by the master, will show that the same were liberal estimates and assigns the same as error.

Complainant excepts to the carrying forward of said credit of \$4,000 for traveling expenses into the statement of balances, page 34 of the master's report, and assigns the same as error.

And excepts to the carrying forward of the balance, so obtained into the consolidated account made by the master on page 57; and assigns the same as error.

Note. The following items which I. Stanton Carter made proof of under the head of the \$8,000 estimated expenses, and for which he did not claim credit in his statement rendered otherwise than under this item, were allowed by the master in the credits given him in stating the amount, page 33 of the master's report, although in stating the account the master simply gives the credit without stating under which item the claim for credit was made, viz.:

"Paid account of Orange, N. J., property.....	\$ 620.50
Paid interest account of 8th avenue property.....	484.48
Paid storage	90.00
Paid commissions of Bragg	10.00
Paid for printing	2,150.00
Paid expenses of Blair November 25, 1899, and for revenue stamps	401.50"

Aggregating\$3,756.48

These items added to the \$4,000 allowed for traveling expenses to I. S. Carter by the master, makes an allowance of \$7,756.48 on the claim of \$8,000 made under general heading of expenses.

Third Exception.

For that the said master in stating the final account of I. Stanton Carter, on page 33 of his said report, committed error in this, that he gives the said I. Stanton Carter credit, as against the fund traced into his hands as found by the master, for salary twenty-two and one-half months, at \$300, \$6,750.

Whereas, the said I. Stanton Carter should not be given credit for salary at all, as shown by complainant's first exception, but should be credited only for the amount which he actually used for account of salary on account of personal and family expenses, which he could not now replace, \$3,450.

And in this, that he gives the said I. Stanton Carter credit for traveling expenses to September 1, 1901, \$4,000.

Whereas, as shown by complainant's second exception, he should not be credited for traveling expenses to September 1, 1901, but with \$2,180.73.

And in this, that said master gives the said I. Stanton Carter credit in said final account for Leavenworth trip September 14, 1901, \$60, and Leavenworth trips since November 6, 1901, \$240.

Whereas, the reasonable expenses and costs for said trips, as shown by complainant's second exception, are:

Trip September 14, 1901.....\$ 49.32

And Leavenworth trips since Nov. 6, 1901..... 197.28

And in this, that on the next page said master carries forward said errors in the original account, into the statement of balances on page 34 of said master's report.

And whereas, said master should have stated the credit side of I. Stanton Carter's account on pages 33 and 34 of his report as follows:

I. Stanton Carter.

	Credit.
Paid F. P. Blair.....	\$ 6,200.00
Paid F. P. Blair.....	5,000.00
Paid F. P. Blair by deduction from Mtge. loan....	2,005.27
Paid F. P. Blair and for revenue stamps.....	401.50
Paid A. J. Rose.....	5,000.00
Paid Lucinda M. Carter.....	2,581.72
Paid for printing	2,150.00
Paid for life insurance.....	453.00
Paid for commission to Bragg.....	10.00

Complainant's Exceptions to Master's Report. 335

Paid storage	90.00
Paid on account Orange, N. J., property.....	620.50
Paid interest, etc., on account 8th Ave. property....	484.48
T. M. Cunningham, notes.....	10,275.00
Colehour, note	11,000.00
Beirne Gordon, notes	600.00
Cash turned over to receiver.....	770.40
Contributed toward purchase 21 Ky. Cent. bonds..	14,884.35
Money paid to L. D. Carter.....	7,000.00
Money paid D. P. Carter	354.00
Money paid O. M. Carter.....	150.00
Salary, 22½ months, at \$300, of which expended....	3,450.00
Traveling expenses prior to Sept. 1, 1901.....	2,180.73
Amount paid C. L. Banks.....	100.00

Total credits to Sept. 1, 1901.....	\$75,760.95
Paid H. G. Stone, Sept. 23, 1901.....	\$1,000.00
Exp. Leavenworth trip Sept. 14, 1901....	49.32 1,049.32

Payments since November 6th, 1901:

Four Leavenworth trips.....	\$ 197.28
-----------------------------	-----------

STATEMENT OF BALANCES,

I. S. Carter.

Total of debit items.....	\$95,651.41
Total credits to Sept. 1, 1901.....	75,760.95

Balance in I. S. Carter's hands Sept. 1, 1901.....	19,890.46
Payments between Sept. 1 and Nov. 6, 1901.....	1,049.32

Balance of assets in hands of I. S. Carter Nov. 6, 1901, which have not yet been turned over to the receiver	18,841.14
Payments since Nov. 6, 1901, not to the receiver....	197.28

Balance still in I. S. Carter's hands to Dec. 2, 1902, at the time of closing testimony.....	18,643.86
--	-----------

In addition to the above, the defendant, I. Stanton Carter, should account for all coupons on said Michigan Telephone Company bond and said Kentucky Central Railroad Company bond accruing since the date of their purchase, March 11, 1901.

Fourth Exception.

For that the said master, in passing upon the credits claimed by L. D. Carter against the fund traced into his hands, finds, on page 39 of his said report, as follows:

"The next item is, 'Paid J. H. Winkler, \$1,000.'

"L. D. Carter testified that Winkler was an attorney at Oakland, Illinois, who had rendered services for him on account of Captain Carter, and that he had paid him the above amount as he and Winkler estimated it. He produced canceled checks showing the payment of \$325, and a receipt for \$1,000, dated September 1, 1901 but which was actually signed October 23, 1902, and which he testified was for amounts paid to Winkler prior to September 1, 1901, although the evidence showed a payment of \$50 was made October 31, 1901.

"The master is of opinion that this item is sufficiently proven, and should be allowed for \$1,000."

Complainant excepts to said finding, and assigns the same as error. Whereas, the said master should have found as follows:

"There was no positive competent evidence of any payments made to J. H. Winkler by the said L. D. Carter except as follows:

"Complainant's Exhibit 27, check, Jan. 22, 1901.....	\$ 50.00
Testimony, page 158, check, November 9, 1900.....	45.00
Testimony, page 158, check, January 2, 1901.....	45.00
Testimony, page 158, check, February 6, 1901.....	50.00
Testimony, page 158, check, March 22, 1901.....	65.00
Testimony, page 158, check, May 2 1901.....	20.00
Testimony, page 158, check, October 31, 1901.....	50.00

Total	\$325.00
-------------	----------

That said L. D. Carter is not entitled to credit for any payments to the said J. H. Winkler in excess of said sum of \$325."

In support of the above exception reference is made to the following evidence:

L. D. Carter testified before the master, page 22, that Winkler was his local attorney at Oakland.

On October 21, 1902, L. D. Carter testified, page 41, that he had paid Winkler said sum of \$1,000 by a check which he could produce.

On October 24, 1902, he came back to the stand and testified, page 157, and produced two receipts from J. H. Wink-

ler, as follows: Defendant's Exhibit 28, receipt dated September 1, 1901, J. H. Winkler to L. D. Carter, for amount paid for expenses, \$1,000. Defendant's Exhibit 29, receipt, dated September 1, 1901, J. H. Winkler to L. D. Carter, for amount paid for expenses, \$100, and for expenses paid by L. D. Carter, \$100.

On cross-examination, page 159, L. D. Carter testified that the receipts were written out and signed by J. H. Winkler on the day before he, L. D. Carter, testified; that is, October 23, 1902,—over a year after it purports to have been written.

On page 157, L. D. Carter testified that the amounts were not paid to Winkler on the dates indicated by the receipts; that it had been paid previous to that, at various times. That he and Winkler had figured it up, \$1,000 for services, "probably before that, and probably that day."

Although Winkler was within reach of the process of the court, and L. D. Carter's own attorney, he failed to corroborate his claim of payment by any testimony from Winkler, or to produce his affidavit, even, in proof of payment.

What part of the \$1,000 was paid on the date the receipt was written out, October 22, 1902, if paid, is not stated. If the \$675 in excess of the \$325 was paid at that time, it was a breach of the order of the court directing L. D. Carter to turn over these assets to the receiver, and in direct violation of the agreement of November 6, 1901.

The receipts were objected to by complainant's attorney, (Rec., 159, 160), because they were not given contemporaneously with the transactions, and were papers evidently prepared for use as testimony, and not supported by affidavit of Mr. Winkler even. And the suggestion was then made that if a statement were made by Mr. Winkler, showing the dates of the payments by him and verified by affidavit, it would be admitted in evidence. To this time the payments stand unsupported. Such receipts are not evidence.

Jordon v. Wilkins, 3 Wash., C. C., 110, Fed. Cases, Vol. 3, No. 7527; Receipts, 19 Ency. Law, p. 1128.

The master should not have allowed credit but for the \$275 paid out prior to September 1, 1901, the date of notice of the appointment of the receiver, and the \$50 paid out October 31, 1901, should be stated as a payment made after that day, which is to be dealt with, under the order of reference, differently.

Fifth Exception.

For that the said master, in passing upon the credits claimed by L. D. Carter against the fund traced into his hands, in his report, page 41, found as follows:

"The next item is, 'Paid J. H. Winkler 4 trips to Chicago, \$200.'

"L. D. Carter testified that he paid this amount. His testimony was supported by Winkler's receipt dated September 1, 1901, although actually signed October 23, 1902. The master is of the opinion that this item is sufficiently proven and should be allowed for \$200."

And complainant assigns said finding as error, and says that the said master should have found:

"That there was no testimony to support said payment other than the uncorroborated testimony of L. D. Carter. That the receipt of J. H. Winkler, dated September 1, 1901, purporting to be from J. H. Winkler to L. D. Carter, was not actually written out and given to said L. D. Carter until October 23, 1902, while the case was on trial before the master. And that there was no proof by affidavit from Winkler, or other testimony save that of L. D. Carter, that such payment was ever made.

That said receipts were objected to by complainant's attorney because not proved, and because they were statements, not under oath, fixed up after the case was on trial and because the evidence tends strongly to show that the said expenses were actually paid to Winkler by the checks for which L. D. Carter takes credit under the \$1,000 item last above excepted to."

In support of this exception reference is made to the evidence under said last above exception, and also to the following:

L. D. Carter testified before the master, page 25, as follows:

"Q. The next item is, J. H. Winkler, 4 trips to Chicago, \$200. A. He charged \$50 a trip.

Q. You paid that? A. Yes, sir."

The times when Winkler made those trips is indicated by the evidence, February 8 and 13, 1901, when the deposit was made with N. W. Harris, and the purchase of the twenty-one Kentucky Central bonds was made. (Testimony of L. D. Carter, page 33.)

L. D. Carter gave Winkler check, February 6, 1901, for \$50, and March 27, 1901, for \$65. The railroad fare from

Oakland to Chicago is only \$4.83. The checks for which credit is given under the \$1,000 item shows that these trips were paid for by those checks.

Sixth Exception.

For that the said master, in passing upon the claims of credit of L. D. Carter against the fund traced into his hands, on page 48 of his said report, states as follows:

"The next item is 'Personal expense, \$5,000.'

"As to this item there is no evidence to support it excepting the testimony of L. D. Carter and some entries from the pencil memorandum books above mentioned.

"As to his Washington and New York trips, he undertook to name the various hotels at which he stopped, naming the Dewey, the United States, Shoreham, Riggs and Ebbett. Complainant's evidence established that there was no United States hotel in Washington; that L. D. Carter did not stop at either the Shoreham, the Riggs or the Ebbett during the period in question. He claimed to have stopped at various boarding houses also, but was unable to name any of them. Complainant's evidence also showed that L. D. Carter did stop at the Dewey Hotel on the following days: November 29, to December 4, 1900, December 19 to December 22, 1900, January 16 to 18, February 19 to 21, and 24 to 25, and 26 to 27, 1901; and that his total hotel bills for said days were \$76.15.

"L. D. Carter testified that he made three, four or five trips from New York to Washington, and complainant's evidence shows that he was at the Hoffman House, New York, August 25 to 29, 1900.

"Complainant's witness, E. I. Johnson, testified as to what are reasonable expenses for railroad fares, hotel bills and incidental expenses of all kinds, and on the basis of this testimony complainant is willing to concede the following amounts:

Expenses, Washington and New York trips proven..\$	618.55
Expenses for 4 extra New York trips.....	154.00
Expenses, two Savannah trips (if made).....	169.80
Expenses, Leavenworth trips prior to September 1, 1901	673.02

Total\$1,615.37"

And thereupon the said master found as follows:

"As to this entire claim of credit for \$5,000 personal expenses, the master finds that there is no proper proof of any portion of it on the part of the defendant, but the complainant's evidence shows that there must have been such expenses, and to a considerable amount. Acting upon the assumption that traveling expenses usually largely overrun any estimate made in advance, the master thinks that \$3,000 would be a liberal allowance, and recommends that L. D. Carter be allowed a credit for his personal expenses under this item for \$3,000."

And complainant assigns said finding as error, and says that the said master should have found:

"That \$1,445.57 was more than a liberal allowance for the trips actually proven, and that there is no competent evidence whatever to support any allowance for said expenses beyond the said sum of \$1,445.57, expended up to September 1, 1901."

In support of this exception reference is made to Complainant's Exhibit 33, in connection with the testimony of E. I. Johnson as to railroad fares, etc.; Record pages 232 and 239, showing that a very liberal estimate for the traveling and personal expenses of L. D. Carter in making these trips would be:

Leavenworth trips to September 1, 1901.....	\$ 673.02
Chicago, Washington and New York trips.....	618.55
Washington to New York trips, to September 1, 1901..	154.00

Total to September 1, 1901.....	\$1,445.57
Leavenworth trips after September 1, and prior to	

November 6, 1901.....	\$ 54.46
Leavenworth trips after November 6, 1901.....	163.38

The master finds, as the evidence shows, that the two Savannah trips claimed by L. D. Carter, were not made, certainly not at the time he claims to have made them, and there is no evidence in corroboration offered.

Seventh Exception.

For that the said master in reporting on the claims for credit made by L. D. Carter against the fund traced into his hands, on page 52 of said master's report, states and finds as follows:

"The final item on L. D. Carter's account is, 'Paid myself salary for eighteen months, \$15,000.'

"This claim is made under a written contract between I. Stanton Carter, as attorney in fact of O. M. Carter, and L. D. Carter, which has been hereinbefore set forth. The power of attorney, under authority of which it is claimed the contract in question was made, has also been set forth heretofore.

"It is pointed out on behalf of complainant that the power of attorney gives no authority to make such a contract, and on the other side L. D. Carter testified that he showed the contract to Captain Carter about a month after its execution, and the latter then ratified it. Counsel for the defendants stated that he would produce before the master an affidavit from Captain Carter covering this point, but he failed to do so, although he subsequently did produce such an affidavit covering the contract as to the salary of I. Stanton Carter.

"The master finds that such an agreement was made for the employment of L. D. Carter at a salary of \$10,000 per year, and that he rendered services thereunder during fifteen and one-half months intervening between the date of the contract and the appointment of the receiver herein. As to whether such salary was or was not a reasonable one, the master does not consider it within his province to decide. In the master's opinion L. D. Carter is entitled to a credit for salary, of fifteen and one-half months at the rate of \$10,000 per year, or \$12,916.66."

Complainant excepts to said finding as error, and says that said master should have found:

"That it was not a part of the master's duty under the order of reference to pass upon the validity of said contract as between the said L. D. Carter and Oberlin M. Carter. That by the terms of the agreement of November 6, 1901, and the order of reference the said L. D. Carter was estopped from setting up any claim of salary, as against the United States and the receiver in this cause, as a set-off against or claim upon the fund traced into L. D. Carter's hands, as found on the debit side of his account as stated by the master.

That by the terms of said agreement L. D. Carter disclaimed all personal interest in said assets claimed by the government and traced to him, or the proceeds thereof and reinvestments thereof.

That if said claim for salary be valid as against the said Oberlin M. Carter, and be a lien on any part of said assets in the hands of L. D. Carter if the same shall be finally determined to be Oberlin M. Carter's. That nevertheless, the

existence of such a lien is not a reason why said asset should not be forthwith turned over to the receiver, to be held pending the litigation, to await the determination of the case on the merits, as between the United States and Oberlin M. Carter; and that as against the United States the said L. D. Carter is forever shut off and estopped from setting up any personal claim, by lien or otherwise, in or to the said assets claimed by the government in the said cause, and traced into his possession, by reason of the aforesaid agreement of November 6, 1901."

In support of the aforesaid exception reference is made to the order of reference of October 15, 1902; to the aforesaid agreement of November 6, 1901, and to the evidence cited under the first exception above.

Inasmuch as the claim for this credit of \$12,916.66 is based upon a contract, not otherwise proven to have been made except by the oral testimony of L. D. Carter of an oral ratification made by Oberlin M. Carter of said contract, the said claim of credit rests solely upon the testimony of L. D. Carter, the accounting party.

L. D. Carter not a Credible Witness.

Reference is therefore made to the following evidence showing that the said L. D. Carter is not a credible witness, and that he stands impeached by the record of this cause for contradictory statements, and for making false claims which have been disproved in the record, to wit:

The order of court of August 27, 1901, appointing Max H. Whitney receiver, and directing him to take charge of the assets in question.

The report of the receiver, which is offered in evidence and is in the record of the case, and attached thereto the written demand of the receiver on L. D. and I. S. Carter for said assets, and their written denial that they had any of the assets claimed in the bill in their possession or control.

Also the answers filed by L. D. and I. S. Carter in the case on October 21, 1901, to the rule for contempt which had been issued on September 23, 1901, on their failure to turn over said assets to the receiver, in which answers they again positively deny the possession or control of any of the aforesaid assets.

Reference is also made to the agreement of November 6, 1901, made pending the hearing on said rule for contempt, in which they acknowledge possession of a large part of said

assets; to the record before the master, in which it is admitted by the said defendant, and found by the master, that they were then in possession of and actually turned over to the receiver over \$70,000.00 of the assets in question, and that L. D. Carter now has in his possession eleven Kentucky Central bonds described in the bill and found by the master to be reinvestments of the funds in question.

Fraud Apparent on the Face of the Alleged Salary Contract Between L. D. Carter and O. M. Carter, by I. S. Carter, Attorney.

Reference is made to the terms of the alleged contract of May 15, 1900, showing that the only duty assumed by L. D. Carter under said contract was to take charge and assume the responsibility of hiring all attorneys and to pay the same and the expenses connected therewith, consisting of court expenses of all kinds, lawyers' traveling expenses and other expenses, as he and the captain may direct, for the purposes of securing a fair and honorable trial before some civil court of the United States for Oberlin M. Carter, the money to be furnished by Oberlin M. Carter.

There was no duty of managing Carter's property, or other duty imposed, and for these services a salary of \$10,000 was provided.

L. D. Carter was not a lawyer. He was a merchant at Oakland, Illinois, dealing in broom corn, buying and selling it, and occasionally dealing in cattle. (Testimony before the master, page 11.) He claims that he could make \$10,000 a year in his business. (Testimony, page 32.)

It otherwise appeared from the master's report that he continued to carry on his broom corn and cattle business during the time of this alleged work for Oberlin M. Carter. He did not keep books of account, according to his testimony, in said broom corn business. (Testimony, pp. 166, 167, 168, 169, 171, 172.)

Of the large amount of money of the O. M. Carter funds which he received into his hands—in fact, all of it—he deposited in the bank to the credit of L. D. Carter & Son, that being the name in which he conducted his business at Oakland, mixed with his own funds. (Testimony, page 169.)

He testified (page 166) that he furnished all the capital in the business, and his son got one-third of the income. But although the business had been run for a number of years, they had never kept any books of account, or had any settlement with his son.

The Alleged Agreement for Salary Construed in the Light of What Was Done Under It.

The master finds (page 51) that the only absence from his business on any trips partaking of the nature of the trips made for the purposes set out in the contract were those shown by the complainant's testimony. (See Exhibit 33, and sub-exhibits thereto, and testimony of E. I. Johnson, Rec., pages 232, 239.) These show that during the whole period it is not proved that he was absent from his home for more than one hundred and thirty-three days.

L. D. Carter testified that he spent a considerable time in Washington, lobbying with Congressmen, etc., in efforts to get some kind of a relief bill through Congress for Carter, but the fact that he spent any such time there, other than that above referred to, is not proven by any competent testimony as found by the master. (See his testimony as to being engaged in lobbying pages 20 and 27 of testimony before the master.) He could not recover for this, if the contract could be construed to cover that kind of services.

Trist v. Child, 21 Wall, 441-452.

Hayward v. Nordburg, 85 F. R., 11.

Irrespective of whether Oberlin M. Carter actually committed the frauds charged in the bill or not, L. D. Carter knew of the fact that Oberlin M. Carter had been convicted before the court-martial, and that the government was claiming that all the funds in Oberlin M. Carter's hands had been derived from those frauds; and the evidence shows that he and I. Stanton Carter were really engaged, more than anything else, in concealing those funds from the government, and in endeavoring to place them beyond the government's reach.

Reference is made to the following evidence:

(1) The securities were hurried out of New York to West Virginia and Illinois in May, 1900, immediately after the government got on the trail of them, in April, 1900. This is shown by the date of the receipt, May 23, 1900, to J. H. Paul, in evidence.

(2) I. S. Carter proceeded to sell off large quantities of these good interest-bearing securities, with the coupons clipped a year in advance, the effect of which was that the purchaser would not have any occasion for a long period to collect the interest, and that the location of the securities could not be found out and the same traced back through

successive sales to him. (See report master, p. 17, and Pf. Exhibit 8.)

(3) A large part of these coupons clipped in advance were delivered by I. Stanton Carter to Kellogg & Rose, attorneys for Greene and Gaynor as well as attorneys for O. M. Carter, and collected through them. (See Pf. Exhibit 27.)

(4) I. Stanton Carter kept (not bearing interest) large quantities of the cash proceeds of those good interest-bearing securities for months in safety deposit boxes in Chicago. He kept them under names different from the name usually borne by him; in one he went by the name of "Isaac Carter," and the other "Stanton Carter." (See testimony of I. S. Carter before the master, page 264.)

(5) While in possession of large quantities of cash money laid up in these vaults, bearing no interest (see testimony, page 96), he negotiated a four and one-half per cent. loan of \$23,000, on the Eighth avenue, New York, property, which then stood in O. M. Carter's name, and stored this away also in vaults. (See Pf. Exhibit 6.) At the same time \$146,000 of the securities had been converted by D. P. Carter in West Virginia into cash, and held in vaults in West Virginia. The equity of redemption in the Eighth avenue property was then conveyed to L. D. Carter.

L. D. Carter, according to his testimony, entered into this contract with I. Stanton Carter, as attorney for O. M. Carter, on May 15, 1900; and, according to his testimony, and as found by the master, he claims to have been working with I. Stanton Carter in these matters prior to that time. L. D. Carter was engaged in converting these securities, which the government had traced in the Greene and Gaynor hearing in New York, into cash, and in making reinvestments thereof. (See plaintiff's Exhibit 9, account sales of J. F. Harris, broker, and original check endorsed "L. D. Carter." Plaintiff's Exhibit 11, account of L. D. Carter & Son with Oakland National Bank.) The above showing the sale of ten New York, Lackawanna & Western bonds, for \$11,883.54, and proceeds, found by the master to be traced into L. D. Carter's possession.

And see plaintiff's Exhibit 3, I. S. and D. P. Carter's receipt, May 23, 1900, to J. H. Paul for said bonds. And Exhibit 8 of the bill, showing the above as part of the same bonds, to take charge of which, or proceeds thereof, the receiver was appointed. See also plaintiff's Exhibits 12, 11, 13 and 3, showing sales of \$13,268.60 of these securities in

October, 1900, by L. D. Carter, and appropriation of the proceeds found against him by the master. See also plaintiff's Exhibit 8, account of L. D. Carter with N. W. Harris & Company, and testimony of L. D. Carter, pages 25, 26, 32 and 33, 45, 160 and 161, and defendant's Exhibit 30, showing that of the proceeds of the bonds which had been identified in New York by the government, by description, in the Greene and Gaynor hearing, and which bonds had been sold by L. D. Carter, he used \$14,884.35 to make a reinvestment in twenty-one Kentucky Central bonds, which he is now attempting to hold out by setting off this salary claim against it.

That it was attempted by Oberlin M. Carter, I. Stanton Carter and L. D. Carter to keep all these transactions concealed, to prevent the government from tracing the bonds, or the proceeds thereof, is shown by the following evidence also:

Not Keeping Books.

I. S. Carter testified before the master (page 56) that he did not keep any books of account for any of his disbursements, because he did not know how to keep books, "and he, O. M. Carter, told me it was not necessary." (Page 144.) That O. M. Carter told him not to keep any books of account.

L. D. Carter testified (page 16) that Judge Jerry Wilson told him not to keep any books of account, and he fails to produce any account from books of L. D. Carter & Son showing the receipt and disbursement of the \$34,000 of cash that was traced through the bank accounts into the account of L. D. Carter & Son, and mixed with the latter's private funds, and which forms part of the \$54,531.70 found by the master, on page 33, on the debit side of L. D. Carter's account.

The foregoing references are sufficient to show that L. D. Carter's testimony is so utterly discredited that it ought not to be believed, without corroboration, even if this were not a case of accounting where the rule is that the accounting party must not only produce the vouchers of actual payments, but *must* prove the document properly.

Eighth Exception.

Complainant excepts to the final statement by the master of the account of L. D. Carter, on page 55 of said report, in that he therein gives L. D. Carter credit as against the fund traced into his hands, as aforesaid, for amount paid J. H.

Complainant's Exceptions to Master's Report. 347

Winkler prior to September 1, 1901, \$950 and \$200, and assigns the same as error.

Whereas the amount he should have given credit for for payments to Winkler, as shown by complainant's Exception Fourth, should be \$275 only, up to September 1, 1901.

And in this, that said master in said final statement of account gives L. D. Carter credit for personal expenses, \$3,000, up to September 1, 1901. Whereas the amount of said personal and traveling expenses, as shown by complainant's Sixth Exception, up to September 1, 1901, is only \$1,445.57.

And in that the said master in said final statement of L. D. Carter's account gives him credit for salary, \$12,916.66. Whereas he should not have given him credit for any salary as against the fund traced into his hands, with which he is charged on the debit side of the account as found by the master, as shown under complainant's Seventh Exception.

And in this, that in the summary statement of the balances, on page 56, and in the consolidated account, on page 57, the said master brings forward the said errors by him so committed.

And whereas said special master should have stated the credit side of said account of L. D. Carter on pages 55, 56 and 57 of his said report as follows:

Credits.

Paid F. D. Blair.....	\$ 6,000.00
Paid Atwood & Hooper.....	1,964.54
Paid two attorneys fees C. H. Grovenor.....	1,500.00
Paid A. J. Rose	1,000.00
Paid I. Stanton Carter.....	6,000.00
Paid J. M. Wilson.....	3,400.00
Paid J. H. Winkler to Aug. 27 or Sept. 1, 1901....	275.00
Paid O. M. Carter.....	75.00
Paid personal expenses	1,445.57

Total credits to Aug. 27 or Sept. 1, 1901.... \$21,660.11

Payments made to third persons not the receiver by L. D. Carter since notice of appointment of receiver, September 1, and prior to November 6, 1901:

Paid H. G. Stone Sept. 12, 1901.....	\$200.00
Paid O. M. Carter Oct. 7, 1901.....	10.00
Paid J. H. Winkler Oct. 31, 1901.....	50.00
Paid expenses Leavenworth trip, Nov. 4, 1901.....	54.46

\$314.46

348 *Complainant's Exceptions to Master's Report.*

Payments to third persons not the receiver by L. D. Carter since agreement of November 6, 1901:

Paid Atwood & Hooper Jan. and July, 1902.....	\$ 75.00
Paid life insurance Jan. 7, 1902.....	453.00
Paid expenses three Leavenworth trips.....	163.38
Paid O. M. Carter	225.00
Paid A. J. Rose Feb. 18, 1902.....	750.00
	<hr/>
	\$1,666.38

Payment to receiver March 13, 1903, ten Kentucky Central bonds, cost price.....\$9,944.43
And should have stated summary as follows:

Summary L. D. Carter.

Total debits	\$54,531.77
Total credits to Sept. 1, 1901.....	21,660.11
	<hr/>

Balance in L. D. Carter's hands Sept. 1, 1901.....	\$32,871.66
Payments not to the receiver Sept. 1 to Nov. 6, 1901	314.46
	<hr/>
	\$32,557.20

To which is to be added coupons on twenty-one Kentucky Central bonds for July, 1901; January and July, 1902, and January, 1903.....	1,680.00
	<hr/>
	\$34,237.20

From this is to be subtracted ten Kentucky Central bonds turned over to the receiver March 13, 1903, which cost	9,944.93
	<hr/>

Balance of assets in hands of L. D. Carter Nov. 6, 1901, which have not yet been turned over to the receiver	\$24,292.27
Deduct amount paid out by L. D. Carter to third persons since Nov. 6, 1901, without authority of court	1,666.38
	<hr/>

Balance still in L. D. Carter's hands.....\$22,625.89

And whereas said master should have stated the consolidated account of I. Stanton Carter and L. D. Carter as follows:

Consolidated Account.

Balance I. S. Carter's account, unaccounted for to the receiver, Sept. 1, 1901.....	\$19,890.46
Balance L. D. Carter's account, unaccounted for to receiver, Sept. 1, 1901.....	32,871.66
Total unaccounted for Sept. 1, 1901.....	<u>\$52,762.12</u>
Payments to third persons not the receiver.	
By I. S. Carter, Sept. 1 to Nov. 6, 1901.....	\$1,049.32
By L. D. Carter, Sept. 1 to Nov. 6, 1901.....	314.46— 1,363.78
Balance unaccounted for Nov. 6, 1901.....	<u>\$51,398.34</u>
Add coupons on twenty-one Kentucky Central bonds for July, 1901; January and July, 1902, and January, 1903	1,680.00
	<u>\$53,078.34</u>
Subtract ten Kentucky Central bonds turned over to receiver March 13, 1903, cost.....	9,944.93
Balance of assets in hands of I. S. Carter and L. D. Carter, Nov. 6, 1901, which have not yet been turned over to the receiver	<u>\$43,133.41</u>
Deduct amount paid to third persons, without authority of court, since Nov. 6, 1901:	
By I. S. Carter	\$ 197.28
By L. D. Carter.....	1,666.38— 1,863.66
Balance still in hands of I. S. Carter and L. D. Carter	<u>\$41,269.75</u>

Ninth Exception.

For that the said master, in paragraph XVIII, page 58, of his report, finds as follows:

"Of the total receipts of the defendants, I. S. and L. D. Carter, the sum of \$21,529.15 was received from sources other than Paul, Bragg and Westcott. Deducting this amount from the balance in their hands November 6, 1901, \$30,992.30, it appears that there was then in their hands of receipts from Paul, Bragg and Westcott, unaccounted for, the sum of \$9,343.15, and, in addition, the sum of \$21,529.15, received from other sources and also unaccounted for."

And for that said master amends his report on page 60,

after the payment to the receiver on March 13, 1903, of the ten Kentucky Central Bonds, and finds that said payment constitutes a complete accounting for the assets received from Paul, Westcott & Bragg.

And complainant assigns said findings as error, and says said master should have found:

"That of the total receipts of the defendants, I. S. Carter and L. D. Carter, the sum of \$21,529.15 was received from sources other than from J. H. Paul and R. E. Westcott and James F. Bragg, and that the amounts remaining in their hands from receipts from Paul, Westcott and Bragg at the following respective dates is as follows:

The total balance from all sources in hands of	
L. D. and I. S. Carter at the date of notice to	
them of the appointment of the receiver, Sept.	
1, 1901, is	\$52,762.12
Deduct	21,529.15

Receipts from Paul, Westcott & Bragg, unaccounted	
for, to Sept. 1, 1901, to the receiver.....	\$31,232.97
Ten Kentucky Central bonds turned over to receiver	
March 13, 1903.....	9,944.93

Balance April 15, 1903, in hands of I. S. and L. D.	
Carter from Paul, Westcott & Bragg, not deliv-	
ered to the receiver.....	\$21,288.04

Tenth Exception.

For that the master, in his report, page 59, finds as follows:

"Also, that, in addition to the cost price of said two bonds, amounting to \$2,017.01, said I. Stanton Carter has failed to account for \$11,454.18, cash proceeds of assets received by him from various sources, and which he should properly account for herein; and, in addition thereto, he should account for all coupons on said above mentioned bonds accruing since March 11, 1901."

And complainant assigns so much of said finding as fixes the sum of \$11,454.18 as the amount of cash proceeds, in addition to the cost of said two bonds, as being the sum the said I. S. Carter should account for as error.

And whereas said master should have found:

"That the said I. S. Carter has failed to account to the receiver for cash proceeds in his hands for which he is re-

quired to account at the following respective dates, in addition to the said two bonds, to wit: the one Michigan Telephone Company bond and the one Kentucky Central Railroad bond, as follows:

Total amount in hands of I. S. Carter at date of notice to him of appointment of the receiver, Sept. 1, 1901	\$19,890.46
Cost of the two bonds.....	2,017.01

Balance in I. S. Carter's hands Sept. 1, 1901, in addition to the two bonds	\$17,873.46
Payments made by I. S. Carter to sundry parties between Sept. 1 and Nov. 6, 1901, the date of the agreement	1,049.32

Balance in hands of I. S. Carter Nov. 6, 1901, in addition to the two bonds and coupons on same maturing since their purchase	\$16,824.14
---	-------------

Eleventh Exception.

For that the said master, page 59 of his report, finds as follows:

"The master further finds that the said L. D. Carter has failed to account for \$15,544.73, cash proceeds of assets received by him from various sources, and which he should properly account for herein, making, with the addition of said coupons, a total of \$17,224.73, and the master is of the opinion that the receiver herein should be allowed to decide whether to take said bonds and pay to said L. D. Carter the difference between their cost price and \$17,224.73 or whether to allow said Carter to keep said bonds on paying said last named sum to the receiver."

And complainant assigns said finding as error.

And whereas said master should have found:

"That the said L. D. Carter has failed to account to the receiver for the balance of \$24,292.27 of assets in his hands November 6, 1901, the date of the agreement, which balance in his hands at said date includes eleven of the twenty-one Kentucky Central bonds purchased with the trust funds in controversy, and which eleven bonds cost \$10,939.42. That in as much as by the terms of the agreement on November 6, 1901, the said L. D. Carter was required to disclaim any personal interest in any of the said assets traced into his

possession, custody or control, and to turn over to the receiver all of said assets so traced, except such as 'have not heretofore been bona fide disposed of by them, and, therefore, beyond their (I. S. and L. D. Carter's) control,' the master finds that said eleven Kentucky Central bonds should be forthwith turned over to the receiver, and that no claim on account of salary due from O. M. Carter to L. D. Carter can be set off against said bonds or against the cash proceeds of the aforesaid assets traced into the hands of L. D. Carter as aforesaid, as against the United States or the receiver in this cause. That if said salary claim of L. D. Carter be a valid claim against the said O. M. Carter, its enforcement as against the aforesaid assets in controversy must await the final determination of the merits of the main cause, in which the true ownership of said assets is to be determined as between the United States and said Oberlin M. Carter."

Twelfth Exception.

For that the master, on page 61 of his said report, in stating his conclusion thereon, finds:

"If it should develop hereafter that the securities and moneys in question were stolen property, or the proceeds of stolen property, and that I. S. and L. D. Carter, or either of them, knew or had good grounds for believing that fact, some portions of the accounts as above found would require modification. The allowance of salary to both of the Carters is made upon the theory that the property handled was trust property, and not on the theory that it was stolen property."

And complainant assigns said finding as error, in this, that the very purpose of the reference was to determine what assets should go into the hands of the receiver for preservation until the issue as to whether they are stolen or fraudulently diverted trust funds shall be tried between the United States and the defendants, O. M. Carter, I. S. Carter and L. D. Carter, and to award \$19,666.66 of salaries to I. S. and L. D. Carter and to allow them to retain eleven Kentucky Central bonds and other assets admitted to be part of the trust funds in controversy, is not only to ignore the orders of the court, and the agreement of the parties, but places it in the power of the said defendants to dissipate said assets, and place it beyond the power of the court to give complainant relief in respect thereto on final decree. Moreover, the

question as to whether said I. S. Carter and L. D. Carter had any claims on the assets proved into their hands, for salary or otherwise, was not referred to said master at all.

Wherefore complainant prays the judgment of the court that the said report of William M. Booth be reversed in the matters herein excepted to and complained.

MARION ERWIN,
*Special Assistant to the Attorney General,
Complainant's Solicitor.*

Endorsement: Complainant's exceptions to Report of W. M. Booth, master, filed April 24, 1903. Marshall E. Sampson, Clerk.

And on to-wit: the 25th day of April, 1903, came Horace G. Stone, solicitor for L. D. and I. S. Carter, and filed in the clerk's office of said court exceptions to the report of W. M. Booth, master, in the words and figures following, to-wit:

**EXCEPTIONS OF L. D. CARTER AND I. S. CARTER TO
REPORT OF SPECIAL MASTER BOOTH.**

In the Circuit Court of the United States, Northern District
of Illinois, Northern Division.

United States of America,
Complainant.

vs.

Oberlin M. Carter, *et al.*,
Defendants.

} In Equity.

In re reference October 15th, 1902, to the Honorable Wm. M. Booth, Master in Chancery. Exceptions to Master's Report.

The Defendants, Lorenzo D. Carter and I. Stanton Carter, each respectfully submit that the Master erred in his report herein in the following matters:

I.

In holding that L. D. Carter and I. Stanton Carter were bound to account as if complainant was their cestui que trust in the absence of proof that complainant is their cestui que trust or the cestui que trust of Oberlin M. Carter.

II.

In exceeding the reference and requiring an equitable accounting from L. D. and I. S. Carter as Trustees where the reference was limited to an ascertainment of whether they had complied with the orders of court herein as modified by the contract order of November 6th, 1901.

III.

In disregarding the testimony of L. D. Carter.

IV.

In disregarding the testimony of I. Stanton Carter.

V.

In disallowing items, or parts of items, of the disbursements by L. D. Carter numbers 1, 2, 3, 7, 9, 10, 11, 12, 13, 14, 16, 17, 20, 22, 23, 24 and 25.

VI.

In disallowing items, or parts of items, of the disbursements by I. Stanton Carter numbered 8, 10, 11, 12 and 24.

VII.

In disregarding the accounting between L. D. and O. M. Carter.

VIII.

In disregarding the accounting between I. S. and O. M. Carter.

IX.

In finding that the two bonds in controversy do not belong to I. S. Carter as his private property.

X.

In disregarding the contract of November 6th, 1901, and requiring L. D. and I. S. Carter to furnish more information than they can furnish.

XI.

In finding I. S. Carter liable for the missing coupons amounting to \$1,437.50.

XII.

In finding I. S. Carter liable for the coupons collected by J. H. Paul amounting to \$1,062.50.

XIII.

In finding I. S. Carter liable for property received by D. P. Carter.

XIV.

In holding that L. D. or I. Stanton Carter ever disposed of any of said property except bona fide.

XV.

In finding that Section Two of the contract of November 6th, 1901, has not been complied with.

XVI.

In holding L. D. Carter liable for the books, receipts, etc., delivered to O. M. Carter's attorney, Judge Wilson.

XVII.

In disregarding the entries made by L. D. Carter in his books as to his disbursements for expenses and for mining expense.

XVIII.

In finding that L. D. Carter should turn over the twenty-one Kentucky Central bonds or any part of them.

XIX.

In finding that I. S. Carter should turn over the two bonds in controversy herein.

XX.

In finding any balance against L. D. Carter.

XXI.

In finding any balance against I. Stanton Carter.

XXII.

In disregarding the contract between L. D. Carter and O. M. Carter with regard to the manner in which L. D. Carter should do business for O. M. Carter.

XXIII.

In disregarding the contract between I. S. Carter and O. M. Carter with regard to the manner in which I. S. Carter should do business for O. M. Carter.

XXIV.

In charging L. D. Carter interest on money in his hands which belongs to him.

HORACE G. STONE,
Solr. for L. D. and I. S. Carter.

Endorsement: Filed April 25, 1903. Marshall E. Sampsell, Clerk.

And on to-wit: the 13th day of April, 1908, came the United States and filed in the clerk's office of said court a motion in the words and figures following, to-wit:

MOTION OF UNITED STATES TO HAVE OPINION OF
COURT FILED NUNC PRO TUNC.

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

The United States of America	} In Equity No. 25980.
<i>vs.</i>	
Oberlin M. Carter, <i>et al.</i>	} Bill and Auxiliary Bills.

Motion of the United States.

Now comes the United States by Marion Erwin, Special Assistant to the Attorney General, and shows to the court that after said cause had been argued on the merits and had been held for some time in deliberation by the court, the court

on January 9, 1908, handed down an opinion, copies of which were furnished to the respective counsel in said cause and a copy of which is hereto attached marked Exhibit A. That no decree was at that time entered on the records of the court covering the questions recited in said opinion and that said opinion has never yet been filed in the Clerk's office of said court as movant is advised.

That thereafter counsel for the respective parties appeared before the court and arguments were had for the settlement of the terms of the final decree: That thereafter on March 17, 1908, the court handed down and delivered to counsel for the respective parties an opinion in further direction as to the settlement of the terms of the final decree, a copy of which is hereto attached as Exhibit B, and that said last mentioned opinion has never been filed in the Clerk's office of said court as movant is informed, and on March 19th and 20th, 1908, further hearings were had before the court by counsel for the respective parties for the settlement of the terms of said decree and that thereafter, to wit: on March 21, 1908, a decree was drawn by counsel for the respective parties to conform to the aforesaid written opinions delivered by the court and its directions delivered orally, and was signed and entered by the court.

In order that the record of said cause may be complete and correctly speak the facts and proceedings movant now respectfully prays that the court will by its order direct that its written opinion handed down on January 9, 1908, as aforesaid, be directed to be filed by the clerk nunc pro tunc as of January 9, 1908, and that the said written opinion handed down by the court on March 17, 1908, as aforesaid be directed to be filed by the Clerk nunc pro tunc as of March 17, 1908.

MARION ERWIN,

Sp. Asst. to the Atty. Genl., Compl. Solicitor.

Endorsement: Filed April 13, 1908. H. S. Stoddard, Clerk.

And on to-wit: the 14th day of April, 1908, in the December term, 1907, of said Court, in the record of proceedings thereof, in said entitled cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the Court, the following order and entry thereof:

ORDER TO FILE OPINIONS OF THE COURT NUNC
PRO TUNC.

The United States of America }
 vs. } In Equity Bill No. 25980.
 Oberlin M. Carter, *et al.*

Pending in Northern District of Illinois, and Auxiliary Bills pending in other Districts.

On motion of the complainant, it is ordered that the opinions of the court in the above stated cause, which is hereto attached marked Exhibit A, and which was handed down by the presiding judge on January 9, 1908, be filed in the record nunc pro tunc as of January 9, 1908, and that the opinion of the court, which is hereto attached marked Exhibit B. and which was handed down by the presiding judge on March 17, 1908, be filed in the records of said cause nunc pro tunc as of March 17, 1908.

Exhibit A.

OPINION OF COURT HANDED DOWN JAN. 9, 1908.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

United States }
 vs. } Gen. No. 25,980.
 Oberlin M. Carter, *et al.*

Kohlsaat, J.

In this suit the government seeks to obtain from defendant, Oberlin M. Carter, possession and title to certain securities and real estate held by him, or in the name of the other defendants for him, which property, it is alleged, Carter purchased or caused to be purchased for him with moneys obtained by him or for him through fraud practiced by him upon the government in the letting and execution of certain contracts for the improvement of Savannah River, Savannah Harbor, Cumberland Sound, and several waterways in that vicinity. The amount in dispute somewhat exceeds four hundred thousand dollars (\$400,000). The bill charges that Carter entered into a conspiracy with the Gaynors and Captain

Greene, contractors, or some of them to pay them or some one for them an exorbitant price for the work called for and then accepted from them, in discharge of the contract, constructions inferior in quality and quantity of material to such a degree that vast sums were realized by the contractors, in which sums Carter shared.

Two startling facts stand fully proved and practically admitted upon the record:

1st. The work was performed by Carter within the appropriation, in such a manner as to secure an increase in depth of the channel of Savannah River, two hundred forty feet in width at bottom, from Savannah to the ocean, of nine feet, whereby that city became the second city on the Atlantic coast in the volume of its commerce. This end had long been sought for without avail. The government engineers, almost with one accord, pronounce the work a triumph of engineering skill.

2nd. Proceeding from the contract in regard to these improvements, there is traced a mysterious fund of vast proportions, into the hands of some one, perhaps R. F. Westcott, father-in-law of Carter, a retired contractor of considerable wealth, now deceased, who was, in his lifetime, familiar with large transactions, from whom Carter claims to have received the properties in suit.

The transactions involve a number of construction contracts for improvements along the Atlantic coast in the vicinity of Savannah and Fernandina. An attempt to deal with each of these specifically would impose very considerable complications, as well as unnecessary prolixity, inasmuch as they all practically involve the same condition. Two of these contracts are, 1st, the contract of October 22, 1892, covering the expenditure of more than \$3,000,000, upon the Savannah River and projects incident thereto, and, 2nd, the contract of October 8, 1896, for improvements in Cumberland Sound involving the sum of \$2,000,000. It does not appear that any part of the property sought to be recovered herein was procured with moneys accruing to Greene & Gaynor out of this latter contract, but it serves to illustrate the methods employed in letting contracts and conducting the work under all of the contracts. These two contracts are typical of all the contracts. Besides the fact that the amounts involved are the largest, they disclose the general course followed in that class of work in that locality at that time by defendant, Carter; so that they may be dealt with as representing the course of procedure complained of. These two contracts will herein-

after, for brevity's sake, be termed the contracts of 1892 and 1896, respectively.

The record is unconscionably voluminous, covering about 50,000 pages; counsel on both sides have with great consideration and skill summarized it; so that the court is relieved of the burden of several years of reading.

Manifestly, the first attention of the court should be directed to the inquiry as to whether the evidence discloses fraud on Carter's part in disbursing the funds appropriated by Congress for these improvements. The finding of the court-martial was that he had committed that fraud. It must be borne in mind, however, that the evidence now before the court embraces not only that produced upon the court-martial proceedings, but a vast amount of additional evidence and that the finding of that tribunal cannot, of itself, be deemed conclusive herein, upon any material point. Moreover, it should be borne in mind that it was held by so great a legal authority as ex-Senator Edmunds of Vermont, in a reference made by the Secretary of War to him for the purpose of an opinion that the judgment of the court-martial was not sustained by the evidence adduced before it. The present suit involves directly, the title to property,—indirectly, the guilt or innocence of defendant, Carter. Neither party to the case can justly complain that the evidence has been in any respect unduly curtailed. The case has been submitted upon the merits, and without reliance upon technicalities. Greene & Gaynor were operating under their corporate name, The Atlantic Contracting Company of New York, which name will be used interchangeably with that of Greene & Gaynor.

The government's case rests largely upon circumstantial evidence. This may be summarized as follows, viz.:

(1) Defendant Carter was personally on friendly terms with Benjamin D. Greene, who was a retired army officer, and with John F. Gaynor.

(2) Carter had dealings of his own with Greene and the Gaynors, and at times contemplated joining them in extensive public contract work, outside of government work.

(3) As a step towards the alleged scheme to defraud the government, and share the booty with Greene & Gaynor, he caused notices to bidders under the specifications furnished by him for said two improvements of 1892 and 1896 to be published twenty-five days and twenty-two days, respectively, while the rules required thirty days, unless for good reasons a shorter time is specified.

(4) As a further step Carter's specification called for three kinds of mats, known as Nos. 1, 2 and 3, each differing very substantially from the others in form and price, and bidders were required to bid one price for them, giving to him the right to use whichever mat he might deem best, so that bidders were obliged, in self-protection, to base their bids upon the most expensive of the three, whereas, he privately advised Greene & Gaynor that he would practically use only the third, or cheapest mat, enabling them to use that mat as a basis of bidding, whereby they could and did under-bid the others.

(5) That he discouraged other bidders by unnecessarily withholding details necessary to intelligent bidding, and by exaggerating the expenses and difficulties of the work.

(6) That he accepted from Greene & Gaynor fascines used in mats, known as No. 3, made of leaves, pine tops, saw palmetto and other improper material, very loosely put together, in length much below the specifications, and placed end to end instead of being overlapped and built into each other, so as to break the joints, as required by specification.

(7) That he allowed these mats to be made into multiple mats averaging about eight single mats each, and placed in position in that form, thereby saving the cost of grillage poles and in other ways causing great saving to the contractor.

(8) That he paid for the mats by the square yard, as against the former method of buying by the cubic yard, and paid, therefore at prices three or four times higher than theretofore, and in quantities three or four times greater than those used in former contracts.

(9) That Greene & Gaynor realized a profit of several million dollars from said contracts, one-third of which mysteriously disappeared, while at about the same time there were deposited in the bank account of R. F. Westcott, from time to time, as payments were made on the contracts, amounts practically equalling the mysterious missing one-third, with which funds the property in dispute was purchased, and that Carter was a party to those transactions.

For defendants, it is insisted:

(1) That the notice was in the usual form and published the usual length of time, and approved by the Department.

(2) That the three different kinds of mats were of substantially the same value, and their inclusion in one bid not

uncommon, and that every bidder who inquired, was told which mat would be used, i. e., No. 3, and so understood.

(3) That every reasonable assistance and encouragement were given to those desiring to bid.

(4) That the fascines were made in substantial compliance with the specification, both as to material and construction, with, perhaps, a few exceptions, where they were overlooked by reason of the great quantity used.

(5) That the mats were paid for in the way then prevailing, i. e., by the square yard, and that mats made about eighteen inches in height were more suitable for the character of work required in those improvements.

(6) That the use of multiple mats was permissible; that they were difficult to handle and much better adapted to the work; that the difference per mat in the amount and cost of material used as compared with single mats was negligible.

(7) That no more fascines were used than the work required; that the amount thereof used in canvassing for bids was stated to be more or less, and that an increase in amount would not have decreased the price if known.

(8) That it is not true that the price paid was appreciably in excess of former prices and that it was impractical to buy mats by the cubic yard.

(9) That the work, so far as completed, was a success and performed well within the appropriation.

(10) That if money was paid to Westcott by Greene & Gaynor, it was paid without either knowledge or suspicion of that fact on Carter's part, and that to the best of his ability, he honestly performed his duty in the premises.

Carter was placed in charge of the Savannah District in April, 1885 under Gen. Gillmore, and so continued until the latter's death in 1888. Afterwards, under Gen. Graighill, he continued in charge, until relieved in July, 1897, by Captain Gillette. His retirement from the position was voluntary in order that he might accept positions elsewhere in the government service. Some time about the early part of 1884, he first met Greene, who was a retired army officer. In 1888 he considered the question of going into the contracting business with Greene & Gaynor in Chili. He writes in regard to certain pine lands to John F. Gaynor in 1885. Later (1886) his brother borrowed \$1,600 from Greene, for which Carter went security. This was paid up. The record justifies the statement that Carter and Greene and John F. Gaynor were more or less intimate and had, at various times, talked of

entering into private business relations, while at the same time Greene & Gaynor were working upon government contracts under his direction, though there is nothing to show that at the time there was anything improper contemplated by either of them.

After the preparation of specifications for the said two improvements of 1892 and 1896, it was necessary that advertisements be made for bids thereon. The army regulations, based upon the Act of Congress calling for "sufficient public advertisement" in such cases, provided for a thirty-day publication and adds: "A shorter period may be named, if the necessities of the service render it desirable, but no period of less than ten days shall be designated, except in case of emergency." It is further provided that in cases of large purchases, thirty or more days' notice should be given. The proposed contract must be submitted to the War Department for approval. This course was pursued in the two cases under consideration, as well as in all the other cases. In a table showing the time of publication in seventeen contracts, ranging from 1890 to 1896, under Carter's direction, the notice in no instance exceeded twenty-seven days in the local papers and twenty-three days in the engineering journals. These were all approved by the War Department. General Craig-hill, retired chief of Engineers, testifies that it was usual to advertise for less than thirty days. To the same effect is the testimony of Major F. A. Mahan, Corps of Engineers. Col. Marshall, formerly in charge of Chicago Harbor, says it depends on the circumstances of each case. If the character of the work is well known and contractors are familiar with its construction, the amount involved, he adds, in substance, would be of no moment. In such case, "I think I would advertise as short a time as I could in my judgment." Col. Willard, of the Engineer Corps, testifies that all large contractors know what is going on before the engineers do; that the length of time of advertisement is of no particular value to the contractors. Major Townsend testifies that he has varied the time of advertising all the way from ten to thirty days or even less. It appears from the record that contractors on national works keep track of the River and Harbor and sundry civil bills as they are passed, and study them with a view to becoming bidders, taking advantage of the data in the war office reports. A list of the periods of advertising done by Gen. Gillmore under twenty-one contracts shows no instance of thirty days, and quite a number of less than twenty days

—one as low as eight days. In the case of the 1892 contract, notice was inserted from July 27, 1892, calling for bids to be opened August 20, 1892. This was recalled by the Department and a new notice, setting out changes in the work was published August 21, 1892, for bids to be opened September 17, 1892. This is the notice complained of. Gen. Craighill says that in a similar case he would deem ten days sufficient. This course was approved by the Department. The record makes it very plain that Carter, in this respect, did not depart from the usual course obtaining in like cases. Indeed, Mr. Erwin, for the Government, concedes this and says:

“We do not contend that he has to advertise any of these contracts for 30 days by direct law, but what we charge is that he had discretion vested in him in fixing the time, and we say that in exercising that discretion, he did it deliberately and purposely in a way to cut off competition.”

There is nothing inherent in the matter of notice which suggests any fraudulent intent. If there was any improper notice or means employed, it must be found outside the mere manner of giving the notice.

The specifications call for three different styles of mats to be employed in the work in such quantities, respectively, as the engineer in charge might deem desirable. Mat No. 1 was composed of logs laid parallel to each other and then fastened together in that position and covered with several inches of brush, the whole bound together by poles to the required dimensions. No. 2 consisted in artificial logs, made of brush bundles, called fascines, laid in alignment, tightly bound or choked at regular intervals, and placed side by side as in No. 1. Across these were placed, transversely, long brush logs, one on each edge, and one down the middle. The whole were then firmly bound together by grillage poles. No. 3 consisted of brush logs, firmly united by grillage poles as in No. 2, but lacking the transverse brush logs. Double sets of grillage poles were provided for.

It is contended by complainant that these three mats differed very materially in cost per square yard to the contractor, and that by reason of inside information to the effect that only the No. 3 mat would be insisted on, the Atlantic Contracting Company was able to underbid other contractors. Carter's method in this respect was approved by the Chief of Engineers, if not required by him. Practically only No. 3 mattresses were used. Captain Gillette, who succeeded Carter, and became the chief factor in Carter's prosecution, tes-

tified that mat No. 2 had ten per cent. more brush in it than mat No. 3 and that it would cost at least twenty-five per cent. more than mat No. 1. W. H. Venable, a contractor, says he would have bid had the bids for the mats been received separately. Major Black, of the Engineer Corps, for complainant testifies that he did not consider it right to require one price bid for all three designs, but states that mats two and three were of substantially the same value and both worth more than design one, based on prices paid at St. Augustine and St. Johns Harbor, Florida. Major Gaillard, Corps of Engineers, testified that the cost of mats two and three would be practically the same. Major F. V. Abbott testifies that he called for separate bids on somewhat similar mats at Winyaw Bay and received about the same bid for each design. J. W. Rutherford, contractor, states that the difference in cost of the three designs was a very small matter in the totality of the contract and that they were practically of the same cost. He as a bidder did not consider the difference in cost as of any importance. C. P. E. Burgwyn, a civil engineer and contractor, and P. Sanford Ross, a contractor, both competitors of Greene & Gaynor, say they did not think the difference in cost was at all embarrassing in making out their bids. To the same effect is the testimony of A. R. Stewart, a contractor, James A. Bryan, also a contractor, E. L. Friday, a contractor, and Roderick G. Ross, a contractor, all prominent in their lines and competitors of Greene & Gaynor. The latter says designs two and three cost something more than design one. Complainant undertakes to minimize the weight of the testimony of these witnesses by showing inexperience with regard to mats and friendly relations on their part with Greene & Gaynor. Making due allowance for both of these, I am clearly of the opinion that the evidence shows there was nothing unusual or improper in Carter's action in treating the case of the three designs as practically the same when considered with reference to the fact that different kinds of work might require different designs, on the same contract. Of itself, it discloses no evidence of a conspiracy to defraud, nor does it tend so to do. Complainant alleges that while Carter embarrassed other bidders by including the three designs as of one price, he advised Greene & Gaynor that he would use the third so that they were able to underbid the other bidders. There is no direct evidence in the record to sustain this charge. It does

appear, however, that a number of those intending to bid, i. e., C. C. Ely, agent for P. Sanford Ross, W. F. McCauley and L. Y. Schermerhorn were advised that design 3 would be mainly used. Contractors J. W. Rutherford, A. R. Stewart, J. L. Grimm and R. G. Ross also knew that fact. There seems to be little ground for complainant's contention in that behalf. There is some attempt in the record as against Carter's denial, to show that Carter discouraged would-be bidders by: 1, Refusing to furnish specifications to persons representing undisclosed principals; 2, Sending only one copy to known bidders, notwithstanding the time was short, whereas he knew it required three copies to enable one to prepare a bid, and then advising them that should they conclude to bid, he would on application, send the other two copies, with the request to return the copy sent, if there was no intent to bid, thus advising Carter in advance who was going to bid, where information, it is claimed, was in turn communicated to Greene & Gaynor; (3), Sending wrong paper when time was short, or knowingly sending copy to wrong address; (4), Exaggerating the difficulties and expense of doing the work.

When it applied for specifications prepared for the 1892 contract, on August 26, 1892, in which the opening of bids was to occur on September 17, 1892, a period of twenty-two days afterward, the American Dredging Company, by L. Y. Schermerhorn, its president, received in a letter dated August 29, only one copy, accompanied by the request that it consider the same carefully "and if you decide to bid upon the work, I shall take pleasure in showing you over the same and giving you all the available information concerning it and furnishing you with the two remaining copies of the specifications necessary to enable you to submit your bid. If you do not intend to bid, please return the enclosed specifications." On September 7, the company wrote for the other two copies, which were sent September 7, with the information that a bond for \$500,000 would be required on the dredging contract. Schermerhorn testifies he went to Savannah, got all the information he wanted, freely, and put in his bid. The same method had theretofore been pursued by engineers formerly in charge of improvements in that vicinity, i. e., Captains Post and Bailey, Major Mahan, Col. Willard, Major Townsend, George Y. Wisner, civil engineer, P. S. Ross, contractor, L. Y. Schermerhorn, above referred to as having received only one copy at first, and J. R. Gilmore, chief clerk for twenty

years of Gen. Gillmore, all state that as a usual thing only one copy was sent at first and on application afterwards, the other two were furnished. The latter witness says that many applications were received from parties who didn't care to bid when they had seen the character of the work. One witness, James Foley, sent for specifications on a bet that he could get them, and did receive them from Carter, when he had no intention of bidding. Carter seems to have made several mistakes, such as enclosing the wrong paper to the National Dredging Company, and addressing San Francisco Bridge Company at San Francisco instead of New York. It is difficult to see how any sinister motive can attach to these two very common mistakes. I give them no weight. As above stated, it is in evidence that parties likely to compete for harbor improvement and other government work, began preparing for their bids, as soon as the appropriation bills were passed. It further appears that the character of the work in these two improvements was such as to require the services of parties skilled in waterway construction; so that persons entering upon such contracts advisedly were not limited to information gathered from the specifications alone, though, of course, before bidding intelligently copies were necessary. It is urged that Carter, on several occasions, took pains to impress bidders with the difficulties of the work. Venable, whose ability to meet the requirements of the 1896 contract was unknown, says Carter told him it would require an equipment for the two contracts of at least \$400,000, and asked him the extent of his preparation for the undertaking, and told him a tramway would have to be built over the breakers, costing many thousand dollars; that the water in the Sound was very rough; whereas, Greene & Gaynor's equipment, it is claimed, turned out to amount to only \$27,000, and no tramway was constructed by them. This is denied by Carter. If Venable had possessed information, however, and judgment sufficient to enable him to make an intelligent bid in those constructions, he would not have had to rely upon Carter's judgment. The facts seem to be that he was inexperienced in that line and desired to enter into the competition for the purpose of selling stone to the successful bidder. Before the bids were opened he had made an arrangement, he says, with John F. Gaynor to supply the stone necessary for the work and had withdrawn from the contest. Afterwards, by reason of the use of brush fascines almost exclusively, his deal proved to be barren of results, and he became em-

bittered. Whether he was imposed upon is not here material. He is corroborated by F. A. D. Hancock, who expected to work with him on the contract. It appears that there were about fifteen bidders present at the opening of the bids on the 1892 contract. There were three bidders under the 1896 contract. As is not at all uncommon, there appears to have been an attempt on the part of the bidders to stifle competition. Whether Carter knew of this is not shown. Certainly, there is nothing in the record with regard to the opening and letting of the bids in and of itself calculated to cast suspicion upon Carter's conduct.

The contract of 1892 for the improvement of the Savannah River as well as the other contracts complained of, called for bids for mats, by the square yard. These contracts were all submitted to and approved by the Chief of Engineers' office, and the Department, upon suggestion of the engineer in charge, whose recommendations in such matters, the Government claims, are generally followed. Until Carter pursued this method, it is asserted, mats had always been purchased by the cubic yard. This does not seem to be justified by the evidence. Mats had been paid for by the square yard by Col. Black in 1888 and 1890, Col. Bixby, 1889 and 1890, Capt. Carter, 1891, and Col. Stanton, 1892. Whenever mats to any considerable amount were required, they were purchased by the square yard. By paying therefor, at ninety-five cents per square yard of prepared mats the Government insists that the cost of construction almost quadrupled that of work of the same nature and locality carried on by the Government prior to 1891.

The fascines were choked, i. e., tied, at each end and oftener if necessary to a diameter of nine inches, leaving the intermediate portion of the fascine "bulged out." These laid in mat form, including grillage poles, it appears gave a body 18 inches in height. The price paid covered the above 18 inch structure. In several small prior contracts, the fascines were procured by the cubic yard, and the contractor was then required to make into mats whatever was necessary, without any charge therefor. Very little material was so put together. Col. Bixby, of the Corps of Engineers, claims for himself and Major Black the credit of first using mats by the square yard, back in 1889 and 1890. The same method of measurement was employed by Major Stanton in about 1892. Carter had previously, in one or two instances, paid for these brush mats by the square yard. There seems to be no reason

why this class of work should not have been dealt with by the square yard. The only manner in which fraud would in such case be accomplished, must be in the price paid, or in the character of work accepted, or both.

Substantially all of the fascines used in the several improvements under consideration were made up into mats. These fascines are required by the specifications to "be made of live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the engineer officer in charge. The fascines will be from twelve (12) to one hundred (100) feet in length (contract of 1892, and 30 to 100 feet in contract of 1896) and must be compressed tightly by an approved form of choker to a diameter of nine inches at intervals of two (2) feet, where they must be bound firmly with wire or tarred rope of approved strength. The brush used shall be as straight and well trimmed as can be obtained, the fascines shall be carefully and thoroughly made and handled with care. They shall be piled on shore or on barges for measurement in such way as the Engineer officer in charge may direct."

For the purposes of canvassing bids the specifications of the 1892 contract assumed the quantities of different materials to be used as follows, viz.:

Square yards of mattresses.....	350,000
Cubic yards of fascines.....	300,000
Sawn timber (feet).....	800,000
Riprap stone, cubic yards.....	200,000

Under the power reserved in the contract authorizing the engineer to vary the relative amount of each, Carter increased the amount of mattresses to 1,363,572 square yards, to the practical exclusion of the other materials above enumerated. He was thus able to keep within the estimate of cost of the whole and within the appropriation, while at the same time he accomplished the results sought for. Conceding the power of the engineer in charge to make such a radical change, some of the expert witnesses were of the opinion that the proposed change should have been submitted to the war office for approval in view of its radical nature. For defendant it is insisted that the frequent reports, showing the progress of the work, advised the Department of what was being done, which was all that was required. It is not denied that the substitution appears fully in these reports. In and of itself, no improper motive can be deduced on Carter's part, from his course in this respect. The failure of the De-

partment to call attention to the change might be fairly assumed to indicate approval.

The specifications provide that the third design mattress, i. e., the one actually used,

"will consist of a bottom grillage of poles of live saplings, of pine or other timber of a kind approved by the engineer officer in charge. The poles must be straight, of slight taper, of an average diameter of from four (4) to five (5) inches, and not less than three (3) inches at the small end, and must be placed from four (4) to eight (8) feet apart between centers, both longitudinally and transversely, and spliced together with long scarf joints in a manner satisfactory to the engineer officer in charge. Upon the grillage will be placed a layer of closely compacted fascines, surmounted by a top grillage similar in design to the one at the bottom. The poles of each grillage will be securely fastened together by suitable wire or rope lashings, and the upper and lower grillages will also be securely fastened together in such manner as the engineer officer in charge may approve."

It is further provided therein that,

"The size of the mattresses will be fixed by the engineer officer in charge from time to time. In general they will be from twenty (20) to one hundred (100) feet in width, have such lengths as may be convenient for handling, &c."

It is also provided therein that,

"As a general rule all materials will be measured by the engineer officer in charge, or his representative, after their arrival upon the ground and just before being placed in the work. The mattresses may also be inspected as made."

Greene & Gaynors' bid for mattresses per square yard was, as above stated, ninety-five cents; for fascines per cubic yard, \$1.60. It is the contention of the Government that the fascines should have been procured and measured by the cubic yard, and, when required, made into mats without additional cost, as was done on several former jobs, where it appears the amount of mattresses required was nominal. The evidence shows that while small quantities of brush fascines can be readily obtained in almost any locality, large quantities are hard to get. It may well be that in volume such as was used in the 1892 contract, a very considerable area would be devastated. The evidence shows this to have been the case. It is shown by the evidence that the construction of fascines into mattresses is a matter of very considerable expense. Col. Bixby of the Corps of Engineers testifies that,

"Buying brush alone,—buying fascines alone, why they would be stacked up ordinarily, stacked up and measured in the same way you would measure cord wood—stacked up and measured by the cubic foot or cubic yard, but when they were made into the mattresses, there was so much work connected with building them into the mattresses, that the only feasible way I saw at the time was to pay for them by the square yard, which was the reason that I put it into those specifications."

It is not charged in the bill that \$1.60 per cubic yard for fascines was unreasonable. Carter testifies that it would require about nine of the fascines made from the scragly brush found on the coast and choked to nine inches and one yard long to make a cubic yard; that the same fascines put into the form of a brush mattress would compress so that four to the square yard would be required and that when subjected to the pressure and weight of an eight course multiple mattress, it would take six fascines to make a square yard, as against nine in a cubic yard, or perhaps ten. Each square yard, he testifies, would thus require 6/10 of a cubic yard of fascines or ninety-six cents. Adding to this the cost of grillage, estimated by Carter on data furnished, as he claims, by Major Black and Captain Gillette, to amount to twenty-three cents, the cost of one square yard of fascine in multiple mat form, amounts to the sum of \$1.19. In September, 1893, the contractors on the 1892 contract began to construct what are termed multiple mats or mattresses. The contract does not make provision for these specifically. They consist of one mattress imposed upon another, varying from two to as many as sixteen, according to the needs of the construction. They were built upon the deck of a barge especially prepared for the purpose, with facilities for sliding them from the deck into the positions desired. It is claimed by Carter and seems to be conceded that this method of planting the brush mats was found to be very desirable in order to prevent the undermining which preceded the laying of single mattresses or stone work. The scouring produced by the resistance of the single stone-loaded mats to the currents had a tendency to cause the currents to work around the outward end of the single mat and stone work and undermine it. By the use of the multiple mats, the construction proceeded so rapidly, and so affected the currents as to prevent the bottom wash, whereby a more even foundation and other good results were obtained. In addition, it seems, the single mats when separately

loaded with stone for ballast, were apt to sink into the soft bottom of the river—sometimes to a depth of seventy feet. By the use of multiple mats, it was possible to sink eight courses of mattresses with the same amount of stone as is required by the specification in sinking one mattress. Thus seven courses of stone were saved, while at the same time the construction was laid rapidly and made less liable to sink into the muddy and sandy bottom of the river. To build these multiple mattresses without making the openings between the different layers, too large, the double grillage was omitted from all the mattresses, excepting the lower side of the lower mattress and the top of the uppermost mattress. There would be only a half grillage between the intermediate tiers of fascines. The multiple mat was firmly bound together with wire and by other prescribed methods, so that the whole formed a compact body of large dimensions, often one hundred and more feet wide, and fifty feet long, weighing sometimes two hundred tons. The barge was then towed out to the place where the mat was to be placed, and, by means of a lowering adjustment located on the side of the barge next to the destined place, the mat was slid off into the water and into position, and weighted with stone sufficient to sink it and hold it in place. Complainant insists that thus a large saving was made to the contractors both in material and labor, in that they were saved the trouble of planting each mattress separately and the cost of the unused grillage poles. The saving in stone accrued to the government, except so far as it was otherwise expended, more particularly in paying for the extra fascine work. The use of multiple mats on the Savananh river work is warmly approved by most of the experts and is fully justified by the evidence. It is also clear that for the purposes of that work, it was desirable that the grillages be made single except at the bottom and on the top of the multiple mattresses. Carter testifies that he caused the contractors to increase the amount of fascines to make an equivalent of the omitted grillage poles. Col. Bixby was of the opinion that the contractors gained little or nothing by the use of multiple mats, and that the government was getting its work done at less expense. A number of witnesses testify that it was just as expensive to the contractor to handle and sink these heavy multiple mats as to sink them separately. It should be borne in mind that Greene & Gaynor would have made a very large profit on the omitted stone had it been used—as much as \$275,000, it is estimated by

complainant's witnesses. Col. Handbury, Corps of Engineers, was of the opinion that Carter's change to multiple mats was within the specifications. Major Mahan, Col. Marshall, Col. Willard, Col. Rossell, Major Townsend, and Major Rees all assert the same. Some of them state that it was the duty of the engineer to resort to multiple mats under the terms of the contract, whenever that method became desirable. To the same effect is the testimony of a number of contractors. A number of bidders testify that they were advised that multiple mats might be used. It seems clear from the evidence that the introduction of multiple mats into the work on the Savannah harbor was judicious and essential. From the complainant's witness Cooper it appears that the eight course multiple mats stood twelve feet high when measured, just before they were put into position—or an average of one and one-half feet each. This was without the full grillage. In order to account for this height of the construction after eliminating one-half, at least of the grillage poles, it must be assumed that the reduction in height by reason of the omitted grillage poles, estimated by complainant to be equal to one course in each eight course mat of the third design, was compensated for by the addition of some element of the mat—presumably more fascines, as stated by Carter, Wisner, Schermerhorn, Burgwyn, and the employees of the contractor. Bulk for bulk, it appears that fascines were quite as valuable as grillage. Considering, therefore, this fact, and the further facts that there were considerable time and outlay involved in constructing the multiple mats, as well as great difficulty in handling them, especially in rough water; that some of the mats had to be transported many miles; that the mats measured up so well notwithstanding the pressure of the great weight imposed upon them, and the successful outcome of the construction, there seems to be little ground for questioning the good judgment and skill of the engineer in charge, in causing the mats to be put together and used in multiple form. Nor is it apparent that there was anything suspicious in his not insisting on a reduction in price per square yard, for mats laid in multiple form as against individual mats, provided they came up to the specifications.

At the time the investigation under Gillette began, the work under the 1892 contract in Savannah Harbor had been completed, and the Cumberland Sound 1896 contract was under way. As a consequence, it is not easy to ascertain just what was the construction of the mattresses, multiple and

single under the 1892 contract. It seems to be conceded, however, that, except for the fact that they contained something more of grillage, they were substantially the same as those of 1896 Cumberland Sound contract. There are several respects in which complainant insists the fascines failed to comply with the contract:

(1) They were accepted in lengths varying from 12' to 18' instead of 12' to 100', as required under the 1892 contract and 30' to 100' as required in the 1896 contract, according to Carter to facilitate hauling from camp to barge, saving to contractor 25% of cost.

(2) They were not well trimmed;

(3) They did not contain the quantity and quality of material required;

(4) They were not arranged and tied according to the specifications.

The specifications of the 1892 contract call for fascines from 12 to 100 feet in length: Those in the 1896 contract were required to be from 30 to 100 feet in length. In the mattress known as design No. 2, it is provided that the brush should be "carefully laid in the fascines, so as to break joints and to make a continuous fascine extending completely across the mattress." The clause is not repeated or referred to in the description of design No. 3, used by Carter in this work. For the Government, it is contended that it should be read into design No. 3. There does not appear in the evidence, any inherent reason why it should be required in the one and not in the other. Fascines 100 feet long could with difficulty be transported from the camp to the barge. Carter seems to have followed the wording of the 3rd design specifications in that respect. No continuous fascines were insisted on. His excuse is that he thereby hastened the work without injury to the government. Indeed it does not appear that continuous fascines added anything to the merits of the mats. On the other hand, it is claimed and with reason that the use of short fascines resulted in a saving of labor and trouble to the contractor. Under the circumstances, it cannot, however, be said to have been a departure from the contract such as would have enabled the engineer to require of the contractor a reduction in the price bid. It would seem that the use of the term "12 to 100 feet in length" should be construed as disclosing an intention to afford the engineer all the latitude reasonably to be required in the changing conditions of the work, between those extremes. That latitude might easily

be abused, but it is not per se evidence of a misuse of it, to waive the more expensive construction when no disadvantage would thereby accrue to the work in hand. Considerable discussion has arisen in the course of the hearing as to the fair construction to be placed upon the language:

"The brush used shall be as straight and well trimmed as can be obtained."

This sentence should be construed in connection with the first clause of the section of the contract in which it occurs, viz.:

"All fascines will be made of live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the engineer officer in charge."

The coast brush from which it was contemplated these fascines were to be made is shown by the evidence to be gnarly and otherwise difficult to reduce to symmetrical bundles. Ordinary military fascines, so-called, consisted of trimmed rods or poles so bound together as to constitute a compact bundle. There was no attempt on Carter's part, either in the specifications or practice, to require this class of fascines.

Complainant insists that Carter construed the same specifications to mean practically military fascines on the work let to Albert J. Twiggs July 5, 1893, for an improvement in Savannah River near Augusta, when he had permitted Walsh & Gaynor theretofore to use mere brush fascines in the same locality and that such discrimination worked great injury to him, Twiggs, and contributed to his failure on the job. Conant, the civil engineer in charge under the Twiggs construction, says he was told by Carter to apply a different rule to Greene & Gaynor's work on the coast under the 1892 contract (which he also had charge of) from that imposed upon Twiggs. He says the material growing near to and employed in making fascines in the vicinity of Augusta was small, clear and straight and required very little trimming. The fascines were used in constructing a spur-dam and in short protection. He was told by Carter that the up-river work required more wood and less fine material than that in the harbor, where it was designed to catch silt. He contradicts Twiggs' assertion that he, Twiggs, was in any way discriminated against. In this he is corroborated by Ford and Rees, inspectors upon this work. Twiggs had intended to be a bidder on a former contract, but took five hundred dollars and a promise from Gaynor, he says, that he should have the stone

work, and withdrew from the bidding. Afterwards, by reason of the substitution of fascines for stone, he got no benefit out of the stone work, and became embittered. He seems to have lacked both the capacity and the financial ability to handle a large contract. He claims that he refused an offer of \$1,000 by Gaynor to withdraw from the list of bidders under the Augusta River improvement contract, which was awarded to him, and which, by reason of Carter's strict construction of the specifications, he was unable to complete. As above stated, Carter, Conant, Ford & Rees deny all oppression on Carter's part. General Craighill, Carter's superior officer, testified that the term "well trimmed" did not mean trimmed of all limbs, but suitably trimmed for the purposes for which it was to be used; that some places require one kind of fascines and some another kind; that where it was desirable to gather the silt, twigs, small limbs and even leaves should be left on.

"If it is to be a brush fascine, intended to be used as a part of a brush mattress," says Gen. Ludlow, "then the more leaves and twigs you have on, the better as long as it does not interfere with the choking. Well trimmed doesn't mean bare poles."

Col. Rossell says,

"To interpret the term 'well trimmed' it would be necessary to know for what purpose the fascine was to be used. It would have a different meaning in different cases."

Col. Marshall, Major Mahan, Col. Willard and Col. Handbury, testify that the term "well trimmed" includes fascines made of brush, limbs and twigs. Altogether, Major Townsend says, he would not consider it good engineering to remove the brush, twigs, and leaves on the Savannah Harbor work. This construction was placed upon the term on river improvement work at Rock Island. Major Rees says the term was always construed in the Savannah District by government employees to mean brush so trimmed that it would lie close and be bound into cylindrical shape with all the twigs, leaves and small brush retained. All of the foregoing nine officers were at the time their depositions were taken prominent in the Corps of Engineers of the United States. In corroboration of their testimony is that of J. H. Westerfield, civil engineer, who had charge of certain brush work on Savannah Harbor, under General Gillmore before Carter was assigned to that district, Schermerhorn, a civil engineer and competitor of Greene & Gaynor, L. E. Cooley, civil engineer, and E. A. Gieseler, as-

sistant engineer in local charge of the Savannah office. Cooper, one of complainant's principal witnesses, says:

"I consider the loose brush mat preferable to the military fascine for filling in."

Considering the character of the witnesses, whose testimony is referred to above, and their positive assertions, there is nothing in the record deemed sufficient to sustain the contention of the complainant that the specifications of the 1892 contract should be construed to mean military fascines, or bundles of rods or bare poles.

Whether in view of this holding, the fascines of the 1892 contract were well trimmed, will appear from a consideration of the quantity, arrangement, quality and binding of the materials used in the fascines. As above stated, there is not a great deal of evidence in the record as to the construction of the fascines used in the Savannah Harbor work under the 1892 contract. Assuming, however, that it was substantially the same as that supplied under the Cumberland Sound and Tybee Roads 1896 contracts, there yet remains in the great prolixity of the evidence on the subject, considerable uncertainty as to their makeup. It seems the bundles were built in as many different camps according to the supply of brush, and the testimony of the witnesses varies according to the different conditions obtaining at the several brush cutting places, as well as in the mental attitude of the various witnesses toward the defendant, Carter.

According to the testimony of Captain Gillette, who was Carter's successor and the prosecuting witness in the court-martial proceeding, and that of Arthur S. Cooper, civil engineer under Carter and Gillette on the works under consideration, Albert J. Twiggs, who accused Carter of unfair discrimination against him with reference to his Savannah River contract, Ernest B. Parker, carpenter and laborer generally, employed by Greene & Gaynor in charge of their mule lot, and later on a barge, Phillip Hopper, who cut brush for Greene & Gaynor from his father's land and the government reservation for two weeks and himself made bundles at four cents each, Frank DuBois, who cut brush and made bundles for the cost of the work from his own land, and O. C. Darling, from whose land brush was cut for the Cumberland Sound work, the mats then used were of very inferior construction, being filled up with all kinds of scrub growths, crooked limbs, straw, leaves and the like. Gillette's observation begins at a period some time subsequent to Carter's withdrawal and

has reference to only two or three mats. It is not contended that these objections applied to all the work. In the mats seen by Gillette, he says he could with difficulty discover any bundles or other bindings. The grillage poles were smaller than those called for in the specifications and much fewer in number. The mats were only eight feet high—one four foot bulk of brush imposed upon another of same height in such a manner as to form steps—the top one being 50 by 80 feet in area, and the lower one 50 by 100 feet. He estimates this construction cost the government \$3,600, and that this price was grossly excessive; that the whole was very loosely put together with lath yarn, so that it spread out and looked like a rough bundle of tangled brush, not sufficiently solid to bear up the weight of a man attempting to walk over it. There is discernible some more zeal on Gillette's part than comports with an impartial investigation of his predecessor's transactions, which seems to have also had its effect upon those who were his subordinates at the time of taking their evidence. How far this has colored their testimony it is not easy now to determine. Were their evidence to obtain, the court must of necessity find that the defendant was faithless to his trust. On the other hand E. R. Conant, a civil engineer in charge of part of the work on Cumberland Sound says that work had to be done with scraggy material from near the coast, and in that respect differed from the work near Augusta, Georgia, with which witness Twiggs compares it. General Craighill, former Chief of the Corps of Engineers, and who was Division Engineer for the Savannah District for a number of years, now retired, says he saw the mattresses used in Savannah River in March, 1893, and later from his own boat and on Cumberland Sound, and deemed them well adapted to the harbor work. He asserts that brush and leaves were more serviceable at catching and holding sediment than military fascines, i. e., those which are trimmed and consist of bundles of small stems or poles. He deemed Carter's work in Savannah River and Cumberland Sound most successful, judged by their results. Captain Gillette's successor, Colonel Quinn found Carter's work in Savannah Harbor in excellent condition as late as 1903. Colonel Bixby says the contractors used more material at Savannah and Cumberland Sound than was required of them by their contract. Colonels Rossell and Mahan say that the so-called military fascines would not have been permissible in the harbor work. Major Townsend says he was accustomed to construe the terms of the contract just

as Carter did; that he had used more than a million yards of brush mattress with the same specifications and had accepted material almost identical with that accepted by Carter in the big Savannah River contract, and that it was a wise move on Carter's part not to advertise for multiple mats because Gaynor owned a patent for such work. Major Rees and General Craighill find no fault with Carter's construction of the contract. Lyman E. Cooley, Wisner, Burgwyn, Schermerhorn, Blandford, Rutherford, Burnett, Brown, Ensey and Ford, all eminent civil engineers, testify that the work was done according to contract. Gieseler, an engineer in Gillette's employ, testified to the value of Carter's work, and was dropped from government employ shortly after so doing by Gillette. Bryan, a contractor, says the work was well done. Ely, a contractor, says Gillette threatened to injure his character, if he would not testify against Carter. The foregoing witnesses were either government engineers, or prominent civil engineers or contractors in competition with Greene & Gaynor, all of them men of standing and eminent in their line. As might be expected, they are not all advised in detail as to the work in question. They were, however, posted generally in regard to the construction and methods complained of, and are entitled to great consideration. It is an impressive fact in this case, that the defendant is so emphatically endorsed by these men who are above suspicion.

There are also some *ad hominem* considerations which may serve as makeweights in arriving at a just estimate of Carter's conduct. He withdrew from the charge of the work for the purpose of accepting a position of honor as military attache at the court of St. James and Army Engineer of the Nicaragua Canal Commission. There is nothing to indicate that he was forced to do so. Is it likely that he would have left matters in such shape as to put himself and his honor into the hands of his successor? And again, if he were conniving at personal profit, would he have naturally retired from the service in the face of the opportunity just at hand to reap large additional profits from the Cumberland Sound contract?

It is a difficult thing to arrive at a satisfactory conclusion of any construction after it is finished. To find fault with a great public work is not difficult—especially where the investigation is one-sided. The evidence leaves the court with the impression that there was carelessness in the manner in which some of the work was done, indeed carelessness for

which Carter was justly entitled to be criticized, but considering the material results, the magnitude of the work, and assuming the absence of any mercenary or other ulterior motive on Carter's part, except such as might be justly deduced from the facts so far considered, I am of the opinion, as was Senator Edmunds in the court-martial case, that Carter's course in the premises was not necessarily an abuse of the discretion vested in him, nor seriously inconsistent with his claim that he discharged his duty to the government, and that, limited as above stated, under the rule of evidence obtaining in such case, the government has failed to maintain its case.

It is, however, the contention of counsel for the government that the foregoing facts should be considered in their relation to the evidence introduced herein to support the charge that the moneys with which the securities and other property in suit were purchased were paid to Carter or to R. F. Westcott, his father-in-law for him, with his knowledge and connivance, by the contractors, as his proportion of the moneys by him fraudulently allowed to the contractors, as it is claimed, on said contracts, in excess of a fair and reasonable consideration for the work actually done by them under the several contracts in question. This evidence, in its present state, was not before Judge Edmunds when he reviewed the finding of the court-martial. It has been procured by the government attorney and expert through very great ingenuity and patience, with the result that counsel for Carter are forced to admit, or at least not to seriously controvert the fact, that large sums of money, in many instances corresponding in date and relative amount to the sums paid Greene & Gaynor from time to time upon their contracts, by Carter for the government, found their way into Westcott's bank accounts. In order to show a systematic course in the payment to Westcott of approximately one-third of the profits accruing to Greene & Gaynor upon said contract work after 1892 as they were received by them, the government's expert witness has in a number of instances forced balances and drawn strained conclusions, which might in a less conclusive showing, throw suspicion upon all his evidence on the subject, but the coincidences tending to identify moneys paid to the contractors with those in Westcott's bank accounts are, in the mind of the court, so conclusive, that the fact of such payments are beyond doubt as to a large number of the items. For Carter, it is asserted as above stated, that, if

Westcott had any interest in the several contracts in suit, Carter was never advised thereof, and never suspected it; that Westcott held him in tender regard as the surviving husband of his deceased daughter and lavished upon him large sums of money from his great wealth, and promised to make him his heir in place of his deceased daughter, Carter's late wife, and that, admitting the receipt by Westcott of large sums of money from Greene & Gaynor, a considerable part of the property in suit was not purchased with moneys derived from that source, or with any moneys which arose from any government contract; that when the securities were turned over to him by Westcott, he supposed Westcott was carrying out his promise to make him his beneficiary. There is no legal presumption here, that Carter knew what was going on and had been a party to it. The circumstances considered, however, he could hardly fail to charge himself, as he undertakes to do, with the task of explaining very many items shown in the accounts in evidence. It must be borne in mind that the transactions in suit covered the period from December, 1891, to 1897, during which period a number of contracts were let, and that even though Carter was not in actual conspiracy with the contractors, yet if he knew of their vast profits on the prices allowed them on the earlier work, it was his duty to investigate thoroughly the situation and see to it that the government thereafter paid no more than was fair and just. Even negligence under such circumstances would have amounted to fraud. If, therefore, Carter was cognizant of the fact that the contractors were reaping an abnormal profit from the 1892 work, and that Westcott was interested in that profit and was turning it over to him under any kind of a cover as and for his share of said profit, he was false to his trust, and should be held liable to make good to the government all the fruits of his fraudulent acts. This, of course, pre-supposes that such profits, if any, grew out of fraud upon the government in the matters of letting or executing the contracts in question, or both. If the government lost nothing by the transactions, there is nothing due it.

The evidence discloses a shameful course of treatment of the workmen employed by the contractors in cutting and otherwise handling the brush used in these constructions. They were paid little or nothing over and above their living, and that, too, of the worst. No doubt some shameful part of the profit reaped from these harbor constructions came in this

way. How much can never be ascertained. Certainly not all of it, nor even, relatively speaking, a considerable portion thereof. It is also claimed that some of the saving to the contractors arose from the fact that they or some of them claimed a patent or patents upon the methods for handling multiple mats. The record discloses no basis upon which to estimate that saving, if indeed, it resulted in any saving, so that it is without moment at this time. Undoubtedly, constructions of the character now involved, afford, when held down to a fair advance on actual cost, little or no inducement to contractors, because of the element of chance growing out of the weather and water conditions. Liberal allowance should, under the evidence, be made to cover such contingencies. But when all these considerations are borne in mind and given due weight, it is still beyond controversy from the record, that a great wrong was practiced upon the government by the contractors.

The evidence to be found in the record with regard to the financial transactions of Carter, Westcott, and the contractors, Greene & Gaynor, is both vast and intricate and entirely circumstantial. It has been read and re-read by the court, as presented in the briefs and depositions. To recite it here is of no value. Suffice it to say that without passing directly upon the questions as to whether Carter had actual knowledge of, and connived at, this raid upon the government, the facts brought out concerning these financial transactions are such that he must, as a conclusion of law be held chargeable with knowledge of what was being done in the premises. This fact alone makes it clear that the government is entitled to a decree awarding to it each and every of said pieces of property held by the receiver, which shall be found to have been purchased, directly or indirectly with moneys received by Westcott or anyone else or in any other way arising from funds made up of profits realized by the contractors under the contracts in suit. And it will be so ordered. In view of the prolixity of the evidence upon the subject of the moneys with which these securities and property were purchased, the court will not at this time dispose of that question, but leaves the matter temporarily with the respective counsel, to agree, if possible, upon a list of those securities and properties as to which, in view of the above finding, there is no contest, and also to come to a settlement of the whole matter, should

they be able to do so. To that end the further consideration of the cause is continued for thirty days.

Endorsement: Filed April 14, 1908, nunc pro tunc as of Jan. 9, 1908. H. S. Stoddard, Clerk.

EXHIBIT B.

Opinion of Court Handed Down March 17, 1908.

In the Circuit Court of the United States for the Northern
District of Illinois, Eastern Division.

United States of America	} Gen. No. 25,980.
<i>vs.</i>	
Oberlin M. Carter <i>et al.</i>	

Kohlsaat, J.

In pursuance of the decree heretofore entered in this cause, the parties hereto have again presented to the Court their several arguments for the purpose of deducing from the evidence already before the Court, the facts with regard to the sources from which the several securities in the hands of the receivers, including the real estate, were derived. Defendant, in his answer, denies "that said Westcott delivered back any securities to this defendant at any time, or that any of the securities described in said receipts of October 11, 1897, and October 29, 1897, ever belonged to this defendant, or that he ever had any interest therein, directly or indirectly, until the same were, respectively, given to this defendant as a pure and original donation by said Westcott at the time of said respective receipts in October, 1897." Speaking of the Orange, N. J. property, the answer proceeds to say that defendant's "sole and only interest in said property was received from his father-in-law, the late Robert F. Westcott, who gave him the only interest he ever had in said property as a pure and original donation, except that a part of the money given by said Westcott to this defendant's wife, may have been used to partly pay for said property. The answer makes no further allusion to the wife's estate. It is sought by the evidence to show that this estate amounted to \$50,000—a gift from her father, R. F. Westcott, after her marriage with defendant. As further supporting this claim, it is shown that Westcott was a very wealthy man, and a

very active business man, prior to his retirement, sometime prior to 1897; that he had given one of his other daughters \$70,000, and that Mrs. Carter was a favorite with him.

The Government insists that the attempt to introduce evidence as to this \$50,000 gift to Mrs. Carter is inconsistent with the donation clause of the answer. Defendant replies that the father-in-law, at the time of the death of Mrs. Carter, resumed possession of her securities, saying that he would make it all right with him later; that he, Carter, was on most intimate terms with Westcott, and made no attempt to obstruct Westcott in handling the matter as he pleased. All this is of weight only as it may throw light upon the sources from which these securities were produced. Even if this gift to Mrs. Carter shall be deemed proven, it can avail defendant nothing, if in fact the money invested in them grew out of the Greene & Gaynor contracts.

In order to narrow the inquiry and abandon claim to securities which must, concededly, have been procured with funds growing out of these contracts, defendant limits his claim to those securities which were purchased with funds acquired previously to July, 1893, insisting that the evidence shows no moneys received by Westcott prior to that date. Complainant's Exhibit 319—Divisions 1 to 7, inclusive, cover this period. For convenience, these divisions will be considered in their order for the purpose of ascertaining where the money shown in each came from.

In Division One complainant's expert shows a number of disbursement checks issued by Carter to John F. Gaynor, between September 10, 1891, and December 1, 1891, aggregating a large sum. He then produces certain entries, two of December 18, 1891—one whereby Greene, Gaynor's partner, withdraws \$1500 from the bank on that day and the other showing that Carter on that day deposited in his account \$1400, also two of June 8, 1892, whereby it appears that on that day Greene withdrew \$2500 from his bank and Westcott on the same day deposited to Carter's credit \$2500, also three entries of July 22, 1892, whereby Gaynor withdrew from his bank \$10,000, and Carter on the same day deposited \$8,100 in his own account and \$2,000 in Westcott's account, and also three entries on October 29, 1892, whereby it appears that Gaynor withdrew \$2500 from his account on that day and Carter on the same day deposited to his wife's credit \$2450. Of this latter sum, Mrs. Carter checked the sum of \$2000 into Carter's account a few days later. It also appears that

Greene & Gaynor also severally withdrew other sums from their accounts about the same time, viz: On June 6, Gaynor, \$2,575; on July 21, Greene, \$11,000. At these particular dates, Greene & Gaynor had no government contracts on hand, and there is no reasonable theory upon which these payments can be held to have grown out of the contracts in question. They and one Hegeman were then partners in the construction of a railroad. Nothing appears in the record save the coincidences of amounts and dates aforesaid, upon which to make a finding against defendant as to these items. The coincidences are somewhat remarkable, although not exact in but one instance. They are suspicious, but, neither in and of themselves, nor in the light of subsequent transactions between the parties, can it be said that they in any way affect the government. Therefore, complainant's prayer as to them is denied, both in regard to the sources from which they were procured and as to the title to the securities in which they have been invested.

The Government's division No. 2 covers the period between January 3, 1893, and February 10, 1893. Defendant contends that up to January 30, 1893, one Anson M. Bangs was a partner of Greene & Gaynor. John F. Gaynor's testimony on that point is confused, but he finally and definitely asserts that Bangs had not been a partner since 1892. The proceedings had with reference to the formation of the corporation known as the Atlantic Contracting Company on July 22, 1892, is deemed satisfactorily corroborative of that fact.

From January 3, 1893, the Government claims begins the divisions of profits arising from the contracts under defendant's charge into thirds. In October two contracts were let, one being what is known as the Big Savannah Harbor contract. On January 3, 1893, Carter's four disbursing checks aggregating \$65,632.62 were deposited to John F. Gaynor's account in a New York bank. The Government's expert deducts from this sum \$26,932.62, being the amount at which Greene & Gaynor turned in their operating plant to the new corporation. He then divides the balance, (\$38,700.12) into thirds of \$12,900 each. No withdrawal of even one-third from the accounts of either Greene or Gaynor is shown, but on the same day, January 3, 1893, there was deposited by Carter to his own credit in bank and with his broker \$12,900. On that day other sums were withdrawn by Gaynor in such a manner as not to disclose the party to whom it was paid, if anybody. Defendant insists this \$12,900 came from his wife's

estate. To the mind of the court, the co-incidence in date and amount is overwhelming, and the government's contention is held to be fully sustained to the effect that this sum was identical with the one-third. It may be as defendant insists; that it came as a part of his wife's estate, and was, as such, delivered to him by Westcott. Nevertheless, it came from the contracts, and belongs, together with the securities it represents, to complainant, in accordance with the former ruling of the court.

From Division Three, covering the period from February 10, 1893, to March 13, 1893, it appears that John F. Gaynor deposited in a New York bank, Carter's disbursing checks, aggregating \$42,748.54 and his own check in the Savannah bank in which was carried the moneys to be expended upon the work, for \$5,261.46—presumably a sum in excess of what was required for that purpose. These aggregated \$48,000, one-third of which is \$16,000. On the same day defendant deposited with his brokers and in bank \$15,850.00. This sum he also claims as part of his wife's estate, received from Westcott. Taking into consideration the facts of Division Two, together with the coincidence, it is deemed clear that the \$15,850 was a part of the \$16,000 paid out by Gaynor on February 10, 1893, to some unknown persons. So that, whether received through Westcott or otherwise, it was Government money, as are the securities into which it was paid. The original money involved, may, as claimed by defendant, have been received by Westcott from some other source. If so, it is satisfactorily shown that later, the Greene & Gaynor funds were substituted therefor, so that the Government's claim attaches in any event.

Division Four, covering the period between March 13, 1893, and April 14, 1893, shows Carter's disbursing checks aggregating \$47,805.11 deposited in a New York bank on March 13, 1893, together with Gaynor's check on a Savannah bank for \$194.89—the whole aggregating \$48,000. One-third of this is \$16,000. On March 6, 1893, Gaynor withdrew \$6,500 cash from the same bank. On March, 1893, he likewise withdrew \$2,500 cash and on March 13, 1893, \$7,000 cash—all from the same bank. All the amounts withdrawn and called in question in these accounts were cash. The only deposit in Carter's account shown, is that of March 14, 1893, \$7,000. That is, only the last one, March 13, 1893, of Gaynor's withdrawals from his bank, reappears at once in Carter's account. The three amounts withdrawn by Gaynor aggregate just \$16,-

000, \$9,000 of which was withdrawn several days before the disbursing checks seem to have been deposited. An examination of Divisions 3 and 4 shows that Greene & Gaynor each received one-third of \$16,000 on each of said divisions, although Greene's share was paid to him in one lump sum of \$32,000, March 13, 1893. From this it seems evident that these two sums of \$48,000 each represented profits, and that some one received the other third, aggregating \$32,000. From Divisions Two and Three it is claimed to be proven that either Westcott or Carter was receiving one-third of the profits. Complainant argues from this that a system of division is established, whereby Westcott or Carter should be charged with having received the full sum of \$16,000 on this 4th Division, notwithstanding only \$7,000 is traced into either of their bank accounts. In support of this contention, it is shown that Carter rented a deposit box at about this time. In Wharton's Criminal Evidence, Sec. 38, it is said:

"When the object is to show system, subsequent as well as prior offenses when tending to establish identity or intent, can be put in evidence. The question is one of induction, and the larger the number of consistent facts the more complete the induction is."

There is, however, something of certainty lacking in the evidence as to the \$9,000. It seems to be fairly well established that Westcott was a partner of Greene & Gaynor, or at least interested in the profits of the contracts. The Government insists that even if he was, he was serving Carter's interests in that connection, and that under the rule stated he can be charged with the whole \$16,000 of the Fourth Division. There is no system claimed for the dealings between Carter and Westcott. If, as a matter of fact, Carter never received this \$9,000, and no part thereof was invested in the securities before the Court, then Carter can, at the most, be held only for this sum on a money judgment. There is no direct evidence that either he or Westcott ever had this sum. Carter did have on deposit at Savannah some \$1,542.14 and he purchased \$500 exchange, all about March 4th to 9th, 1893. But, considering the withdrawal by Gaynor of the \$9,000 several days prior to the deposit of the \$48,000 in the New York bank, together with the other facts in the case, the proof is not sufficient to enable the Court to find that this sum of \$9,000 ever came into Carter's or Westcott's possession, or that he should be charged therewith.

The transactions of Division Five cover the time between

April 13, 1893, and May 8, 1893. On April 14, 1893, disbursing checks aggregating \$62,154.34 were deposited in a New York bank by J. F. Gaynor. One-third of this sum is \$20,718.11. Between April 14 and April 20, 1893, money in excess of \$20,718.11 was withdrawn by Gaynor from said bank. On April 14, 1893, \$400, and April 15, \$3,000 in bills were deposited to Carter's credit. On April 14, 1893, the sum of \$14,500 was deposited to Westcott's account in the same bank. On the same day Westcott deposited \$14,742.64 to Carter's credit with brokers. There is no evidence to show that more than \$18,142 (including the \$242.00 from Westcott) came to Carter's hands from any outside source on or about April 14, 1893. It is in evidence that he visited his two safety deposit boxes at that time, in which boxes he could, of course, have placed currency. However, giving all the weight to complainant's evidence to which it can lay claim, the court is of the opinion that there is nothing in the record which would justify it in charging Carter, or Westcott, or both of them, with having received from this division a sum in excess of \$17,900.

Division Six extends from May 8, 1893, to June 5, 1893. On May 8, 1893, J. F. Gaynor deposited Carter's disbursing checks aggregating \$40,281.60, and his own check in a Savannah bank for \$4,718.40, in a New York bank, making in all \$45,000: One-third of this is \$15,000. On the same day Gaynor withdrew in cash \$7,640, and Greene, from his own account, withdrew \$7,360.00, making \$15,000. On May 13, 1893, Westcott made deposits aggregating \$3,500, leaving \$11,500.00 unaccounted for. Complainant undertakes to follow this \$11,500 into certain transactions of Westcott's had on May 23, 1893. To make the figures come out right, the expert injects an item: "Unaccounted for \$100.00" into some transactions of Westcott's of May 23, 1893. On that day Westcott deposited \$26,600.00. There is no pretense but that Westcott was handling large sums of his own. While there may be a presumption that he looked after his one-third, that presumption cannot be carried too far. There is no just ground upon which to hold that the \$11,500.00 ever came into Westcott's or Carter's hands, and, therefore, neither of them can be charged with it.

Division Seven covers the period between June 5, 1893, and July 11, 1893. On June 5, 1893, Carter's disbursing check for \$42,150.00 was deposited in a New York bank to the credit of Greene. From this sum the Government deducts an

arbitrary allowance for some supposed expenditure of \$150 and also \$4,500.00 sent to Savannah, leaving \$37,500, as alleged, for distribution. One-third of this sum would be \$12,500. On June 5 and 6 Greene withdrew some \$14,500 in cash and on June 17, 1893, Greene's check for \$12,500 to W. T. Gaynor was cashed. On June 6, 1893, Westcott deposited \$12,500 with his brokers. There remains no doubt in the mind of the Court but that this money arose from the contracts with Greene & Gaynor and must, therefore, be accounted for to the government in this proceeding.

It thus appears that of the \$109,568.15 claimed by the government, as shown in Divisions One to Seven, inclusive, aforesaid, the evidence fails to support the claim as to \$39,768.11 thereof.

And on to-wit: the 21st day of March, 1908, in the December term, 1907, of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat, judge presiding, there was made by the Court, the following decree and entry thereof:

DECREE OF MARCH 21, 1908.

United States	}	Bill No. 25980.
<i>vs.</i>		
Oberlin M. Carter, <i>et al.</i>		

Pending in Northern District of Illinois, and Auxiliary Bills pending in Southern District of New York, District of New Jersey, Southern District of West Virginia, Southern District of Illinois, Southern District of Georgia.

Decree.

The above stated cause came on to be heard upon the pleadings and proofs and was argued by counsel, whereupon it is considered, adjudged, ordered and decreed by the Court as follows:

(1)

That all moneys in any way arising from the profits realized by the contractors under the River and Harbor contracts described in the bill and auxiliary bills in this case, constitute

a trust fund, and that all of the same, with the investments, proceeds, re-investments and income thereof constitutes a trust fund which in equity and good conscience is for the benefit of and belongs to the complainant, and that no part of said money so arising, or the investments, proceeds, re-investments, or income thereof, can be held by the defendant, Oberlin M. Carter, as against the complainant, or by any one not a bona fide purchaser for value without notice holding under or through Robert F. Westcott or Oberlin M. Carter.

(2)

It is further adjudged, ordered and decreed that the following securities now in the hands of the receivers under the bill and auxiliary bills aforesaid, were not purchased with said trust fund, but with the private funds of Robert F. Westcott and Oberlin M. Carter:

5 Chesapeake & Ohio 5% bonds purchased Feb. 11, 1893, No. 21025 to 21029, cost	\$5,275.00
5 Chicago, St. P. M. & Omaha 6% bonds purchased Apr. 11, 1893, No. 20242, 15926, 19282, 16101, 16672, cost	\$6,143.75
5 Chicago, St. P. M. & Omaha 6% bonds purchased Apr. 28, 1893, No. 2093, 21116 to 21118 and 21123, cost	\$6,102.25
5 Chesapeake & Ohio 4½% bonds purchased Apr. 11, 1900, No. 24871 to 24875 cost	\$4,993.75
(Said 5 C. & O. 4½% bonds being in lieu of 5 Wabash 1st Mort., 5% bonds No. 16135 to 16138 and 16140, originally purchased by R. F. Westcott Jan. 20, 1890, held not to be traced to the trust fund and which went into the Orange, N. J., investment, and is represented by an equivalent amount of cash, paid over to J. H. Paul, for O. M. Carter in the partition of said Orange, N. J., property and invested by J. H. Paul in bonds)	
15 shares Savannah Lighterage & Transfer Company stock, par value	\$1,500.00
1 share Greenwich Park Association, par value	100.00
25 shares Seaboard Company stock, par value	2,500.00
100 shares Savannah Tow Boat Co. stock (Certificates Nos. 56, 81, 113, 123, 133, 145, 152, 170 and 217) par value	10,000.00
5 shares Savannah Cotton Mill stock, par value	500.00

And all of the said assets in this paragraph described, together with the income and proceeds thereof which have been collected by the receivers, are held to be the property of Oberlin M. Carter, and not to have been derived from the said trust fund.

(3)

It is further adjudged, ordered and decreed, that with the exception of the securities described in the paragraph of this decree numbered "(2)" that all the following described properties and assets, are traced from and held to be investments or re-investments of the trust fund, referred to in the paragraph of this decree numbered "(1)" and arising from the profits of the River and Harbor contracts referred to therein, to wit:

(a) Bonds of the par value of \$63,000.00 received by Oberlin M. Carter from Robert F. Westcott on October 11, 1897, and described in the original receipt therefor given by said Carter to said Westcott, a copy of which is hereto attached and marked Exhibit B.

(b) Bonds of the par value of \$222,000.00 and also all stocks, receiver's certificates, notes and choses in action represented by deeds or mortgages, being the properties received by said Oberlin M. Carter from Robert F. Westcott on October 29, 1897, and said properties being more particularly described or referred to in the original receipt therefor given by said Oberlin M. Carter to said Robert F. Westcott, a copy of which is hereto attached and marked Exhibit C. (In the said receipt of October 29, 1897 one Chicago St. Paul, Minn., & Omaha bond No. 16101 is erroneously described as No. 16102, and one Wabash, Detroit & Chicago bond No. 1737 is erroneously described as 1731, and the description in said receipt is to be taken as corrected accordingly).

(c) And also the real estate described in the deed dated November 27, 1894 from Howie & Bragg, Executors, to Robert F. Westcott, and which was conveyed by said Robert F. Westcott to Oberlin M. Carter by deed executed January 17, 1895, and described in the bill as the 8th Avenue, New York, property.

(d) And also the interest in the Orange, New Jersey, property conveyed by Robert F. Westcott to Oberlin M. Carter, by deed dated January 25, 1897, Exhibit No. 427 in evidence, and all interest in the improvements thereon made, constituting what is described in the settlement agreement made between

Robert F. Westcott and Oberlin M. Carter dated October 29, 1897, (Exhibit 283 in evidence) as the individual half interest of Oberlin M. Carter therein;

(e) And also 100 shares of Hunting Island or Port of Savannah stock—

25 shares of Savannah Brewing Company stock, Certificates No. 431 and 467,

50 shares Savannah Towboat Company stock, Certificates No. 235, 242 and 244,

50 shares of Brush Electric and Power Company stock,

And an equitable interest in Life Insurance Policy No. 743543 on the life of O. M. Carter in the Equitable Assurance Society of New York represented by the premiums paid thereon:

And all of said above described properties (with the exception of those described in paragraph of this Decree numbered "(2)" as aforesaid, with the proceeds and reinvestments thereof are decreed to constitute a part of the trust fund belonging to complainant.

(4)

And it is further adjudged, ordered and decreed, that all assets which went into the hands of the receivers in this and the auxiliary causes, other than those described in the paragraph of this decree numbered "(2)" are investments, and re-investments, and proceeds, of a part of the said trust funds and that the same, together with the income and proceeds thereof, which have been collected by the receivers, constitute a trust fund belonging to the complainant.

The assets which went into the hands of the receivers, belonging to complainant, aggregating at cost or proceeds, the sum of \$367,822.71, and the said assets being more particularly described in Exhibit A attached to this decree, and made a part hereof.

(5)

It is further ordered and decreed that unless the said Oberlin M. Carter shall elect to make good to the complainant from the fund in Court decreed to be his, or by payment otherwise, the surrender value of the said life insurance policy number 743543, on the life of Oberlin M. Carter, in the Equitable Life Assurance Company of New York, to be fixed by the said Assurance Company, he shall within thirty days from the date of this decree make over and assign said life insur-

ance policy to Frank W. Hubby, the receiver under the auxiliary bill in New York. If said surrender value is so made good, the policy shall belong to Oberlin M. Carter, otherwise to the Complainant.

(6)

It is further ordered and decreed that the said I. Stanton Carter and L. D. Carter, having executed deeds of conveyance conveying to Frank W. Hubby, receiver under said auxiliary bills in New York and New Jersey the property described in the bill as the 8th Avenue, New York, property, and the Orange, New Jersey, property, and said deeds of conveyance having been left with Max H. Whitney, receiver in this cause in escrow to abide the decree in this cause, it is now decreed that said deeds be delivered up to said Hubby, receiver, free from all claims of said I. Stanton Carter and L. D. Carter and O. M. Carter, in, of, or to said properties described in said deeds.

(7)

It is further ordered and decreed that the fixing of the costs and expenses of this proceeding, including allowance to be made to receivers, and to counsel, and the charges which may be allowed under the agreement of parties of November 6, 1901, is reserved at the foot of this decree, to be adjudged and passed on by the court.

(8)

It is further ordered and decreed that the conversion of the assets in Court into money so that the same may be disposed of in accordance with the rights of the parties as herein decreed, is reserved at the foot of this decree.

(9)

It being provided in the fourth clause of the stipulation of the parties dated Nov. 6, 1901, that:

"L. D. Carter and I. Stanton Carter will forthwith dismiss their demurrers, and file answers disclaiming any personal interest in the aforesaid assets in controversy in this litigation, including the real estate on Eighth Avenue, New York, and at Orange, New Jersey, except as to two bonds claimed by I. S. Carter."

And the issue as to whether the said two bonds were purchased from the trust fund, being left in the stipulation to the determination of the Court, and the finding of the special Master approved by the Court, being that the said two bonds were purchased with the trust funds, it is adjudged and decreed that all liens or claims made by L. D. Carter or I. S. Carter as against any of the assets hereinbefore awarded the complainant are denied.

(10)

It is further adjudged, ordered and decreed that the claim of the Complainant to have a deficiency judgment against L. D. Carter is denied.

(11)

It is further adjudged, ordered and decreed that the claim of the complainant to have a deficiency judgment against Oberlin M. Carter for so much of the proceeds arising from the trust fund, as it is claimed was dissipated by Oberlin M. Carter, or his agents prior to the agreement of November 6, 1901, is denied.

(12)

It is further adjudged, ordered and decreed that the said United States do have and recover of and against the defendant, I. Stanton Carter, the sum of Eleven Thousand, Four Hundred and Fifty-four Dollars and eighteen cents (\$11,454.18) for the amount of the said trust fund, not accounted for by him as found by the special master.

(13)

The right of the complainant to recover from such agents of said Oberlin M. Carter, (not parties to the suit in this district), such of the assets or proceeds of assets constituting any part of the trust fund which may have been diverted by them and not included in the assets brought into the hands of the receivers, or to recover a deficiency judgment against them therefor is not passed upon herein, the same not being within the jurisdiction of this court.

EXHIBIT A TO THE DECREE.

DESCRIPTION OF ASSETS WHICH WENT INTO THE HANDS OF RECEIVERS UNDER THE BILL AND AUXILIARY BILLS, IN THE SEVERAL DISTRICTS, DECREED TO BELONG TO THE UNITED STATES.

- Receipt, Thomas Martin to A. Minis, atty., dated Nov. 21st, 1895.

OBERLIN M. CARTER.

And on towit: the 14th day of April 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court, the following Decree and entry thereof:

FINAL DECREE APRIL 14, 1908.

The United States of America	}	Bill No. 25980,
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

Pending in Northern District of Illinois, and auxiliary bills pending in Southern District of New York, District of New Jersey, Southern District of West Virginia, Southern District of Illinois, Southern District of Georgia.

Decree.

The above stated cause came on to be heard upon the pleadings and proofs on the matters reserved to be disposed of at the foot of the decree in said cause entered March 21, 1908,

Whereupon, it is considered, adjudged ordered and decreed by the court as follows:—

(1)

That the compensation of Max H. Whitney for all services rendered and to be rendered as receiver under the bills filed in the Northern and Southern Districts of Illinois, is fixed at the sum of \$6,692.50, of which said sum said receiver has already been advanced from the funds which went into his hands the sum of \$3,000.00. The said compensation to the receiver to be paid out of the proceeds of that part of the assets decreed to belong to the complainant.

That whereas said entire compensation fixed as above, contemplates the sale or collection of bonds and notes still in his hands aggregating some \$64,000.00 in value, and the disbursement of all moneys which are or may come into his hands under the orders and decrees of this court, it is ordered that the sum of \$1,692.50 out of the full amount fixed for his compensation shall be withheld from application to the receiver's compensation until the administration of said assets by the receiver as aforesaid is completed, and if the parties to the cause or either of them should appeal said cause without appealing from the compensation fixed for the said receiver, the said sum of \$1,692.50 shall be withheld from application to the said receiver until he has completed his administration of the assets remaining in his hands as aforesaid.

(2)

It is further decreed that the bill of the International Audit Company for services rendered the defendant O. M. Carter by Robert Nelson as expert accountant and witness, for the sum of \$1,000.00 which has been presented and filed by H. G. Stone, chief counsel for O. M. Carter, be and the same is hereby allowed and Max H. Whitney receiver is directed and ordered to pay the same to the said H. G. Stone as his attorney from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant.

(3)

It is further decreed that the bill of Lyman E. Cooley for services rendered the defendant O. M. Carter as expert en-

gineer and witness, for the sum of \$1,600.00 which has been presented and filed by H. G. Stone, chief counsel for O. M. Carter, be and the same is hereby allowed, and Max H. Whitney receiver is directed and ordered to pay the same to the said Lyman E. Cooley or to H. G. Stone as his attorney from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant.

(4)

The compensation claimed by Nathaniel C. Sears as fees for services as the attorney of Oberlin M. Carter at Chicago, as a charge upon the assets accounted for to the receivers under the agreement of November 6, 1901, is allowed to the amount of \$5,000.00 which shall be in full for his compensation for all services rendered by him in said cause, and the same is directed and ordered to be paid to him by Max H. Whitney, receiver, from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant.

(5)

The compensation claimed by Horace G. Stone as fees for services as chief counsel of Oberlin M. Carter, under the bill in this District and in the said auxiliary bills in the other districts is fixed and allowed for 2,000 days at \$30.00 per day \$60,000.00, from which is to be deducted the sum of \$17,500.00 already advanced him from the fund in court under the interlocutory orders and decrees of the court, and the balance, \$42,500.00, is directed and ordered to be paid to him by Max H. Whitney, receiver, from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant, and the said allowance of \$60,000.00 shall be in full compensation to said H. G. Stone for all services rendered by him in said cause including whatever services may be necessary to carry the decrees of this court into effect in the other districts in which auxiliary bills are pending under the terms of the agreement of November 6, 1901. And should the said assets left in the hands of said receiver after paying the other allowances directed by this decree to be paid by the receiver, be not sufficient to pay the entire al-

lowance for the fees of said H. G. Stone it is decreed that he shall be paid such deficiency out of the funds in the hands of the receivers in other districts.

(6)

Whereas said H. G. Stone as chief counsel for said O. M. Carter was under the interlocutory order and decree of this court paid the sum of \$1,089.94 as an advance on bills for his expenses claimed to have been paid out by him, under the said agreement of November 6, 1901, the court then reserving for future determination items of expense claimed aggregating \$308.69 objected to by complainant, and whereas H. G. Stone as such chief counsel has since presented bills for \$1,289.39 and \$271.23 for expenses claimed to have been paid out by him, under the said agreement of November 6, 1901, to the payment of which the complainant made objection, and whereas said H. G. Stone has presented an additional bill for the sum of \$382.00 claimed by him to have been advanced by him to O. M. Carter: It is upon consideration ordered that said claims of said H. G. Stone for payment under said agreement of November 6, 1901 for said expenditures aggregating the sum of \$2,251.31 be and the same are allowed and directed and ordered to be paid from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant.

(7)

The motion of the United States to have a provision in the final decree in this cause, making certain allowances aggregating \$35,885.23, as stated in said motion, which have heretofore been paid out of the fund in the hands of the receiver for and on account of the defendant O. M. Carter as an allowance for his personal expenses, and for printing bills, counsel fees, and accountant's fees, together with the additional amounts by this decree directed to be paid out of the fund in court for counsel fees, and allowances to expert witnesses for the defense, aggregating \$52,351.31 a charge first upon the assets which by the decree of March 21, 1908 in this cause were decreed to belong to Oberlin M. Carter, is denied.

And the said Oberlin M. Carter is decreed to have and receive from the receivers under this bill, and the auxiliary bills, the said assets which by the said decree of March 21, 1908, were decreed to belong to him, free from all costs and

charges of the litigation, and free from any claim of the United States for the advances made or herein decreed to be made, for or on account of the said expenses of said Carter or allowances to his counsel as aforesaid.

(8)

The amounts heretofore paid under the interlocutory orders of the court, or which by this decree are directed to be paid by Max H. Whitney, receiver, to examiners and commissioners and stenographers, and to the Clerk and Marshal, are decreed to be a charge upon that part of the assets in the hands of the receiver decreed to belong to the United States.

(9)

The execution of this decree is stayed for fifteen days from the date hereof, and unless on or before the expiration of that time the said decree be superseded, the said Max H. Whitney, receiver of this court, shall at the expiration of that time deliver to said Oberlin M. Carter the assets in the hands of said receiver which in the said decree of March 21, 1908, were decreed to be the property of said O. M. Carter; and shall proceed to sell through some reputable stock broker at market value, such of the said bonds in his hands as have a market value, and may deliver the said C. W. Colehour note to the Attorney of the United States as the property of the United States. The proceeds of the said bonds so directed to be sold by the said receiver shall be applied to the payment of the allowances provided for in this decree, and if there be any excess of such proceeds in the hands of the receiver over and above the allowances directed to be paid by this decree, such excess shall be held by the receiver subject to the order and direction of the Attorney General of the United States as to its disposition.

(10)

It is further adjudged, ordered and decreed that the payments and allowances heretofore made or hereinbefore directed to be made for or on account of said O. M. Carter and his counsel from the assets brought into court under the bill in this district and under the other said auxiliary bills pending in other districts is and shall be taken as a full compli-

ance on the part of the complainant with all the requirements of said agreement of November 6, 1901, and a full satisfaction of all claims of said O. M. Carter or of any of his attorneys or counsel, whether in the proceedings in this district or in the proceedings under the said auxiliary bills in other districts under the said agreement of November 6, 1901. The question of whether the said agreement of November 6, 1901 embraces allowances if an appeal is taken by either side is not passed on herein.

And on towit, the 17th day of April 1908 came the defendant Oberlin M. Carter and filed in the clerk's office of said court a statement of election as to policy of Insurance in the words and figures following towit:

ELECTION OF O. M. CARTER AS TO INSURANCE
POLICY.

In the Circuit Court of the United States, For the Northern
District of Illinois, Eastern Division.

United States	}	Gen. No. 25,980.
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

Election.

In § 5 of the Decree in the above entitled cause, it is provided that if Oberlin M. Carter shall elect to make good to the Complainant the surrender value of life insurance policy #743543 on his life in the Equitable Life Assurance Society of New York, then the policy shall belong to Oberlin M. Carter.

In accordance with that provision, I hereby elect to make good the surrender value of said policy, fixed at \$3,671.36 by the said Equitable Life Assurance Society by its statement dated April 3 1908, a copy of which is herewith, and to take the policy for myself; and I direct that the said sum of \$3,671.36 be made good to the Complainant out of the income

on the assets in court which have been decreed to belong to me.

OBERLIN M. CARTER

Chicago, April 15, 1908.

(Copy)

Please refer to this letter in your reply and address the undersigned officially, always mentioning the number of your Policy and Post Office address.

The Equitable Life Assurance Society.

Paul Morton, President.

New York, Apr 3, 1908.

Mr. Oberlin M. Carter,

Dear Sir:

On return, with proper release of Policy No. 743543 on the life of yourself on June 7, 1908, or within six months thereafter (if premiums be paid to said date and the premium due on said date Not paid), we will pay in cash the sum of \$3,671.36, but unless otherwise expressly agreed, this offer will not be binding after the termination of the said six months. These values are inclusive of all dividends. The amount of this offer is based on the principles and methods employed by the Society, and the Society reserves the right to correct it, should any error in computation be discovered before the settlement is completed.

Yours respectfully,

J. G. VAN CISE,

Actuary.

W A S

Endorsement Election of O. M. Carter Filed Apr 17, 1908
H. S. Stoddard Clerk

And on to wit: the 28th day of April 1908 came the complainant by Marion Erwin, special assistant to the Attorney General, and Edwin W. Sims, Attorney of the United States for the Northern District of Illinois, and filed in the clerk's office of said Court in the said entitled cause an Assignment of Errors in the words and figures following to wit:

ASSIGNMENT OF ERRORS.

In the Circuit Court of the United States for the Northern District of Illinois, Eastern Division.

The United States of America }
 vs. } Bill No. 25980.
Oberlin M. Carter *et al.* }

Pending in Northern District of Illinois and Auxiliary Bills pending in Southern District of New York, District of New Jersey, Southern District of West Virginia, Southern District of Illinois, Southern District of Georgia.

Now comes Marion Erwin, Special Assistant to the Attorney General, and Edwin W. Sims, Attorney of the United States for the Northern District of Illinois, who, for the said United States and by direction of the Attorney General thereof, is about to pray an appeal from the judgments and decrees entered by said Circuit Court in the above entitled cause, to the Circuit Court of Appeals of the United States for the Seventh Circuit, and for the said United States, Complainants in said cause, complain of errors in the record and proceedings in said Circuit Court in said cause, and show to the Court that the following errors intervened to the prejudice of Complainants, and assign the same as errors:

(1)

That the Court in and by its final decrees of March 21, 1908, and April 14, 1908, committed error in failing to find specifically on the issue between the United States and Oberlin M. Carter as to the fraudulent diversion by him of funds intrusted to him as disbursing officer, into the assets as charged in Complainant's bill in this cause and under the auxiliary bills pending in the several districts, as the court should have done under the pleadings and proofs and under the agreement of Nov. 6, 1901.

(2)

That the Court in and by its final decrees of March 21, 1908 and April 14, 1908, and in the findings made in its opinion filed March 17, 1908, upon which said decrees were based, committed error in holding that the following described cur-

rency deposits and the investments claimed by the Government in its bill to have been made with a part thereof, made during the period represented by what is called Division 1 in Complainant's Exhibit 319, were not shown to have been received by O. M. Carter from corresponding withdrawals of currency from the bank accounts of Benjamin D. Greene and John F. Gaynor, and derived from the proceeds of the river and harbor contracts as charged in Complainant's bill, to wit:—

Dec. 18, 1891	Withdrawal by B. D. Greene from American Exchange National Bank, N. Y.	\$ 1,500.00
Dec. 18, 1891	Deposit to credit of O. M. Carter in Union Trust Co., New York, currency	1,400.00
June 8, 1892	Withdrawal by B. D. Greene from American Exchange National Bank, N. Y.	2,500.00
June 8, 1892	Deposit to credit of O. M. Carter in Union Trust Co., New York, currency	2,500.00
July 22, 1892	Withdrawal by John F. Gaynor from American Exchange National Bank, N. Y.	10,000.00
July 22, 1892	Deposit to credit of O. M. Carter in Union Trust Co., N. Y., currency	8,100.00
July 22, 1892	Deposit by O. M. Carter to credit of R. F. Westcott in Union Trust Co., New York, currency	2,000.00
Oct. 29, 1892	Withdrawal by John F. Gaynor from American Exchange National Bank, N. Y.	2,500.00
Oct. 29, 1892	Deposit by O. M. Carter to credit of M. W. Carter in Garfield National Bank, New York, currency	2,450.00

(3)

That the Court in and by its final decrees of March 21, 1908 and April 14, 1908, and in the findings made in its opinion filed March 17, 1908, upon which said decrees were based, committed error in holding that the following described currency deposits, and the investments claimed by the Government in its bill to have been made with a part thereof, made

during the period represented by what is called Division 4 in Complainant's Exhibit 319, were not shown to have been received by O. M. Carter from corresponding checks of John F. Gaynor drawn on his account in the American Exchange National Bank, New York, and paid from the proceeds of the diverted trust funds belonging to the complainant as charged in the bill, to wit:—

Withdrawal by John F. Gaynor from American Exchange National Bank, New York, by check of unknown date, paid March 7, 1893		\$2,500.00
Deposit by O. M. Carter in Merchants National Bank, Savannah, Ga.		
March 4, 1893, currency	\$650.00	
“ 6, “ “	565.00	
“ 9, “ “	327.14	
March 4, 1893, Exchange purchased by O. M. Carter at Savannah for currency	500.00	
		<hr/> \$2,042.14

(4)

That the Court in and by its final decrees of March 21, 1908 and April 14, 1908, and in the findings made in its opinion filed March 17, 1908, upon which said decrees were based, committed error in holding that the whole of the following described withdrawals of currency made from the illegal proceeds of the river and harbor contracts as charged in the bill, on deposit in the bank accounts of Benjamin D. Greene and John F. Gaynor, were not traced into corresponding deposits of currency in the accounts of O. M. Carter and R. F. Westcott, and that \$11,500.00 thereof is not so traced, and that the investments claimed by the complainant to have been turned over to O. M. Carter by R. F. Westcott as representing said \$11,500.00 were not traced to the illegal profits of said river and harbor contracts as charged in the bill, to wit:—

May 8, 1893	Withdrawal by J. F. Gaynor from American Exchange National Bank	\$7,640	
“ “ “	Withdrawal by B. D. Greene from American Exchange National Bank	7,360	
			<hr/> \$15,000.00

Amounts held by the Court to have been traced to above:			
May 13, 1893	Deposit to credit of R. F. Westcott, with Union Trust Co., N. Y., bills	\$ 500	
" 15, "	With Van Deventer, N. Y., currency	3,000	3,500.00

Balance held by the Court as not
traced \$11,500.00

Whereas the Court should have held that the said balance, \$11,500.00 is traced by the evidence into a deposit of \$26,600.00 made by R. F. Westcott on May 23, 1893, to his own credit in the Union Trust Co., New York (the source of \$15,000.00 of said currency deposit of May 23, 1893, being shown to have been from the cashing by R. F. Westcott of a certified check cashed May 13, 1893, and the source of \$100.00 of said currency deposit of \$26,600.00 only, being unaccounted for.)

(5)

That the Court in and by its final decrees of March 21, 1908, and April 14, 1908, committed error in finding in paragraph numbered (2) of said decree of March 21, 1908, that the following described securities in the hands of the receivers under said bill and auxiliary bills, were not purchased with the trust funds belonging to the complainant fraudulently diverted as charged in said bills, but were purchased with the private funds of Robert F. Westcott and Oberlin M. Carter, and are the property of said Oberlin M. Carter, to wit:—

5 Chesapeake & Ohio 5% bonds purchased Feb. 11, 1893, No. 21025 to 21029,	cost	\$5,275.00
5 Chicago, St. P. & Omaha 6% bonds purchased April 11, 1893, No. 20242, 15926, 19282, 16101, 16672,	"	6,143.75
5 Chicago, St. P. M. & Omaha 6% bonds purchased Apr. 28, 1893, No. 2093, 21116 to 21118 and 21123,	"	6,102.25
5 Chesapeake & Ohio 4½% bonds purchased April 11, 1900, No. 24871 to 24875 (Said 5 C. & O. 4½% bonds being in lieu of	"	4,993.75
5 Wabash 1st Mort. 5% bonds No. 16135 to 16138 and 16140, originally purchased by R. F. Westcott Jan. 20, 1890, held not to be traced to		

the trust fund and which went into the Orange, N. J., investment, and is represented by an equivalent amount of cash, paid over to J. H. Paul, for O. M. Carter in the partition of said Orange, N. J., property and invested by J. H. Paul in bonds.)

5 shares Savannah Cotton Mill stock purchased Nov. 3, 1892, par value 500 " 532.50

73.22 shares of the 100 shares of Savannah Towboat Company stock represented by certificates No. 133 dated Jan. 18, 1892, by part of Certificate No. 145 dated May 13, 1892, by Certificate No. 152 dated Aug. 31, 1892, by part of Certificate No. 170 dated Oct. 22, 1892, and by Certificate No. 217 dated Feb. 20, 1893, " 5,800.00

(6)

That the Court in and by its final decrees dated March 21, 1908 and April 14, 1908, in said cause, committed error in failing to sustain Complainant's exceptions numbered "First" and "Third" to the report of W. M. Booth, Special Master, said exceptions being to the allowance by the said Master of \$6,750.00 salary to I. Stanton Carter claimed to be due him by O. M. Carter as a credit against the assets for which he was accountable to the receiver and to complainant in said cause, and which assets were held by the court to be a trust fund belonging to the United States, the agreement of Nov. 6, 1901, being that said I. Stanton Carter should disclaim any personal interest in the said assets, and the Complainant not being privy to any contract between I. S. Carter and O. M. Carter for salary, and the said I. S. Carter having received said assets into his hands with notice of the rights of Complainant therein.

(7)

That the Court by its final decrees dated March 21, 1908 and April 14, 1908 in said cause committed error in failing to sustain Complainant's exception numbered "Second" and "Third" to the report of W. M. Booth, Special Master, said exceptions being to the allowance by said Master as a credit against the assets for which said I. Stanton Carter was accountable to the receiver and to Complainant and which said assets were held by the Court to be a trust fund belonging to

the United States, of the sum of \$1,819.27 for traveling expenses claimed by I. Stanton Carter as having been paid out by him in excess of the sum of \$2,180.73 actually proved, the allowance being on the ground that "general experience proves that the actual expenses of traveling usually amount to about double what is estimated in advance," and no vouchers for said alleged expenditures being shown.

(8)

That the Court by its final decree dated March 21, 1908, by awarding a deficiency judgment in favor of the Complainant against I. Stanton Carter, for \$11,454.18 only, failed to sustain complainant's exceptions numbered "Third" and "Fourth" which exceptions were to the Master's summary of the amounts for which I. Stanton Carter was accountable to the receiver and to complainant, for the trust funds in his hands, the said summary made by the Master giving credit to I. S. Carter for the amounts erroneously credited as claimed by Complainant in assignments of error herein numbered (6) and (7). The amount of the trust fund found by the Master in I. Stanton Carter's hands unaccounted for being \$13,471.19 to Dec. 16, 1902 and he, under the interlocutory decree of the Court of Jan. 7, 1904 having subsequently delivered to the receiver two bonds costing \$2,017.01, leaving the \$11,454.18 for which the said deficiency judgment was rendered. Whereas eliminating the credit errors complained of as aforesaid the balance of the trust fund in the hands of I. Stanton Carter on Sept. 1, 1901 unaccounted for to the receiver to Dec. 16, 1902 was \$19,890.46 as pointed out in said exceptions for which amount less said sum of \$2,017.01 Complainant was entitled to a deficiency judgment against said I. Stanton Carter, and the Court committed error in not giving Complainant judgment against the said I. S. Carter for the sum of \$17,873.45.

(9)

That the Court by its final decrees dated March 21, 1908 and April 14, 1908 in said cause committed error in failing to sustain Complainant's exceptions numbered "Fourth" to the report of W. M. Booth, Special Master, said exceptions being to the allowances by said Master as a credit against the assets for which said L. D. Carter was accountable to the receiver and to complainant, and which said assets were held

by the court to be a trust fund belonging to the United States, of the sum of \$675.00 for amount claimed to have been paid by him out of the trust fund to J. H. Winkler in excess of the sum for \$325.00 actually proved.

(10)

That the Court by its final decree dated March 21, 1908 and April 14, 1908, committed error in failing to sustain Complainant's exception numbered "Fifth," to the report of W. M. Booth, Special Master, said exception being to the allowance by said Master as a credit against the assets for which said L. D. Carter was accountable to the receiver and to Complainant, and which said assets were held by the Court to be a trust fund belonging to the United States, of the sum of \$200.00 for amount claimed to have been paid by him out of the trust fund to J. H. Winkler, the evidence pointed out in the exceptions showing that said payment was included in amounts for which said L. D. Carter was already given credit by the Master, and no competent proof of any additional payments represented by said credit being made.

(11)

That the Court by its final decrees dated March 21, 1908 and April 14, 1908 committed error in failing to sustain Complainant's exception numbered "Sixth," to the report of W. M. Booth, Special Master, said exception being to the allowance by said Master as a credit against the assets for which said L. D. Carter was accountable to the receiver and Complainant, and which said assets were held by the Court to be a trust fund belonging to the United States of the sum of \$1,554.43 for traveling expenses claimed by L. D. Carter as having been paid out by him in excess of the sum of \$1,500.03 actually proved, the said allowance being on the ground that traveling expenses usually double any estimate in advance, and no vouchers for said alleged expenditures being shown.

(12)

That the Court by its final decrees dated March 21, 1908, and April 14, 1908, committed error in failing to sustain Complainant's exception numbered "Seventh" to the report of W. M. Booth, Special Master, said exception being to the allowance by the said Master of \$12,916.66 to L. D. Carter, claimed to be due him by O. M. Carter, as a credit against the assets

for which he was accountable to the receiver and to Complainant in said cause, and which assets were held by the Court to be a trust fund belonging to the United States: The agreement of Nov. 6, 1901, being that said L. D. Carter should disclaim any personal interest in the said assets, and the complainant not being privy to any contract between L. D. Carter and O. M. Carter for salary, and the said L. D. Carter having received said assets into his hands with notice of the rights of complainant therein.

(13)

That the Court by its final decrees dated March 21, 1908, and April 14, 1908, failed to sustain complainant's exceptions numbered "Eighth" and "Eleventh" to the report of Special Master Booth, said finding of the Master excepted to being that L. D. Carter had in his hands unaccounted for to the receiver, of the trust fund, to Nov. 6, 1901, \$17,211.11, from which he had paid out afterward for O. M. Carter in violation of the agreement after Nov. 6, 1901, \$1,666.38, leaving a balance still in his hands of \$15,544.73, and said exception being that the said summary made by the Master is erroneously arrived at by deducting from the amounts for which said L. D. Carter was accountable to the receiver and to Complainant the items of credit complained of in assignments of error herein numbered 9, 10, 11, 12. The amount of said assets unaccounted for in the hands of L. D. Carter for which he was accountable to the receiver and to Complainant being to Sept. 1, 1901

\$32,871.66

From which is to be deducted subsequently turned over to the receiver

Mar. 13, 1903 10 Kentucky Central bonds
cost

\$9,944.93

Jan. 13, 1904 11 Kentucky Central bonds
cost

10,939.42 20,884.35

 \$11,987.31

And the Court committed error in said decree of March 21, 1908, in failing to sustain said exceptions, and in failing to give complainant a deficiency judgment against said L. D. Carter for said sum of \$11,987.31 so in his hands unaccounted for to the receiver and to complainant as aforesaid.

(14)

That the Court by its final decrees of March 21, 1908, and April 14, 1908, failed to sustain Complainant's exception num-

bered "Ninth" to the report of Special Master W. M. Booth, the finding of the Master being that the balance of the trust fund received by I. S. Carter and L. D. Carter from all sources remaining in their hands Sept. 1, 1901, was \$32,296.76 and \$30,922.30 on Nov. 6, 1901, and that all of the same except \$21,529.15 was received from J. H. Paul, James Bragg and R. E. Westcott. The exception being that said balance of the trust fund received by I. S. Carter and L. D. Carter from all sources in their hands Sept. 1, 1901, was \$52,762.12 and that all of the same except said sum of \$21,529.15 was received from said J. H. Paul, James Bragg and R. E. Westcott, leaving the sum of \$31,232.97 in the hands of said I. S. Carter and L. D. Carter Sept. 1, 1901, not accounted for to the receiver up to the time of the Master's said finding, from which is to be deducted the cost of certain securities turned over to the receiver subsequent to said finding of the Master, to wit: turned over by L. D. Carter March 13, 1903, 10 Kentucky Central bonds, cost \$9,944.93 and Jan. 13, 1904, 11 Kentucky Central bonds, cost \$10,939.42, and turned over by I. S. Carter Jan. 8, 1904, 1 Kentucky Central bond, cost \$997.56, and 1 Certificate for 1 Michigan Teelphone Co. bond, cost \$1,019.45, leaving the sum of \$8,331.61 of proceeds of said trust assets received from said J. H. Paul, James Bragg and R. E. Westcott, by I. S. Carter and L. D. Carter, which were still unaccounted for to the receiver and to the Complainant at the date of said decrees of March 21, 1908, and April 14, 1908.

(15)

That the Court by its final decrees of March 21, 1908, and April 14, 1908, committed error in failing to hold that the defendants, I. S. Carter, L. D. Carter and O. M. Carter, had not turned over to the receiver substantially all of the assets turned over to I. Stanton Carter and L. D. Carter by J. H. Paul, R. E. Westcott and James Bragg or their proceeds and reinvestments, except such as had been prior to the receivership, bona fide paid out or pledged by them for attorneys' fees or as expenses in defense of Carter, or expended by them legitimately in the handling of said properties, or which had not prior to the agreement of Nov. 6, 1901, been taken possession of by the receivers in said cause, and in not holding that the said defendants had not sufficiently complied with paragraph (9) of the agreement of Nov. 6, 1901, referred to in said decrees of March 21, 1908, and April 14, 1908, to entitle them to claim the benefit of paragraphs (7) and (8) of

said agreement; in this, that the said I. S. Carter and L. D. Carter did not file answers disclaiming any personal interest in the assets claimed by the Government, as provided in said agreement, but set up and claimed liens on said assets for salaries alleged to be due them by O. M. Carter to the amount of \$22,500.00 and have contested for the same during the whole litigation, and have not accounted to the receiver or to the Complainant for assets for which they were so accountable under said agreement to the amount of \$28,960.76, of which \$8,331.61 were received from J. H. Paul, R. E. Westcott and James Bragg.

(16)

That the court in and by its final decrees of March 21, 1908, and April 14, 1908, committed error in denying to and in failing to give to Complainant, a deficiency judgment against Oberlin M. Carter for \$105,019.66 being for so much of the proceeds of the trust fund belonging to the complainant, dissipated by Oberlin M. Carter and his agents prior to Nov. 6, 1901, as complainant elected to take a deficiency judgment for, to wit:

Paid out by O. M. Carter to Kellogg & Rose of New York, his attorneys in the Court Martial case.	
Oct. 12, 1897 Proceeds of 13 U. S. Coupon 1904 5% bonds No. 34449, 34450, 34452, 34454, 34455, 34477 to 34483, 55167, Exhibit 417 Parsons	\$14,990.62
Nov. 23, 1907 Proceeds of 200 shares Delaware & Hudson stock, Certificates No. 25868 to 25869, Exhibit 344 Shields	21,875.00
Mch. 12, 1898 Proceeds of 10 Milwaukee & St. Paul 8% bonds No. 668, 1324, 2100, 2115, 2196, 2207, 2369, 3174, 3246, 3599, Exhibit 418 Parsons	10,000.00
Apr. 27, 1898 Proceeds of 2 Receivers Certificates No. 791 and 792 of Receivers of Baltimore & Ohio R. R. Co., Exhibit 417 Parsons	9,943.33
Also:	
Paid out by I. Stanton Carter, agent for O. M. Carter, from the trust fund for which I. S. Carter is given credit in Master's Report page 33 to sun- dry parties:	
March 21 and June 29, 1900 Paid to Kellogg & Rose, Attorneys of O. M. Carter	5,000.00

Assignment of Errors.

		<hr/> \$105,019.66

The complainant having elected to proceed against John H. Paul and R. E. Westcott, defendants to the auxiliary bill in New York for an accounting for the balance of the said trust assets in their hands which they did not turn over to I. Stanton Carter, D. P. Carter and L. D. Carter.

(17)

That the Court in and by its final decree of April 14, 1908, committed error in fixing the compensation of Nathaniel C. Sears as fees for services as Attorney of Oberlin M. Carter at Chicago at \$5,000.00 and directing payment of the same from the proceeds of that part of the assets in the hands of the receiver decreed to belong to the complainant, because:

1st: Said defendants have not sufficiently complied with the terms of the said agreement of November 6, 1901, to entitle

them or their counsel to be paid out of the fund in the hands of the receiver, belonging to complainant.

2nd: That if said defendants have so sufficiently complied with the terms of said agreement, still whatever fee to which said counsel would be entitled out of the fund accounted for to the receiver would be a charge first upon that part of said assets which under the final decree of the court is or may be held to be the property of O. M. Carter and only secondarily upon those assets decreed to belong to the complainant.

3rd: That the amount of said allowance in any event is excessive and exorbitant considering the services rendered, and the fact that said allowance, together with the other allowances to be made under the said agreement were to be made from the fund which was to be accounted for to the receiver, and the maximum amount which under any circumstances can be considered as having been accounted for to the receivers under said agreement did not exceed \$135,971.77.

(18)

That the court in and by its final decree of April 14, 1908, committed error in fixing the compensation of Horace G. Stone as fees for services as chief counsel of Oberlin M. Carter for 2,000 days at \$30.00 per day, \$60,000.00 and decreeing that the same should be paid out of that part of the assets which went into the hands of the receivers which were decreed to be the property of the complainant, because:

1st: Said defendants have not sufficiently complied with the terms of the said agreement of November 6, 1901, to entitle them or their counsel to be paid out of the fund which went into the hands of the receiver, belonging to complainant.

2nd: That if said defendants had so sufficiently complied with the terms of said agreement, still whatever fee to which said counsel would be entitled out of the fund accounted to the receiver, would be a charge first upon that part of said assets which under the final decree of the court is or may be held to be the property of said O. M. Carter, and only secondarily upon those assets decreed to belong to the complainant.

3rd: That the amount of said allowance, in any event, is excessive as to time and rate, and exorbitant considering the services actually rendered and the time reasonably required for such services, and the fact that said allowance together

with the other allowances to be made under the said agreement were to be made from the fund which was to be accounted for to the receiver, and the maximum amount which under any circumstances can be considered as having been accounted for to the receivers under said agreement did not exceed \$135,971.77.

(19)

That the court in and by its final decree of April 14, 1908, committed error in decreeing that Horace G. Stone, chief counsel for O. M. Carter, be paid the sum of \$2,251.31 for expenditures claimed to have been made by him under the agreement of Nov. 6, 1901, from the assets in the hands of the receivers decreed to belong to the complainant, because:

1st: Said defendants have not sufficiently complied with the terms of the said agreement of November 6, 1901, to entitle them or their counsel to be paid out of the fund which went into the hands of the receiver, belonging to complainant.

2nd: The sum of \$308.69 included in the above amount so allowed, is made of items of alleged expenditures specified in complainant's objections filed to the allowance of same, which are not within the purview of said agreement of Nov. 6, 1901.

3rd. The sum of \$1,289.39 included in the above amount so allowed, is not shown by any statement of the items thereof to be expenses of said H. G. Stone within the purview of the said agreement of Nov. 6, 1901.

4th: The sum of \$271.23 included in the above amount so allowed is made up of items of alleged expenditures not within the purview of the said agreement of Nov. 6, 1901.

5th: The sum of \$382.00 included in the above amount so allowed, is claimed by said Stone to be for amounts paid out by him to O. M. Carter, it not appearing for what it was so paid, or any reason shown why such payment falls within the terms of said agreement of Nov. 6, 1901.

6th: The petition of said H. G. Stone for the payment to him of said entire sum of \$2,251.31 is not supported by any vouchers showing such disbursements nor any reason given why said vouchers were not filed with the petition, or otherwise offered in evidence.

(20)

That the court in and by its said decree of April 14, 1908, committed error in decreeing that the sum of \$1,000 be paid from the funds which have been or may be realized by the

receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant, to H. G. Stone as attorney for the International Audit Company and Robert Nelson for services rendered the defendant O. M. Carter by said Robert Nelson as expert accountant and witness, because:

1st: The court had already allowed and paid to Charles McPherson out of the fund in court, the accountant claimed to have been employed by said defendant under the terms of the agreement of November 6, 1901, the sum of \$1,580.73 and there is no provision in said agreement for the payment of two accountants, to be paid out of the fund in court.

2nd: The bill of said International Audit Company and Robert Nelson is for a lump sum of \$1,000 and without any specification of the particular days or of the number of days in which said services were rendered, or any other fact stated in the pleadings or in the bill rendered, which would make it ascertainable by the Court whether said charges for services is not in excess of \$10 per day for his services when needed and actually employed plus his expenses, which was the limitation provided in said agreement even as to the payment of the one accountant provided for therein.

3rd: The said services are not chargeable on the funds decreed to belong to the complainant, and there is no lien therefor on any of the fund in Court, the claim being one of private contract between said O. M. Carter and said expert witness.

(21)

That the Court in and by its said decree of April 14, 1908, committed error in decreeing that the sum of \$1,600 be paid from the funds which have been or may be realized by the receiver from the proceeds of that part of the assets which have been decreed to belong to the complainant, to H. G. Stone as attorney for Lyman E. Cooley for services rendered the defendant, O. M. Carter, as expert engineer and witness for sixteen days at \$100 per day, because:

1st—There is no provision in said agreement of November 6, 1901, for the payment from the fund in court, for any charges for services as an expert engineer rendered or to be rendered by any one to said defendant. The only kind of expert for whom compensation was provided in said agreement being an expert accountant.

2nd: The said services are not chargeable on the funds decreed to belong to the complainant, and there is no lien therefor on any of the fund in court, the claim being one only of

private contract between said O. M. Carter and said expert witness.

(22)

That the Court in and by its said decree of April 14, 1908, committed error in not decreeing that the sum of \$35,885.23 which had been advanced under the interlocutory orders of the Court for and on account of the defendant, O. M. Carter, as allowances for his personal expenses, and for printing bills, counsel fees, and accountant's fee, together with sums, for similar allowances for the defense, aggregating \$52,351.31 directed by said decree of April 14, 1908, to be paid out of the funds in the hands of the receivers, or so much thereof if any as is properly payable out of the funds of the receivers, is a charge first upon the assets in the hands of the receivers belonging to Oberlin M. Carter.

(23)

That the Court in and by its said decree of April 14, 1908, committed error in not decreeing that the amounts paid under the interlocutory orders of the court, and which were directed to be paid by Max H. Whitney, receiver, to examiners and commissioners and stenographers, and to the Clerk and Marshal, should be a charge first upon the assets if any which are in the hands of the receivers belonging to said O. M. Carter.

(24)

That the court by its said decree of April 14, 1908, committed error, in decreeing that said Oberlin M. Carter should have and receive from the receivers under the said bill, and auxiliary bills, the said assets which by the said decree of March 21, 1908, were decreed to belong to him, free from all costs and charges of the litigation, and free from any claim of the United States for the advances made or therein decreed to be made for or on account of the said expenses of said Carter or allowances to his counsel as aforesaid.

MARION ERWIN,
Special Asst. to the Atty. Gen'l.
ERWIN W. SIMS,
United States Attorney.

Endorsement: Assignment of Errors filed April 28, 1908.
H. S. Stoddard, Clerk.

And on towit: the 28th day of April 1908 at the December Term 1907 of said court came the complainant by Marion Erwin Special Assistant to the Attorney General and Edwin W. Sims Attorney of the United States for the Northern District of Illinois, and in open court filed and caused to be entered a petition for an appeal in said cause, in the words and figures following towit:

APPEAL.

In the Circuit Court of the United States, For the Northern District of Illinois, Eastern Division.

The United States
of America

vs.

Oberlin M. Car-
ter *et al.*

} In Equity Bill No. 25980, ..

Pending in Northern District of Illinois and Auxiliary Bills pending in Southern District of New York, District of New Jersey, Southern District of West Virginia, Southern District of Illinois Southern District of Georgia.

Come now, Marion Erwin, Special Assistant to the Attorney General, and Edwin W. Sims, Attorney of the United States for the Northern District of Illinois, and for said United States, and by direction of the Attorney General thereof, present to the court here their petition for an appeal to the United States Circuit Court of Appeals, for the Seventh Circuit and represent to the Court that in the proceedings and in the final decrees rendered on March 21, 1908 and April 14, 1908 herein, error hath intervened to the prejudice of these complainants as set forth in the assignment of errors filed herewith, which prayer for appeal is as follows:—

Said complainants considering themselves aggrieved by the final orders and decrees entered on the 21st day of March, 1908, and the 14th day of April, 1908, in said cause do hereby pray an appeal to the United States Circuit Court of Appeals, in and for the Seventh Circuit, and that said appeal be allowed, and the transcript of the record and proceedings

and papers upon which said orders and final decrees were made, duly authenticated, may be sent to the said Circuit Court of Appeals, and the proper citation be granted requiring said defendants Oberlin M. Carter, I. Stanton Carter, Lorenzo D. Carter and all other parties to said cause in interest, if any, to appear and show cause to said Circuit Court of Appeals, why said final orders and decrees, should not be reversed.

And petitioners pray that the court will grant an order superseding the said orders and decrees dated March 21, 1908 and April 14, 1908 pending said appeal.

MARION ERWIN
Special Asst to the Atty Gen'l
EDWIN W. SIMS
United States Attorney

Endorsement Petition for Appeal. Filed April 28, 1908
H. S. Stoddard Clerk.

And on towit: the 28th day of April 1908 in the December term 1907 of said Court, in the record of proceedings thereof; in said entitled cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court the following order and entry thereof:

ORDER ALLOWING APPEAL.

The United States of America <i>vs.</i> Oberlin M. Car- ter <i>et al.</i>	}	In. Equity Bill No. 25980,
---	---	----------------------------

Pending in Northern District of Illinois and Auxiliary Bills pending in Southern District of New York, District of New Jersey, Southern District of West Virginia, Southern District of Illinois, Southern District of Georgia.

On petition of the United States and on motion of Marion Erwin, Special Assistant to the Attorney General, and assignment of errors being filed, It is now, in open Court, at the same term of the court in which the orders and decrees of March 21, 1908 and April 14, 1908, appealed from, were entered, ordered by the Court that an appeal be and the same

is hereby allowed to the Circuit Court of Appeals of the United States for the Seventh Circuit, to have reviewed the said orders and decrees, and this order shall operate as a supersedeas to the said orders and decrees entered on March 21, 1908 and April 14, 1908.

And on towit: the 28 day of April 1908 in the December term 1907 of said Court, in the record of proceedings thereof, in said entitled Cause before the Honorable Christian C. Kohlsaat Judge presiding, there was made by the Court the following order and entry thereof:

ORDER EXTENDING TIME FOR FILING TRANSCRIPT
OF RECORD.

United States of America,	}	Bill No. 25,980, etc.
<i>vs.</i>		
Oberlin M. Carter <i>et al.</i>		

An appeal having been taken this day by complainant in the above stated cause from the decrees of this Court entered therein on the 21st day of March, 1908, and the 14th of April, 1908, to the Circuit Court of Appeals of the United States for the Seventh Circuit, and it appearing that the record in said cause is so voluminous as to make it impracticable for the clerk of this Court to prepare and transmit a transcript thereof to the said Circuit Court of Appeals by or before the return day of the citation issued therein, It Is Ordered that the time for filing in said Circuit Court of Appeals the transcript of the record be and the same is enlarged to the 15th day of August 1908.

IN U. S. CIRCUIT COURT,
Northern District of Illinois
Eastern Division.

United States of America	} In Equity 25980 Appeal to U S Circuit Court of Appeals 7th Circuit.
<i>vs</i> Oberlin M. Carter <i>et al</i>

Personally appeared J. S. Harrison, who being duly sworn deposes and says that he is the Official Stenographer of The City Court of Savannah, that the stenographic notes taken by him at the hearing before the Board of Officers of The Engineer Corps, at Savannah, Ga., on September 22, 23, 24 and 25, 1897, are a faithful record of the proceedings, and that the typewritten copy submitted is a true transcript of said stenographic notes.

JOHN S. HARRISON.

Sworn to and subscribed before me, this September 7, 1897.

(Seal) J. W. O. STERLY,
Notary Public Chatham Co., Georgia.

- 1 Stenographic Report of an Examination by a Board of Officers of the Corps of Engineers, convened at Savannah Georgia, September 22, 1897, by virtue of G. O., No. 32, Headquarters Corps of Engineers, of September 17, 1897.
-

The Board convened for the taking of testimony and the hearing of evidence at 10 a. m., on September 22, 1897, at the office of the United States Engineer; present, Col. George L. Gillespie, Chairman: Major Charles W. Raymond, Major Henry M. Adams, who constitute the Board of Officers; Capt. O. M. Carter, Capt. Cassius E. Gillette, and the stenographer.

Col. Gillespie: The Board desires that you make a presentation of your case, in further explanation of the charges contained in your letter of September 17, 1897, to the Chief of Engineers.

- Capt. Gillette:—I have here copies of the specifications for different contracts, beginning with the one opened on
2 September 10, 1892. In each of these the specifications for brush mattresses are essentially the same, showing three designs, to be used at the option of the Engineer Officer in charge. In the specifications appear these words, "The United States reserves the right to make such alterations in the details of the construction, or in material, as may be deemed best during the progress of the work, providing that should such alterations materially vary the cost of the mattress the price to be paid shall be increased or diminished proportionately, such change of price being agreed upon before the alterations in the mattress are made." It also says, "Separate bids for the designs of the mattress are not desired. One price only should be given in the proposals, and the price so stated will be understood as referring to any of the designs which may be required by the Engineer Officer in Charge." That appears, with some slight variations in all the specifications. Bids were received on these specifications and contracts were awarded. None of those designs have been used. A form of mattress that is somewhat analogous to the third design has been used, enormously

cheaper than the third design would have been, and no record appears that any reduction in the price was made as permitted by the specifications. To show this, I inspected 3 the first mattress that was built, or the first mattress that came to my notice, at Cumberland Sound, and I have a photograph of it here. I also have drawing showing the three designs as proposed, and drawings of the mattress as built. Taking what is known as the eight course mattress, which is the kind shown in the photograph; this mattress, as I inspected it was built of loose bundles of brush, tied with, I think, spun yarn, at spaces of about three or four feet, and loosely made into a thick mattress, divided into layers by a grillage of small pine poles, approximately like the third design of the specifications. I have been informed, and the records of the office verify it, that the system of payment under Capt. Carter was to pay for that mattress by the square yard, and to pay for each layer, of course, as if it was a separate mattress. In trying to go across the mattress the mattress I stepped onto it, and sunk into it nearly to my waist. It was exceedingly loose; nothing that came anything like being the fascines that were described in the specifications. That is, "All fascines shall be made of live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the Engineer Officer in charge.

The fascines will be from thirty to one hundred feet in 4 length, and must be compressed tightly, by an approved form of choker, to a diameter of nine inches at intervals of two feet, where they must be bound firmly with wire or tarred rope of an approved strength. The brush used will be as straight and well trimmed as can be obtained; the fascines shall be carefully and thoroughly made and handled with care. They shall be piled up on shore, or on barges for measurement in such way as the Engineer Officer may direct." (That part of the specifications apply to only one contract. This remark within parenthesis is by Capt. Carter).

The bundles of brush, which might be taken to represent fascines, in the mattress I inspected were short bundles, fifteen to twenty feet in length and sometimes shorter, and frequently the brush was not trimmed at all. I have since had tests made of the bundles of brush which the contractor had on hand, and I will submit them. This is in the form of a letter from an inspector in the brush camp, Mr. Hale, in which he says that he measured the bundles of brush that the contractor had on hand and then tightened them and

choked them properly; before choking they measured 3.5 feet in circumference and after choking 2.1 ft. Mr. Hales is the inspector that I placed in the mattress camps. When I came here there was no inspector of the making of brush fascines in the camps, and the testimony will show, I expect, that
5 except at long intervals and for a short time there never have been any under these contracts. This statement comes from the inspector of mattress camp for Savannah Harbor, and I also have a statement, more complete from the inspector for the mattress camp for Cumberland Sound. They both show about one-quarter the cross section after compression that the bundles had before compressing. I then had the above mentioned mattress sunk in the work and as it sank out of sight a great quantity of leaves floated off, a great number of leaves floated away. The next mattress was in better shape—the contractor didnt know that I was going to inspect the first one, but he did know that I was going to inspect the second. Measurements showed that the mattresses contained about four-ninths of the material, of the quantity of the material required by the specifications. To do the work shown by the specification it would require eight of those mattresses, and eight trips to sea, whereas by building eight courses at once it required only one trip to sea, and enormous saving was made by that, which accrued only to the contractor as the United States got no benefit from it.

Major Raymond: I didnt quite understand that. You say those mattresses took only one trip to sea?

6 Capt. Gillette: Yes sir, one trip, towing out to sea.

Major Raymond: And if built according to the specifications?

Capt. Gillette: It would take eight trips. He might have taken two at once, but it would have been very awkward and difficult. The camp for Savannah River is about 60 miles from the breakwater. Under the specifications the mattress should be sunk in layers, with rock on each layer, each layer sunk separately, while in this work they are all sunk at once and rock put on top of the whole. This has also resulted in an enormous saving, none of which has accrued to the United States.

I will also submit a report of the assistant engineer on the measurement of two mattresses. The assistant engineer told me, he is now sick in the hospital, but I have his affidavit, which I will submit—that the mattresses, the first mattress

was as good in quality, as the average previously sunk but slightly deficient in height. I have also a report from the same man, Marion Twiggs showing the average height, width and number of cubic yards of stone placed on the mattresses under the present contract on Cumberland Sound. I also submit a report from Marion Twiggs, Assistant Engineer, showing the method of construction of the brush mats
7 in Cumberland Sound, which shows a kind of choker that was used. Here is a table showing the average height of mattress placed under that contract, by Marion Twiggs.

A. S. Cooper, in March last reported by letter to Capt. Carter that the mattress work was not standing up and that it needed more rock badly. No answer of any kind to that letter can be found on record, and Mr. Cooper states that he got no letter. In the month of June he reported the matter again, and an answer was returned by Capt. Carter ordering more rock on the mattresses. This was not carried out, and was the same day verbally countermanded by Capt. Carter. On the 6th of August, 1897, I wrote a letter to an inspector, Mr. Daniels, the correspondence is before you. A. S. Cooper also received a letter from Mr. Daniels, which I will also submit. This was upon receipt of his report of the amount of work done by The Atlantic Contracting Company.

Col. Gillespie: Was this a report you got from Daniels, or from Cooper?

Capt. Gillette: From Daniels. The letter from Daniels came through Cooper, and Cooper answered it.

Col. Gillespie: It passed through Cooper's hand?

Capt. Gillette: Yes sir. (Here Capt. Gillette reads letter from Daniels.)

8 Capt. Gillette: In addition to the mattresses not being up to specifications, the stone used was not up to specifications. It is prescribed in the specifications that the stone shall be of a specific gravity of 2.4, which means 149 pounds to the cubic foot. The bulk of the stone used has been Florida limestone, and it runs from—I think 93 pounds was the lowest, up to 140, averaging between 115 and 125 pounds per cubic foot, and instead of weighing say 88 pounds under salt water it weighs 41. I am aware that that which has been received before may have been higher than that, but that is the average of what I took.

At Cumberland Sound I had some soundings taken concerning the first nine mattresses sunk under the present contract, and I submit the result. I attach a letter from Marion

Twiggs, Assistant Engineer, of August 15, 1897. I also attach a computation of the volume of those nine mattresses at present, with an estimate of the cost per cubic yard of that portion of the jetty, and the result is \$13.69 per cubic yard.

I also submit a table from the official records showing the work, the date of opening the bids, the dates of opening the bids, the names of the bidders and the prices bid for mattresses and stone. Also a table showing the comparative amounts used in canvassing bids and the amounts actually used. This shows that wherever the name of the contractor is Gaynor, Bangs, The Atlantic Contracting Company, Walsh, or Ely the quantity of brush used has been greatly increased, and the quantity of stone used has been very much decreased. Where the name of the contractor is Twiggs, it is the other way.

Major Raymond: In how many cases does that occur in the case of Twiggs?

Capt. Gillette: It occurs once.

Major Raymond: What is the full name of that contractor?

Capt. Gillette: Albert J. Twiggs.

I also present a table showing the dates of the contracts. the square yards of mattress used, the amount paid, the amount retained, and the amount still due. Under the Savannah Harbor Contract of 1892, 350,000 square yards of mattress work were used to canvass bids, also 300,000 yards of fascines. There has been, up to July 30, 1897, 1,363,572 square yards of mattresses and 208,124 cubic yards of fascines used on the work. 50,000 yards of first class stone was used to canvass bids; none was used in the work. Fourth class stone, 200,000 tons were used to canvass bids, 127,764 10 were apparently used. On the present contract on Savannah Harbor 200,000 yards of mattresses were used to canvass bids, and 255,000 and over had been already used to July 30, 1897. Under the contract for Cumberland Sound for 1896, the estimate used in the project was 425,000 square yards of mattress, 125,000 cubic yards of first-class rock, 300,000 feet of second class rock and 100,000 feet of third class rock, aggregating 425,000 cubic yards of rock. For canvassing bids 200,000 square yards of mattress were used and 475,000 cubic yards of rock, increasing the estimate for rock, and cutting the estimate for brush in two, using less than one half the amount. Up to July 30 of this year 446,000 square yards of mattress had been used, more than twice as much

as was used in canvassing bids and more than the original estimate.

This is an outline of the facts I wish to present showing deviation from the specifications. I also submit three photographs, two of the first mattress that I inspected at Cumberland Sound and one of the single course mattress constructed according to the specifications, with the exception that they are not scarfed with a long lap. In addition to these

11 facts, and in connection with the amount of work done, there appear on the records of the office official statement on the part of Captain Carter, which do not seem to be borne out by the facts. On a letter from the Chief of Engineers to Captain Carter, is an endorsement dated December 31, 1896, signed by Capt. Carter; I have not the original here, it is in Washington, as follows; "Respectfully returned to the Chief of Engineers, inviting attention to the additional inclosure. The additional inclosure refers to a statement of the amount of brush mattress to be used in Savannah Harbor. That inclosure says, "In the specifications only 200,000 square yards of mattress are given, but as the new soundings show that 300,000 square yards will be required, that estimate has been changed, as provided in paragraph 44 of the specifications." The records of the office do not show that any soundings were made. The office force, who would certainly know it, if it had been made say that none was made. A survey was made on the third of February, 1897; this is dated December 31, 1896. That document is also submitted.

Col. Gillespie: A survey was made?

Capt. Gillette: About five weeks after the date of this letter. I submit also a copy of that survey, and a copy
12 of the survey upon which the project was based.

I also submit a portion of the correspondence with the steamboat inspector here concerning the inside route to Beaufort. The correspondence is very voluminous and is at the service of the Board. I will also submit a report of Capt. Carter on the survey for that route. The old original route went around the point of Jones Island, leaving the Savannah river near what is known as dam 33. The works in the Savannah river nearly cuts off that route, but there is an opening left for boats. In Executive Document 295, 53d Cong. 3d session Captain Carter discusses the improvement of the inside route from Savannah to Beaufort. He discusses two routes, neither of which is the old original route. One is the shorter, which he estimates will cost about \$85,000; one is

longer and involves considerable dredging and extension of dam 31 to Turtle Island by brush mattress, and he estimates the cost of that at about \$107,000. The old route is not mentioned. In the letters to which I refer complaint is made of the closing up and dumping of mud into this old route. In his correspondence with the Chief of Engineers occurs a statement, or two statements from Capt. Carter, which must

13 have deceived the Chief of Engineers and were apparently intended to do so. In one of his letters he says, "Nothing has been deposited in the steamboat channel back of North Long Island training wall;" and that in connection with the general trend of the correspondence, indicates that letter was intended to deceive his superior officer. The other statement to which I refer is as follows: "The distance between Savannah and Beaufort is practically the same by both routes, but the route across the sound in rough weather is impassable for small boats. The present route has been shoaling for some years, but the shoaling has been hastened by the construction of works of improvements just mentioned; those works are North Long Island training wall and dams 33 and 35." By omitting to state that the route was shoaling because of the fact that enormous quantities of dredged material was being dumped in the vicinity of the channel, and the very day that this was written at least two dredges were dumped where the tide would carry them into the channel—those two statements appear to be intended to deceive his superior officer. A third attempt, all the details of which I have not here, but which the public documents show, was in connection with the contract of 1892. That contract provided for the removal of a portion of Hutchinson's Island, opposite the city. This was not done. It was contracted for, but was not carried out. In a communication to the Chief of Engineers Capt. Carter gives a reason why that was not

14 carried out, because people had been buying up lots, for the purpose of charging exorbitant rentals while the work was being done, and by postponing it \$50,000.00 would be saved to the United States. I have had a careful examination made of those lots and submit maps showing them. With one possible exception, no lots have changed hands for several years. Mr. Willink purchased a lot about 1890, which adjoined his marine railway, and he had to have it as it was being sold and his railway covered a portion of it.

It seems to me that that is a fair statement of my case. There are other matters which I desire to present to the Board, but I have not investigated them sufficiently to take

the responsibility of bringing them in anything like the form of charges at the present time. When I have them prepared, if the Board is still in session, I will bring them up. The facts concerning them are at the service of the Board, but I do not desire to bring them as charges against Captain Carter.

I will read an affidavit from Mr. Marion Twiggs, Assistant Engineer in connection with the mattress that I inspected. Mr. Twiggs is very sick in the Savannah Hospital and unable to be here.

15 A. S. COOPER, testified as follows:—

Direct Examination by Capt. Gillette.

Q Will you give me your name and your history, connected with Capt. Carter and the works recently under his charge?

A My name is A. S. Cooper, and I first came to Savannah in 1884.

Q Was that your first connection with Capt. Carter?

A I did my first work for Capt. Carter in the Department of Missouri and Leavenworth, Kn. I went there in 1882, to serve as topographical assistant in that department. I was in that department for about a year and nine months. I came to Savannah in 1884.

Q (By Major Raymond) How did you happen to come to Savannah?

A Capt. Carter requested me to come here, and I got my discharge from the department of Missouri and came here.

Q How long did you stay here at that time?

A Some time in 1888, I think.

Q In what capacity?

16 A First as inspector and then as assistant engineer.

Q When did you come back after leaving in 1886?

A I came back the same year, the fall of the same year.

Q How long did you remain at that time?

A I remained until 1888.

Q When did you come back after leaving them?

A I left in 1888 and came back in the fall of the same year.

Q How long did you remain at that time?

A I remained until 1890, July 1890.

Q In what capacity?

A As assistant engineer.

Q How long did you remain away in this instance?

A I remained away about three years, and came back in 1893.

Q Under what circumstances did you come back these various times, at your own solicitation or that of Capt. Carter?

A At that of Capt. Carter.

Q In what capacity did you come back in 1893?

A As assistant engineer in charge of the Savannah harbor, local charge.

17 Q And you have been here ever since?

A Yes sir.

Q Were you ever at Cumberland sound?

A I was at Cumberland sound in 1886 and 1887.

Q Now, referring to contracts for the Savannah harbor, from all you know for the eight years previous to 1896, were the specifications concerning brush properly carried out?

A Not fully, no sir.

Q Were the mattresses built according to any of the designs of the specifications?

A They were built according to the third design, that was the plan they were built on.

Q Describe them?

A When I first came here they were using the mattress of the third design, and they were built on a gin which had poles over the end of the barge. They were built about thirty or forty feet, three courses at a time, and then they launched what they had done to the water's edge, and they built thirty or forty feet more, making a continual mat the entire length of the work. That describes the method of building.

18 Q Was any change made in that method, in the method of building the mattress?

A Yes sir. We were working under that method when the storm of August 27th, 1893, tore everything to pieces, and there were no gin barges left. Then, instead of rebuilding under the same method, the suggestion was made to build large barges, build the mattress on the barge.

Q (By Col. Gillespie): Who suggested that?

A I think I did. I think I made the suggestion, but of course, it was passed upon between Capt. Carter and the contractors. I don't know anything about what agreement was made, but I was told to go ahead on that suggestion. The scheme was to build large barges capable of carrying a suffi-

cient number of courses to build the entire dam at once, ten courses were built at once.

Q (By Capt. Gillette): For a certain length?

A Yes sir, for the length of the barges.

Q Are you familiar with the specifications as to the fascines to be used on those mattresses?

A Yes sir.

Q Were those fascines built according to the specifications?

A They were not, no sir.

Q In what respect were they not?

19 A They were not what you would call fascines of the best description. They were not trimmed, they were simply piled merely as they were found, with the leaves and everything left on them.

Q Were they choked anything like as tightly as the specifications required?

A I don't think there was much choking done at all. I think they were just tied up as well as they could.

Q Did Capt. Carter see the mattresses frequently?

A When I first came on the work, in 1893, he used to be there very often, twice a week, at least.

Q Has he seen them frequently up to the time of his departure from this district?

A Yes sir.

Q Did he approve or disapprove of the mattresses built?

A I believe they were satisfactory to him; I was told so when I first came on.

Q (By the chairman) Did he ever at any time give you any instructions in regard to those fascines, as to making them better?

A No sir, I was told that they were satisfactory.

20 Q (By Major Raymond): Give me your estimate of the cost, the relative cost, of mattresses of the three designs, of the same size, and of the mattress as constructed, how much would a mattress of the first design cost, of any assumed size?

A A mattress of the first design is a log mat. I suppose a mat of that design 100 by 50 feet, which was the size they were using, would probably cost somewhere in the neighborhood of four hundred dollars.

Q 100 by 50 feet, single course mattress?

A Yes sir.

Q How much do you think a mat of the same size of the second design would cost?

A I presume it would cost about three hundred dollars, probably.

Q And a mat of the third design of the same size, what would that cost?

A About two hundred and fifty dollars.

Q About how much do you think the entire cost of the three course mattresses as constructed by the contractors under this contract, would be?

A I dont think it would cost more than one hundred and seventy dollars, probably.

Q This estimate is for the mattress in place in the—
21 A Yes sir.

Q Do you remember what Capt. Carter paid the contractors for this work, which you say is worth one hundred and seventy dollars?

A I dont know what the price was; I suppose it would be the contract price per square yard.

Q What would the cost of that mattress be?

A They usually run seventeen hundred square yards. I think the price was somewhere in the vicinity of a dollar.

Q (By the Chairman): How do you arrive at your figures in determining the cost you have given of the three different styles of mattresses?

A simply by my general knowledge of the work. Those figures probably should be made in detail. I just give them roughly; they may be wrong and they may be right; I would have to figure on them to be exact.

Q Are your figures determined from any knowledge you have of the cost of this work, the different kinds of work, or simply from a rough estimate; I want to know how you get at it?

A Simply a rough estimate, by a long experience on the work, but just as I said, if I had to verify them I would like to go through the details and figure it very much more exactly.
22

Q (By Capt. Gillette) Did you ever know of inspectors being placed in the camps where the mattresses were made, were they kept there habitually?

A No sir.

Q Were they there at all?

A There have been one or two instances where inspectors were sent over to the camp.

Q For how long?

A I dont know. About two or three months, I guess, something like that.

Q Generally those mattresses were eight or ten courses, I think you said, on the Savannah harbor contract of 1892?

A I think they would average probably eight or ten feet in thickness.

Q How many courses?

A Eight courses, maybe.

Q As inspector, inspecting those mattresses, did you know what was in the interior of those thick mattresses?

A I could not see anything but the outside, I would have to judge by the general appearance of the outside of the mat; that was the only thing I could judge by.

23 Q Did you ever know of a mattress being hollow inside?

A Things of that kind have happened.

Q Did you see it?

A It was reported to me and I investigated and found it so.

Q What did you do about it?

A I told the contractors that that kind of work must be stopped; that they must not build mattresses with the brush left out, and that sort of thing.

Q Did you do anything about it?

A I carried the matter to Capt. Carter.

Q Did you write to him?

A I went to Capt. Carter personally, and told him that that way of building mats ought to be stopped, that they were leaving out some of the brush. I know of a man who went right down into the mat.

Q What year was this?

A In 1894.

Q (By Capt. Gillette): Did you mention it to Capt. Carter?

A I told him that that kind of work would have to stop, because everybody would know all about the irregularity and it would not do.

24 Q (By Major Raymond) You say that there was no way of finding out what was inside of the mat, and yet you say that it was so loose a man could fall through it?

A In this case.

Q Was the mat loose?

A The mat was loose. What I meant was that if the mats

were well put together, you could not see what was inside of them.

Q Do you think it was necessary to keep inspectors at the brush camp?

A That would be the proper place for them. That was where the mats were made.

Q The mats were built at the brush camp?

A Yes sir, the mats were built at the brush camp.

Q (By Major Adams) Did you have the specifications and the contract for this work?

A Yes sir.

Q Did you see that those specifications were carried out?

A In that regard I did not.

Q Why not?

A Because those mats were inspected by my superior officer, and I was told that they were all right.

25 Q Did you have any written instructions from Capt. Carter?

A About the mats?

Q About the work?

A At various times I had written instructions, but I could not say what they were now.

Q Did those written instructions involve any departure from the contract?

A No sir, not that I know of.

Q You had oral instructions?

A Yes sir, I did.

Q About what?

A In regard to those fascines.

Q About what, just what?

A When I went on the work in 1893, I was told to carry on the work in the manner I found it being carried on, and consequently I put in those bundles of brush just as I found them being put in.

Q (By Capt. Gillette) When you reported this matter to Capt. Carter, what did he do about it, did he take any official action, that you know of?

A No sir.

Q Did he take any official action?

26 A I think he wrote a note to Mr. Gaynor.

Q What made you think he wrote a note to Mr. Gaynor?

A Because the mats came in in a little better shape after

that, and I suppose he must have seen or written to Mr. Gaynor.

Q You say he saw Mr. Gaynor?

A I saw he wrote him a note or saw him?

Q Did he do anything at that time or say anything to indicate that he was going to write a note?

A I dont know.

Q You never had any official communication to show that he had taken any action?

A No sir.

Q Did Captain Carter ever prescribe what height the mattress should be made for certain numbers of courses?

A Yes sir; he gave me a memorandum, stating the number of courses and the height, in order to allow the contractors for—

Q Was that determined by the height of the mattress or the grillages?

A Both. There was a certain range that they were not allowed to go below.

Q About what did that table give for the average
27 height of a course?

A About a foot and a half?

Q Have you got that table?

A I have not got the original, I have got a copy.

Q Was it given you by Capt. Carter?

A Yes sir.

Q In the form of an official letter?

A No sir, just a pencil memorandum.

Q Were you ever instructed by Capt. Carter to allow a certain number of courses, or a certain number of mattresses, for a given height, irrespective of the division into courses?

A Yes sir.

Q Did you do it?

A No sir.

Q Why not?

A Captain Carter asked me when he was giving me this memorandum to allow them for a certain number of courses for a certain height, no matter how they got the height, and I told Capt. Carter I could not do it, because I would be certifying to something that was not so, and the mattress must have those courses.

Q (By Major Adams) When was that?

28 A I think it was in 1894 or 1895; I am not certain.

Q (By Capt. Gillette) In regard to the mats in the

Savannah Harbor, the contractors by the specifications are required to place them on the proper range, what method is used to get them on the proper range?

A After this new method was adopted?

Q On what you call the big contract, the contract of 1892?

A When this new method was first adopted, in launching those big mats, there was a great deal of trouble. The first scheme was to have tanks in the barges and turn the water in and dump the mat in that way, because those mats were very heavy, and would sometimes weigh 150 to 200 tons, and to avoid this difficulty the contractors suggested—the contractors' foreman suggested that it would be a good idea to drive piles, tie the mats up to the piling and pull the barge out from under the mat.

Q Was this done?

A Yes sir. I told the foreman if he wished to do it, he could do it, but I could not make him any allowance for this piling, as it was his own work he would have to pay for them himself.

Q Had this piling any use except to help the contractors get the mats off the barges?

A None whatever. Sometimes they were used to locate the dam by, but they were not necessary for that purpose.

Q Did you report the number of those pilings so used?

A Yes sir, I was directed to do so.

Q By whom?

A By Capt. Carter.

Q Do you know whether they were paid for or not?

A I saw the estimate, otherwise I would not know. The records indicate that they were paid for.

Q (By Major Adams). Who made the estimates?

A I think Mr. Giesler made them up.

Capt. Gillette:—Mr. Giesler made up all final estimates in the office. I will submit later vouchers, showing that that piling was all paid for.

Q (By Capt. Gillette) So far as you know, in what form were those piles paid for, as single piles, linear feet of pile, or how?

A As linear feet of pile dam constructed.

Q (By Major Adams) When this point first came up. I understood you to first say that you didnt know whether this was paid for, and now you say it was paid for?

A I have seen the estimate.

30 Q You just now said it was paid for.

A I just spoke that way, I don't know whether it was paid for or not; I only saw the estimates.

Q (By Capt. Gillette) Estimate for linear feet of pile dam?

A Yes sir.

Q What does that mean; is there any provision for that?

A In that big contract there is pile dam built and paid for at so much per linear foot for piling.

Q Describe that dam and how it was measured?

A It was a dam built by means of two rows of piles, eight feet apart and eight feet apart in the row, making an average of one pile to every four feet of advance of the wall. The piling was paid for by the linear foot.

Q From the piling you can count how many feet of dam were built?

A You can count one pile for every four feet of dam, and two piles for every eight of dam. I remember they were paid for by the length of the dam, regardless of the length of the piling.

Q Under the present contract, was the specified quantity of stone, in your judgment, used on the mattresses?

31 A You mean the breakwater?

Q Yes sir?

A I don't think so.

Q Did you report that fact?

A I did.

Q When?

A In March of this year.

Q Did you report it to Capt. Carter?

A Yes sir.

Q (By Major Adams) Was any written report?

A Yes sir.

Q (By Capt. Gillette): Did he do anything about it?

A No sir.

Q Did he write any letter at all?

A No sir.

Q The work continued to have too little stone?

A Yes sir.

Q Did you again report it at any time?

A In June, I think it was, those mats were being destroyed by the storms from one end to the other, and I went to Capt. Carter personally and told him the breakwater was be-

ing destroyed and eaten by the teredo, and something would have to be done or he would not have any breakwater.

32 Capt. Carter wrote an official letter, ordering the contractor to put 200 yards on each mat, and a certain number of yards, I dont remember how many, on the old work.

Q (By Col. Gillespie) You say 200 yards per mat?

A Yes sir.

Q Was it a common structure, eight courses?

A Three courses.

Q On each three mats?

A Yes sir, on each three mats.

Q That is the common structure, three mats?

A Yes sir.

Q (By Capt. Gillette) Capt. Carter issued orders to have that done?

A He did.

Q Was that order carried out?

A It was not.

Q Why didnt you carry it out?

A Because the order was countermanded.

Q By whom?

A By Capt. Carter.

Q Orally, or by written order?

A Orally.

Q To whom?

33 A To Inspector Daniels.

Q Did you hear him countermand it?

A Inspector Daniels told me so.

Q How soon after the issue of the written order did he countermand it orally?

A I think it was on the same day.

Q Dam 31 has been extended to Turtle Island, what has been the effect of that on the Savannah Harbor, in your judgment, as an engineer?

A I think it shuts out some of the flood tide, and consequently, has a tendency to diminish the tidal range.

Q (By Major Raymond) I should like to ask you about those inspectors in the brush camps; did this absence of inspectors exist always, from the first time you were employed under Capt. Carter?

A I dont think there were any inspectors in the brush camps when I first came here.

Q You never made any general inspection at the brush camps?

A It was not customary to keep inspectors at the brush camps.

Q You were in local charge of the Savannah Harbor when those mats were put in there?

34 A Yes sir.

Q You were exercising a supervision over the work?

A Yes sir.

Q You know that there were no inspectors at the brush camps?

A Yes sir.

Q Did you ever invite the attention of Capt. Carter to the necessity of putting inspectors there?

A I think I have, occasionally.

Q You reported that it was necessary in your opinion, and that you could not certify exactly as to the nature of the work unless the inspectors were there?

A I have in one or two instances.

Q Did you certify to the proper execution of the work in your report which you sent in as local engineer, to Capt. Carter?

A Yes sir.

Q And upon your reports payments were made?

A Yes sir.

Q Didnt you have to certify that the work was properly done before payment could be made?

A I think the form of certificate was, "The above Report is Correct."

35 Capt. Gillette:—The Assistant Engineer writes on the report, "Checked and approved," the inspector, "I certify on honor that the above report is correct." The certificate on the bill which goes with the voucher is signed by Mr. Giesler; he knows of his own knowledge, nothing at all. Nowhere in the entire system of reports does any one report that the work has been done according to specifications, except by inference.

Q (By Col. Gillespie) These reports were simply measurements of the mattresses with the stones?

A That was what I understood them to be.

Q With no reference to the specifications at all?

A Yes sir.

Q For certain mattresses and certain cubic yards of stone?

A Yes sir.

Q (By Capt. Gillette) When you first came on the work, was there any necessity for inspectors in the mattress camps, the same as there was later on?

A There was not. When we were building those first mats, it was really not necessary. It would have been better but it was not so necessary as when we were building those large mats.

36 Q Capt. Gillette: The specifications called for fascines of a definite length?

A I think the size was anywhere from fifteen to one hundred feet.

Q Did they ever run smaller than fifteen feet?

A Not to my knowledge; I don't remember ever putting in less than fifteen feet.

Capt. Carter: When I first brought you down here, had you ever seen any work of this character?

A No sir.

Q Had you ever seen any fascines of this character?

A I have never seen any fascines.

Q What do you understand a fascine is?

A A Bundle of brush with the branches and leaves all trimmed off, as I understand it.

Q With the branches and leaves all trimmed off; when did you understand it that way?

A When I read your specifications.

Q When, how long ago?

A When I came back in 1888.

Q You so understood it then?

A Yes sir.

Q Have you ever been at the mattress camps?

37 A No sir.

Q So far as the building of fascines is concerned you had never seen it?

A No sir.

Q Have you had facilities for seeing how they were constructed and how they were choked in the mattress camps?

A No sir.

Q Have you had any facilities for determining the cost of the construction of those fascines?

A Yes sir, I have somewhat, when they were building those bundles of brush in the first instance at Brunswick.

Q Were you there long enough to make any estimates, would you consider yourself justified in determining the cost of the work in a mattress camp?

A I think I would, from the information I have got.

Q Where did you pick up such information?

A From the contractor's foreman and from men who have been in the camps.

Q Have you ever said to any one that the work that was being done was satisfactory?

A I dont know whether I have or not.

Q You dont remember that?

A No sir.

38 Q Have you ever said to anyone that it became necessary for the contractors to build better mattresses than were required by the specifications, otherwise they could not get them in; that the mattresses that were good enough for the contractors were good enough for the United States?

A I remember that somebody said you said so.

Q Did you ever say that?

A I dont think I ever did, unless I repeated what somebody else said.

Q Do you remember whether you ever did or did not say that?

A I dont remember every saying it, no sir.

Q You say that the inspectors were not as necessary in the mattress camps in the beginning as they are now?

A No sir.

Q How were the mattresses built in the beginning?

A Loose mattresses.

Q Where were the mattresses, in the water or in the air, where they could be seen?

A On barges where they could be seen.

Q In the beginning were they where they could be seen?

39 A They could be seen in the water.

Q Underneath the water, with brush on top of them?

A Yes sir, very often they would float high enough to see the ends of the logs.

Q You say that the bundles or brush were not choked but tied by hand?

A That is my belief.

Q Why do you believe that?

A On account of the general appearance of the bundles. They didnt have any appearance of being choked.

Col. Gillespie: You mean compressed?

A I mean being compressed with the choker.

Q So as to have smaller dimensions than they naturally would.

A Yes sir.

Capt. Carter:—You have seen blue prints of the form of choker devised to be used in the construction of those fascines?

A Not that I know of.

Q In some instances you recommend deductions in the mattress work?

A Yes sir.

Q Why did you recommend such deductions?

40 A What do you mean, in the large mattresses?

Q In the various mattresses, large and small.

A Well, in some instances the mattresses didnt come up to the instructions which you gave me to go by, and I recommend deductions for that reason. You gave me instructions that they should be a certain height, and when they did not come up to that height, I recommended deductions.

Q Any other instances?

A Possibly so. I dont remember. If you can cite an instance, I might say.

Q When the mattresses were a departure from a certain type of mattress, did you not order that a deduction should be recommended?

A Yes sir.

Q When a mattress did not come up to the standard, did you not recommend a deduction?

A Yes sir.

Q If it fell below it, you should recommend a deduction?

A Yes sir, a certain standard given to me by you.

Q Were not those fascines satisfactory to me?

A I suppose they must have been, or you would not
41 have approved them.

Q Do you know my reasons for constructing the mattresses as I did construct them?

A No sir.

Q Have I been in the habit of giving you my reasons for what I have done?

A Not always, sometimes.

Q You stated that you recommended that the amount of stone should be increased, because the work was not standing up properly?

A Yes sir.

Q Did I agree with you or not?

A I dont know.

Q Are you sure of that?

A I made a report to you—

Q Orally, in the office?

A You doubted the facts, it seemed to me that you doubted the fact that they were not standing up. I don't know whether you did or not, but it appeared to me that you did doubt it.

Q You say that it was in 1882 that I brought you down here?

A Yes sir, I think it was in 1882—that was in 42 Leavenworth, Kn.

Q Do you think that I would have brought you down here and put you on this work, if I had not had confidence that you would do what was right?

A I don't think that you would.

Q As a matter of fact, did I not rely absolutely on you when you told me anything?

A I think you did.

Q I relied upon you to tell me whether things were done properly or improperly?

A I suppose you did.

Col. Gillespie: Did you ever see any drawings of the mattress of the character that went into the work, or were you simply supplied with specifications?

A I was simply supplied with specifications.

Q You never saw a drawing of the type that you were to build?

A Not that I know of.

Capt. Carter: As a matter of fact, when you first came here, were not the tides troublesome to you?

A I never had been on tidal waters before.

Q Were you not taken down on the work and shown how the work should be done?

43 A Yes sir.

Q And the kind of work which I intended the specifications to cover?

A Yes sir.

Q Have you tried to carry out those instructions, or have you tried to make me believe that you tried to carry them out?

A That is exactly what I did. When you told me what was to be done, I did it. I was under your orders entirely.

Q Suppose you had been handed those specifications when you came down here, and you had not until then been on the

work, do you think you would have been competent to interpret them?

A I don't think I would.

Q Was it not considered universally by yourself and assistants that the kind of work which was desired was considered by me to be for the best interests of the service?

A Yes sir.

Col. Gillespie: Did Capt. Carter ever speak to you on that subject?

Capt. Carter: About the use of the mattresses or anything of that kind?

44 A Yes sir.

Q (By Capt. Carter) Did you not report that the mattresses, especially the Cockspur Island training wall, was filling in beautifully and suited the purpose admirably?

A I think so, and I think so yet. I think that the loose brush mat is preferable to the military fascine for filling in.

Q Have you ever seen a military fascine built in a mattress?

A Yes sir, since Capt. Gillette has taken charge.

Q Have you ever seen one before?

A No sir.

Q Those fascines do not come up to those military fascines?

A No sir.

Q Which do you consider is the fascine contained in the specifications?

A The fascines that are now being built are evidently what were intended by the specifications. There is no denying that.

Q As interpreted by whom?

A As interpreted by anybody. It calls for regular fascines.

45 Q What is a regular fascine?

A A bundle of brush that must be straight and well trimmed of branches and leaves, choked every two feet.

Q Trimmed of branches and leaves?

A Yes sir.

Q Would you with your experience put in the work fascines trimmed of all branches and leaves for the collection of this mud?

A Up in the upper river, I think not. I think the bundles of brush just as good.

A Dont you think a man framing a specification would frame it to get what he thought was best?

A Yes sir.

Col. Gillespie: I think you are confusing the witness.

Major Raymond: I think the question is pertinent.

Major Adams: Are the questions asked by Capt. Carter confusing you?

A No sir, I think I understand the case very clearly.

Major Adams: I would be glad to have the witness answer the questions put by Capt. Carter.

Capt. Carter: When you came here you were brought here, not because of your knowledge of the work, but because I
46 thought you were honest?

A I think you did.

Q Because I thought you would report the truth about matters?

A Yes sir.

Q Have I not again and again told you that if a contractor attempted to do anything improper, to let me know; have you not understood that you were put there to see to the interests of the government?

A Yes sir.

Q Do you not know, as a matter of fact, that if any contractor was attempt to approach any one, and I ascertained it, that man lost his place immediately?

A I could not say that?

Q Dont you know that?

A I could not say that, no sir.

Q Have you ever favored the contractor?

A In a certain sense of the word I have; in one sense of the word I think I have.

Q Have you not been instructed that under no circumstances should you be under any obligation or give favors to the contractors?

A I think when I first came here I was given instructions of that character.

47 Q Have those instructions ever been modified?

A I dont think they have.

Q If they had been, are you the kind of man who would have accepted service under circumstances of that kind?

A I never have accepted services from any contractor of any description whatever.

Q You say that you received orders when you first came here that under no circumstances were you to be under any

obligations, or show favors to the contractors; I asked you whether those orders had ever been modified, and you said they had not. If those orders had been modified and you had been instructed to do anything improper, would you have resigned, or would you have gone ahead doing the work?

A I would have gone ahead doing the work ordered. If I am working under somebody else, and he gives me an order, I am not responsible for that order. The one who gives the order is responsible.

Q You say that you received orders in the beginning that you should never under any circumstances allow contractors to do anything improper, and you say that you have never received any modifications of these instructions, I ask you if you are the sort of man that would continue in any employment if you were given instructions to do what was improper?

A If I received instructions, I would hold the man responsible who gave the order, I would not think that I was responsible for it.

Q Then you would do an improper thing?

Capt. Gillette:—I would like to know what you mean by "improper"?

Capt. Carter: Show favors to contractors.

Q Have I not told you at various times that the interests of the United States must be first protected, and that after that if a contractor could devise means to make money, he could do so?

A Yes sir.

Q That you could allow him anything so long as it didn't interfere with the interests of the United States?

A Yes sir, I received instructions that I was to be more liberal.

Q That you were to be more liberal, in what way?

A In regard to the height of the mat.

Q Did you not say that you received a certain height of mattress as a standard?

A Yes sir.

49 Q Did you not say that you conformed the height of the mattress to that standard?

A Yes sir, I did absolutely conform to that height. If the mattress didn't come up to the height deductions were made by me.

Q Do you mean to say that you—

A I mean to say that the last work was favorable to the

contractor. The way the fascines were built was favorable to the contractor.

Q That I am responsible for?

A You are responsible for it and not I.

Q What thickness was required by the specifications?

A Nine inches in diameter.

Q Whereabouts, at what point?

A Measured anywhere, the diameter of the fascine.

Q The diameter of the fascine varies, suppose it was choked to a diameter of nine inches, where would you measure it?

A I would measure it at the end.

Capt. Gillette: The specifications answer that question.

Capt. Carter: A fascine which is nine inches at the point at which it is choked must be how many inches larger?

A If the fascine was choked to nine inches, it would
50 not vary more than half an inch, if it was choked only two feet apart.

Q Have you ever known an inspector on the work to be reprimanded for accepting any favors from the contractors?

A Yes sir, I think I have.

Q Have you ever known of an inspector on the work who would have dared to let me know if he did accept any favors?

A I don't think he would care to have you know it.

Q Why?

A Because they knew that they would be reprimanded for it?

Capt. Gillette: Have you ever known of a case where Capt. Carter did know of it, where an inspector asked for favors of the contractor?

A Yes sir, I know one case.

Capt. Carter: What one?

A Mr. Hall.

Q What favor?

A Capt. Carter showed me a letter from Mr. Hall to Mr. Gaynor, stating that he wanted Mr. Gaynor to give him
\$75.00.

51 Q I showed you a letter to that effect and asked you about Mr. Hall.

A I wanted you to raise Mr. Hall's pay, and you thought Mr. Hall got enough pay.

Q He was inspector under you and you recommended an increase in his salary?

A Yes sir.

Q Didn't I ask you if you thought Mr. Hall was absolutely honest?

A I dont remember. After seeing that letter, I thought he ought not to be trusted.

Q Did you not say that you wanted to retain him on the work?

A I dont remember about that.

Capt. Gillette: You say you saw a letter from Mr. Hall, asking for \$75.00. Didn't you testify a moment ago that any inspector who accepted any favors from a contractor would be immediately reprimanded?

A It was very often done.

Q Did they discharge Mr. Hall or keep him?

A They kept him.

Q Do you know whether he reprimanded him or not?

A I don't know, I suppose he did.

52 Capt. Carter: Do you remember the dam between Marsh Island and Hutchison island?

A Yes sir.

Q Do you remember having any difficulty in connection with that?

A A Very serious difficulty.

Q Do you remember attempting to hide from your superior officer and cover up some work you had done there?

A No sir. I didn't attempt to cover up anything. I made a couple of mistakes there, but I didnt cover it up.

Q Do you remember having given certain instructions to a man while I was away, and when I came back denying that you gave those instructions?

A No sir. That closing dam of which you speak I attempted to close all at ance and the attempt was a failure. I didn't make any apology for it; I simply said I had made a mistake and ought not to have made the attempt.

Col. Gillespie: Coming back to the drawings; did you ever see, either in the hands of the inspectors, or any of the assistant engineers, or in the hands of the contractors anything in the shape of drawings representing the style of mattress
53 that was used?

A I heard of them, but I never saw them. I heard the draughtsman tell about making it.

Q In this office?

A Yes sir.

Q You never saw it in the hands of the inspectors or the engineers?

A Not that I remember of.

Q You never saw it yourself?

A It is barely possible that I have ever seen it, but I have not the slightest recollection of having seen it.

Major Raymond: You first entered the service of Capt. Carter in 1882?

A Yes sir.

Q Then you were out of his service and in again repeatedly?

A Yes sir, three different times.

Q Now you say in this letter to Capt. Gillette, this letter dated August 7, 1897, that in your opinion he has yielded to temptation, and probably allowed the contractors to do as they liked in exchange for their influence and power to "boost him along." When did you first become aware that Capt. Carter was showing favors to the contractors.

54 A I think it was the time that Mr. Brown was discharged, in 1889.

Q Subsequently, did you leave Capt. Carter's service, after 1899?

A Yes sir, I left in 1890.

Q Then you came back in what year?

A In 1893, two or three years afterwards.

Q When you came back, you came back, I understood you to say, on Capt. Carter's invitation?

A Yes sir.

Q Was there some correspondence between you and Capt. Carter in reference to your re-employment?

A He wrote me a letter asking me to come back.

Q And you answered it?

A Yes sir.

Q Did you write several letters on that subject?

A At that time I only wrote one.

Q Did you express any desire to come back again, or was it in conformity to Capt. Carter's wishes that you came again?

A He made a direct offer, that was in 1893. I was then serving as city engineer at Duluth.

55 Q You came back?

A Yes sir.

Q And yet you had every reason to believe that Capt. Carter was a dishonest man?

A I cant say that. Some cases looked suspicious.

Q You thought when you were in the service before that he was conniving with the contractors?

A There were some things that led me to suspect that possibly he was, but when I received that notice, I thought I must be mistaken, and that it was all right, and I must be wrong in my suspicions.

Q Your suspicions were not strong enough to justify you in arriving at a conclusion?

A No sir.

Q When you became satisfied Capt. Carter was doing this thing, you wrote this letter?

A I had not been here very long before I was convinced there was some understanding.

Q And yet you say in this letter, "The mischief is not serious." Dont you think the mischief is serious if an officer defrauds the government?

A Everything was accomplished that was expected to be done; it was simply a question of price.

56 Q Where did you work before coming into the service of Captain Carter in 1882, what experience did you have before that?

A I graduated from the University of Wisconsin in 1881.

Q In the engineering department?

A Yes sir. I first went to work with the American Bridge Company in Chicago, and I worked for them for about four months, when one of their patrons coming out from Mexico, said he wanted some drafting, and I went to Mexico and went to work on the Mexican National Railway, and stayed there for something less than a year. Then I came back North, and went to work with the Cleveland Car Works of Cleveland, Ohio. After that I went to work for the Nickle Plate Road and worked for it some time. About this time I saw an advertisement for a topographical engineer, and I answered it and got the position under Capt. Carter.

Q You never did any work on the Atlantic coast north of Savannah?

A No sir, my first experience in river and harbor work was in this department.

Q What reason have you to think that Capt. Carter did anything in favor of the contractors in exchange for their
57 influence and power to boost him along?

A Well, just that in the building of those mats.

Q In what way have the contractors boosted him along?

A I suppose by their influence in Washington.

Q Do you know any way in which Capt. Carter has been

“boosted” along different from that in which every officer is “boosted” along?

A I suppose by getting that appointment.

Q What “boosting” he had got from the contractors you dont know?

A No sir, I dont know.

Q What “boosting” do you think he has got?

A I suppose they might have helped him get appointed on the Nicaragua Canal Commission.

Q You think that’s a good thing to have?

A I suppose so.

What reason have you to think that, any other reason except your own notion; have you any reason to suppose that they helped him get that appointment?

A No, except that I know that he was worked along getting appropriations.

Q You have no reason whatever except your own notion?

A No sir, just inference.

Q Have you any reason to believe that Capt. Carter ever received any consideration, pecuniary or otherwise, from those contractors, or any contractors?

A No, excepting that the general tendency of everything would seem to indicate that.

Q What do you mean by that “except the general tendency of everything?”

A Nothing except the general current of things.

Q Your letter seems to insinuate these things and I want to know on what grounds you make the insinuation?

A There is no direct thing that anybody can say, there is just simply the fact of the character of the work.

Q Was there anything outside of the character of the work that impressed your mind with that idea?

A I know that Capt. Carter and Capt. Green were very friendly. I know that there were a good many favors shown on their contract, and the other contractors were held rigidly to the specifications, and that would naturally lead me to suppose that there possibly was favoritism.

Q That is the only basis you have for making this assertion?

A Then those contracts were usually drawn up in such a way as to be more favorable for those men to bid than anybody else. Contracts were often arranged, you might say, especially for their benefit.

Q In what way?

A Take for instance, the Brunswick or the Darien work in 1893 or 1894, I dont remember which, and there is a clause in the specifications which says that the piles were to be from two to eight feet apart, and that the depth of the water was from six to twenty-five feet. No contractor who did not have inside information could bid on that.

Capt. Carter: Is not that true that the water at Darien is six to twenty-five feet deep?

A On that contract no piles were driven in 25 feet of water.

Q Do you know anything about it?

A I had charge of it.

Q Between what depths did they run?

A From about eighteen to six feet.

Q They did not run less than six feet?

A There were some driven when there was no water at low tide.

Q They ran from nothing to how many feet?

A About eighteen feet.

60 Q What was the rise of tide?

A I am speaking now about the depth below mean low water.

Q What was the rise of tide?

A Seven and a half feet.

Q Eighteen feet at low water would make how much at high water?

A About twenty-five feet.

Q Did not every contractor who came here have access to all the records in the office that he wanted?

A No sir, not that I know of. Everybody in the office was instructed not to give them information.

Q Do you know of any case where a contractor came to me and wanted to know about the work where he didn't get every information concerning it?

A Yes sir.

Q Who?

A Mr. Hancock.

Q Who told you?

A Mr. Hancock.

Q In what way did he not get information?

A He came here to get information to bid on this break-water, and he didnt get what he wanted.

61 Q What did he want?

A He asked for specifications.

Q Where did you get that information?

A Mr. Hancock told me.

Q You know it simply from Mr. Hancock?

A Yes sir.

Q You say that Mr. Hancock did not get the information he desired?

A He came up and asked for the specifications, and you didnt want to give them to him.

Q Was there anything else that he asked to see, any of the plans of the work or annual reports?

A I dont know whether he did or not.

Q What you do know is simply what Mr. Hancock told you, that he could not get papers to bid on the work?

A Yes sir, and that you had discouraged him by the general way in which you talked about the bidding.

Q Anything else?

A That you told him that he would have to have a plant of \$100,000.00 to do the work with.

Q This is the information I gave him concerning his work?

A Yes sir.

62 Q Then you simply state that he could not get papers to bid on the work and that he was discouraged?

A Yes sir.

Q Anything else?

A No. Not that I know of.

Q Do you know anything except what somebody told you?

A No sir, not about that.

Q Do you know anything about anybody else?

A Yes sir.

Q What?

A What do you want?

Q You say that the contracts were drawn so as to be more favorable to the Atlantic Contracting Company than to other bidders?

A Because they have inside information. Take the rock question on the breakwater, they prohibit Florida rock.

Q Were they not drawn up for the express purpose of bringing in Florida rock; have you not reported that Florida rock was the best?

A No sir, I did not.

Col. Gillespie: What clause in the specifications prohibits Florida rock?

A There is a clause in the specifications which says
63 that the rock shall weigh one hundred and fifty pounds
a cubic foot, and Florida rock wont average more than
one hundred and twenty.

Capt. Carter: First you said that the depth of twenty-
five feet was not correct and afterwards you said it was cor-
rect? Was not the depth of the water ascertainable by
everybody?

A It was not practicable for everybody who went down
there to make a survey.

Q Couldnt he come to the office?

A That wouldnt do him any good. I remember one in-
stance where a man came to the office and went to Mr. Giesler
to get information, and Mr. Giesler was not allowed to give
it to him.

Q Who was that man?

A A man from Major Adams' office.

Q When?

A Just before the date of the letting of the Darien con-
tract.

Major Adams: You say he was from my office?

A I don't remember his name, Mr. Giesler told me his
name, but I have forgotten it. He was formerly assistant
engineer, under Major Adams.

64 GIESLER, called:

Capt. Carter: Mr. Giesler, evidence has been given here
by Mr. Cooper that before the opening of the bids in 1895,
for Darien harbor, some one came here from Major Adams'
office and asked for certain information which you would
not give him; do you remember that man's name?

A That must be a mistake.

Mr. Cooper: You told me his name yesterday.

A You mean from the former Chief of Engineer's office,
Col. Craighill's; I think the man's name was Bourguin?

Capt. Carter: What did he come to you for?

A For the Darien specifications. You came in while I
was speaking to him. He was asking for certain information
which I could not give him, and while we were speaking about
the matter, you came in, and he went away with you. I

suppose you talked the matter over with him. He asked me several questions about dark points in the specifications which he could not understand, and in regard to which I could not give him any information.

Q Because you didn't know the facts, or because you were not allowed?

A Because I did not know them. One of the doubtful
65 points was the piles. You remember that they were to be anywhere from two to eight feet apart, and he wanted to know how far they were to be apart, and of course, I could not tell him.

A. S. COOPER (Continued)

Capt. Carter: What other reason have you for saying that those specifications were drawn up in such a way as to give the Atlantic Contracting Company an advantage over other people?

A That is my belief.

Q Why do you believe it?

A From what I saw and observed.

Q What have you seen and observed?

A. Those men always got inside information that other people couldn't get.

Q What inside information?

A In regard to the work and how it was going to be done. You asked me for a case and I gave you a case.

Q You mean the Florida rock? Do you know that the Atlantic Contracting Company knew that Florida rock was to be used, and that other people knew that it was not to be used, and that other people knew that it was not to be used or understood that it was not to be used.

66 A I don't know what other people understood.

Q If no distinction was made, how could they have an advantage over other people; you must have some reason for thinking that they had inside information. What reason have you for thinking that?

A Because the Florida rock was allowed, and according to those specifications, it should not be allowed. If you had wanted to, you could have ruled out Florida rock on those specifications.

Q Did I rule out Florida rock?

A No sir.

Q Then in what way did the Atlantic Contracting Company have any advantage that other people didn't have?

A Because they knew it before.

Q Do you know that other people didn't know?

A I don't know what other people knew.

Q You say that they had an advantage over other people?

A Because the Florida rock could have been absolutely ruled out by those specifications.

Col. Gillespie: Is Florida rock considered a cheap rock?

A Yes sir.

Q Is it easier quarried?

67 A The quarries were near at hand and it was easier quarried.

Q What was the next cheapest stone that could be got?

A Georgia granite.

Q How could that be delivered?

A By rail.

Capt. Gillette: It is all delivered by rail.

Capt. Carter: In what other way was the Atlantic Contracting Company favored by drawing up the contracts?

A According to my idea they had been favored, by being allowed to do things that they ought not to have been allowed.

Q In what way were they given favors over other contractors?

A By getting inside information.

Q What inside information?

A All the facts about the work they were doing, exactly what was going to be done, which other people, I believe, didn't have.

Q Why do you believe this?—you don't believe it without some reason?

A I know the one instance of this man who came here to get information and could not get it.

68 Q Any other reason?

A No.

Q If you know of any other reason, I want to know it all?

A The bids always appeared arranged.

Q Why, what do you mean?

A The figures show it. They were too close to have been honest, square bids. They could not have been honest, square bids.

Q Is that necessarily true?

A I dont know how it could be otherwise, if they bid within a few cents of one another.

Q You never knew contractors to do that?

A Not so close as that. One man always got the work. The result has always been the same.

Q In what way does that show that these men had any advantage?

A There were half a dozen different contractors bidding, the figures were always within a few cents of each other, and the Gaynors always got the contract.

Q (By Col. Gillespie) Were those contracts always in the same name?

A Not always. Sometimes they were in the name
69 of of the foreman, sometimes in the name of John F.

Gaynor, sometimes in the name of Green & Gaynor, and sometimes in the name of the Atlantic Contracting Company.

Q Those various contractors always used the same identical point, indicating that they were same company?

A They always used the same plant, or they used what was left of it.

Q They practically used the same plant?

A They practically used the same plant. I can't prove that there was any understanding between Capt. Carter and Capt. Green, all I can say is that I believe it.

Q Because the figures always ran right along close to one another?

A Yes sir.

Q You say that showed that the contractors had inside information?

A If it didn't show that, it showed that they had everything arranged with the other bidders, or the other contractors.

Q Assuming that that is true, how does that show that they had any inside information?

A That dont show it.

70 Capt. Carter: What does show it?

A I can tell you another reason, Mr. Connolly, who got his position through Green & Gaynor, as I understand it—

Q. Who told you that?

A I dont know. Mr. Connolly drew up the papers for the Atlantic Contracting Company, he always drew them up. Anything they wanted out of this office, they would go to Mr.

Connolly for, and Mr. Connolly didn't give any information to anybody else.

Col. Gillespie: What do you mean by "drew up the papers."

A Drew up the bids.

Capt. Carter: Connolly drew up the bids for the Atlantic Contracting Company?

A He did, and he told me he did.

Q How long ago did Mr. Connolly tell you that?

A About two years ago.

Q (By Col. Gillespie) Dont you know that the regulations positively prohibit that?

A Yes sir, I do.

Q You knew that and didn't report it?

A Yes sir.

Q You say that Mr. Connolly got his place through Mr. Gaynor?

71 A I can't tell you exactly who told me that, whether it was Mr. Gaynor or whether Mr. Connolly told me himself.

Capt. Gillette: You got it through Mr. Green or Mr. Gaynor?

A Through Mr. Gaynor—I think Mr. Connolly told me himself.

Col. Gillespie: Mr. Gaynor being a contractor at that time?

A Yes sir.

Capt. Carter: I advertised for a typewriter, and got the names of various people who submitted samples of their writing, and this man was hired in that way.

Q (By Capt. Carter) What other reason have you for thinking that they had inside information?

A That is the reason I believe that they had inside information. Mr. Connolly gave it to them. I know he did in some instances. He told me he did.

Q Information of what kind?

A About the work, as to what was to be done.

Q What did Mr. Connolly know as to what was to be done?

A I dont know. That is for him to answer and not me.

Q Is there anything else, any other reason for your belief; I want to get at them all?

A I can't give them all.

72 Q If you thought this sort of thing was going on, why didn't you come and tell your superior officer?

A I didn't think it would do me any good to tell them.

Q You didn't make the plans for this work?

A No sir.

Q Were you anything but practically an inspector?

A I had charge of the construction work.

Q In what way?

A I put in the work.

Q You were ordered to place a dam in a certain place and in a certain way?

A And I built the work.

Q You saw that the contractor built it that way?

A Yes sir.

Q Had you anything to do with the formulation of the plan, with the obtaining of the result, or with the planning as to how the work should be done, were not orders always given you as to how you should do it from the office?

A They were.

Q What do you mean by saying that you did the "bulk of the work" yourself, as you say in your letter?

A I mean the construction work.

73 Q You were ordered to do it and you did it as you were ordered?

A I built it.

Major Adams: You built it or the contractors built it?

A On the construction work I can come pretty near to saying that I did it myself.

Major Raymond: Then you are responsible for it?

A No sir the idea is this. The material was sent down there, and the contractors had a foreman there; what I mean is this that I did considerable head work, the planning as to how his plant should be arranged to the best advantage he did; I didn't mean that I had charge of the work in that sense.

Major Adams: Were you at any time working for the contractors?

A Not in that sense. I helped him a good deal in planning the work.

Q At his request?

A No sir.

Q Did you get any compensation for it?

A No sir.

Q Were you sent there for that purpose?

A No sir. I went there to do the work, that is to
74 the engineering work. What I mean to say is that in
the execution of the work, the foreman was a man of not
much ability, and a man who made a great many mistakes,
and I would see his mistakes and rectify them; I would
aid him by telling him that he could do it better by doing
it so and so.

Col. Gillespie: Was the contractor represented on the
work by an ignorant man?

A I dont know that I could say that he was an ignorant
man. His ability was not very high.

Q What was his name?

A Well sir, he is a cousin of the contractor; his name is
John Gaynor.

Q He is not interested in the contracts?

A No sir.

Q Was any other relation of the contractors on the work,
either at the camps or on the work?

A I dont know what relations Edward Gaynor had—he
was the Treasurer of the Company.

Q Where did he habitually reside?

A In Savannah.

Q How frequently was he on the work?

A I very seldom saw him on the river.

Q John Gaynor was the only Gaynor on the work?

75 A He was foreman in charge of putting the work in.

What I said was that a good deal of that work I oversaw
myself, that is I helped him in order to facilitate the work,
and get the work done that much quicker.

Capt. Gillette: So in the execution of that work, as As-
sistant Engineer for the government, you gave them any
assistance they needed?

A I did.

Q Why did you do so?

A To help the work along.

Q Ought not the contracts to have had men there to
do the work that you did?

A Yes sir.

Major Raymond: Is it not the custom in every engineer's
office for the assistant engineer to have instructions to aid
the contractor in every way possible?

A I dont know.

Capt. Carter: Did not the contractors always have men whom he considered responsible, in charge of the various portions of the work?

A Yes sir, he did.

Q You considered, however, that his ability was not up to the standard, and he accepted your advice?

76 A I believe he did, at least, they adopted my suggestions in almost every case.

Q Then this work was carried out according to your suggestions?

A In the method of putting it in, it largely was; there is no doubt of that.

Q Did the contractor have any representative at any other place on the river, was this the only man they had, this man, John Gaynor, didn't they have a lot of other foremen?

A Yes sir.

Q You say that you think my position on the Nicaragua Canal Commission was due to the influence of the contractors; what else have they done to "boost" me along?

A I don't know that they have done anything.

Q You say "he has yielded to temptation?"

A That is my belief.

Q And probably allowed the contractors to do so and so; what other way do you believe they tried to "boost" me along?

A By their influence at Washington.

Q In what way?

A I couldn't say.

77 Q If you think they "boosted" me along, they must have "boosted" me along in some way, you mentioned the Nicaragua Canal Commission, can you think of any other way?

A I suppose the appointment to London, probably.

Q Do you know that they had anything to do with it?

A No, I just think so.

78 PAUL E. TWIGGS called by Capt. Gillette, testified as follows:

Q (By Capt. Gillette) Tell approximately the date of your first employment under Capt. Carter in this district and the history of it, giving dates?

A I dont know that I can give the exact dates; I came over here, I think, in March, 1892, if I am not mistaken.

Q From where?

A From Georgetown, S. C. I had been employed in the government service there under Capt. Bixby. I came over here some time after that to get employment from Capt. Carter. At the time I came over he had nothing for me to do, and I went home; and shortly, perhaps a month or a month and a half, afterwards, he wired me to come here.

Q Have you been employed off and on ever since?

A Yes sir; ever since I came over here I have been in Capt. Carter's employ.

Q Have you been inspector for using the mattresses under Capt. Carter?

A Yes sir.

Q In the Savannah river?

A Yes sir.

Q Were you furnished a copy of the specifications?

79 A Yes sir.

Q Were the instructions carried out in the construction of the fascines used in the mattresses?

A Under certain circumstances they were, and under certain circumstances they were not. I will state what I mean:—I had the specifications and I understood them. There was a clause in the specifications which I noticed very particularly and called Capt. Gillette's attention to it. That was that the material used in the construction should be satisfactory to the engineer in charge. I will state that I based my building and used the mats upon that clause in the specifications.

Q Was the mattress constructed in accordance with either of the three designs described in the specifications?

A Leaving that clause out?

Q I asked you if it was like any of the three designs described in specifications;—were the mattresses built according to any of them?

A No sir.

Q What one did they come nearest resembling?

A The third.

Q In what way did they differ from the third?

A As I understand the construction and making of
80 fascines, as I have been instructed,—if I am allowed to
bring this in,—in Georgetown and according to the specifications, which are very much alike, they should be constructed out of brush, choked down to nine inches. I think the specifications called for “approved” chokers, and choked to nine inches. I think these specifications called for tarred rope, and we used annealed wire. Those fascines that we made over there were military fascines, and the brush was trimmed up.

Q (By Major Raymond) That was at Georgetown, under Capt. Bixby?

A Yes sir; I was then there. These fascines were not choked, or if they were choked, they were certainly choked very light. The material used in tying was simply yarn rope, I should say,—I don’t know what else to call it; a single strand of rope yarn, varying in distance from two sometimes three and sometimes three and a half feet apart.

Q In this Savannah river?

A Yes sir, in the construction of those fascines; that is my opinion; that is what I say.

Q (By Capt. Gillette) Were the bands sufficiently tight?

A No sir; they were very loose.

Q Could you have pulled them off without untying them?

81 A If everything had been trimmed up, so that there were no branches or limbs that projected, you could have slipped them off.

Q Without much trouble?

A Yes sir.

Q What were Capt. Carter’s instructions to you as to how the fascines and mattresses should be built?

A I don’t know that Capt. Carter gave me any instructions in regard to the building of the fascines and mats. Capt. Carter came on to the work about two or three times a week, and I claim that I built or saw that the fascines were built and mattresses constructed according to Capt. Carter’s wishes.

Q Did he ever tell you in words what kind of fascines he wanted or did not want?

A He told me when I took charge of the work, that the fascines were not to be military fascines.

Q Did they fulfill the conditions of the contract, and were they made, in your opinion, as they should be?

A I don't know; I presumed they were all right, as Capt. Carter had seen them as much as I had or more, as he was here longer than I was. They satisfied him, and they were therefore, satisfactory to me.

82 Q Did he give you any instructions as to being rigid or otherwise with the contractors?

A When Capt. Carter came and removed me from the dredge to take charge of the jetty work at the lower flats training wall, he told me in taking charge, that the fascines were not to be military fascines, and that he did not wish the contractors pressed: I think that was the word,—“Pressed”—I won't be positive, but something to that effect.

Q How long were the fascines as you saw them used?

A The fascines were usually floated down on an ordinary lighter.

Q Not made into mattresses?

A The fascines were made into mattresses and floated down in the same way. The lighters, I should say, ranged from eighteen to twenty-two feet, and they were placed cross-ways on those lighters.

Q In carrying those fascines, how many men did it take?

Q How do you mean?

Q Could one man pick up a fascine and put it in place?

A No sir; not well.

83 Q It was too heavy?

A It seemed too heavy. It would take two or three, and I have seen four men take hold of a fascine.

Q They were flexible?

A Yes sir.

Q What kind of material was used in them?

A There were a good many pine tops, good many oak brushes, sassafras bushes, myrtle, gum bushes;—I have seen all of them.

Q Suppose you wanted to take a fascine and wanted to pull it in two in the middle, how many men would it take on each end, in your estimation?

A One. I could have taken two men, one on each end, and if they pulled pretty hard, they could have pulled it in two. I never tried it, and I don't like to say positively that it could be done, but that is my judgment.

Q Did you ever try to walk across the top of an eight or ten course mattress on the barge?

A Yes sir; on one occasion.

Q Did you sink into it?

A Yes sir; I sank down over my head; I had to climb to get out.

Q You went clear through it?

84 A I may have done so; I had to reach up, this way, over my head (indicating) so I suppose I sank over seven or eight feet until I struck on a hard substance; I cannot say whether it was the top of the lighter or not. The lighters are all covered with brush and leaves. I did fall through one and that was the way it happened.

Q (By Capt Carter) Did you ever find a mattress in which you thought there was more material put into it than was required by the specifications, and recommended an increased allowance?

A Yes sir.

Q Was it allowed?

A Not that time, sir.

Q The instructions given you then were, were they not? to do all you could while there to see that the interests of the United States were protected, and in doing so, if you could give any assistance to the contractor in a legitimate way, to help him facilitate his work, you could do so?

A Yes sir.

Q Your first duty was to look out for the United States, and then afterwards, if consistent with your duty, you could give any facilities to the contractor that were proper?

A I think that is right, sir.

Q You carried out these instructions to the best of your knowledge and ability?

A Yes sir; I did it according to the way I thought you wanted it done.

Q You say that the fascines built by me were not the same as those built by other officers?

A No sir; because the fascines at Georgetown were military fascines.

Q Do you remember a case of this kind?—do you remember that there was a certain amount of work being done at the closing dam here between Marsh island and Hutchinson island, under the supervision of Assistant Engineer, A. S. Cooper, where the mattress work did not come down to the bottom, and an attempt was made to hide it from me?

A I remember the circumstances which you relate, but not exactly as you state it.

Q I may be mistaken as to the details?

A I will state what it was as I remember it. I was on the Tomachichi dredge, near the Central Railroad, and Mr. Cooper was in charge of the jetty work, and intended to close the spur running around Marsh Island. He attempted to do that by having, eight, ten and twelve very heavy mats, some of them ranging twelve courses, and some of them ten or twelve feet. He used those mats, or he attempted to use them. I think that one mat got away and floated up river, and another mat slewed, or in other words, went out of line six, eight or ten feet;—this is approximately only,—The mats, as I say, were mats that were very heavy. A few days after that Mr. Cooper came up to my dredge, and gave me instructions to go to Marsh Island and dig him some mud and Marsh grass, to be placed on the upper side of Marsh island closing dam; I do not remember for what purpose, but I know he gave me instructions to take my dredge to the edge of Marsh island, on this side of the island, and dig him some marsh mud and marsh grass, He told me if I could not get mud on the edge of the island, to go into the island until I did get it, as he must have it. Those were my instructions, and in pursuance of them the dredge was taken to the edge of Marsh island, and after I dug up one dipperful, I found that there was sand there, and I had to turn the dredge square onto the island, and I dug in seventy-five feet, or perhaps not that much,—maybe a little more. Mr. Cooper came up while I was in the island, digging the mud, and to use his own language, he said, “That is the very stuff I want.” He then told me to take the dredge back and put it on the work again. I heard nothing about it any more until Capt. Carter’s return,—he was away at the time,—when I received a letter from him; it might have been ten days afterwards, maybe longer than that,—relieving me and placing Capt. Cunard in my place. Capt. Cunard came down and told me there was a letter in the office for me, and I had better go up and see about it. I came up to the office and Mr. Sterly handed me the letter, or read it to me, and I did not understand it at all; I went in and saw Capt. Carter and asked him what it was about. I said,—“What does it mean? I don’t understand it.” He said, “There are very grave charges against you.” I said, “I am at the first of it, Capt. Carter, I don’t know what it means.” And he told

me that I was charged with disobedience of orders in digging in Marsh island without instructions, or something to that effect. That was the gist of the charges for disobedience of orders. I was very indignant; I had been discharged, and I suppose I lost my temper and told Capt. Carter that Mr. Cooper lied, and I don't take that back yet. Gentlemen, he did lie. Capt. Carter became indignant and reproved me
 88 for stating that Mr. Cooper had lied. I then demanded, or asked Capt. Carter for an investigation, and told him I thought I was entitled to it or something to that effect. Finally he said that he would have Mr. Cooper in the office the following morning. Mr. Cooper did not come; I guess he knew better and did not want to come, and Capt. Carter said that Mr. Cooper was so busy down the river that he could not get off. Capt. Carter placed me back on the work without any investigation whatever. He simply told me to meet him on the Angler, and he carried me to No. 1 dredge. Mr. Mays was the inspector of that dredge. That is all I can say in regard to that matter, as I remember the circumstances now.

Captain Carter:—Mr. Cooper explained to me that he thought he had made a mistake, and I put Mr. Twiggs back on the work.

MR. GIESLER, called by Capt. Gillette, testified as follows:—

Q Will you give me an estimate of the cost of building a mattress according to each of the three designs in the specifications, and according to the eight courses combined,—such as are put in the Savannah harbor?

A I have made such an estimate at your direction and
 89 I have it in my hand now. The cost of building an eight course mat, such as are put in the harbor, I estimate at \$382.40; and I estimate making a mat of the same superficial area, according to the first design, at \$347.87.

Q (By Col. Gillespie): That is one layer?

A The eight course mattress consists of eight layers; the second estimate is for one layer.

Q Then the full mat will be eight times that?

A Yes sir; with the exception of some items;—for in-

stance,—the item of towing, which is quite a considerable item. A mattress built according to the second design I estimate would cost \$201.81.

Q For a single mattress?

A Yes sir, according to the specifications.

Q You estimate the first design at \$348.00 in round numbers for a single course mattress,—the second design, single course, \$202.00;—the third design \$187.00, but you estimate that the eight course mat as put in, cost \$382.00—

(The Commission is questioning the witness from a paper, said to have been made by him)

No answer.

Q (By Major Adams) What was the contractor's price?

A (Capt Gillette) \$1.10 per square yard at Cumberland Sound; the cost is about \$3,600.

Q (Major Adams) Have you figured out the price as paid for one eight course mat?

A About \$3,600.

Q What would the Government have to pay for the first design built according to specifications?

A About \$450.00.

Q For a complete eight course mattress?

A No sir.

Q Would it have to be multiplied by eight?

A Yes sir.

Q (Capt. Gillette) Are you familiar with the state of the breakwater out there?

A Yes sir; I have been out there and made a survey out there.

Q Do you know the date upon which the estimate for the original breakwater was made?—do you know the survey on which it was made?

A I think it was made in 1895.

Q That is the survey upon which the estimates were based?

A Yes sir.

Q Has there been any survey made since then?

91 A None; with the exception of one Mr. Cooper made in last February.

Q Between those two dates was any survey or examination made by any one connected with the office, as far as you know?

A No sir.

Q Were there any soundings taken by any one connected with the office, as far as you know?

A No sir; only those soundings that were taken by Mr. Cooper.

Q Between those two dates—I have mentioned?

A No; there was no examination that I know of.

Q Could any examination have been made without your knowledge?

A I don't think so.

Q Have you investigated the matter of cutting off Hutchison island?

A I have at your direction, seen a number of those who own the property.

Q You made this drawing which I now show you in connection therewith?

A Yes sir.

Q This shows the property and the ownership?

92 A That was the best I could get; it is not absolutely correct, but it is not very far from the truth.

Q Did anybody demand any excessive rents during the existence of the contract of 1892, known as the "big contract?"

A No sir. The only people that I have not seen in connection with that are E. A. Smith and the Kinzie heirs. The Kinzie estate—and in regard to that I saw somebody who knew about it, and I am really only in doubt in my mind about E. A. Smith.

Q With the possible exception then of E. A. Smith, nobody demanded an excessive rent?

A I don't say that exactly. I believe that the owners of the ship yard at one time demanded quite a considerable rent. The question that was given me to investigate was whether any body had bought any land with a view to demanding such excessive rent.

Q Did you find anything to indicate that?

A I found nothing to indicate that.

Q (By Major Raymond) About that Savannah harbor breakwater,—were two sets of soundings made there?

A Those two sets are right before you now.

Q Were the soundings made by the wharf surveyor or any engineering officer there and recorded in the office,
93 taken at any time previous to that?

A I can only answer that in one way;—with the ex-

ception of those before you, there is nothing in the office that I know of.

Q There might have been a coast survey map?

A Yes sir; there was undoubtedly a coast survey map.

Q So that Capt. Carter speaking of new soundings, might refer to the more recent set of soundings?

A On the part of the coast survey?

Q He might have referred to those as new soundings; he may have drawn his opinion from them?

A Undoubtedly there were some coast survey soundings; but when they were made I don't know.

(Major Adams) I want to find out whether the reference to new soundings might not refer to something besides soundings made by this office.

(Capt. Gillette) I can only find what you have here, and nothing else to base such a statement on.

Q (Capt. Carter) Do you recollect the failure to cut off a portion of Hutchison island training wall?—do you know what investigation was made by me concerning the resistance I would encounter in cutting that off, if I had tried to do so?

94 A I know nothing more about it beyond what I recently read in a certain letter referring to the subject.

Q I did not talk it over with you afterwards?

A No sir; you have never spoken to me about the matter.

Q Only from an engineering point of view?

A Yes sir; not from the other points at all.

A. G. HANCOCK called by Capt. Carter:

Q In reference to your proposed bid for the work here, the question has come up that I did not give you any information about the work when you came to me?

A That was a mistake; on the contrary, I got plans and specifications, and I got information, but it seemed to me that the information was peculiar: I never said that I did not get any information.

Q Did you not come to get plans and specifications for the work, and did I not go over them with you, and when you asked me about the work, did I not give you all the information I could, and tell you it would take a lot of money, and

you should look into the matter thoroughly, and that you should go down to Cumberland Sound and look over the proposed work?

95 A The chief thing I remember you told me was that the plant would cost \$400,000.00.

Q Tell us exactly what I said?

A I certainly understood you to say that the plant would cost \$400,000, but I expected to bid for the work for my own concern—

Major Raymond:—What was your own concern?

A McAlpin & Schley. We made an alliance with people up the country, and we expected to bid for the work. I came up to Capt. Carter to apply for the papers, and my recollection is that he gave me one copy of the papers, and told me he would furnish me with the other part after I had looked over the ground. Then he went on talking to me about the character of the work, its difficulties, telling me how hard it was, and asking me to go down there and look at the work myself. I think he told me that he warned people not to bid unadvisedly; that is my idea, but I am quite clear about that \$400,000.00 plant. I have always felt that that was a very high price for the plant for that work.

Q (By Col. Gillespie) What effect did this have upon you?

A I don't know that; I can't say, but I didn't like it.

Q You didn't like it?

96 A I didn't like the statement as to the plant costing \$400,000.00.

Q Might you not have mistaken Capt. Carter as to the amount?

A I had quite a long interview with Capt. Carter, and I discussed it with my principals when I went back to them. I am clear that there was not any mistake about those figures, because I went right back to them and talked about the interview. Naturally I was careful to listen to what he said, because it was my business to do so. We immediately investigated the matter of the cost of the plant, and could not see where it was at all necessary to spend that much money on the plant; so that I think if there was any mistake about it, that mistake was not mine.

Q (By Major Adams) You estimated the cost of the plant necessary to carry on the work?

A I think my people did figure it out; that was gone into by my people; it was done apart from me.

Q What was that estimate?

A As to the plant, I never heard them say. We made our estimate on the basis of rents and charter of plant, not on buying it.

97 Q (By Capt. Gillette) Do you know what was the value of the plant the contractors are actually using at Cumberland sound?

A Not a thing, sir.

Capt. Carter:—I remember very distinctly the interview with Mr. Hancock. I think he must be mistaken about the value of the plant. I think I can refresh his memory as to exactly what was said. I think it was in discussing the plant that I told you it was quite possible—we talked quite a good deal about a good many things, and I wanted to give you all the information I could, as it was a new experience with you. I did not want any man to go down there and make a failure, for his own sake and my own. I do not remember the statement about the cost being \$400,000.00. I remember I talked to him and may have said to him that to carry on this work would take a large amount of money, perhaps \$300,000.00 or \$400,000. or perhaps up to a million dollars. There was no money appropriated at that time except \$5,000. and he might have to borrow money for a year so as to go ahead with the work, and I may have said to him that he might have to incur an expense running from \$300,000. or \$400,000. up to a million: I remember using the word "million." I may

have said to him that it would require an enormous
98 amount of money, beyond the plant, to do that work.

Q (By Col. Gillespie) Do you remember what Capt. Carter says?

A I remember the discussion of the difficulties of the work at Cumberland sound. I know we discussed it, but it is pretty hard to recall the exact words in which everything was said; but what fortifies me in the idea that I am right is that I went and immediately discussed it with my principles.

Q You never did any work requiring such a plant?

A No sir.

Q At that time you were not familiar with the material and plant required to carry on that work?

A Only in a general way.

Q (By Major Adams: Did you put in any bid for the work?

A No sir.

A Why not?

A Our preparations for bidding began very close to the time the bids should be put in, and we did not feel that we were in a position to put it in with such little preparation as we had to get up figures. If we had had a few days longer we might have done it. My recollection is that the people associated with us only came here three or four 99 days before the letting of the work, and they were unfamiliar with that kind of work. The reason we entered into the business at all was because they knew I had a lot of experience down on the seaboard, and was familiar with the local conditions. We did not have time to go into the matter fully,—we did not have time to get ready and we felt that it was not a good business proposition for us to bid.

Q (By Major Raymond) Who were the people whom you represented?

A Venable Bros., who are now constructing the work at Tybee.

Afternoon Session:—

Present;—

Members of the commission,
Capt. Gillette,
Capt. Carter
and the stenographer.

A. S. COOPER recalled by Capt. Carter.

Q (By Capt. Carter) You said that Mr. Hancock told you that he had been unable to get certain information?

A Yes sir.

Q When did he tell you that?

100 A About a month ago.

Q Can't you state when a little more definitely than that?

A No sir; I can't. It was at Tybee; I think it was about a month ago; it was not over a month ago.

E. R. CONANT called by Capt. Gillette, testified as follows:—

Q Have you been employed as inspector of government work by Capt. Carter in this district?

A Yes sir.

Q Where were the works you were employed on?

A The first work was a small contract at Jekyl creek.

Q What was the next?

A The next was at Augusta.

Q What was the next?

A The next was inspector on the dredge work in the Savannah harbor; the next at Augusta, Ga; the next dredge work on Savannah harbor; the next was at Fernandina, Fla.

Q When you went to Augusta, Ga., who was the contractor having the contract?

A A. J. Twiggs.

Q Were you given instructions by Capt. Carter as to carrying out the specifications?

A Yes sir.

Q Are there fascines prescribed in those specifications?

A Yes sir.

Q Did you built them according to specifications?

A Yes sir.

Q What were your general instructions as to carrying out the specifications?

A I was given instructions to carry out the specifications in the work, that they should be carefully carried out, that it was a work of importance, that the previous work that had been done on the harbor in Savannah river had not held up after a heavy freshet, and that the present contract was desired to be carried out in such a manner as to have the work stand any freshet, and to built it in the best possible manner consistent with the specifications.

Q Did you do that?

A Yes sir.

Q Did the contractor object?

A The contractor did object to carrying out a certain part of the work.

Q Was the contractor there considered a capable and honest man?

A I do not consider that that contractor took hold of the work with the determination that he should have, and

with the right motive. I don't want to say that he was dishonest, but I don't think he took hold of it as any contractor should.

Q How did the work that he did compare with previous work done in the same vicinity by other contractors?

A Most of the work that had been previously done was more or less damaged, so that I could see only a part of it.

Q How did the part you saw compare with the work you would call the attention of the contractor to?

A I think that the work that I left was done better than a part of the work I saw.

Q Did you see any fascines on the work?

A The fascines were badly made, but I could see some portions of brush of what had been fascines, but there was nothing to show their form; it was simply brush.

Q Were there no remnants of the ties?

A There was nothing of the ties left.

Q What material did you use for the bands, for tying the fascines together with?

A Both wire and rope.

103 Q (By Col. Gillespie) How long a time previously had the first work been done?

A Some work had been done before I came to this department; I think two or three years, but it was previous to my coming here, I know.

Q (By Capt. Gillette) One contract is dated August 1891, and this was opened June 19, 1893. There was little or nothing left?

A Of brush.

Q How about the stone?

A The stone was there.

Q Was the stone placed in the shape that you placed the stone under your contract,—the contract you were inspector of? In placing the stone did you have the contractor place the stone by hand, or throw it in rip rap?

A On the top of the jetty the stone was edged up and on the shore protection, but on the mattresses it was just thrown on.

Q Did you see any stone that any of the preceding contractors had placed in either of those positions?

A There was some of the shore protection remaining that indicated that it was placed by hand.

Q Would you in your judgment say that there was
104 anything like as much placed by hand under previous contractors as there was under this contractor?

A There was very little work of the shore protection done previous to this.

Q How about fastening the fascines to the bank for shore protection, how did you fasten them?

A We fastened each fascine by driving stakes through them into the ground.

Q How did you drive them?

A We drove them until the head broke under the hammer, two or four feet.

Q Did you ever have the head break more than once in driving them?

A No sir; we never required them to be re-headed.

Q Did the contractor complain of the difficulty of driving the stakes?

A Yes sir; he did.

Q Frequently?

A In my recollection, but once.

Q Did you tell him he would have to drive them down as prescribed if he had to use pile drivers?

A I don't remember telling him that. I told him if they could not be driven sufficiently well he would have to employ a pile driver or other means.

Q What was the object of this shore work?

A To protect the banks; the river rises there to the mean height of perhaps five to seven feet, up to twenty-five feet sometimes.

Q Did you ever see a pile driver used in that kind of work?

A No sir.

Q Did you ever hear of anybody using a pile driver in that kind of work for driving stakes in fascines on the shore?

A I am not sure, but it is my impression that they employed a pile driver in protecting the bank of the canal, or a part of it.

Q You afterwards went to Fernandina, Fla., as inspector on mattress work?

A Yes sir.

Q Were the specifications for the fascines there similar or different?

A They were the same except as to the length of the fascines.

Q Did you carry out the specifications at Fernandina the same as you had at Augusta?

106 A In regard to the construction of the fascines there they could not be carried out in the same way. The brush at Fernandina, Fla., is entirely different from the brush we had at August.

Q Did you put in as much material for the same length of fascine at Fernandina as you did at Augusta?

A I don't think there was.

Q Did you put in half as much?

A Yes sir.

Q Did you put in half as much wood material, not leaves?

A Yes sir; more than half.

Q What percent would you say?

A I should think at least sixty per cent more; that would be the very lowest; I will say sixty percent or seventy.

Q Were chokers used in choking the fascines as at Augusta?

A Yes sir.

Q What kind of choker was used?

A The choker was mostly a chain, I think, three or four feet long, and at each end was left a ring: this chain was taken around the fascine, and two men, one each side 107 of this bundle, put a long stake into each end and through the ring and by using this leverage, they tightened the brush, after which it was tied with wire or rope, whichever was used.

Q Did you supervise personally the construction of the fascines?—did you see them built?

A I saw some built, but I was not supposed to be inspector during their construction. I saw them when they came on to the work.

Q You saw the fascines?

A Yes sir; that was all. I measured the cubic yards.

Q At Fernandina, did you see the fascines built?

A I saw some of them; I visited the camp occasionally, and saw the material to make them,—the business of making them. The business of the inspector there was along the wharf where the mattress was constructed on the ground, after the fascines were hauled from the woods to the work.

A They were under your eye during the construction of the mattress?

A Yes sir.

Q What year was this?

A 1894.

Q What kind of machinery is used in choking the
108 present fascines?

A Pretty much the same, except that instead of chains, they use perhaps, inch and a half rope.

Q Was there any difference in your instructions at Fernandina from what your instructions had been at Augusta?

A The instructions were varied afterwards.

Q As to the interpretation of specifications, was there any material difference between your interpretation and that of Capt. Carter?

A As to the construction of the mattress?

Q As to carrying out the specifications; in one case you were told to carry out the specifications strictly, and you did so?

A Yes sir.

Q In the other case, were you told to carry out the specifications strictly?

A No sir.

Q What were you told?

A I was told to carry out the work and to construct the mattress in the same manner as they were constructed in the lower harbor work.

Q That was not the same as at Augusta?

A No sir.

109 Will you give me an estimate of the comparative contents of one hundred square yards of mattress built at Augusta and one hundred square yards built at Fernandina,—which cost the most, in Fernandina or Augusta?—Which work cost the most, at Fernandina, Fla., or Augusta, Ga?

A At Fernandina everything was favorable to the contractor; the brush was obtained within a radius of a mile to two miles and a half, and there was a shell street to haul it along which large loads could be hauled, and everything was favorable. At Augusta the brush was more easily obtained, but the hauling was longer. I should consider that at Fernandina the mattress could be constructed cheaper than at Augusta.

Q About how much more would it cost comparatively at Fernandina to built a mattress as they were built at Augusta?

A They would cost much more, for this reason, that at Fernandina the mattress was constructed four or six

course layers, while at Augusta they were always constructed there as a general rule, except on a few occasions, as single mattresses. There they were simply towed a very short distance, while at Fernandina they were constructed on shore and hauled about five miles to the place of sinking.

Q The cost to the contractor at Fernandina to put in say, one thousand yards of mattress, as it was put in a good many times, would be as much as it would cost him to put in a mattress that was originally built in single course in that work at Augusta?

A To place it in the work in the same way?

Q Say one mattress at a time?

A It would cost him—that would depend—one thousand square yards—that would depend upon how many courses could be put into the mattress at the same time.

Q Take an eight course mat?

A It would cost many more times—a four course mat would cost him four times as much as a single course.

Q About how much more would it cost to put in a mattress after the Augusta plan; give me figures of one, two three or four course?

A It would be very difficult for me to answer that question.

Q I understood your answer before was many times; could you say how many times?

A I could not say how many, but it would cost a great deal more to use a single mattress than to lump up three or four courses and sink them—at once.

Q (By Col. Gillespie) Was there the same contractor on the Fernandina work as there was on the Augusta work?

A Bangs was the contractor for Fernandina and on Cumberland sound.

Q (By Capt. Gillette) What was the final result of the work at Augusta?

A The work progressed very slowly, and about the time it should have been completed, there was one half or perhaps, less than one half of the work done, and the work was taken up by day labor, and we allowed the contractor to do what he could on his part, and we went to work and finished it up in a very short time.

Q Do you know anything about the financial standing of the contractor when he got through with it finally?

A About the same as when he started. He had very little

when he started, and when he got through he had very little or much less.

Q (By Capt. Carter) Had you any experience in work of this character before you came into my district?

112 A No sir.

Q You were asked to compare the work at Augusta with the work that had been done previously,—did you see any of the work that had been done previously which you were asked to compare with the work such as had been done when you were here?

A At Augusta,—no sir; the previous work was done before I came into your employ.

A They have pretty good floods there, don't they?

A Yes sir; twenty-five feet rise.

Q Did you see the freshet there, where the dam on the Georgia side was carried over to the South Carolina side and vice versa?

A Yes sir; I saw the effect of that flood.

Q Is it possible to form any estimate of what was done after one of those floods?

A No sir; everything was torn away by the flood; it cut away ten or fifteen feet of bank.

Q How frequently do those floods come?

A I could not answer that. I think in 1882—I would not be able to answer that,—I have not been in the district long enough to answer that.

113 Q You were asked whether the stone was placed on the work by hand under the previous contractor,—is it practicable in work of that character to place the stone by hand when the mattress is sunk underneath the water?

A It could not be placed by hand.

Q You were asked about the difference in the character of the work near Augusta and on the coast, and the possibility of making an accurate estimate of the work in the two localities; are they now entirely different, depending upon the character of the material?

A Yes sir.

Q Can you carry out anything as close on the ocean bar as you can on the river bank?

A No sir.

Q What is the object of a mattress on the ocean bar as you understand it, from an engineering point of view?

A Take the formation of the jetty at Cumberland sound,

for instance—, it was proper to have a mattress to stand where it would form and make a sand bank.

Q Is it possible to do that sort of thing to bank protections in a river?

A Not in the case that I was on.

Q Not only is it not possible, but would not a man
114 be a fool that would try to do it?

A It could not be done, sir.

Q You were asked to compare the cost to the contractor of a mattress as built at Augusta and the cost here, and if they were built alike, would not the brush have to be brought all the way from up the country?

A I don't know much about that; I am not familiar enough with the country to answer that.

Q You are familiar enough with the case to know that it would cost more if it had to be brought a long distance by rail than what it would if built on shore?

A Yes sir.

Q Have you seen any brush similar to that on the bank of the river at Augusta, round here?

A No sir; that brush made perfect military fascines.

Q Do you consider yourself an expert in determining the cost of the mattress work to the contractor?

A Well,—O don't say that I am an expert; but I think I could form a good idea of the cost of a mattress to the contractor. I think I am capable of forming an estimate of the cost of a mattress to the contractor. Of course, the cost of cutting the brush and formation of the fascines, towing
115 the fascines to the place where the work is, and the cost of the stone have got to be estimated.

Q Is that all?

A No sir; there is the sinking of the mattress.

Q Is that all that enters into it?

A I don't think of any other details now.

Q Was it not customary always to recommend in the district that the accuracy with which the work was done was dependent largely upon the exposure of the place; in other words,—there was no attempt to put steam steering gear on a mud scow;—would it be fair or sensible to exact the same conditions every where, where the conditions were entirely different?

A No sir; local conditions would, of course, enter into it.

Q Of course, you would know you were carrying out those conditions as far as I wanted them carried out?

A Yes sir.

Q Did you ever have a personal difficulty with Twiggs?

A I did.

Q Did Twiggs feel disgruntled at the method of carrying on the work?

116 A Yes sir, and I made a report to you from time to time, and received instructions.

Q (By Capt. Gillette) What was this personal difficulty?

A After his failure to complete the contract, I was given orders to get some plant together and go ahead with the work that was then being done by the contractor, and I think I got on so much better with it than he had, that he was jealous of the way it was progressing. It so happened that he had a little tug to tow the material, and when I wanted my material towed there was always some excuse made; he wanted to have his material towed. I can't go into it fully. My idea was to finish it as quickly as I possibly could. On several occasions we had little tilts, and one evening I told him he had not kept his word, and that brought on that trouble.

Q What was the trouble?

A Without what I considered any provocation, he struck me; I came away and reported it to my employer, Capt. Carter; then went to my hotel. I understood that all that evening he kept a very close watch on my whereabouts, but I was right in my room.

117 MR. GIESLER recalled:—

Here is a further memorandum in regard to the cost of the mattresses, which was requested by the board this morning.

Q (By Major Adams) Did you have anything to do with making the specifications of this work?

A Nothing at all.

Capt. Gillette here read the affidavit of Mr. Marion Twiggs who is at present ill at the Savannah hospital and unable to attending the meetings of the board.

118 R. V. WOOLVIN, called by Capt. Gillette, testified as follows:

Q (By Capt. Gillette) Have you been inspector of mattresses at Augusta?

A I was assisting Mr. Conant there for a while.

Q Who was the contractor?

A A. J. Twiggs.

Q Have you seen the mattresses constructed at Savannah Harbor?

A I have seen the mattresses constructed in 1892 and 1893; some of them were thirty feet wide.

Q Have you ever seen any of the remains of the work constructed prior to Mr. Twiggs' work, about two years previous to that?

A I saw some of the last work done there on the Savannah river above Augusta. When I was in Augusta, I went and looked at it.

Q The old original work?

A Yes sir; I seen some of that work that was done by Green & Gaynor.

How does that work compare with that done by contractor Twiggs?

119 A He did better work, Twiggs' was the best work.

Q What was the difference there in the work?

A The stone was better placed by Twiggs, and the fascines were trimmed better. From what I could see of the other work it was a kind of loose brush fascines.

Q Something similar to the brush fascines seen on the river?

A Something similar; probably not so large as they

A Did you see any stone that was placed on the shore protection of the old work?

A Of the former work?

A Yes sir.

A Yes sir.

Q Was it placed by hand or loose?

A It looked as it is was thrown even; some was not so even.

Q How about the stone that was placed under the new contract,—how was that placed on the shore protection?

A Under the Twiggs' contract that was placed by hand,

on the grade it was placed edge-ways, and on the flat surface it was placed flat.

Q That was the Twiggs' contract?

A Yes sir.

120 Q Was there any of this edgewise placing of the stone under the previous contract?

A I never saw any.

Q Did Twiggs place the stone better in any other place?

A Yes sir; he placed it on the top of the dam better; he placed it by hand there.

Q Did you see any of that sort of work that had been done by the previous contractor?

A I did not.

Q Did you see any driving of stakes to hold the fascines on the shore?

A On the Twiggs' contract; yes sir; I had some driven.

Q What were your instructions about driving them?

A As well as I remember the stakes should be three inches in diameter and five feet long.

Q And driven how far?

A Driven up.

Q Did you succeed in doing that?

No sir; the bank was too hard in places, it could not be done.

Q You always drove them as far as the stakes would
121 hold, and thought probably then the fascines would stand?

A I don't know about that. They were driven down with wooden mauls until the head burst.

Q If you had been trying to protect the bank with stakes and fascines for yourself, would you have driven the stakes that far?

A Yes sir; I think I would.

Capt. Carter,—Did you see any of that prior work, or could you compare the remains after the freshet when it was washed away?

A I never saw any of that prior work.

Q You were working in connection with Twiggs contract after the freshet?

A Yes sir.

Q (By Captain Gillette) Were the bundles of brush in place?

A Yes sir; they were in place, and some of the stakes were there.

Q Did the stakes appear to be thoroughly driven?

A I don't think they were thoroughly driven. I saw Mr. Twiggs take hold of one of them and pull it up with his hand. That was one of the causes of friction between him and Mr. Conant; I heard him remark about it several times.

122 S. M. HALE, called by Capt. Carter, testified as follows:

Q Have you been inspector of brush mattresses in this district?

A Only at one time; that was at Augusta.

Q Who was the contractor?

A Twiggs, Albert Twiggs.

Q You read the specifications?

A Yes sir.

Q Did you have any instructions as to how to carry them out?

A Yes sir.

Q What were they?

A I was on the shore protection. The fascines were to be well made and tied tight with wire, two feet apart, placed in the proper place and driven down with stakes.

Q Were the fascines thoroughly constructed?

A Yes sir.

Q Strictly according to specifications?

A Yes sir.

Q What kind of stakes were used to fasten them down?

A Stakes from three to four inches in diameter.

123 Q State what process was pursued in driving the stakes?

A The stakes were driven two or three feet deep, or as deep as we could get them; the clay was very hard and we could not drive them any deeper.

Q Did you drive them right down and then stop?

A We had to cut them off and drive them again.

Q How many times do you know of cutting off the stakes and driving them down?

A Twice.

Q That makes three drivings?

A Yes sir.

Q With heavy mauls or light mauls?

A With heavy mauls.

Q Did you see any stakes driven under the previous contract in the same vicinity?

A No sir.

Q Have you seen the brush mattresses built on the lower river, on the seacoast of this district?

A I have never been over one.

Q You were not familiar with them?

A No sir.

124 Q Have you seen the bundles of brush used in them?
A Yes sir.

Q How did they compare with the bundles of brush used at Augusta?

A The fascines at Augusta were much clearer of twigs and leaves than these were.

Q Was the best brush grown as far as you know, here or at Augusta?

A It was better at Augusta.

Q How much better?

A According to the brush I saw at the camps, it is much better, sir.

Q Did you find the contractor, when you were sent to his camp with a lot of brush ready for use?

A Yes sir.

Q How many bundles of brush did it take to make one fascine, same length of bundles?

A Three or four he told me.

Q How were these fascines made, how long?

A They were one hundred feet long.

Q Were the limbs cut off?

A Yes sir, he trimmed them off.

Q What about the material in that stock of bundles that was there when you got there, was there any thrown away, do you suppose in making fascines of it?

125 A I could not say; the only way I can get at it is that the bookkeeper told me he built two mattresses, 100 by 50, and it took ten thousand bundles, ten thousand he had on hand.

Q Did you find any bundles that you could not make anything out of at all?

A Yes sir, some we did not use.

Q (By Capt. Carter) In making those fascines, did you receive any instructions as to how the fascines should be made, the new ones?

A Yes sir.

Q Were you not informed that fascines in order to come up to the specifications should come up to the fascines which were shown you as a type?

A Yes sir, I was to carry out the specifications.

Q As interpreted by Capt. Gillette?

A Yes sir.

Q Who instructed you as to what to throw away and what to put in?

A No one.

Q How were you told to build that fascine?

A With few leaves or twigs; Mr. Cooper told me to make them about the same as we built them in Augusta.

126 Q (By Major Raymond) It was not the same kind of brush, was it?

A The specifications say "very few twigs and leaves" and I built them that way.

Q (By Captain Gillette) What instructions did you get from me in regard to building those fascines?

A All you told me in the office was to see that they were built well, tightened and made out of good brush, and I spoke to Mr. Cooper about it, and he gave me a copy of the specifications, and told me to carry those out.

Q Then the gist of the instructions was to carry out the specifications?

A Yes sir.

Q (By Capt. Carter) Did not Mr. Cooper tell you to leave the brush similar to that in Augusta?

A Yes sir.

Q (By Capt. Gillette) You were only that winter in Augusta?

A Yes sir, I was only that winter in Augusta.

Q (By Major Raymond) Do you know the brush in Augusta and you know the brush down here?

A Yes sir.

Q Taking equal quantities of that brush, would you not have to take a great deal more to make a fascine down
127 here out of that brush than you would out of the brush in Augusta?

A The time we were in Augusta it was winter, and there was not any leaves on the brush; it was mostly composed of sweet gum; down here there is nothing but oak and myrtle, and it was full of leaves.

Q It would take a great deal more brush down here than it would up there?

A Yes sir, you would have to use a great deal more.

Q Did Mr. Cooper, tell you to leave out all the twigs and leaves?

A That is the reason I mentioned about Augusta. He said he wanted the specifications carried out.

Q You got your interpretation from him as to what was wanted?

A Yes sir.

Q Did Mr. Cooper pretend to interpret the specifications for you?

A He read the three designs over to me, and told me that no further instructions were necessary.

Q And he gave you no further instructions?

A No further instructions.

128 Q (By Capt. Carter) You said he told you to make them like those were made in Augusta?

A I thought he meant that, and I asked him if I should make them like those and he said yes.

Q (By Capt. Gillette) When you left my office, all the instructions you had were simply to go over there and have the mattresses built according to specifications?

A Yes sir.

Q How did you built those mattresses any different than you would have built them if you had gone straight from here to the mattress camp?

A No sir, I followed the specifications.

Q (By Major Adams) Why did you ask Mr. Cooper?

A That was before I got the specifications.

Q Did he not give you the specifications and point to whatever he explained to you?

A Yes sir.

Q (By Captain Gillette) Did you think the same from reading them yourself?

A Yes sir, I thought the same from reading them. I built them according to the specifications. There were very few leaves in the 'Twigs' fascines.

129 Q Is that the way you would have built them had you received no instructions except to carry out the specifications?

A Yes sir.

Q (By Capt. Carter) Had your work not been altogether confined to Augusta, where you built them in the winter season?

A Yes sir.

130 AUSTIN, called by Capt. Gillette:

Q (By Capt. Gillette) You have been inspector of the construction of mattresses in this district?

A Yes sir.

Q In what year?

A In 1893.

Q Were you given a copy of the specifications?

A Yes sir.

Q Were the fascines composing the mattresses built according to the specifications, according to any of the three designs mentioned in the specifications?

A At the time that I was on the work in the Savannah river, the contract of 1892 had just started, and the mattresses we were then building were mattresses to be used alongside of the training walls, as I understood it at that time, to prevent scouring. I don't recollect whether they were constructed according to any of the designs in the specifications or not, but they were constructed as I was ordered by my superior officer. I was under Mr. Ensey, Mr. Twiggs and Mr. Hall, at various times.

Q Were the fascines built under your supervision, or
131 were they brought there ready prepared?

A They were brought there ready prepared.

Q Was the brush trimmed at all?

A Some of the bundles might have been trimmed and some not.

Q Have you ever seen a fascine built as prescribed in those specifications?

A Just at present I cannot recall the specifications; I have not read them since the contract of 1893. I have built fascines or have seen them built under my supervision.

Q For the mattresses prescribed?

A For use on the work in this district.

Q Were they choked?

A They were choked.

Q Tightly choked?

A Yes sir.

Q Where were those built?

A Above Augusta.

Q What contract was that, who was the contractor?

A William H. Walsh.

Q What year was that?

A That was in 1892, the latter part of 1892.

Q What were those fascines used for there?

132 A In the construction of jetties.

Q Was the brush trimmed?

A Well, it was, yes, the brush was trimmed in this way, that when there was a large limb of any kind, projecting limb, that was looped off and made use of as if it was a separate limb; sometimes they were rather large, in fact, almost trees cut down.

Q Did you build any shore protection there?

A No sir. The country up there is all rocky, in fact, the whole river above Augusta is quite different to what it is here.

Q How is the brush up there compared with what it is down there, have they any difficulty in getting brush?

A There was no difficulty in getting good brush there; there was any quantity of it on the river bank.

Q How about down here?

A I don't know.

Q How did the brush look, did it look as good brush as you got there, did it look as straight and as good brush?

A I don't think it was as straight, I know it was not as good brush as we used on the work up there. We had plenty of it to select from and we had more variety to select
133 from; the brush here is not as straight as it is up there.

Q (By Capt. Carter) You were inspector down the river at one time?

A Yes sir.

Q Do you remember what the size of the fascines called for by the specifications was?

A I remember that they were nine inches choked; that is part of the specifications that I do remember.

Q Do you happen to recollect whether you examined any of those fascines or many of them as to their size?

A I did examine some of them.

Q Were they according to the specifications?

A Some of them measured nine inches round and some of them went as high as a foot and a half.

Q Did not the majority of them run far above nine inches that you measured?

Q Yes sir. I don't think I measured any one bundle of brush that was less than nine inches and a good many meas-

ured a foot and a half, not one or two but probably four or five dozen in a barge row.

Q The average in a barge row would be thirteen or fourteen inches?

134 A I would put it at thirteen or fourteen inches, probably fifteen; very few of them are nine inches and I don't remember measuring any less than that.

Q (By Capt. Gillette) When you inspected those fascines were the bands under considerable strain from the pressure of the brush or not; was there considerable strain from the pressure of the brush or not?

A The fascines here or above Augusta?

Q Here?

A I don't think they were choked as tightly here as above Augusta; the bands could not be slipped about, the brush had evidently been choked and I don't believe that any two or three men could have tightened the bands, unless it was choked by some method, what method it was I don't know.

Q You were not in the mattress camps?

A No sir.

Q Do you know whether there were any inspectors in the mattress camp?

A There was an inspector I think around there some where at the time they were made, at the time I was speaking of.

Q This was what year?

A This was in 1892. The mattresses at that time were 135 sunk as they were built.

Q (By Capt. Carter) Do you not know that every inspector on the work was instructed to look out for the interest of the United States first, and then when that was done, to permit the contractor to do the best he could for himself?

A I received those instructions.

Q Was not that the general feeling?

A So far as I know, with the inspectors connected with the work, it was the general feeling. I was on the work only a short time.

Q Do you think any inspector would have done anything that looked like showing favor to a contractor, without being fearful of losing his position, in other words, was he not required to show no favors, except what he legitimately could, to contractors?

A That was my understanding, so far as I could understand while I was on the work.

Q You heard nothing at that time to the contrary?

A No sir.

Q You were on the lower training wall?

A I don't remember, I could point it out on the map.
136 (Capt. Gillette here read a letter from Daniels, formerly an inspector.)

Capt. Gillette announced that he had no further evidence to present at present.

Col. Gillespie,—Captain Carter, you can now outline your defense, and afterwards you can present your witnesses.

Capt. Carter,—The statement in the report of Capt. Gillette, of August 19, 1897, that he examined the brush mattresses and that it was not at all according to the specifications, and did not contain more than half the material needed to be equivalent to the specifications, is incorrect. The mattress was built according to the specifications strictly, with the following modifications; the specifications required that the fascines should be placed between two grillages of poles, a bottom and a top grillage, the mattresses as used in
137 Cumberland sound were modified slightly under this provision that the United States can vary slightly the designs, provided there is no material variation in the cost.

Col. Gillespie:—Suppose you quote from the specifications, giving the number of the specification where you quote that as authority.

Capt. Carter:—I presume I can make this statement clearer by beginning in chronological order and show the development of this work here and why we used those fascines and how they were used.

Col. Gillespie:—Any way you choose, but I would rather have you quote the specifications under which you acted.

Capt. Carter:—In 1884, when I came here as assistant to Capt. Bailey, who was Gen. Gilmore's assistant, we were putting in mattresses composed of logs, with layers of brush on top at times, and at times without. Prior to my coming here I had not seen any fascines used for the purpose of improving estuaries on sandy coasts, having seen only the military fascines built at West Point, and naturally those fascines did not appear to me to be the equal of the military fascines, but from the experience of an officer like Gen.

Gilmore, and from my own experience I learned that 138 even if it were practicable to build military fascines, under no circumstances should those fascines being built, the object being to have an entirely different fascine, the object here being that the fascine should act as a silt catch and make the river build its own bank. As the work progressed those fascines were constructed into mattresses and various forms were tried for putting them into mattresses, the usual form being to use a grillage of poles and on top of this grillage to place layers of fascine, and then to top off that layer of fascine by placing another layer of poles tied down. The object of the poles being to hold the fascines in place until they could be put in the work, and also to hold the fascines up until they could collect sediment sufficient to consolidate the whole. This after awhile became entirely unsatisfactory. For the following reasons; in 1892 or about that time, when the continuing contract for the improvement of the Savannah river, Savannah harbor, which was based upon plans submitted by me to Gen. Gilmore and approved by him, was adopted, the method of construction which formerly had been brush or log mattresses, or fascines, was changed and pile training walls connecting the end of those dams were used to regulate the width of the river between the spur dams. In making my estimate of the cost 139 of this work, I got the linear feet of the pile work, the cubic yards of the brush fascines required for mattresses, and the cubic yards of the stone, as nearly as I could tell from the profiles of the points where the points of construction were to rest. Shortly after that work began, by the construction, as I remember of the pile training walls in filling them in the brush fascines—

Col. Gillespie:—What year was that?

Capt. Carter:—I think that was in the fall of 1892—very shortly a tremendous scour developed along the face of the training walls, and it became necessary to stop that scour. I had not contemplated in the beginning building any mattresses along the face of those training walls. We then started to use one of those forms of mattresses along the face of the training wall, but the grillages resting on the bottom, the scour underneath, threatened to undermine the mattress, and then I had to devise a different method of putting down that mattress, and I had ordered the inspector to form a mattress, leaving out both the grillages, and weaving those fascines all together into mattresses with wire,

somewhat on the plan of the fascines used in the mattresses on the Mississippi or Missouri rivers. The contractor demurred to that, because it was cheaper to build 140 the mattresses as before than it was to do this work,

but I reasoned with him and finally persuaded him to go ahead with the work, telling him that if we found after a while that it was a greater expense, I would recommend an increased amount of money being paid to him, but I thought that he would find that he would be able to do it at practically the same cost. After some demurring he proceeded to build the brush mattresses in that manner. Silting took place immediately on all of the faces of those training walls, and the danger of scour in my opinion was lessened with those mattresses. A little bit later, when it came to the constructing of the training wall on the lower flats, I think that is where it began, those fascines having worked so well along the face of that wall, I began using some mattresses in there. That was a failure, on account of the great depth of the water, and I had to abandon that method. I then told them that we would try the strict form which was given in the specifications, a grillage under the fascines and a grillage on top. I started to do that, but I could not do anything with that form of mattress by reason of the depth of the water and the pressure of the current, so I had gins rigged out on the barges, and tried to built them two or three courses 141 at a time. He complained, they were very heavy mattresses, because the swell of the passing steamers broke things loose, but I insisted on his going ahead. That work was carried on for some time, but after I had spent seventy thousand dollars (about), and saw how little increase there was in the height, it scared me very much, because I estimated that probably I could not complete it for three times that sum. Then it became a question how I could get those mattresses down there. When we put the stone on them with those heavy fascines, they would sink right into the bottom and we didn't get the height. Then I built them of several courses to avoid the intermediate courses of stone. He made objection to leaving out the stone, except the stone on top, because it necessitated a change in the plant, and because it was easier to build them according to the typical form of the specifications than in any other way, and in launching those large mattresses he would occasionally lose them, and they would get off the ranges. It made more difficulty for him, and the risk was greater, and he objected to

that. That refers only to the river work. Finally I succeeded, or the contractor at my suggestion, devised the way by which this work could be done.

I reported the matter, I don't know whether in writing 142 or orally, to the Chief Engineer, shortly afterwards. I remember the incident especially, because he sent me a letter introducing two French officers. That was the first time I had succeeded in getting this method in good working order. I was prouder of it than anything I have done on the river, because it enabled me to carry out this work within the appropriations, otherwise it never could have been done.

Q (By Col. Gillespie) Did you make any changes of which the Chief Engineer did not know?

A Those minor changes I did not report, no sir. I did not make any report of those, except as my Division Engineer was here, because the specifications gave me power to do this. It was never my custom to report those minor modifications to the department at all. When I succeeded in getting this up successfully, I was very proud of it and I reported it. The result of those modifications was very gratifying to me. Those gentlemen whom the Chief Engineer sent here, had seen a great deal of similar work, not only here, but also in Holland. They expressed themselves as not having seen anything as satisfactory, and as well calculated to do this work. Since the mattresses have been sunk in this way, the silt has formed, and the wall has filled up 143 in such a way as to consolidate, and the sinking which I had found previously, did not exist.

Q (By Major Adams) What date was this?

A That was in 1893. I think it was in 1893, the fall of 1893, as I remember. The first work here was in the fall of 1892. Then when we got down further, my estimate for this work had been stone; because I believed that the teredo would eat up this work, but the bottom was so soft that I found that I could not use stone at anything like my estimate of the cost, but to my pleasure I found that the shell growth, as reported by the Assistant Engineer, was so satisfactory, that the growth of barnacles covering the brush, protected it, and this enabled me to continue this light form of construction, and instead of stopping the brush work up the river, I carried it clear down to Tybee roads, watching it carefully and having him inform me if he saw any signs of deterioration, so that the plans could be changed. In this way the amount of brush mattresses was enormously increased, to probably four

times the amount of the original estimate. The amount of stone, for the same reason was decreased. The fascines were built as they had been built from the time I first came on the work, and were built as required by the specifications. The specifications were made out by me, and were intended to cover exactly the character of fascines which I got. The contractors, all of them who bid on this work, knew exactly the kind of fascines that I was in the habit of using; they knew exactly the kind of fascine I wanted.

Q (By Major Adams) Did you describe the fascine in the specifications?

A Yes sir; I described it. The fascines are described in Paragraph 39 of the specifications for Cumberland sound. There I say that the fascines shall be from thirty to one hundred feet in length. I modified that length, and required them to be built in shorter lengths, because I found that it was delaying the execution of the work, and it was impracticable to carry them as long as thirty feet, so I ordered them to be built about fifteen feet. They were to be choked tightly by an approved form of choker, either of chain or of rope, to a diameter of nine inches, but I could not get them down to a diameter of nine inches, and ordinarily they would run from twelve to eighteen inches, in diameter. They were choked satisfactorily. Any fascine on any work of this kind, brought here after several days exposure to the sun, may sometimes have the choker loose.

Major Adams: I understood that Capt. Carter was to outline his case, but he is making a statement of facts; it is not an outline, but it is a prolonged statement and assertion on his part.

Major Raymond:—I think Capt. Carter ought to be permitted to make his statement in his own way, at what length he likes.

Col. Gillespie: The chair rules that Capt. Carter give an outline of his case, without going into a description or detail, afterwards he can go into that, after he has called his witnesses.

Capt. Carter:—The outline is this; the work has been constructed according to the specifications as understood by me when I made them, and as understood by all the contractors when they bid on the work, and that no changes in the specifications have been made, except what were to the interest of the United States; that no changes of any description have

been made, except as were contemplated by the specifications and as were permitted by the specifications, and that no change has been permitted which has varied materially the cost of construction; that the mattresses used here and at Cum-berland sound were as contemplated in the specifications, and for the interest of the United States, not only were they as contemplated, but they were the proper kind of fascines for the work to be done. That the mattresses contained the amount of material required and contemplated by the specifications. That the system of payment by counting those eight layers as eight mattresses and paying for them by the square yard, was as contemplated by the bidders and by the specifications. As to the cost, the work was paid for at the contract price for mattresses per square yard; that the contractor could only make one trip instead of eight, was as contemplated by the specifications. That it was not put in the specifications was for the following reason,—that that method was patented by the Atlantic Construction Company, and to have put it in the specifications, would have given that company the monopoly. Everybody was told that if he could devise a system by which that could be done, he could do so. That was omitted in order that one company should not have any advantage over the rest of the bidders. If that had been put in the specifications, nobody but the Atlantic Construction Company could do it. That bidders were required to bid on three types of mattress at one price. That was done for the following reason; it was contemplated, not only in the office, by myself, but also by every bidder; that the type of mattress which would be used was the third design, with perhaps a very few of the second, not enough to make any difference. The statement that the contractors have been paid more than they should have been paid, is an error; they have been paid exactly as contemplated by the specifications. The statement that the Atlantic Contracting Company has delivered so many yards of brush mattress, is probably true. The amount of money is probably correct. The mattresses have always been up to the requirements of the specifications, and instead of falling off, at the time I left, they were as good as they had ever been, as reported by the Assistant Engineer and as contemplated by the specifications.

The statement in here that the government has lost a certain sum of money is an error. The contractors have been paid exactly what was contemplated, and for work they put in,

according to the specifications. The statement that the government suffered any loss during this contract, is not true. The statement that I connived at it is a statement that is absolutely untrue. Everything that was done was for the interest of the United States in every particular. "That there

148 was no inspectors put on the brush camps except at short intervals." When I first came here inspectors were put on the brush camps, because the contractors were unfamiliar with the character of the work; when they became familiar with it and when the mattresses were built on the barges, we took the inspectors off. When there was any deficiency reported in the quality of the mattress, an inspector was sent to the camp to see that they were brought up to the specifications, and when the inspector reported that there was no longer necessity for inspection, he was recalled. Where the Atlantic Contracting Company have been the contractors the quantity of brush has invariably been larger than the estimate and the quantity of rock much smaller." That is probably true, because the nature of the work required it.

"At Cumberland sound the project estimated 425,000 square yards of brush and 425,000 cubic yards of rock." I presume that is correct.

Capt. Gillette:—I think that rock should be 425,000.

Capt. Carter:—In the estimate made by me and submitted to the Board of Engineers, the amount of brush was, as I remember it, reduced, on account of my fear that the teredo would eat the brush. In calling for bids, I called for what I thought would be required; but the mattresses down 149 there instead of, as I feared they would, sanding up very slowly, covered almost immediately, and I increased the amount of mattresses. The statement here that they put in a larger amount of brush and a smaller amount of rock is true. Whether the figures are correct, I dont know. That I made a statement to the Chief of Engineers, a statement in which the following statement occurs,—“In the specifications only 200,000 square yards of mattress are given, but as the new sounding shows that 300,000 square yards will be required, this estimate has been changed,” is probably true; I have seen the letter. The statement that records dont show that any soundings have been made, may be also true, because there were many soundings made by me upon which I could base that statement that might not be in the shape of a formal survey. I have not had access either to my private

files, or to the public files, and I don't know upon what that is based.

Capt. Gillespie: You say that you have not access to your private files?

Capt. Carter: No sir.

Col. Gillespie: The files are at your disposal for any examination you desire to make.

Capt. Carter: I thank you. Whether that information came from an examination or from an official survey, I am not able to tell now.

Col. Gillespie:—Is that an outline of your case?

Capt. Carter:—Briefly it is that everything has been done according to the specifications, at the price given, for the interest of the United States, and properly.

Major Raymond:—You want to add that, "Without any personal interest."

Capt. Carter:—Of course, I was exceedingly anxious that the work should succeed.

Major Raymond:—Professionally?

Capt. Carter:—Personally, professionally and for the corps, certainly, that goes without saying. My only object in this work here was that I should carry it out and make a success of it, and I have done it. My interest was solely professional and for the corps. I was anxious to carry the work out within my estimate, and when I saw the danger of its not being done, I was scared nearly to death, and I devised every scheme to get through, and I finally solved the problem of carrying through the work, and the work is successfully done in the best possible manner. My interest has been purely and solely personal, professional and for the corps;

nothing except that. I want to say this that there are 151 some of the dams (?) in here, that if I had to do them again, I would not put them exactly as it is. I have learned a good deal in thirteen years. If I could have foreseen what I know now, I would have called for the amounts in the specifications that were used in the work, but that I could not foresee.

152 A. F. ENSEY, called by Capt. Carter:—

Q You are a graduate of Johns Hopkins University?

A Yes sir.

Q Give, briefly, your engineering experience?

A I was engineer on the work at Baltimore, and since I left home I have been engaged on railroad work in Georgia, the construction of the Macon & Atlantic railroad, the Macon & Birmingham, the Georgia, Southern & Florida, on the F. C. & P. extension; on drainage work in Florida, and I am now engaged in locating a railroad from Jacksonville to Dead Man's Bay on the Gulf coast.

Q Between what dates were you employed here in my district?

A I applied to Capt. Carter, if I am not mistaken, in August 1892, for a position, and when he asked what qualifications I had, I mentioned having located the Macon & Atlantic railroad and the fact that I had located the crossing at the Oconee river, and made a topographical drawing for submission; I didn't know at that time that it was any where near, and he produced it from the records and my name was on it. I was employed by you from that time until the yellow fever epidemic in Brunswick.

153 Q Were you not inspector of the work in Savannah harbor, where the brush fascine mattresses were being made?

A Yes sir.

Q Were not your instructions to see that all the work was done according to the specifications, and did you not see that it was so done?

A I did, sir.

Q (By Major Adams) Give us the dates of your employment?

A I went to work on the Savannah river in December 1892, and was put in charge under Mr. Coulson, Assistant Engineer, in January, 1893, and I remained there until probably April, I wont be certain.

Q What year?

A 1893. I was put on tide gage work in Brunswick harbor and other similar work of its class, under Mr. Coulson, and at his death under Capt. Carter. All the mat work and the fascines came under my personal supervision.

Q When did your employment on the Savannah river terminate?

A On the Savannah river or with the Savannah office?

Q On the Savannah river?

A In April, 1893.

154 Q When did your employment in connection with the office terminate?

A At the time of the yellow fever epidemic at Brunswick.

Q What year?

A I think it was the same year, it may have been a year later.

Q (By Col. Gillespie) You say you followed the specifications?

A Yes sir.

Q What type did you build?

Q We built the fascines into mattresses.

Q At that time you read those specifications?

A Yes sir.

Q There are three designs, which design did you use at that time?

A The mattress which we constructed had a bottom grilage of poles—the third design is the design we used, for the protection of the pile training wall I used a closely woven mat.

Q Confine yourself strictly to the question; I asked you what design you used there, what design that is described in those specifications?

155 A I used the third design for that training wall, and I used a lighter mat to protect the base of the training wall.

Q Was that described in the specifications?

A I don't know whether there is any description of that in the specifications or not; it is simply a protection at the base of the training wall to prevent it from scouring.

Q (By Major Adams) Is there anything in the specifications that authorizes that modification?

A Yes sir, I think there is, I think that the specifications state—

Q (By Capt. Carter) Is there not a clause in the specifications, Mr. Ensey, that the United States reserves the right to make alterations in the details, provided such alterations do not involve extra expense, etc?

A I referred to that.

Q As a matter of fact, did not this minor modification become necessary for engineering reasons?

A Yes sir.

Q Was it for the benefit or the interest of the United States?

A It certainly was, sir, in my estimation.

Q Did those alterations diminish the cost to the contractor?

A No sir, the cost to the contractor in those changes was increased. There was considerable talk on the work among the contractors at that time and dissatisfaction, in fact, I had myself some personal talk with them, and a little trouble several times about modifying the work, but of course, I had my instructions and I could not change them.

Q Were not the fascines that were brought on the work perfectly choked?

A They were. When I was put in charge of the work, when I first went on the work before I was put in charge of Mr. Coleson, the first work you gave me was on the brush barge, filling in the pile training wall with brush; that brush came under my personal inspection, and my business was to put a certain amount into the training wall, keep a record of what went into the training wall, see that the fascines came up to a certain measure—that was the average, and I made it my business to see that the fascines were up to specifications,

and in the construction of the mat I would not allow the use of any fascines that I considered below the specifications.

Q As a matter of fact, did not the fascines run larger than the specifications required?

A They averaged considerably larger.

Col. Gillespie:—Are you referring to the fascines delivered separately, or those built into the mats?

Capt. Carter:—Both.

Q (By Capt. Carter) Were the fascines made into mattresses on the work when you came there?

A Yes sir.

Q Is it not possible for any intelligent inspector to properly examine fascines when they are on barges, whether they have been made into mattresses or not?

A Yes sir. When I would sink a mat, the first thing I would do would be to take a sounding over the mat carefully to know the thickness of the mat, and I would look with

a great deal of suspicion on any inadequacy in the height of the wall.

Q Could you not by examination before it went into the work tell whether or not it was properly made?

A Any proper examination would reveal any imperfections in the mat.

Q Afterwards you would take a sounding?

158 A Yes sir. I would go out and get on the ranges, stretch a wire and take the distances on that wire from a mark.

Q What was your object in sounding?

A To test the progress of the wall. Very frequently in heavy weather, when sinking a mat, after the mat would disappear from sight, you couldn't tell whether that mat got on the wall or not; until we ascertained that beyond question, there was no credit given to the contractor for the work, and the rise of the wall was indicated by those soundings.

Q When you were there on that work, on that training wall down there, what was the result of weighting each layer of the mattress with stone?

A The wall was on soft bottom and very frequently that extra weight, any unusual weight on the wall, would cause the sinking of the mat into the bottom. I remember it became a problem in my mind and in Capt. Carter's to design a mat that would not sink into the mud; in other words, to get the altitude, to get the height, without any more weight than would be necessary to keep the mat in position, and after that we used a double course mat and a single course mat.

159 I think I went to Capt. Carter's room at to confer with him on the progress of the work and he was on the work sometimes twice a day.

Q Do you not remember, an officer of engineers, my superior officer, who inspected that work and was satisfied with its progress?

A I remember that case, it was the visit of Col. Craighill. He stood on the decks of the Angler, and saw me build that mat. I had no idea he was there or any where in the neighborhood. He saw me sink it, and I sank it exactly as I always did. I heard his remarks, and they were very favorable to the work.

Q (By Col. Gillespie) Whereabouts was that work?

A The training wall that I refer to is at Venus Point, somewhere near the neighborhood of the lower flat.

Q How far is that from here?

A I suppose that would be nine or ten miles.

Q You say that Capt. Carter would go down there twice a day?

A Capt. Carter would come down the river twice a day occasionally, sometimes. Capt. Carter came down the river one time and some one had tied one of the barges, against orders, to some of the piling recently driven, and
160 a gale struck them and pulled the piling out, and when

Capt. Carter came along, he had me have the pile driven over again. I investigated that wall to see if it was according to the specifications; I spent two days on that work and I gave the contractor no credit for it. I found so much carelessness in the construction of the wall, that I made a report of it.

Q Who was the inspector in charge of it?

A I believe his name was Hale (or Hill).

Q Was that replaced at the expense of the contractor?

A Yes sir.

Q Had you not orders to see that the specifications were carried out properly, the work done properly, and allow no favors whatever to the contractors, except what could be properly shown to them?

A Those were my orders.

Q Was not that the general understanding on all the work?

A It was. That was what I gave my inspectors, they all understood it.

Q Do you know as a matter of fact that every one on the river, every one on the work, understood it the same way?

161 A Yes sir.

Q Do you know that if any man had been suspected of showing the slightest favors improperly to the contractors, he would have been dismissed immediately?

Q Were not my instructions as follows, see whether you remember it or not, "I want this work carried on properly according to the specifications, but if any contractor can devise,—?

Major Adams,—I submit, the proper way to ask the question is to ask him what his instructions were.

A My instructions were, as well as I can remember them, to the effect—I had my specifications furnished me—that I was to confine myself to those specifications, with such exceptions as any complication on the work might cause. You under-

stand how hard it is to be iron-clad in following the specifications, as conditions may arise under which to adhere to the specifications rigidly would be impossible. With those exceptions I was to be governed entirely by the specifications, except that should the contractor himself devise any scheme by which the work could be properly and adequately carried on in a manner that would afford the same lasting result 162 that the specifications called for, I should let him do it.

Q Were you permitted to make any change whatever from the iron-clad specifications without my permission?

A No sir.

Q If any change was made, did it from your knowledge and experience as an engineer, afford any benefit whatever to the contractor?

A No sir, it did not.

Q Did it afford any benefit to the United States?

A Yes sir, in every instance where a change was made, it was made with a view to benefit the work of the United States.

Q Were those changes radical? or were they minor changes, such as any intelligent engineer could make?

A I think they were of minor importance, and made very little difference. They were simply matters of detail. The main specifications, the main work, was carried on so far as I could see, I know it was in my department, absolutely up to the specifications.

Q (By Col. Gillespie) Now did you ever permit any departure, did you ever feel that you were at liberty to allow a contractor to do anything not specially provided for in the specifications?

163 A No sir, I would not make any changes without seeing Capt. Carter and submitting them to him. There were no changes made, except doubling the courses of mattresses, which is a very sensible thing to do, in my estimation. The main point was to get the mattress in the water and settled, and avoid the expense of stone and the danger of overweighting and pushing the mats into the soft mud.

Q Was there any danger of not having weight enough on the wall?

A I don't think so.

Q (By Capt. Carter) Was there any danger of having too much weight on the wall?

A Yes sir. Part of that wall was built in about thirty feet of water, with a heavy tide and stream and an unusual

tide running over the top of such a wall, would have a tendency to turn it over if it was weighted too heavy. Not only that, I am speaking now of the top weight, but it would tell most disastrously on the wall if the weight was sufficient to push it into the mud.

Q What would be the effect in such a case on the mat?

A I think the weight should be distributed evenly
164 through the wall, with a reasonable exposure, but I think a wall that was heavily capped on top with rock, in such a case it would over balance and have a tendency to turn over.

Q (By Major Adams) What was the width of this wall, thirty feet?

A I think the width was about ninety feet, I am speaking from memory. My instructions were to make the slope one and a half to one.

Q (By Col. Gillespie) You didn't heavily weight it, fear- ing to overturn it?

A We sank every mat, we sank it securely anchored. The idea was to get the mat down, and not put too much rock on it for fear of sinking the mat in the mud.

Q (By Capt. Carter) You can run a pole down there thirty or forty feet by hand?

A Yes sir.

Q Is not the bottom of the Savannah river generally soft?

A Yes sir.

Major Adams:—Had you not better get the information from the witness, rather than to inform the witness what you want?

The Witness:—That is the point I was trying to establish.

165 Major Raymond:—This is not a court. I would like to have Capt. Carter permitted to present his defense as he wishes.

Q (By Captain. Carter) Do you know of any instance whatever, or have you ever heard of any instance whatever where an inspector has been permitted to unjustly favor any contractor?

A No sir.

Q What would have happened if an inspector had done that?

A He would have been removed at once.

Q Were you familiar with the instructions given to carry on that work while you were here?

A I was.

Q Were you not associated with other inspectors down the river, and did you not have other inspectors under your charge?

166 A I think I had four assistant inspectors under my charge.

Q Was there much mattress work being done except what was under your charge?

A There was none done. I superintended the work myself. I sank every mat with one exception. There was one mat that I didn't personally sink. That happened this way;—Capt. Carter came down the river one day—he saw it, I had instructed one of my sub-inspectors to personally superintend the sinking of the mat while I went below to inspect some tide gauges, and Capt. Carter came there and found no one there to superintend the sinking of the mat. Our instructions were to keep an inspector there; in fact, I myself would be at the mat and personally superintend the building of it and see every length of it as it was built, and I would sink the mat myself, as I was better acquainted with the ranges and in my capacity of engineer I could locate the ranges, and could tell whether it was off line. I was instructed to keep my eye on the mats myself and see to the building of them and the sinking, which I did, as I say with this one exception. Capt Carter came down the river and I was down the river looking at some gauges, comparing them, the tide was at a certain stage, and I left some one there 167 to attend to it.

Q Were any mattresses paid for ever that were not favorably reported on by the inspectors as being sunk according to the specifications, properly?

A Not that I know of.

Q What were the instructions concerning deductions what were the instructions concerning the work in case it did not come up to the specifications, or was not properly done?

A My recollection is that my instructions under those conditions were to make no allowance at all, therefore—I suppose no allowance was made. If I sunk a mat and that mat was off line, and did not yield its quota to increase the vertical height of the wall I gave no estimate.

Q Suppose a mattress fell below the specifications in the method of construction?

A I would not have sunk it.

Q Were not those the general instructions and were they not generally obeyed?

A They were, sir.

Q (By Major Adams) Have you any means of knowing what was paid for?

168 A That point struck me when Capt. Carter asked the question. I have only, of course, general means. The estimates were made from my reports, and I know that when my reports did not include certain amounts of mattresses, for instance—that the contractor had put down there, they would come to me and want to know why I did not give them credit for them, and I referred them always to headquarters. By that way I know. I have simply only that means of deciding whether they were paid for or not. It stands to reason that if a contractor were paid for so many feet of mat, he would not come and want to know why he was not paid for it. That is the only way I have of finding that out, simply by deduction.

Q (By Capt. Carter) Were the records made up by the clerical force in the office?

A Yes sir.

Q You don't know anything more than that you simply saw that the mattresses and fascines were built according to specifications, that the work was properly done, and reported if every thing was correct?

A That was the extent of my work. I had nothing to do with the estimates or anything of that sort. I simply
169 saw that the work was carried on according to the specifications, and made a corresponding report to the office.

Q (By Col. Gillespie) Did I understand you to say that nobody was at the place where the fascines were made?

A I was instructed—

Q From your personal knowledge was any one on the mattress field when those mattresses were made and delivered ready for sinking?

A No sir, I made them myself.

Q Were the fascines made?

A The fascines were brought down on barges and I made the mattresses.

Q The fascines were made and delivered and the contractor made the mattresses under your supervision?

A Yes sir.

Q (By Capt. Gillette) You stated first that you were instructed to carry out the construction strictly according to specifications. Do you mean by these three types described and the fascines described in paragraph 40. Do you know that the fascines in paragraph 40 are from sixty to one hundred feet long; did you carry that out?

Capt. Carter:—The specifications say twelve to fifteen 170 one hundred feet.

Capt. Gillette:—I believe you are right about that.

The Witness:—I have got to refresh my memory (referring to specifications). The fascines here are described as made of "live brush of cedar, water oak, myrtle, sweet gum, or any other variety of wood approved by the engineer officer in charge. The fascines will be from twelve to one hundred feet in length and must be compressed rightly by an approved form of choker, to a diameter of nine inches, at intervals of two feet, where they must be bound firmly with wire or tarred rope of approved strength." Of course, these fascines were built in such lengths as the size of the mattress we made required. My recollection is that the right length of the fascines was fifteen feet.

Q The question I asked you was did you carry out those specifications. The specifications prescribe three types of mattress; there is a prescribed method of making the fascines, and there is also a general provision for variation from the prescribed types. Did you carry out the specifications as prescribed, or according to the variations for which you got instructions?

A I got no instructions to make any variation.

171 Q Why did you weave those mattresses with wire?

A We wove the mattresses with wire protecting the bottom of the training wall.

Q That was not in the specifications?

A That was not in the mattress work, that was simply to protect the bottom of the training wall.

Q How did you report it, as mattresses or cubic yards of fascines?

A I don't remember now.

Q What do you think?

A I think we probably reported it as mats.

Q Then you put in something not prescribed in the specifications. did you or did you not?

A I can't say that it is not prescribed in the specifications.

Q Look at them?

A I don't know whether I can find it here or not. The point was simply—

Q I am not asking you for engineering questions, I am asking you simply for facts, are those prescribed in the specifications?

A I could not say whether they are or not.

172 Q Well, they are not? The specifications in paragraph 39 speaks of the brush being trimmed, was it trimmed?

A Yes sir, it was. I consider the fascines that I used on that work to be absolutely up to those specifications.

Q "They must be compressed tightly." Were they compressed tightly?

A They were.

Q How do you know?

A I could tell by the way they were handled. Brush put up loosely in fascines would not stand the rough handling that they got."

Q They say, "by an approved form of choker." Was an approved form of choker used?

A I was not on that inspection.

Q You don't know anything about that?

A No sir.

Q "To a diameter of nine inches." Were they choked to a diameter of nine inches?

A I am very sure that they were.

Q I thought you testified that they sometimes were twelve to fifteen inches, that they averaged fifteen inches?

173 A I measured some that measured as much as sixteen inches.

Q Were the generality of them choked to nine inches?

A I think they were nine inches or better.

Q I did not ask you whether they were "nine inches or better"?

A That is getting down rather fine to say that each separate fascine was choked to nine inches.

Q You testified that the bulk of them were fifteen inches?

A I never intended that, sir.

Q (By Major Adams) Have you had any connection with the work in this district since 1893?

A Yes sir, I did dredging work in Jekyll creek and gauge work, I believe in 1894, under Mr. Giesler.

Q Did you do any other work?

A No sir.

Q Have you had any opportunity of refreshing your memory in regard to work on the Savannah river, since 1893?

A None at all, sir.

Q (By Capt. Gillette) You spoke of the advantage of putting one mat on top of the other, that the top mat-174 tress would help sink the bottom mattress?

A The mats were made of green brush and consequently were heavier than dry brush; in building that training wall it was the chief aim—I was closely instructed and shown just the design that was to be gotten at, and the scheme, so that I could become familiar with the idea itself, and could do my work intelligently. That idea in that training wall, as I understood it, was to get the height and such a weight as would make it stable, but would not drive it into the soft mud bottom. If we could sink three to five mats at once it would save that much time in sinking.

Q After you got down ten feet under water, how would a mat on top help the others sinking?

A When you get a mat down ten feet under water its a very simple matter to keep it going. It seems very plain that if you put one mat on top of another that it would take less weight to sink the two than to sink the one, and those mats were very heavy.

Q Does it weight it after both are submerged?

A No sir, it does not.

Q Was the bulk of the work that you did according to the printed specifications, or according to the variations allowed by those specifications?

175 A The variations, I will say, were just in minor details, according to my best knowledge, no favors were allowed and not the slightest variation in any way. I was said to be a very strict inspector by the contractors, and Mr. Coleson, when he put me on the work, told me that I was to accept no favors from the contractors and never to show them favors unless I could do so without in any way injuring the work; not to act the bear with the contractors or work any hardship on them because I could do it, and under no conditions to ever accept any little token of esteem. The contractor told me himself that Mr. Coleson carried on the work at Fernandina so conscientiously to himself, to the office and to all the contractors, and that at the same time the contractors appreciated his work, and when they wanted to compliment him after it was all concluded satisfactorily, he

declined to accept or take any notice of any appreciation that they would show him as being due him, as he had simply done his duty under Capt. Carter, strictly. That is exactly what I did in every piece of the work.

Capt. Carter:—Mr. Coleson is dead.

Major Adams:—Did Mr. Cooper succeed him?

A Mr. Ensey succeeded him. Mr. Coleson died of 176 scarlet fever after a few days' sickness, and then I thought of bringing back Mr. Cooper and sent for him and brought him back, feeling that Mr. Ensey's experience on river work had not been long enough.

Q (By Capt. Gillette) This system of building mattresses on barges and launching them, when did that commence?

A That was the way I built the first mat.

Q Launching it from the side of a barge?

A That was the way I did.

Q Was the system of launching from the side of the barge, the mattresses being built at the camp, started when you were here?

A No sir, they were just built on the barge and launched as we built them.

Q (By Col. Gillespie) Do I understand you to say that you built three mats on the barge at once?

A We built them right on the barge.

Q You don't remember the specifications now, the details of them probably, but do you not remember this, were you permitted to build any mattress either by the iron-clad, so-called, specifications, the rigid type, I mean, mentioned in there, or by a provision in the specification which permitted the engineer in charge to modify that type slightly, outside of his modification from that rigid type, did you build anything?

A No sir.

177 Q In the course of the work were there any modifications from the rigid type that were not for the interest of the United States?

A In my estimation they were for the interest of the United States.

Q Were there any modifications from the rigid type, the alteration of which you say were authorized by these specifications, which were for the benefit of the contractor?

A No sir.

Q (By Col. Gillespie) Do you think you would have been

authorized by the specifications to have wholly omitted all of the mattress work?

A I would not be authorized to make any change in any of the work without instructions from Capt. Carter.

Q I thought you said any change could be made if the integrity of the work was not affected?

A I think you misunderstood me. I said that there are times when you can't follow instructions, there are circumstances occasionally when it is impossible for you to get instructions.

Q You mean emergency work?

A Yes sir. In those cases you have got to use your own head.

Q What would you do in such cases?

A Use my own judgment and do the very best thing I could for the good of the work and the interest of the United States, and make a written report.

Q (By Capt. Carter) Would you be authorized to do anything under these modifications except what was approved by the officer in charge, except in cases of emergency, which would be reported afterwards?

A Only in emergencies.

Q Was any mattress work recommended for payment except such as in your judgment was for the best interest of the United States and according to the provisions of the specifications?

A No sir.

Q Were any recommended by you, or would any have been recommended by you, which, even if they had been for the interest of the United States, would have been greatly 179 for the interest of the contract?

A If they were for the interest of the United States and the work was well done, I would recommend it.

Q Without recommending a certain deduction?

A I would recommend any deduction that seemed to be reasonable.

Q (By Col. Gillespie) Did you ever build one single mat according to any one of the designs mentioned in these specifications?

A We built them according to the third design.

Q You followed that absolutely without change?

A I think so, sir.

Q Just read the designs (witness refers to specifications)

A Yes sir, that was the design.

Q Were your instructions to build, and did you build under your instructions any one of those designs?

A Yes sir.

Q Absolutely according to the specifications, and without change?

A Yes sir. That third design is the mat I used.

Q Absolutely?

A Yes sir.

180 Q Didn't I understand you to say that you were authorized to make changes?

A Not in that mat, sir. We did make changes in the mat used in the protection of the bottom of the training wall.

Q Then I understand you to say absolutely that you built while you were there, and while it was under your supervision, the mattresses according to design No. 3, without variation or change?

A Yes sir. Those were my instructions to use that design as nearly as I was capable of doing, and I used it.

Q Did you get those instructions in writing?

A Yes sir. To the best of my knowledge there was absolutely no variation from the design.

Q (By Capt. Gillette) Can you produce the writing you got?

A I hardly think so.

Q Do you think you could find it if you were allowed to go through the files of the office?

A I don't know whether it is in the office. I got my mail down river, the mail I had at that time. I have got at home quite a large bundle of official letters, and if I thought
181 they would have been needed, I could probably have had them here. It would necessitate my going for them myself several hundred miles, and that would be out of the question.

Q You remember positively that you got such official letters?

A I received those letters at intervals. Whenever there was any change on the work, or whenever any new work was contemplated, I was written a letter of instructions that went into matters of detail, and afterwards I would talk it over with Capt. Carter, so as to get at the gist and bottom of the whole scheme.

Q (By Major Adams) Who were those letters from?

A Capt. O. M. Carter.

Q They didn't come through the Assistant Engineer?

A No sir.

Q (By Capt. Gillette) You have received letters giving you specific instructions, and you built those mattresses strictly according to specifications of the third design?

A Yes sir.

Major Adams:—I should like to have the office copy of those letters produced.

Major Gillespie:—Capt. Gillette, you will furnish the 182 the board with copies of the letters which Mr. Ensey says he received from Capt. Carter?

Capt. Gillette:—I can find no such letters.

P. J. KEATING, called by Capt. Carter:—

Q (By Capt. Carter) You have been inspector for me on some of the work in Savannah harbor, have you not?

A Yes sir.

Capt. Gillette:—Give dates?

A I am not able to do that off-hand. I began in the capacity of boatman.

Q (By Capt. Carter) Give years?

A In 1893, I think I began. In March 1894, I think it was, I was placed in charge of that work. I was in charge of that, the pile work, until June 18, 1894, I think it was. My title was "boatman" all the time.

Q Have you not been employed in other capacities since?

A Yes sir.

Q Do you remember any instance when I thought that your supervision of the work was not as rigid as I thought it should be?

183 A Yes sir, I do.

Q Do you remember what I said to you?

A Yes sir, I was reprimanded by you on one occasion; that was the only reprimand that I received.

Q Were you not instructed to disallow the work which I thought had not come up to the requirement, and did it not have to be replaced by other work?

A Yes sir.

Q (By Col. Gillespie) What was this; bring it out?

A I was ordered to repair some pile work on one of the spur dams; some of the piles forming the clusters at the end of the spur dam, were damaged, old and decayed, and I was

ordered to replace the piling. Mr. Cooper, the Assistant Engineer, told me to replace only the piling that was absolutely necessary, and some of the clusters had been struct by the steamers and knocked crooked, which I was not ordered to replace. This piling was out of line, and when I drove the other piling down I drive them deeper than they really should have been, and it made them look bad, and Capt. Carter reprimanded me for it. The work didn't look well at all.

Q Didn't I order you to have the contractor repair it at his own expense?

184 A You ordered him to repair it, Captain, but about repairing at his own expense, I really don't remember.

Q Were you permitted to show any favors to contractors?

A No sir, none at all.

Q Did you try to do your duty properly?

A Yes sir.

Q Were you not at one time, I think in 1895, sent to inspect mattresses at the mattress camps?

A Yes sir.

Q Did you not report that they were being built so well that you were relieved from that and brought back?

A Yes sir.

Q You remarked afterwards that they were built so well that you had worked yourself out of a job?

A Yes sir.

Q (By Col. Gillespie) Did you have a copy of the specifications with you?

A No sir, I was instructed by the Assistant Engineer just what was required.

Q Who was the Assistant Engineer?

A Mr. Cooper.

Q Did he give you a letter?

185 A No sir, I received a letter from Capt. Carter to call on Mr. Cooper at his house, and there I received instructions, verbally.

Q This was in 1895?

A I think it was the 17th, of June, 1895.

Q That is two years ago now?

A Yes sir. I have all my letters at home and I can tell you just to a day.

Q What were you instructed to do when you went to the camp?

A I was instructed to see that those mats were built better than they had been building them.

A In what respect?

A They were built of very shabby, poor material. Mr. Cooper said that the mats going down on the river then had a good many holes in them, and that they were honeycombed, and told me to see that the brush was laid up close together, and that they were made of better brush and made better than they had been making them.

Q What did you go there specially to do?

A That was it, to superintend the construction of the mats.

Q Did they make better mats than they had been making?

186 Yes sir.

Q (By Capt. Gillette) How long did you stay there?

A Six weeks, I think, from the 18th, of June to the 26th, of July.

Q (By Capt. Carter) Were the mattresses satisfactory to the Assistant Engineer when you returned?

A I suppose so, I heard no complaints.

Q Did you report that they were satisfactory?

A Yes sir.

Q Satisfactory according to the instructions you received from him?

A Yes sir.

Q (By Capt. Gillette) Satisfactory to whom?

A Mr. Cooper.

Q How do you know?

A I only say that there was no complaint made, that's all.

Q (By Col. Gillespie) What do you mean by "honeycombed?"

A I mean that where the ends of the brush came together, they were not lapped properly, and there was a space between them. in fact, a man could crawl down between the different layers—I know that is what Mr. Cooper told me 187 that he had seen a man crawl down between the different layers. The mattresses were built one layer on top of another. When I went out there I saw that the layers were better lapped.

Col. Gillespie:—Capt. Carter, I understand that the mattresses were put down at this time in five courses?

Capt. Carter:—Mr. Cooper reported that the mats were not

being built according to specifications, and I sent this man out there.

Q (By Col. Gillespie) There were several mattresses, one on top of the other.

A Yes sir.

Q (By Major Raymond) I did not quite understand what you meant when you said that a man could crawl in between the layers; was one mat laid upon another?

A Yes sir.

Q Was that because the brush was crooked, so that the mats were not horizontal?

A Because they didn't come together at the ends; the bundles didn't come together at the ends quite. Two, three or four layers were placed across each other, and under each layer of brush a man could crawl down.

188 Capt. Carter:—Some statements have been made here about my inspectors, that they did not have instructions to carry out the specifications. I simply want to prove that those statements are not true by these other witnesses, who I think heard me give those instructions. I don't know whether it is worth while to bring them or not.

Col. Gillespie:—Anything you find necessary, Captain, the board will hear.

Capt. Carter:—Something has been said about that Florida rock. I want to show that those specifications contemplated exactly the kind of material that is being used on the work, and that all bids were made with that understanding.

Capt. Gillette:—What do you mean by the specifications "contemplating" Florida rock? I do not find it in the specifications.

Capt. Carter:—I mean by that that that was the idea in my brain. That may mean something else to another man, but in order that I might be certain that people understood them, I explained what that meant to the bidders, so that there could be no misunderstanding. I took a sample of the Florida stone and had it in my office and sent it down to Mr.

Rowlinski, a druggist here, to have its specific gravity
189 determined, and it came back to me marked "2.4". Then

I put that in the specifications, and it never occurred to me but that that was about the average. It is very likely that specific gravity may have fallen below this; if it does run below that it was carelessness to put it in, but I wanted

nothing but soft stone, and everybody that bid on the work understood it, and their prices were based on it.

Capt. Gillette:—Did you contemplate using Florida stone at Augusta?

A No sir, I didn't.

Capt. Gillette:—Your specifications are precisely the same, 2.4.

Capt. Carter:—Well, that is an error. I contemplated using the stone that is within a few hundred yards of the work at Augusta.

Capt. Gillette:—How were they to know that those specifications contemplated Florida stone?

Capt. Carter:—It was my custom in preparing those specifications—I see now Capt. Gillette, that of course, they are capable of misinterpretation, but that didn't occur to me. When I came here, we had certain specifications for the work and when I found any difficulty with the contractors, I would make a pencil memorandum of that, and make the changes 190 that I thought necessary the next year, and in preparing new specifications I used the old specifications with such changes as I had noted, and in this way the specifications were made. Little changes in that way were made, and there may have been errors. I now see that they are capable of misinterpretation.

Capt. Gillette:—Was any of this Florida stone used on the public works at the time you came here?

Capt. Carter: No sir, it all came out about the time they found the phosphate rock in Florida.

Capt. Gillette:—Have you used any New England stone since the discovery of the rock in Florida?

Capt. Carter:—Yes sir, I have allowed them to use ballast rock. We used to use granite, and I was notified that it lying there as shiny and smooth as at the time when it was put down.

Col. Gillespie:—Was there any development of quarries in Florida upon which you could rely to get this stone?

Capt. Carter:—Yes sir—of course, there was no development of quarries, that stone was picked up over the ground in nodules here and there. It is a peculiar formation.

Col. Gillespie:—Returning now to your explanation of the 2.4, I notice here that you specify 2.5, and then change 191 to 2.4.

Capt. Carter:—I sent this piece after—

Col. Gillespie:—Where did you get that 2.5?

Capt. Carter;—That I don't remember. I suppose I must have taken that 2.5 from the specific gravity of some piece of stone. My custom was to send pieces of stone and have them ascertain its specific gravity. It was the custom when I came here to allow claims of contractors for doing work that was not in the specifications, and I wanted to keep that down, and I put a number of things in the specifications to guard against it, so that the contractor could have no claim on the government, because I could compel him to do certain things. I didn't want to use that as a strict basis, but simply so that I could use it if the contractor wanted to put in something that was not suitable.

T. J. DANIELS, called by Capt. Carter:

Q (By Capt. Carter) How long have you been employed on this work here?

A Since 1882.

Q From time to time have you been inspector on the work?

A Since, 1893, I think sir.

192 Q Before that time, had you seen anything of the work in this district?

A Passing up and down the river, I did.

Q But not as inspector?

A Not as inspector.

Q When you were inspector on the work, was a copy of the specifications furnished you?

A Yes sir.

Q How did you understand that the fascines used in the work compared with the specifications?

A They were up to the specifications at that time.

Q Were you instructed afterwards in any way, or in any way given to understand that those fascines did not come up to the specifications?

A Afterward, when Capt. Gillette was in charge, he told me that the mats were not of the type described in the specifications.

Q Prior to that time did you understand that the mattresses were being improperly built?

A Yes sir.

Q You don't understand me, that they were being improperly built?

A No sir, they were being built according to the 193 specifications while you were in charge.

Q Were there any difference in the interpretation of the specifications after I came here, from what there was before I left?

A Mr. Cooper told me to build the mattresses according to the specifications.

Q During that time did Mr. Cooper suggest to you that the mattresses were not built according to the specifications?

A No sir.

Q Were they built according to the specifications?

A I believe it was, the work went on just the same.

Q Have you received any orders about allowing favors to contractors?

A You told me at one time to see that the United States got their full benefit, and not to allow them any privileges until the United States got their benefits.

Q Were you ordered to see that the work was done according to the specifications?

A Yes sir.

Q Were not those instructions general?

A As far as I know, yes sir.

Q Would you have allowed any benefit you considered improper to a contractor?

A No sir, I don't think I would.

Q Would any of the inspectors on the work, so far as you know?

A Not so far as I know.

Q What would have happened, do you think, if I had suspected that they were doing anything improper?

A I suppose you would have discharged them.

Q Was that thoroughly understood?

A I could not say about others, but I was always under that impression myself; I speak for myself and not for anybody else. I consider that that was understood by others as well as myself, they were as scared of their position as I was.

Q Scared if you didn't do right?

A My head would have been cut off if I didn't do right.

Q The specifications prescribed a definite specified design,

or three or them, for building mattresses when there were minor modifications in those designs, were they for the interests of the United States in your opinion, or not?

A While you were here I believe your mats were better than they are now. I believe the scraggly bundles 195 are better than those smooth bundles.

Q Were the fascines always properly choked?

A As far as I know, they were. They are right now and will show for themselves. Of course, some of them would work a little loose. You will find loose ones right there now.

Q Would it have been possible or practicable to have gotten fascines for the construction of this work at any reasonable cost with perfectly tight chokers that will stay right until they go in the work?

A No sir, I don't think so. The wood is green, it lays on the bank untrimmed.

Q The specifications require the mattresses to be at least nine inches choked, to be at least nine inches in diameter?

A Yes sir, the bundle.

Q Did the contractor, as a rule, or ever, on an average, put in any more than that amount of material?

A I think he did.

Q Did he put in any more?

A So far as I know, those bundles measured more than those do now.

Q Have you ever heard Mr. Cooper say that all the 196 work on the Savannah river was first class and properly done?

A I believe I have, but I would not swear to it. I think that I have heard him say it.

Q When?

A I could not say.

Q Has that been the universal feeling as expressed at various times?

A I have not heard anything to the contrary.

Q (By Col. Gillespie) To whom did Mr. Cooper make this statement?

A I don't know.

Q It was just a remark?

A Yes sir, it was just a remark. I believed it. He evidently said so or intimated as much.

Q (By Capt. Carter) Was there anything in Mr. Cooper's manner to indicate to you that he thought that the work was not done properly?

A No sir, not to me.

Q His statement was not made to you lately?

A My wife expected to be confined in August, and I asked if I could get a month off in August and he told me to make an application to Capt. Carter, and it would be all right, that

I could have as much time as I wanted. I went to the 197 doctor, and he told me it would be between the twelfth and the twenty-second. On the night it occurred or previous to that, he said to me that he would attend to my work. On the 9th, on the morning of the 9th, I went down the river and got a telephone message to the quarantine station, that my wife had been confined, and I came into town. He got that same message. I came to town and went to the office of the Atlantic Contracting Co., and tried to get him, but I could not get him. On Friday morning I saw him and he said, "This is the devil on me." I said I would like to have two weeks off until she was out of bed. He said that I had better come back to work as soon as the ten days were up, which was on Tuesday. I said that on Tuesday morning I would be there to attend to business. On Tuesday morning I got a message over the telephone from Mr. Cooper Capt. Gillette said to report to him. Mr. Cooper's message was that I must report for duty at once, which I did, and that was the first time that I knew, or that I heard that the mats were not built according to specifications.

Q Prior to that time you always understood that the mats were built according to specifications?

A Yes sir.

198 Q There is a question about some stone that was put on the mattress work; I ordered the amount of stone increased a little bit, and you spoke to me afterwards about permitting it to go in in smooth water. Did I give you permission to allow the mattresses to be sunk with less than two hundred yards?

A You told me to allow them to use the least amount they could, but that it was at the contractor's risk until they put down two hundred yards.

Q I did not change the order about the two hundred yards?

A No sir.

Q Did I tell you to report that to Mr. Cooper?

A I reported it to him.

Q When instructions were given to you or to any sub-inspector, the rule was that you were to report it to your superior officer?

A Yes sir. He was my superior officer and I reported it to him.

Q Do you remember whether I diminished the amount of stone?

A No sir, I do not. It never has been less than one hundred and thirty yards. I took on myself to sink two mats 199 of seventy-one yards apiece.

Q Were my instructions concerning the amount of stone modified, except to allow the work to progress rapidly, and did that permit the contractor to put in anything that was at the government risk?

A I understood that I was to allow the contractor to put in anything, but it was at his own risk.

Q Did you ever allow any contractor to put in less than what was authorized, except that it was at his own risk until the amount of authorized was put on?

A I informed Mr. Gaynor of that fact, that it was at his own risk. I think Mr. Gaynor can verify my statement.

Q When there was any difficulty concerning the mattress courses not being built properly, or being lost in sinking, what were your instructions?

A To make a deduction.

Q Didn't you do that?

A I did.

Q Were those deductions satisfactory to the contractor always or not?

A We had a fuss with a foreman. One time he claimed twenty one bundles that went adrift, and I reported the matter to Mr. Cooper. I has a fuss with Mr. Gaynor too.

Q (By Col. Gillespie) What set them adrift?

A The sea broke them up.

Q Before you used them?

A Yes sir.

Q And for that reason you recommended a deduction?

A I recommended a course and he claimed only twenty one bundles.

Q (By Capt. Carter) So far as you know were there any changes in the requirements of the fascines; were the fascines constructed as well at the close as at the beginning of the work; was there any change in the fascines?

A Not one.

Q I notice that you make a statement here that the fas-

cines used on the work during my administration were not up to the specifications. Was that because you thought at the time that they were not up to the specifications, or was that because you got the impression from some one else?

A I got the impression that they were not up to the specifications, that the the bundles of brush we spoke of as fascines were not fascines, and that the bundles we are using now were government fascines.

Q Who described (?) the present fascines?

201 A Mr. Cooper, he was the only man I received instructions from.

Q (By Col. Gillespie) To make that query intelligible, were you guided by what you thought the specifications meant, or were you guided by the interpretation given them by Mr. Cooper; were you governed by Mr. Cooper's instructions?

A He was the assistant in charge and I was subject to his orders.

Q Did it ever occur to you during this construction that there was any difference between the specifications and the instructions Mr. Cooper gave you?

A I supposed that the specifications were carried out.

Q Were you guided in the construction of the fascines by the specifications?

A Yes sir.

Q But you say now that Mr. Cooper gave you instructions?

A No sir, I did not say that Mr. Cooper gave me instructions, I didn't say that anybody gave me instructions.

Q During the construction of those mattresses here, going back to 1893, for two or three years, you had the specifications in your hand?

202 A I did.

Q Did you guide yourself in the construction of those fascines by the specifications, or did you govern yourself by the instructions received from Mr. Cooper?

A If so, I thought they were right. I thought they were according to the specifications previous to this.

Q Did Mr. Cooper give you any instructions when you came here?

A He was not in charge when I came here.

Q Who was?

A Mr. Coleson.

Q What instructions did he give you?

A I didn't know that he gave me any.

Q Did he carry out the specifications?

A Yes sir, what I thought was right I did.

Q (By Major Adams) What guided you in determining what was right?

A I read the specifications and carried them out as far as I knew.

Q They were rigid types of mattress construction given, the first, second and third designs, then those types were slightly modified; what do you think was the result to 203 the United States of those slight modifications at various times? (By Capt. Carter).

A I would not like to answer that more than to give my private opinion. I say that I believe that your bundles of brush are the best.

Q You called them fascines before?

A Yes sir, previous to your leaving they were called fascines, reported as fascines, and passed the assistant engineer.

Q (By Capt. Gillette) You say that you think the bundles of brush are the best?

A I believe the brush is the best of the two.

Q For what purpose?

A For catching the sand or mud.

Q (By Capt. Carter) You have been on the work for sometime?

A Yes sir, I have been on the river all my life.

Q Do you think it is any advantage to the contractors in building mattresses to build several courses at a time?

A I don't know that there is. They have to have more plant.

Q When it was desired to build those mattresses several 204 courses at a time, do you remember anything that occurred between yourself or the rest of the inspectors and the contractor's foreman?

A No sir, I do not.

Q I mean in regard to whether he wanted to do it?

A He always complained of any change, and when we started to build those mats there was that kick. Of course, he had to make that kick. They had to have that much more plant so they could build so many more linear feet.

Q You say they had to have more plant; how much more?

A He would have to have extra barges.

Q How many extra barges?

A I don't know, and he would have to have those extra gins.

Q Why did you say the plant would be increased?

A He would have to have the gins as well as the barges to carry the stone.

Q When those orders were given as to the amount of stone were given by me to you, would you consider it your duty to report the matter to your immediate superior officer?

A Repeat that.

Q When I gave you orders or orders came to you direct from me, would it consider it your duty to repeat them
205 to your immediate superior officer, the assistant engineer?

A Yes sir, I did it almost every time.

Q (By Capt. Gillette) Did you write that letter?

A I did.

Q (Handing witness letter, dated Tybee Island, August 18, 1897) which has been read in evidence).

Q Were you furnished information as to the contents of this letter of June 12th, 1897, to the Atlantic Contracting Company, signed "O. M. Carter," copy of which was sent to Mr. Cooper? Were you given instructions by Mr. Cooper?

A Previous to Capt. Carter coming down, he told me that two hundred yards were to be placed on the mats, otherwise nothing farther.

Q That was shortly before Capt. Carter left?

A Shortly after he left,—no, he had not left at that time.

Q You testified that Capt. Carter came down and told you to put them in with less than that number of yards, but that the contractor should be responsible?

A Mr. Cooper came down on the work and said to me,
"Mr. Daniels, if you get good weather, you can use two
206 mats a day. Get them down."

Q That was before you were informed about this letter?

A No sir—just about the same time or previously.

Q Did you tell the contractor that it was to be at his risk?

A Yes sir.

Q Did you mean that if any were lost, they were not to be paid for?

A Yes sir.

Q After a mattress went in you reported it to the office?

A Yes sir.

Q You report them, presumably for payment?

A Yes sir, I report them to the assistant engineer, he is the man in charge.

Capt. Carter:—There is one point which my inspectors knew nothing about, and that is this, when the retained per cent due the contractors, was enough to protect the United States, it was the custom to pay the contractors up to the end of the month, and then if any losses took place afterward, I had enough money of his to make him make good those losses at the end of the month. One month the work would be all right, and the next it might be reported injured, and it would have to be repaired at the expense of the contractor.

Capt. Gillette:—If the mattress was destroyed from any cause, how did you manage to correct it?

Capt. Carter:—I corrected it in this way,—I always had the contractor to put in a mattress to replace any that was lost and that were not put in the proper place.

Capt. Gillette:—How did you tell what was lost after it went in the work?

Capt. Carter:—By sounding and examination.

Capt. Gillette: I tried it and found it very unsatisfactory.

The Witness:—I can take a range every on any mat ever sunk. I sunk one mat short and took a range and found it.

Capt. Carter:—Those ranges are used by the pilots.

Q (By Capt. Carter) What do you believe would have happened if you had done anything improper?

A I would have been discharged.

Q If you had known of any inspector that was not carrying out his duty, would you have considered it your duty to have let me know?

208 A I was only looking out for myself; I didn't care about that; I didn't care about what somebody else did.

Q If you thought he was doing something wrong?

A I was always attending to my duty myself.

Q If you had suspected a man of doing wrong, and not injuring the government, would you have reported him?

A I believe I would have reported him. I have a book of rules which says that man's pay is according to the information he gives. I tried to observe that. I tried to get to the top notch.

A You tried to be absolutely honest and fair?

A Yes sir.

Q You showed no advantage to the contractors?

A No sir.

Col. Gillespie:—It appears from the testimony from this letter that has been read, that you required a certain amount

of material immediately put down on the work. Did you make this variation through a written order?

Capt. Carter:—I don't remember whether I did or not. It wasn't exactly a variation, it was more of an explanation. He had no authority to evade that two hundred yards. The two hundred yards of rock were required before the mattress would be accepted by the United States. The reason this was done, was because the cyclone season was coming on, I don't know that you are as familiar as I am with the conditions down in this District, I have been here thirteen years. It is very difficult to work on certain places except as certain seasons and times. Along in the fall usually there come up cyclones which tear everything all to pieces and delay the work. My object was two-fold, the first was to get the work done within the limits of the appropriation, and the other one was to rush it. Anything that I could do to rush the work and get the result quickly, I would do. It was always in my mind to do anything I could to accomplish that effect and I did it. Seeing the effect of this letter and the inspector reporting to me that the mattresses were holding up, I said "Go ahead, and notify the contractor that the mattress is at his risk until he puts two hundred yards upon it."

Capt. Gillette:—Speaking of the cyclone season, do you think a jetty safely loaded is safer than one that is not?

Capt. Carter: A jetty is perfectly safe with that amount of stone, in my judgment.

Capt. Gillette:—You expected to get that amount on 210 before the cyclone season?

Capt. Carter:—Yes sir; of course, it would be impossible to tell how quickly that will happen. I have had unfinished work stand through a cyclone, and I have had finished work destroyed.

GEORGE H. PALIN, called by Capt. Carter:

Q Have you been employed by me in the Savannah harbor?

A Yes sir, as recorder of dumping.

Q Have you had anything to do with the plant of the Atlantic Contracting Company?

A I had instructions from you several times, they were tying up the plant of the Atlantic Contracting Company to the

training walls and to new jetties, and acting under your instructions, I cut them loose on one occasion, and I ordered them away several times.

Q Have you received any instructions regarding allowing the contractors to do what was right, or otherwise?

A I had positive instructions to allow them to do nothing that was wrong at all, to make them comply strictly with 211 all the rules, and if they tied up to the jetty or there was any violation of the rules at all, I should report it instantly to you.

Q Have you ever heard that there were any other inspector who had any other instructions?

A No sir, most positively I had not.

Q Do you remember whether Mr. Cooper once made a remark about the inspectors concerning how they allowed the work to be done?

A In going down on the Violet one morning with Mr. Cooper to work, Mr. Cooper made the remark that Mr. John Hall was a man who allowed more work to be done that did not come up to the specifications. At another time in going down with Mr. Giesler, to read the tide gauges, I was speaking to Mr. Giesler about the work, and asked why they were so strict in tying up to the training walls, and he made the remark that you were so conscientious about the work coming up to the standard that the least deviation worried you exceedingly.

212 Capt. Carter:—Capt. Gillette, if you desire to ask me any more questions about the work, I wish you would do it.

Capt. Gillette:—I do not care to ask any more questions.

Capt. Carter:—I have given the reasons which I judged to be good, and I want to know why they are insufficient for you.

Capt. Gillette:—I will answer any questions you may ask me.

Capt. Carter:—If there is anything you want to know, I will be very glad to tell you.

Capt. Gillette:—I think on the Savannah river loose bundles of brush are all right, and it has made walls fairly substantial, if the bidding had been according to the work to be done, as the bidders bid on an expensive description of work, and you used a cheap work, I think it is all wrong.

You accomplished the work about as well, but you would have saved the United States enormous amounts by having them bid on what you used.

Capt. Carter:—There is where you are in error, Capt. Gillette.

Capt. Gillette:—Possibly. At Cumberland sound, as an illustration, not profiting by your lesson on the Savannah river, you asked for bids on the three exact types of mattress which were bid on before, none of which were used, and 213 which the indications are you never intended to use, and the work under the contract has been enormously expensive. The amount of jetty work down there under the present contract, has been enormously expensive, approximating \$13.50 per cubic yard; the measurement might have shown worse, if the man had gotten clear down to the top of the bottom mattress, but he could not always get there. The measurements were very much in your favor, and with the figures very much in your favor, the work costs \$13.50 per cubic yard. That is my objection to your engineering. But if even if it was good, you put in your specifications a heavy mattress and pay for a heavy mattress. While you may have given information to every contractor who sought it, yet it is customary to put such information in specifications where all the bidders can get it.

Capt. Carter:—The specifications do give it.

Capt. Gillette:—The specifications do not call for the brush work that has been constructed. Mr. Giesler has given an estimate of the cost of those things which shows what enormous prices were paid. If you did that carelessly, you were amazingly careless for a man of your reputation.

Capt. Carter:—Mr. Giesler's statement,—as to that I 214 would not say anything against Mr. Giesler; he was a good man on tide gauge work and office work, but as to estimates of cost, his opinion I don't think worth anything. As a matter of fact, so far as I can tell, from the records I have kept, and the observations that I have made since I came here, those mattresses do cost the contractor in the work sixty-five to ninety-five cents a square yard. This has been arrived at by me in two or three different ways, from bidders who have bid for a long number of years, from conversations with disappointed and unsuccessful contractors and from observations I have made in the mattress camps and on the work, both by myself and in connection with my predecessor, Capt. Bailey. The mattress work of logs in the old days

was much cheaper than brush. The method of putting in those brush mattresses is described in the specifications to the best of my knowledge and belief. I carried out this work here satisfactorily to myself, and I don't believe that there is a man living who could have done better. As to the question of my engineering, I take issue with you, and from the results I have obtained here, my opinion is probably worth something.

Capt. Gillette:—Here and in Cumberland sound?

Capt. Carter:—Yes sir. I have not attained the desired 215 result, result, because I have been ordered away. I can go back there to Cumberland sound and carry to the work to a successful ending for less than the estimate. I have never failed on any work I ever undertook, except a minor piece of work near Darien that we have not had money enough to carry through. The work that has been done on Cumberland sound is only about one fifth in cost of the total work to be done. I have been here for thirteen years and I know all the local conditions.

Capt. Gillette:—Where is Mayport?

Capt. Carter:—At the mouth of the St Johns. The statements as to this work are in the office, and I have not means to verify them, and I assume that may be the same way. Thirteen dollars a cubic yard—I must believe there is an error in that. When those mats were put down and measured I think they were about eight feet, after they had gone down, which was about what we wanted.

Capt. Gillette:—I will submit a profile to the board, showing that they average four and a half feet immediately after sinking.

Capt. Carter:—You mean in thickness?

Capt. Gillette:—Yes sir.

216 Capt. Carter:—Do you mean four and a half feet from the old bottom, or four and a half feet, in the mattress?

Capt. Gillette:—Four and a half feet in the mattress, average. An assistant you spoke of, a man by the name of Marion Twiggs made the estimate.

Capt. Carter:—That is absolutely different from his reports to me. He reported to me that there was no subsidence, but that the jetties were standing up slightly, and that the mattress averaged about eight or eight and a half feet, and that to me was a very satisfactory piece of work, and I ordered him to continue his sounding. At the time I went away, as far as I know, the sounding was being done. If it was

not, it was his duty to do it, and in the absence of any report to the contrary, I presumed that my instructions were carried out. If there was a compression of that mattress immediately after sinking to about half of what it was when it went on the work, that is unknown to me. My idea has always been to put in on that ocean bar larger mats than I put in the Savannah harbor, with the fascines closely choked and made of brush straight as can be obtained. As to that any one that knows anything about mattress construction on the South

Atlantic coast, knows that it is impossible to get 217 fascines like those used in the West; it would not be practicable; it would be foolish to attempt it. One hundred dollars a square yard could not get it.

Capt. Gillette:—The contractor told me that he would just as soon make them the way I wanted as the way you did. The mattresses at Mayport, made under the same specifications, cost about seventy to seventy-five cents per square yard, and you paid a dollar ten.

Capt. Carter:—I don't know how that happened. I have had contractors bid for mattress work at a loss. I had some made for about thirty cents a square yard.

Capt. Gillette:—How do you know that they were made at a loss?

Capt. Carter:—I don't know absolutely that they were, but to the best of my information I believe that they were. I awarded that contract because the bid was made by a responsible man by the name of Bangs. He may have done it for the same reason that railroads sometimes carry freight at a loss in order to smash another railroad. Such a bid may or may not mean that a contractor is making money. A contractor may desire to control large works, and may be compelled to lose a good many thousand dollars to obtain control of work and in that way bid below the cost of the work.

218 Capt. Gillette:—Did Bangs in 1894 bid for fifty-seven cents a yard?

Capt. Carter:—I believe he did that to crush a contractor in Jacksonville, so that he would not have him as a competitor in the future.

Capt. Gillette:—How would that pay him?

Capt. Carter:—For this reason, it is this,—a man who is doing work of this kind needs to have, in order to do it well, not only money but experience, a large number of foremen, men conversant with that sort of work, and an organization. That is true of all sorts of contract work. When a man is

unsuccessful and does not get a contract, he is eliminated in the future and ceases to be a dangerous competitor. This is not only my judgment, but you can also ascertain it from men in Jacksonville. I know furthermore that men in bidding again on work, know exactly what they are bidding on. You were speaking about my specifications not having been properly drawn, and I believe in view of these criticisms that have been made that a misinterpretation of them is possible. I explained them clearly to every bidder who came to me, and it did not occur to me that it would not be clear to any one else.

There seems to have been a misinterpretation of my mode.

219 It was impracticable and it would have been unjust and would have subjected an officer to just criticism if he had described the method of doing the work which one company had absolute control of.

Col. Gillespie:—Could you not have stated in the specifications that the mattresses might be built in courses of eight, separated by grillages?

Capt. Carter:—I could have placed that in. That method is patented.

Major Adams:—Explain what is patented.

Capt. Carter:—The thing that I understand that is patented is the method of building and sinking those large layers. It is the method of doing it that is patented.

Major Adams:—It is possible then for a man to put them in position by his own method?

Capt. Carter:—Yes sir; it would be very difficult to do it. I explained to all the contractors how I wanted this work done, and told them to go and look at the work, see how it had been done, and asked them to look at the plant which the last contractor had, and in that way they knew how I desired it built. I see now in view of what has been said, that criticisms can justly be made against this. My object was to have something by which they could get around that patent, and therefore, I spoke of single course mattresses.

220 Major Adams:—Why did you ask in the specifications for a single bid for three designs?

Capt. Carter: I thought it would be necessary to put in a few of those log mattresses only, and I explained that to every one who came here.

Major Adams:—The specifications called for three forms of construction; why did you require a single bid for the three forms?

Capt. Carter:—Of the first and second designs there were

to be only a few mattresses, and it would not make any material difference, it would not make any difference at all to the contractor, and so I put it in that way. All of the mattresses were to be built of the third design, except where I found a very bad bottom where I put in a few of the second design.

Major Raymond:—Would you have obtained any bids, any lower bid, if you had specified in those specifications that only the cheapest style of mattress would be used?

Capt. Carter:—I would not have obtained any cheaper bids, for this reason, that every single contractor knew what I was going to use in the work.

Major Adams:—How did they know it?

Capt. Carter:—I told them.

221 Major Adams:—You ought to have told him in the specifications.

Capt. Carter:—I agree with you now.

Col. Gillespie:—The specifications in themselves are not clear as to what you wanted?

Capt. Carter:—No sir. My project contemplated building them in this way.

Col. Gillespie:—Does it so state?

Capt. Carter:—I don't know whether the specifications state so or not.

Col. Gillespie:—Did the Chief of Engineers know by any letter that you wrote to him that you proposed to construct the third design?

Capt. Carter:—I don't know whether he did or not.

Col. Gillespie:—Was it not your duty to tell him?

Capt. Carter:—I thought I had done so until these criticisms came up. I made out a plan and submitted a project to the Chief of Engineers for carrying out the work, but I always understood that the details of that work were left with the officer in charge.

Col. Gillespie:—Does not the Chief of Engineers call upon you for a project?

Capt. Carter:—Yes sir.

222 Col. Gillespie:—And he approved the specifications?

Capt. Carter:—Yes sir.

Col. Gillespie:—Do those specifications indicate a particular design which you were to adopt?

Capt. Carter:—I believe now that they do not indicate it.

Col. Gillespie:—Then you presented to him a specification which was incomplete?

Capt. Carter:—I did not believe them incomplete at the time, and I do not now except in view of the criticisms, because the knew the Chief of Engineers knew the kind of mattress I was using.

Col. Gillespie:—In order that a contractor might know what particular design you were going to use, he had to be accessible to you, and receive a personal explanation from you?

Capt. Carter:—He would have to do that, or he would have to see somebody else on the work. From the specifications themselves, without any conversation with anybody else, or looking at anything else, he would not know.

Col. Gillespie:—Did any contractor from a distance ask any personal explanation of the specifications from you, so as to know exactly what he was bidding for?

Capt. Carter:—Yes sir.

223 Col. Gillespie:—Did you give them in writing?

Capt. Carter:—I don't know that it was in writing.

Col. Gillespie:—How could you have given it otherwise?

Capt. Carter:—I did most of it orally.

Col. Gillespie:—To different bidders?

Capt. Carter:—Without coming here? By letter, no, sir.

Col. Gillespie:—Did they make any inquiries from you as to what particular work you wanted done under that contract?

Capt. Carter:—You mean writing? contractors came here and asked me. Two men came here, I remember one from Philadelphia.

Major Adams:—Suppose that some of the contractors, here or there, came here and talked with you, and found out exactly what you proposed to do, and suppose other contractors should bid simply on the specifications, without this information, would you expect to get bids that would be higher from the others?

Capt. Carter:—When a contractor from a distance, who didn't come here at all to see the work, and didn't know the work that was going on here, I intended to send him a sketch of the work, and also tell him what I intended to do.

Major Adams:—Why didn't you put that sketch and that information into your printed specifications?

224 Capt. Carter:—It would have been better if I had put them in. The reason is probably, that in making my specifications, I took the old specification and clipped out portions that related to the work from year to year, and wrote in other portions, and that may have left the specifications not clear. They were clear to me and clear to every bidder.

When a bidder wrote to me for papers, I sent him one copy and wrote him that if he desired to bid on the work, I would send him others. If he desired to bid on the work, I would give him every information concerning it. No man asked for papers to bid on this work except those who came here, or had agents or representatives here, who had access to this office. If any one had we would have given him this information. It would have been better to have put the whole sketch into the specifications.

Major Adams:—Suppose you put out a specification like that, inviting bids, and suppose that one man wanted to bid, and asked to know how much you were going to use of design No. 1, how much you were going to use of design No. 2, and how much of design No. 3, would it have been possible to have given him that information and not given it to every other bidder?

Capt. Carter:—No sir, I gave it to everybody.

Major Adams:—Who came for it?

225 Capt. Carter:—No sir, I gave it to anybody who intended to bid. If a man asks for a copy of the specifications, I send them to him and tell him if he desires to bid, to ask for the remaining copy; if a man does not ask for the remaining copy, he does not intend to bid.

Capt. Gillette:—Did you give the proportions of the three types to any bidder?

Capt. Carter:—I think I gave them to every one.

Capt. Gillette:—Will you name a bidder that you gave them to?

Capt. C: I gave them to a man of the name of Rutherford.

Capt. Gillette:—Will you tell us what proportions you gave him?

Capt. C:—I told him that they would be all number three, with the exception of a few of number one and two. I told him that the proportions were practically infinite, and the difference so slight that it made no difference. I mentioned it to other people, R. G. Ross, of Jacksonville; Mr. Duval, representing the F. C. & P., who desired to bid for the work because he had a railway to the stone, and to the Atlantic Constructing Company. Those are from my memory.

Capt. Gillette:—If a bidder were to make a contract with you under these specifications, what guarantee would he
226 have that you would not require him to use single course log mattresses?

Capt. C:—The guarantee of my honor.

Capt. Gillette:—He has the guarantee of your verbal statement, that contract is between the contractor and the United States, what guarantee has a man got, any of those bidders got, that you will not require him to put in all log mattresses?

Capt. C:—I see the point. There is no guarantee except mine.

Capt. Gillette:—Would it be a good business proposition for him to bid for anything except on the basis of the most expensive type?

Capt. C:—Yes sir, it would be. He would know what I told him would be done.

Capt. Gillette:—That is personal confidence in you individually?

Capt. C:—Yes sir.

Capt. Gillette:—Suppose you were ordered away or should die?

Capt. C:—He would have the interpretation of the specifications as given by me.

Capt. Gillette:—Would you consider that binding, as a business proposition?

227 Capt. C:—The moral enters into this—

Col. Gillespie:—Your personal reputation is not a writing.

Capt. C:—I see that.

Capt. Gillette:—I have asked the assistant engineers that I find in charge of these works for estimates of the cost of building those separate types; did you ever ask those gentlemen for estimates of the cost?

Capt. C:—I have asked for no estimates since 1893. I kept my own figures concerning it and I had my own estimate.

Capt. Gillette:—I made an examination hastily of the first works constructed under those specifications, and I find it enormously expensive. Did you ever make a similar examination?

Capt. C:—Yes sir; as the work went down I have made an almost daily examination, and since it went down I have had my assistant engineer make soundings and report to me if the slightest indication of scour developed.

Capt. Gillette:—Did you have your assistant engineer find whether the mattresses were sinking into the sand or not?

Capt. C:—I did some time ago, not in this contract.

Capt. Gillette:—Did it show that it was or was not?

Capt. C:—That it was going into the sand some.

Capt. Gillette:—Did you have him find out whether the 228 mattress itself was shrinking or not.

Capt. C:—I dont remember whether I did under this contract. I found that the other mattresses had not.

Capt. Gillette:—What do you mean by "subsidence"; you testified that they showed no "subsidence" and that they were standing up.

Capt. C:—I should have said compression.

Capt. Gillette:—They showed no compression?

Capt. C: No compression so far as I know.

Capt. Gillette: You said that your assistant engineer informed you that there was no subsidence, now you wish to change it to compression?

Capt. C: My assistant engineer reported to me that the top of the mattress was about on the same level as when it was sunk, except what went down in the sand.

Capt. Gillette: Was that verbal or written?

Capt. C: Oral. That was not under the present contract. Under the present contract I had inspections made from time to time, and my assistant engineer reported to me. I instructed him to observe carefully whether those mattresses showed the slightest change. I told him not only to sound on the mattress, but to sound on either side.

Capt. Gillette: Who was that man?

229 Capt. C: Marion Twiggs. I may say while I have some confidence in Marion Twiggs, I do not now have the same confidence that I did.

Capt. Gillette: Were you afraid of the teredo at Cumberland sound?

Capt. C: No, because the sand covered it. I would have been afraid of it if the sand had not covered it.

Capt. Gillette: The amount to be expended on the work was enormous?

Capt. C: Yes sir, over two millions to be expended.

Capt. Gillette: The slightest change, the slightest shrinkage would be a question of very great importance in the immense number of yards of jetty to be constructed?

Capt. C: O, yes.

Capt. Gillette: For your own information, and your own protection in future, in case there was something wrong there, should you not have reports from your assistant engineer?

Capt. Carter: Nearly all my reports from my assistant engineers and inspectors have been oral reports, for the rea-

son that I have been personally on the work so much that I felt as if I was an inspector myself. I called them on the deck of my boat, and I relied on their oral statements.

230 Capt. Gillette: Have you ever visited the work at Cumberland sound with the division engineer, Col. Haines?

Capt. C: I think I have.

Capt. Gillette: Did he ever see the mattresses as constructed by the Atlantic Contracting Company?

Capt. C: I presume he must have seen them.

Capt. Gillette: Do you remember whether he saw one being built on the barge at the reservation when Gen. Craighill was here?

Capt. C: I presume he must have seen them, if he was here when the work was being erected.

Capt. Gillette: Do you remember explaining to him whether the mattress he saw on the barge was one mattress or eight, and that you paid for those layers instead of as one mattress?

Capt. C: I dont remember at this date. The mattresses are about eighteen or nineteen inches thick each, whereas this was enormous; he must have known that this was a combination of mattresses.

Col. Gillespie: When was this?

Capt. Gillette: That was under the present contract.

Capt. C: Some time last winter or in the early spring.

Col. Gillespie: Less than a year ago?

Capt. C: Yes sir.

231 Capt. Gillette: The work on the contract began in December 1896? The first brush used on the contract was gotten from the reservation?

Capt. C: I can see very readily by referring to my notes. I kept a memorandum of the work. I dont remember now. I remember of his being down here. All this was as clear to me of course, as the sun shining on a bright day, it was in all my reports, but whether I especially explained the matter to him, or whether he asked me, I dont remember.

Capt. Gillette: Did he know you were paying \$1.10 a square yard for each layer?

Capt. C: I suppose he did; that was the contract price. I presume he must have known that we were paying it. The original estimate price is a dollar.

Col. Gillespie: Did you have any conversation with the Division Engineer as to the type you were building, and as to your departure from the specifications in building it?

Capt. C: I dont remember whether I did or not. When he came down we went on the work, and I showed him the work and how it was being done. I explained this fully to him, whether I explained it to him clearly or not I dont know.

Capt. Gillette: What is the most important point in an engineering question?

Capt. C: Its success:

232 Capt. Gillette: Irrespective of cost?

Capt. C: No, but if it is unsuccessful, it is no good. My aim has been here to succeed, and I have.

Capt. Gillette: Have you finished?

Capt. C: I have an average depth of water in Savannah harbor and river of twenty-six feet.

Capt. Gillette: Did you cut off Hutchison island?

Capt. C: No sir.

Capt. Gillette: You spent the money.

Capt. C: Yes sir, I spent that for dredging. I explained that to the Chief of Engineers. There were some buildings, some property acquired over there, for which the man wanted an enormous rental.

Capt. Gillette: Who was the man?

Capt. C: A Man called "Big Smith."

Capt. Gillette: Do you remember what he wanted?

Capt. C: Some large amount on rental, I have forgotten, but I think it was something like \$75,000.00. That is all in the official books, I don't remember.

Capt. Gillette: I dont find anything except your bare statement that the government would save \$50,000.00, and after a while you thought it would not have to pay any rental.

233 Capt. C: I thought so. I thought they would want that wharf front and would be willing to let the United States cut off the island without those damages. There is a scheme that on Hutchison island shall be the big warehouses of the city of Savannah, and that terminals shall be constructed there by the Middle Ga. & Atlantic road, and I thought that the United States could do the work at a saving of probably \$50,000.00, if we waited.

Capt. Gillette: Who were those property owners who wanted so much damages then?

Capt. C: I remember, I think, Smith and Paulsen. I went at it as carefully as I could, and that was my estimate of the cost. I don't remember just who they all were. I am intimately familiar with this district, and have learned a

great deal about it since I came here, and knowing the men and knowing the conditions, I was able to arrive at conclusions, which strangers could not arrive at without a good deal of figuring.

Capt. Gillette: You stated that people were buying up lots there for the purpose of speculation, and you thought that \$50,000.00 could be saved. Do you remember anybody who bought up land at that time? I had your principal assistant engineer look it up, and he can't find anything.

234 Capt. C: Possibly that may be a mistake about the buying up of lots, I think that there were improvements being erected there.

Capt. Gillette: You did not mention that in your letter, you simply said "buying up land for speculative purposes." I want to find out who it was that bought that land at that time.

Capt. C: Perhaps there is error in that. I know that, that that was the general opinion, and when I approached those men to find out what the damage would be, I obtained that result, and then by figuring that over, I became convinced that about that sum would be necessary. I may have made a mistake in referring to buying lots instead of the construction of improvements. That, of course, I am not prepared at this date, to say.

At this point the board adjourned until 3:30 P. M.—

235 The board met at 3:30 P. M. Present the same as before.

Col. Gillespie: Capt. Carter, for the years running back from 1896 to 1892, the board has before it a certain number of specifications. You have testified that during those years you have gained a great deal of experience in construction, and that there has been an evolution, but the board fails to see any evolution of your specifications. The specifications are the same for all. Will you give the board evidence as to why the specifications have not been changed, to describe the work as you wished it done?

Capt. C: I want to bring this—I want to demonstrate to the board, and I believe, I can, that it has made no difference in the price of the work; that I can demonstrate to the board, then I want to add this, that I consider the changes—

Col. Gillespie: You are going beyond my question; have you any evidence as to why you made no changes in those specifications?

Capt. C: No. I want to put a few more things to it.

Col. Gillespie: Who wrote those specifications, who 236 wrote them originally?

A I think probably—I don't remember, probably Gen. Gilmore.

Q Gen. Gilmore wrote those specifications of 1896?

A No sir. Those were made by taking the specifications of this work from year to year, and adding to and changing them.

Q They were your own, individual, personal work?

A Yes sir, I did them myself.

Q Those specifications then were written by yourself?

A I am responsible for them.

Q Do you think they express all you wanted to express?

A They express what I thought I wanted to express.

Q (By Major Raymond) In the beginning you had a certain kind of specifications for this kind of work, and then, from time to time, as you made new contracts, new specifications for a new contract, you took the old specifications and changed them in such respects as those new conditions required?

A I only changed them just enough—the way I did it, I took the first specifications, probably there might be some disagreement between my inspectors and the contractors as to the interpretation of the specifications, and I would 237 make a pencil change on the specifications, and when the next specifications came up I would put in that change.

Q Then you must have in the specifications some item, which are survivals of the old specifications and which you did not change?

A Yes sir; the log mattress work.

Q (By Col. Gillespie) The specifications from 1892 to 1896 are your own work?

A They were my own work, to this extent, that when I came here I found a set of specifications which covered the work. I accepted those specifications, my superior officer having made them, until 1888—

Q Was not this work here in the Savannah river, for which you are claiming so much credit, done under a project made by yourself?

A I was ordered to do it. It was my project.

Q Was not the money gotten under estimates that were contained in that project?

A Although it was written by Gen. Gilmore, I was his assistant on the ground.

Q Gen. Gilmore didn't write those specifications?

A When I came here I found a certain type of specifications for a certain work, and I only modified those specifications just as I would find difficulty in the execution of the work. If there was a disagreement between the contractors and inspectors, because the specifications were not clear, I made a memorandum of it and tried in the new specifications to avoid it. I continued that down to the present time. I don't know where I got my idea for this type of brush mattress, but I think it was on the St. Johns. When I made those specifications in 1892, I thought it would be the best thing; but I found in the construction of the work, that I had to make changes, and I did that under that clause which gives the United States power to make variations where the cost is not increased. I want to state here now that I supposed that that was always known. I made no concealment of it.

Q (By Col. Gillespie) After 1892 your specifications are written the same way?

A Yes sir, practically so. I thought it was inadvisable to make and change, because the only change I would have made would have been something which I considered would have given one concern the monopoly.

Q The first contract that was made in which any large sum was involved was in 1892?

A Yes sir.

239 The amount involved was large, one million and a half dollars, was it not?

A Three millions and a half.

Q For the Savannah harbor?

A The project I think was for three million five hundred thousand.

Q A very large sum in comparison to what had gone before?

A Yes sir.

Q How did the prices bid compare with those bid before?

A I don't remember, without referring to the bid.

Q The contractor was the Atlantic Contracting Co?

A Yes sir.

Q They have had a number of contracts since?

A Yes sir.

Q It has been stated, in the statement of Capt. Gillette, that all those men who have had those contracts, since 1892, although under different names, are the same individuals. Do you know who constitutes the Atlantic Contracting Company?

A Of my own knowledge, I dont, but I have heard that it consisted of the Gaynors. I dont know. I know it is an
240 incorporated company, because I made them file a certificate of incorporation.

Q The Gaynor Bros?

A I know one is president, another is treasurer and another secretary.

Q Anybody else interested in it?

A I have suspected that Capt. Green had an interest in it, but I am not positive. I know that at one time he had an interest with them, but whether he has an interest yet, I dont know. Then I understand that Mr. A. M. Bangs is interested in it.

Q Did Capt. Green's name appear on the bond at the time of the execution of this contract?

A I dont know. I can tell by referring to it.

Q If his name appeared on the bond, and you knew or suspected him to be a member of the firm, would that have influenced you to call on them for another bondsman?

A If I had known that he was a member of the firm.

Q You say that you suspected it?

A I say that I thought he might have had an interest in the matter, but I didn't know.

Q Have you ever had any private transactions with
241 any of those men who you state belong to this company, which would lead people to suspect in any way that you had something to do with the contract under the government?

A No sir.

Q You had no such private transactions?

A Nothing, except I may have had Capt. Green do little things for me, but they were of a private nature and not business. With the Gaynors I never had any transactions. I have had Capt. Green do some commissions for me. I would write to him to make little purchases for me. I have had nothing which I would not have had the whole world know.

Q You never had any business relations with any of those

gentlemen, Bangs or Green or the Gaynors, that would lead the public to suspect for a moment that you were acting in concert with them in the conduct of the government contract?

A No sir. I remember at one time going down to Florida with Col. Gordon, or for him, about the time of the phosphate discovery in Florida, and Gaynor went down at the same time, and he said "If you find some phosphate, I would like to put some money in it." But we didn't find any phosphate and we didn't put any money in it. I have never been under obligations to them in any way whatever.

242 Q On September 8, 1896, you opened bids for an amount aggregating considerably over three million dollars?

A Yes sir.

Q Under the last specifications?

A Yes sir.

Q For Cumberland Sound and Savannah Harbor?

A Yes sir.

Q Those specifications being practicably the same so far as the requirements were concerned?

A Yes sir.

Q You received three bids at this opening for each contract? Did the smallness of the numbers of the contractors excite any suspicion on your part that contractors did not find sufficient in this contract to justify their bidding?

A No sir. I thought I would have more bidders than that, but after conversation with men who intended to bid, and did not bid, I came to the conclusion that it was the monetary condition of the country that prevented it, in fact, two men told me that that was the reason.

Q Did you suspect that the obscureness of the specifications as to the work to be done under the contracts, was any reason why other bidders did not bid?

243 A No sir, no, that was not the case.

Q Did you at the time the bids were opened, and submitted to the Chief Engineers for approval, think that the prices were reasonable and just, in comparison with the prices of the same work a very short time before?

A I thought they were, otherwise I would not have recommended them.

Q In the contract for the Savannah harbor the price of the mattress was ninety-five cents, in the bids opened September 8, 1896; in September 1892 it was the same price. In

Cumberland sound, in the bids opened September 1896 the price was one dollar ten (\$1.10); the previous price, Sept. 29th, 1894, from A. M. Bangs, who you say was presumably a member of the Atlantic Contracting Company, was fifty-seven cents?

A I dont know that he was a member, he may have been associated with them.

Q It was fifty-seven cents in one case and \$1.10 in the other, how could you recommend the acceptance of that bid?

A I believed, and I believe yet, that that bid of fifty-seven cents was enormously below cost.

244 Q Is it a question for a government officer to determine whether a contractor can afford to do certain work?

A No sir, but it was this; the estimate that was made up was one dollar per square yard, and this was only ten cents greater, and in view of the conditions, a variation of ten per cent was not too much.

Q Then your theory is that any contractor who bids below the estimate, loses money?

A I should be glad to have them bid below the estimate.

Q Bangs did bid below it?

A I was exceedingly glad to get him to do it.

Q It seems a little curious that you should have accepted a bid nearly twice as great. Did it ever occur to you that you could reject those bids.

A I had a right to reject them, but I didn't feel that it was to the interest of the United States to reject them.

Q In reference to the stone; Bangs bid \$2 on the stone. Have you any evidence that he lost money on that?

A No proof.

Q You recommended the acceptance of the Atlantic Contracting Company at \$3.50?

245 A Yes sir, I did that for this reason,—I dont know whether that is a matter of record, I think it is—.

Q You stated that Mr. Duval owned stone quarries, and that he intended to bid with a view of opening them, as his road ran to them.

A I dont know that he did open those stone quarries. I said that he determined to bid and that the railroad reached the quarries.

Q With a view to developing the quarries on the line of his road?

A He expected to haul the stone over his road, but as to whether he owned the quarries, I dont know.

Q I gathered from you that he had opened quarries?

A I didn't get that impression, I got the impression that he wanted to transport the stone, I did not necessarily get the impression that he was going to open quarries.

Q Do you know who it was that proposed to open quarries?

A No sir. There were two or three men down there who had quarries on the line of the Savannah, Florida and Western Railway, and on the line or near the line of the Florida, Central and Peninsula Railroad.

Q Coming back to the identity of those contractors 246 whether it was Bangs, or whether it was the Atlantic

Contracting Company, or whether it was Ely, is it not a fact that they all used the same plant, or the nucleus of the same plant?

A I don't think so. Ely I think, is P. Sanford Ross, these men are entirely different men.

Q Is not the plant now used upon the work, the same that has been used heretofore, with possibly a little extension or repairs?

A The same plant that has been used, with additions, I think it is; that belongs to the Atlantic Contracting Company, I don't know whether Mr. Ely had his plant here. He is P. Sanford Ross.

Q In approving this contract and in its execution, did you feel that you were authorized, did you feel that you had the right to go beyond the amount which was given in the specifications as the approximate amount of work to be done?

A Yes sir.

Q In conversing with bidders, were the approximate quantities mentioned in specifications, given as the amount of material which would be required in the execution of the contract?

A Yes sir.

247 Q In the contract for the Savannah harbor of 1892, you used three hundred and fifty thousand square yards of mattress for canvassing bids, and up to July 30, 1897, you have used 1,363,000 square yards of mattress, nearly four times the amount mentioned in the specifications?

A Yes sir.

Q When you had reached the three hundred and fifty thousand square yards, did you notify the Chief of Engineers?

A No sir.

Q Did you notify him at any time?

A I don't think I have notified him directly.

Q You assumed that the specifications were so elastic, that you could provide any quantity of material, and dispose of it any way you thought fit, provided you didn't exceed the sum appropriated by Congress?

A Provided it was to the interest of the United States, and provided it didn't increase the cost.

Q Is it customary for officers to so far exceed the quantities approved by the Chief of Engineers?

A Yes sir, so far as I understand it.

Q Without specifying the quantities?

A I provided for that in the specifications, as Gen. 248 Gilmore did.

Q I am only asking about your quantities, I am not asking you what Gen. Gilmore did. After you began to exceed the amount called for in the specifications, did you notify the Chief of Engineers of that fact?

A No sir, not that I remember.

Q In the case of Cumberland sound, the amount used for canvassing bids is two hundred thousand square yards, you had, up to July 30, 1897, four hundred and forty-six thousand square yards. After you had completed the placing of 200,000 square yards, did you notify the Chief of Engineers that you had completed it?

A No sir.

Q Did you notify him at any time prior to July 30, 1897 that you had exceeded the specified quantity?

A You mean the quantity used in canvassing bids?

A Yes sir.

A I should like to explain why I did not. You will find in the specifications put in here, I don't know where it is now, that the quantities are liable to increase or decrease, absolutely or relatively, as may be necessary, and I considered that the local engineer was given authority to do that in all cases where he thought it necessary.

Q Authority to spend money on a specific project pre- 249 sented by you to Congress?

A Yes sir.

Q That is your guide, and not the specific approval of the Chief of Engineers on the project presented?

A Yes sir, I understood by that—

Q It is not safe, at least, to go beyond it?

A I always understood and acted the other way.

Q What do you mean by that?

A I always used whatever quantities I thought necessary without reporting it to the Chief of Engineers. I never understood that it was necessary. It never occurred to me that it was necessary.

Q You felt that so long as you kept within the appropriation, you could go ahead and do what you chose?

A So long as I kept within the appropriation and did what was to the manifest interest of the United States, without injuring anybody.

Q (By Major Raymond) Did you not make monthly reports of the progress of the work?

A Yes sir.

Q In your monthly reports you always stated the quantity of mattress work that you had done up to that time?

A Yes sir.

Q That you had done during the past month?

A Yes sir.

Q You reported to the Chief Engineer monthly?

A Yes sir, I had to make a specific report, and my reports always told what the inspectors and engineers were doing.

Q Your reports always stated the quantity?

A Yes sir.

Q Did that go through the Division Engineer?

A Yes sir.

Q I would like to ask you a question, I inferred from something you said, that this mode of extending the work in regard to quantities, without the approval of the Chief of Engineers, was in existence before you took charge

A Yes sir.

Q That was done by Gen. Gilmore before your time?

A Yes sir.

Q You followed that practice?

A Yes sir. The only experience I had was in this district. That contains the number of yards of mattress. (referring to report handed him by Capt. Gillette) This was sent to the Chief of Engineers and my Division Engineer.

251 Q (By Capt. Gillette) There is \$308.00 one month, and then the month following \$345,000.00?

A That happened in this way; there was only \$5,000.00 appropriated when the project was made, and the contractor had to do his work without his money being appropriated. When Sundry Civil Bill was passed it appropriated \$350,000.00

and I took it up and paid the contractor what I could afford to pay. I think that must have been the way of it.

Q (By Major Raymond) Those kinds of mattresses which are specified in your specification, were they the same that were specified in previous specifications, before you took charge of the work?

A What kind?

Q Those three.

A Yes sir.

Q When they were built under those former contracts, were they built similar to what you built them?

A Yes sir.

Q In your opinion, is there any variation between the mattresses as built under your direction, and the mattresses built under previous officers, and under similar specifications?

A The instructions which I always received were that 252 the specifications should be made, and the project also, as elastic as possible in order that the engineer's hands should not be tied, in order that he might be able to accomplish the results he desired to attain. It was the intention, and I believe it to be right, that they should be as elastic as possible, so that any modification which would work no injury and save money to the United States could be adopted without formal change. In other words, when the project was approved it carried with it authority for doing that. I think in the project the details are left to the engineer in local charge. I have forgotten the exact verbiage.

Q You said this morning in your testimony that the reason why you had asked for a single bid for those three designs, was that you wanted to avoid supplemental contracts. What was there about a supplementary contract that you wanted to avoid?

A Nothing, except the correspondence and the clerical labor.

Q It is only Twenty-four hours to Washington?

A It was simply a method I adopted.

Q Do you think it a good method?

A If I had not, I would not have used it.

253 Q Is it the spirit of the specifications (?) that the supplementary contract is to cover those very changes or departures from the specifications upon which the contract is based?

A Only in case it varies materially the cost; the specifica-

tions state that then a supplementary contract shall be entered into.

Q The statement here is that the cost has been increased?

A That is not true. The cost has been enormously diminished.

Q You have nothing to combat that?

A I shall get something. That is not true, that is the very reason why I increased the quantities of mattress—because as I explained—

Q To make it cheaper?

A Yes sir, because, as I stated, those mattresses would have gone down clear out of sight. If I had put that amount of stone on them, I would have never gotten further than Fort Pulaski.

Q Do you think it equitable to disappointed contractors that you should have liberty to change the amounts of material delivered under that contract?

254 A Yes, provided it does not modify the cost of the work. If brick or stone were specified and I used wood, that would be an entirely different thing. It seems to me that when the nature of the material is not modified and the cost is not increased, and the United States gains enormously by it, that it is perfectly fair. If I had not thought so I would not have done it.

Q That was an enormous change from three hundred thousand square yards to thirteen hundred thousand square yards?

A I reported it month by month. Of course, I made no distinct report. I didn't think it was necessary. It was always my desire to have my superior officers know exactly what was being done, in fact, I had the fullest confidence that they did know.

Capt. Carter: I desire to make one more statement and that is this;—I have had all my experience right here in this district, and I know the conditions of this coast and this harbor, and I know that if I had done otherwise than as I did, it would have been detrimental to the interests of the United States and the work, and that being the case I conceived it to be my duty to do what was right, and I think that I would have been very negligent if I had not
255 done so. About the supplementary contract; that question came up in my mind, because the contractor complained that the work was costing him more than I was giving him for certain work, but I persuaded him to go ahead and

do it. I said to him, "You have an interest in this work as well as the United States, and you have your reputation," and he would go ahead and do the work.

Q (By Major Adams) You say that you persuaded them to do it?

A I said to them, "You are a large contracting firm and you want the work done creditably, and if the work on this harbor is successful, it will be to your credit just as it will be to the credit of the United States, if you can devise any means to carry this on without pecuniary loss" and in that way I induced the contractor to do it.

256 Q Have you ever carried on any correspondence with the individual members of The Atlantic Contracting Company, have you received any personal or private letters from the individual members of this contracting company?

A Yes sir,—not private, but personal letters. I think I have received them from other contractors.

Q Did you file them in the official records?

A Not if they were personal letters, I didnt file them in the official records.

Q In making payments for work done by the Atlantic Contracting Company, who received the checks?

A I dont remember at this date. In one case I remember that I gave it to the President of the Company in New York; the Secretary of War had ordered me to go with him to Sandy Hook.

Q Will you please give names?

A Mr. John F. Gaynor—it may have been his brother, Mr. William T. Gaynor, as I remember it gave it to John F. Gaynor.

Q State to whom you have delivered checks, mentioning all the names, for the Atlantic Contracting Company?

A There were only three men William T. Gaynor, E. H. Gaynor and John F. Gaynor.

Q You are positive about that?

A I feel positive, I dont know as I remember it now.

Q Have you ever received letters calling for checks?

A Yes sir.

257 Q From whom?

A I received them from them.

Q From whom?

Q From John F. Gaynor and E. H. Gaynor—I dont know, I cant remember.

Q From anyone else?

A I may have received them from Captain Green.

Q Did you ever deliver any checks to Captain Green?

A Not that I remember, I dont think that I ever have.

Q When you have made a payment, have you made it by single check, or by more than one check?

A By as many as they desired.

Q How was that determined.

A By their request.

Q What was your reason for drawing more than one check in payment of a single voucher?

A Because I always made it a rule to draw as many checks as the contractors wanted.

Q What is the greatest number you have ever drawn in payment of a single voucher?

A I dont remember, the checks themselves will show; I remember drawing a large number.

Q How many?

A Perhaps twelve or fifteen.

Q All drawn on the same date?

A I dont remember; the records will show that; they
258 may have not been drawn on the same date; that would depend on whether or not I had funds available.

Q When you make up a voucher, you would have the voucher receipted in full on the date of payment, would you not?

A The Chief Clerk fills in the date of payment when the checks are drawn.

Q Filling in that date, would you draw checks on different dates in payment of that voucher?

A It ought not to be, if so there is an error in filling in the date.

Q Coming back to the question of the delivery of checks, I understood you to say that you may have received letters demanding checks from Captain B. D. Green?

A I remember that he has either spoken to me or written to me, I dont know which.

Q Have you ever received any letter from W. W. Hegeman calling for checks, or for payment?

A For the Atlantic Contracting Company—not that I remember of. I remember Mr. Hegeman, but I dont remember of his having any conection with the Atlantic Contracting Company.

Q Have you ever received a letter or telegram from W. W. Hegeman?

A That I dont remember. I have met Mr. Hegeman. I knew Mr. Hegeman years ago, in 1891 or 1892, when he was connected with the East River Tunnel.

Q Where is his office; in New York?

A I really dont know.

259 Q Is he anyway associated with The Atlantic Contracting Company or the individual members of that company?

A I think that they contemplated at one time hiring him as an engineer for some pressing work that they were doing. In fact I think that it was through Captain Green that I met Mr. Hegeman, but I dont remember.

Q Have you had any business relations with the Gaynors, Mr. Hughes, Captain Green or Mr. Hegeman?

A No sir, I have never had any business relations with them.

A Are you sure about that?

A I am sure of it to this extent, I may have had some correspondence with Mr. Hegeman, because he wrote to me, or I saw him, I feel absolutely sure.

Q You have had no business relations with any one of them?

A No. I contemplated at one time having some business relations with Mr. Hegeman; I also contemplated having some business relations with A. M. Newton, but no money that I remember has ever passed between Mr. Hegeman, or Mr. Newton, or between any member of The Atlantic Contracting Company, Hughes, Bangs, Gaynor, Green and myself.

Q You say that no money has passed between you and Captain B. D. Green?

A None except this, I sent him small checks, when I wanted him to do something for me, and he sometimes sent me the balances of those checks.

260 Q You said sometime ago that you were under no obligations to any member of this firm, The Atlantic Contracting Company. I wish you would think of that and tell me whether it is strictly true?

A That is strictly true.

Q Have you ever borrowed money from any man associated with that company, or acting as agent of that company?

A I borrowed money at one time \$1600.00 from Captain Green and I repaid that to him. That was a private loan and I repaid him with interest, I paid him principal and in-

terest. If I can look through my own records I can find it, because it was a mortgage on—

Q Do you know anything about the organization of The Empire Construction Company?

A Yes sir.

Q Who is president of that Company?

A I think that Captain Green is.

Q Have you any interest in anyway in that company?

A No sir. I talked it over with them, but I had no interest in the matter.

Q Have you any records of the company in your possession?

A I think I have.

Q How did that come about?

A The stock book of the company was left here by Captain Green or Mr. Gaynor.

Q Why did they leave it here?

A I dont know why it was left—I believe, I think
261 that it has been there a long, long time, several years.

Captain Gillette: No sir, there is nothing in that desk.

Q (By Major Adams) Have you ever received any letters from any of the officers of this Construction Company?

A The Empire Construction Company?

Q Yes?

A I dont remember; they had some contract, and I have discussed matters with them, but whether I have had any correspondence with them, I dont know.

Q Who were the stockholders of The Empire Construction Company?

A That I dont know whether I can tell you.

Q Can you tell us the names of any of them?

A I know that Captain Green was a stockholder in the Empire Construction Company.

Q Either of the Gaynors?

A I think so, I am not sure. The stockbook was left on my desk here, and I dont know whether I looked over it or not. I know that I heard them talking of the organization of the Company. I think a man, a lawyer by the name of Chandler, in New York organized it, I am not sure, but I can find that out by writing Captain Green, who may have the records of it.

Q Generally speaking, the men associated with the Gaynors, Captain Green and Mr. Hughes are the same men that are connected with the other construction Company?

262 A As I understand it, the Empire Construction as an organization is non-existent. I dont know anything about the details of the business, I only know that they talked of organizing it for the purpose of building the Adirondack railroad.

Q Were you in anyway interested in that work, or in that company?

A Not personally, I mean that I had no pecuniary interest my interest in it was only on account of my friendship for Captain Green, and my acquaintance with the members of the firm.

Q Did you take any steps to further the interests of this construction company?

A I dont remember whether I did or not. I remember seeing Mr. Vanderbilt once and speaking to him, but whether it was in the interest of the company or not, I dont know, I dont remember.

Q Has Mr. R. F. Westcott any interest in the affairs of The Empire Construction Company?

A No pecuniary interest that I now anything of.

Q Did he take any measures to further the interests of this Company?

A None that I know of, except this, knowing them, and he being an influential resident of Orange, N. J., they asked me to introduce them to him, as they wanted to meet some people in Orange; whether they met them through him or not, I dont know.

Q You have stated that you had an account as attorney for R. F. Westcott?

A That is true.

263 Q Acting as attorney for him you have an account in The Union Trust Company, New York?

A Yes sir.

Q Had you any personal interest in that account?

A None except what he chose to allow me; I took want I wanted out of that.

Q Did you deposit your own funds in that account?

A That I dont remember, but the account will show.

Q Did you deposit checks drawn for mileage in that account checks drawn to your order?

A Very likely I did.

Q Did you deposit checks for your pay?

A I deposited anything I had in that account just the same as I did in mine.

Q Did you draw on that account checks for your personal expenses?

A Yes sir.

Q Did you draw checks to pay your club bills?

A Yes sir.

Q Did you draw checks payable to the order of your relatives?

A Yes sir.

Q How many of them?

A Any of them I wanted, anything Mr. Westcott allowed me to give.

264 Q I thought you were acting as attorney for Mr. Westcott?

A Yes sir.

Q Had you at the same time an account in your own name in The Union Trust Company?

A Yes sir.

Q Did Mr. Westcott draw checks from this account, the one in your name, in which you were acting as attorney?

A I had two powers of attorney, do you mean the bank power of attorney?

Q Both?

A I dont remember now; the bank power of attorney simply gave me power to sign his name to checks, and he gave me another power to transact his business generally, whether he drew his own checks—I dont think he did draw any of his own checks during that time, I believe he did draw one?

Q Did you draw checks to his order from time to time?

A Yes sir.

Q For what purpose?

A I think it was—I dont know what the purpose was, I must have drawn a check on Brown Brothers, and I think same small checks.

Q You draw checks to his order to make investments for yourself?

265 A No sir, not as distinguished from him. What I mean is this, I drew his checks to make investments for him, not to make investments for myself, because I dont know that I had my own funds there.

A It is in evidence that you had your own funds there?

A I didnt make any distinction between his funds and mine, except by a little pencil memoranda; if I remember right I used to note whether whether they were for rentals

of his, I used a certain figure in checking, or something of that kind; then in his general bank account, if I made an investment I had another check, whatever I did for him I put down under the head that I was responsible for, and the personal things that he was responsible for I put down under another head, the head that he was responsible for; the personal things that went to him I also put under the head that he was responsible for?

A In this account as attorney for Mr. Westcott, why did you deposit in it your own funds?

A I dont know. It might have been because Mr. Westcott had for some years back treated my affairs and his as the same.

Q Still, you say that at the same time you had an account in your own name?

A I had.

Q Why didnt you deposit your personal checks in your own name, instead of his?

A I dont know why it was, except this, he opened a bank account for me first in 1890, or 1891, when I went down 266 to Roanoke; I went down there to attend to some business on account of his son in law; from that on I had an account in my own name in the Union Trust Company, New York; and I have it now.

Q Are you still acting as Mr. Westcott's agent?

A I didn't draw checks in his name since his return from Europe; I only drew those during his absence.

Q Is that account in his name, O. M. Carter attorney?

A No sir, it is his account.

Q Did you ever draw a check transferring the balance to him?

A To his order?

Q Yes?

A Yes sir.

Q So it is closed so far as you are concerned?

A So far as I am concerned, I dont think I have used it since.

Q Is it ended?

A I dont think that it is ended; it is in his safe deposit box—I dont know, I dont remember; the only object of it was this—

Q At the time that you were acting as attorney for Mr. Westcott, at the time that you had this account in The Union

Trust Company as Attorney, did you make any large investments for him?

A I did.

Q Did you make any for yourself?

267 A No, I did not. I think I made some in my name, stock for facility of transfer, but none of it was mine.

Q Do you hold that stock now?

A No, I gave it back to him as soon as he got back from Europe.

Q Did you receive the dividends on that stock?

A On one he received dividends, the other one I think he sold; sometimes he received them and sometimes I did.

Q Did it stand in his name, or in your name?

A I dont know exactly yhat he had transferred on the books of the company.

Q How was that dividend collected?

A By check.

Q Did those dividends go to his credit in the Union Trust Company, or to yours?

A Unless he has had it transferred on the books of the company, they go to mine.

Q Do you know whether it goes to your credit, or to his?

A It did go to my credit until I went to Europe. I transferred everything over to him when I went away, because I was then no longer abole to take care of his things; when
268 I went away I gave up everything to him; whether he went down and had the account changed or not, I dont know, but The Union Trust Company will know.

Q Has Mr. Westcott made any investments for you?

A I never had anything to make any; I didnt have much of my own; he has given me some property, which I have and he has made those investments for me.

Q While you were acting as attorney for Mr. Westcott, while you held this account in his name, what amount of money of your own did you deposit in that account?

A I really dont know.

Q What do you think?

A They appeared to me to be very large sums—let me see how long was he absent?

Q I am not under examination?

A I beg your pardon. I dont remember. I have had his affairs for some time to look after, I dont remember just when. Sometimes I would deposit my money here in this bank; sometimes I would deposit it in New York, sometimes

I would deposit in the account standing in my name, and sometimes in the account standing in his name.

Q Tell us why you did that; having two accounts in The Union Trust Company, one in the name of R. F. Westcott 269 and the other in your own name, when you came to deposit your own money, why did you deposit it to his credit?

A I dont remember how I did it, except that the other was his also; it didnt make any difference in which account I deposited it, whether I put it in the account in my name, or in the account in his name; when he was here in this country, I presume that I deposited it in my own name.

Q Did you make any remittances to The Union Trust Company from Savannah during that time?

A Yes sir.

Q Large amounts?

A No, I dont think so; I dont remember. There were some mortgages that he had here that were large.

Q Who made those investments for Mr. Westcott?

A I did.

Q What amounts?

A There was, I think \$15,000.00, I think \$35,000.00.

Q Did Mr. Westcott deposit that money to his own credit in the Union Trust Company for that purpose, deposit \$35,000.00 to his own credit for that purpose?

A I dont know whether it was all there I dont know whether I drew checks as his attorney, or whether he 270 drew them; I dont remember when the investments were made, I simply know that he holds those three mortgages here, four mortgages, one in South Carolina and three in Georgia.

Q Where did that \$35,000.00 come from?

A I dont remember. It came from his account as I remember. I dont remember whether it was drawn out of that account, or drawn out of the other account; I think the check books will show that.

Q You say that you remitted money by mail from Savannah to the credit of Mr. Westcott?

A Sometimes to his credit and sometimes to mine.

Q Where did you get that money?

A It came sometimes from checks from his collector in New York, sometimes from dividends—I dont remember how it came.

Q What was the name of that collector?

A It was his son-in-law's father?

Q What is his name?

A Mr. Solly.

Q Did he ever make deposits in New York himself personally?

A Yes sir.

271 Q Did he ever remit money from New York to you?

A I dont remember whether he did or not; I know that he has made deposits.

Q Do you know any reason why he acting as collector in New York, and making deposits in The Union Trust Company in New York, remitted money to you to be sent back to New York? If he deposited one check, could he not deposit another?

A There were checks drawn in my name, and there were checks drawn in Mr. Westcott's name; if a check was drawn in my name he could not deposit it, if it was drawn in Mr. Westcott's name, I think he could. I dont know that that there is any reason, other than that.

Q He did then make deposits to the credit of Mr. Westcott himself?

A That I wont be sure about; I think he did. I am not sure about that.

Q Did you make any investments in New York at that time when you held that account in Mr. Westcott's name?

A You mean make any purchases?

Q Make any investments?

A I think that I did.

272 Q Who was your agent in making those investments?

A Two or three. I think the main brokers were Reed & Flagler, Charles Vandeventer and Watson & Gibson—the most of it was through an old gentleman by the name of Reed.

Q What amount of money belonging to Mr. Westcott do you now hold in your own name?

A I dont know how much I do hold in my own name—I am not quite sure, but I think about \$45,000.00.

Q What amount does Wr. Westcott hold belonging to you?

A He dont hold anything belonging to me—I may state here, of course what I own is his.

Q (By Col. Gillespie) Was Mr. Westcott in this country at the time that power of attorney was given?

A He gave it to me before he left.

Q He was expecting to leave this country?

A Yes sir.

Q Did that power of attorney exist during his entire absence?

A Yes sir.

Q What year was this?

A I think that he went away in 1894 and came back 273 in 1896.

Q Was this power of Attorney, then issued in 1894?

A Of that I am not sure. They are both in existence yet.

Q You say that he issued that power of attorney when he was going away?

A I dont remember whether he issued it just at the time or not; it must have been issued while he was here.

Q In expectancy of his going away?

A That I cant be sure of; I know that the power of attorney to the bank was issued in expectancy of his going away, as to the other power of attorney, I dont know.

Q Did the bank power of attorney expire when he returned?

A Not necessarily, as I understand it. Whether it has been revoked or not, I dont' know.

Q Did you exercise it after he returned?

A I dont believe I did.

Q Is Mr. Westcott an infirm man, incapable of taking charge of his business?

A No sir, he simply did it through love for me.

Q Was it easier for him to have his business transacted by you in Savannah, a busy man, rather than have it 274 transacted by himself in New York.

Q I would very often be with him in New York. He wanted me to resign and go into The Westcott Express Company. He wanted to give me business experience.

Q Was he an active man in The Westcott Express Company?

A He is not now, and I dont think he has been for some time; I think his son is.

Q Is Mr. Westcott a large stockholder in that line?

A Of that I am not sure.

Q Could you, conveniently to him, transact business in Savannah that ought to be transacted in New York, which would need a power of attorney, would it be convenient for

him, being in New York, to give a power of attorney to you living in Savannah?

A If he wanted anything done that was in New York why he could do it himself?

Q Then it is a power of attorney that began many years ago, and has not expired and you continue to act under it?

A I dont remember the last thing that I did under that power of attorney.

Q Would you be legally justified in using it now?

275 A I dont know whether that power has expired. I would not feel justified in doing it without communicating with him. I have not had occasion to use it, and I dont know whether it has expired or not.

Q Then it is a power of attorney, you say, that is in the safety deposit box in New York?

A Yes sir.

Q It can be made active at any time he sees fit?

A As far as I know. I have not used the power for sometime, and I have not looked at it, I have forgotten the last time I looked at it; I dont remember when it was.

Q Have you had a power of attorney for any other person?

A Yes sir.

Q For whom?

A For my mother.

Q Is your mother living now?

A Yes sir.

Q Have you charge of the estate?

A Unfortunately there is not very much estate; I have charge of what there is, yes sir.

Q Are you trustee for the estate?

276 A My mother has no estate at all. I take care of her the best I can.

Q (By Major Raymond) Mr. Westcott may have cancelled that power of attorney without your knowing anything about it?

A Yes sir.

A That is the reason that you are uncertain?

A Yes sir, that is all. I know that he gave me that power of attorney, so that if anything came up I could attend to it without troubling him. Mr. Westcott gave me that power of attorney so that I could have it for that purpose.

Q (By Col. Gillespie) You stated in your testimony that

you had transferred those securities to Mr. Westcott; what kind of securities were they, stocks or bonds?

A Both.

Q Is it probable that company would send you the dividends after you had transferred the stock?

A Oh no, not if it had been transferred on the books of the company.

Q What is the latest dividend you have any knowledge of having received?

A I think it was—I dont remember—I cant tell you, 277 I think it was last April.

Q If the money was placed in your name, would you not remember what dividends came in?

A When I wanted any money, I just drew myself a check for it and took it?

Q On Mr. Westcott's account?

A On this account, the one that is in my name.

Q In the Union Trust Company?

A Yes sir. I have made no distinction between the two accounts, except by memoranda. I never did anything without consulting with him, I was a young man and I never did anything without consulting some older man; then I would go over with him what I had done. Sometimes he was satisfied, and sometimes he was dissatisfied. Whenever I wanted money I drew it out of my own account, which is his, or out of his own account.

Q Do you know whether those bonds were registered bonds, or common bonds?

A I think that they were all common bonds.

Q Then they did not need to be transferred?

A No sir.

Q Would the company that issued those bonds know 278 that you were the owner of them?

A They would not know whether I presented the coupons or not.

Q The coupons are like bank notes?

A Yes sir. They are always kept in his safe deposit vault.

Q Then anyone who got hold of those coupons could cash them?

A Oh yes sir.

Q Now as I understand you, you dont own those bonds and you have not got them in your possession?

A I never had them in my possession, except in this way,

that Mr. Westcott had a safe deposit box, to which I had access.

Q Then when you bought coupon bonds, you went to his safe deposit box and deposited them there?

A Yes sir.

Q Have you access to that box now?

A Yes sir.

Q Can you go there as freely as Mr. Westcott himself?

A Yes sir, I always have. I also have one of my own in which I have a few little things of my own.

Q From what source does the money accrue from which you make investments for yourself, personally?

279 A Well, I have not made any of those for myself. I could have made them by his advice, or with his permission.

Q Have you ever advised or counselled with Mr. Westcott in making those purchases?

A In nearly all. I would not feel justified in doing otherwise.

Q You said that sometimes he was satisfied and sometimes he was not?

A That was when he was in Europe. I did one or two things that turned out very well and he was pleased, and with other things he was not pleased.

Q Then you did make purchases without his advice?

A Yes sir. I took the advice of others?

Q You made purchases without communication with him?

A Yes sir.

Q (By Major Adams) Explain how, why having two accounts there, you deposited your own personal checks in Mr. Westcott's account?

A For this reason, simply; they were both Mr. Westcott's accounts. The money that he gave me to open this first account was his, and everything that I have put in there, except my mileage, and things like that that I had myself. Both accounts were his.

280 Q If Mr. Westcott wanted to draw his check wanted to invest say \$2,000, he could draw his own check against his own account to make such investment?

A I think while I had that power of attorney—I know the question was discussed as to whether we had better have two accounts, he said to the Bank, "This is my son in law", and they said, "It will confuse us, you had better one in his name and one in yours.

Q During the time that you acted for him, did he draw his own checks on his own account?

A I think he drew one check while he was in Europe; the bank showed it to me; it was written on a little piece of hotel paper in Glasgow.

Q Was there more than one check of that kind?

A I dont remember; that was the only one that impressed itself on me.

Q If he drew that check and the check was cashed, and he wanted to invest \$2,000.00 could he have drawn a check?

A He could do it, but he would not know what balance he had in there; he might draw a check for \$2,000 and there might not be money there to meet it.

Q Were any of the bank statements given to him?

281 A Not at the time I had the power of attorney they did not go to him.

Q Since he returned from Europe?

A The one that stands in my name would not go to him; I am responsible to him for that bank statement, the other one would be given to him.

Q Did you ever draw checks to the order of R. F. Westcott?

A I suppose I may have.

Q Did you ever draw one for the purpose of having him make an investment of the proceeds?

A I don't remember that.

Q Suppose that you did, then was it to enable him to make an investment for you or for himself?

A It could have been for himself, because I have had nothing, except what he has allowed me to have. I dont remember whether I did that. The books ought to show that, but I dont remember.

Q Have you drawn any checks for the purpose of making investments, after Mr. Westcott's return to New York, on The Union Trust Company?

A Do you mean in his name, or in my name?

Q In your own name or a broker's name?

282 A I dont remember whether I did or not, but I suppose, I imagine that I did.

Q (By Col. Gillespie) What time did Mr. Westcott return from Europe?

A In 1896, I think.

Q (By Major Adams) When did he go to Europe?

A In 1894, I think, I am not sure about that.

Q Has he been absent in Europe more than once since he opened that account for you?

A Yes sir, I think he has, I think he has been two or three times there; I don't remember about that right now, of course I can refresh my memory—yes, I know he was in Europe again, when I was there in 1895.

Q Can you tell me the total amount of money you remitted, either in cash, or by check from Savannah to New York, for deposit in the Union Trust Company?

A That I sent from here to The Union Trust Company? No, I don't know; there were some dividends that I sent from here, I mean some mortgages, some interest that I sent; I could not tell you, I don't know.

Q Can you tell me the total investments made by you, for yourself, or Mr. Westcott?

283 A No, I don't remember. I remember making some quite large investments; they seemed large to me; I don't remember what was the total.

Q Will you state the source from which you received the money which you remitted to The Union Trust Company and deposited in Mr. Westcott's name, I mean which you remitted from here, from Savannah?

A The only source that I could have received it from the towboat company, Cunningham,—I don't remember—I think only from the Towboat Company, Lyons and Cunningham, or Gordon.

Q What amount do you think?

A I don't know; not very much.

Q As much as a thousand dollars?

A I think more than a thousand dollars.

Q As much as \$5,000?

A I could not tell you, I don't remember.

Q Did you ever remit for deposit to his credit as much as \$7,000.00?

A I don't remember.

Q What is the largest deposit you ever made in his name?

A In New York?

Q Yes?

284 Q Yes?

A I don't know; I made some pretty large deposits; I don't remember; they seemed to me to be large.

Q Where did you get the money?

A The checks, or the cash?

Q What was the largest one you made in cash?

A The largest I made in cash I got from his safe deposit box.

Q Had you a deposit in the box yourself?

A No sir. I never put anything in Mr. Westcott's box, except the proceeds of what I took out of the box. He had—

Q Did Mr. Westcott usually keep as much as \$10,000.00 in his safe deposit box?

A Yes sir, he used to keep a great deal of money there at that time, I suppose ten or twenty times as much as that, in gold certificates.

Q And had the account in the Trust Company at the same time?

A Yes sir.

Q The Board would be glad to have you go on and state anything you may wish?

285 A Of course, there may be some things here that you may not understand. It was Mr. Westcott's habit, I dont know how long ago to keep a large sum of money in legal tenders, or gold certificates, as a method of investment, in that safety deposit box, and he does that yet, and when I became better acquainted with him and knew him better, and got anxious to be a business man, as I thought, and wanted to make investments, and from time to time, after consultation with him I did make them, and sometimes I would make them and sometimes he would. During his absence in Europe I made some of them. About that time there was considerable fluctuation in the value of currency, and in one instance that has impressed itself upon me firmly, because I remember taking the money down and getting about three per cent for it, and then buying some of those bonds which came out.

Q United States bonds?

A Yes sir. That was one of things that he was very much pleased with. Then, of course, I made other investments which were not so good. Those bank accounts I had probably better explain to you, so that you may understand them and how they came about. As I stated, when I went to Roanoke the first deposit was made; I dont remember how
286 much, I think five or ten thousand dollars, and being his money the credit on the balance was allowed two per cent, when general depositors didnt get that much, on account of his having an account there for a long time. For a long time I had a small account, until he knew me better, and became fonder of me, and I transacted more and more of his business,

still in this account. This was kept up until he went to Europe, when it was transacted in his name by me; then when he came back it was in my name. That was continued until I went to Europe. I still had that account and some property put aside, so that I might have enough income, in addition to my pay, to live properly, and then the rest of it he took back. I think that this explanation of the private accounts of Mr. Westcott will probably seem better from him may be, than from myself. Of course, I want to give you all these confidences between Mr. Westcott and myself, as the Board desires it, I shall be very glad to give every single thing that I can. Anything that I dont give you is because I have forgotten it.

Q (By Major Adams) Can you show the Board press copies of your letters? transmitting funds to New York?

A I think I can.

Q Will you do it?

287 A With pleasure.

Q Did you ever have copies of such letters?

A I think so.

Q When can you let the Board have them?

A I think that the Board has them.

Major Adams: I have not seen them.

Captain Carter: I should be very glad to have you see them.

Q (By Major Adams) I find that a deposit was made on February 10, 1893; can you show us the letter transmitting it?

A (Witness refers to letter book). I dont find it here.

Q There was a deposit made January 3, 1893?

A "Inclosed herewith check for deposit, Garfield National \$300.00."

Q The one I refer to is for \$3,550?

A What is the date of that?

Q January 3, 1893?

A I dont see that. I dont know that press copies were made of all my letters.

Q There was a deposit made on April 14, 1893?

A I dont's find that.

288 Q February 10, 1893?

A I dont find it.

March 7, 1893?

A I dont find that either.

Q June 18, 1894?

A \$3,700, that is here.

Q No, \$1,350?

A I dont find that.

Q Can you tell us the source from which that money was derived?

A I can find that out for you from the bank; they keep a record of it. I dont remember now.

Col. Gillespie: Not the record that he asks you for?

A If I could get hold of it—I can get from the bank the dates and amounts, and then probably find out how they were derived; I dont remember. I attempted to have press copies of all my letters made, but of course, I dont know why I did not. There is another book, may be they are in that. May be we can find it in the letters received, acknowledging receipt. They always acknowledged receipt of anything that I sent. (The witness refers to letter files). I dont find any acknowledgments of receipt.

289 Col. Gillespie: The Board will give Captain Carter an opportunity to submit that information.

Capt. Carter: I can get them from the bank. They must keep them.

Col. Gillespie: The Board desires the information submitted to it as early as possible. I must say right here that when the Board adjourns here it will meet in New York, and you will be required to come there. That is the place.

Capt. Carter: I shall be very glad to do it.

Major Adams: Are there any letters in these files received from any of the contractors for government work in this district?

A I can tell in a moment. I dont remember whether there are or not. I can look over them.

Q Have you had any correspondence with Captain Green in regard to the purchase of material?

A I think I have; I think he wrote me about some brush (?), there was a company which held some land in South Carolina on which there was brush; I think he wrote to me to know about that; I am not sure about that.

Q Have you had any correspondence with Captain Green as to the purchase of stone?

290 A Of that I am not sure. We talked it over, but I dont know whether we had any correspondence about that or not.

Q Have you had any correspondence with either member of the Gaynor family in regard to any contract work, other than the work for the United States?

A I think that I have.

Q Coming back to the first question as to whether you had any business relations with any one of the men interested in the Atlantic Contracting Company, let me ask you again whether you had any business relations with any one of them?

A No, I have not had. I have had this, I have corresponded with them concerning material, and concerning projects and one thing and another.

Q Personal?

A Personal letter? Yes sir.

Q Have you been associated with them in business enterprises?

A No sir, I have not. By that I mean this, I have had no actual business relations with them. I have known them very well and talked over many things with them, and I have written them about things, I remember one case in Barbadoes, advising them about that matter and looking over it.

291 Q Have you had any interest with in constructing anything in the State of Ohio?

A No sir. I went out with them once. The Pennsylvania road had a piece of terminal property in Cincinnati, and I went to look at that with a foreman by the name of McNeill, but nothing whatever was done about it.

Q Do you consider that you could properly have even that business relation with those men, and at the same time look after the interests of the United States, they being large contractors in this district?

A Yes sir, I felt that I could, because nothing passed between us in anyway that put me under obligations to them.

Q Have you ever drawn any checks on The Union Trust Company in favor of B. D. Green?

A Yes sir.

Q Have you had any business relations with him?

A I dont call them business relations. I drew checks in his favor to give a woman, and he sent me the balances. I asked him to do that because it was something that I did not want Mr. Westcott to know about.

Q Have any of your agents at any time received money from any of those contractors, or men interested with them?

A Any of my agents?

292 Q Yes sir.

A No sir.

Q Has Mr. Westcott ever acted as agent for you?

A No sir, I dont know that I could say that. He has asked as his own agent, for me, but he has never acted as my agent.

Q When in your records you enter a deposit, "Received from R. F. W", what does it mean?

A It means that it came from Mr. Westcott.

Q It is a deposit?

A If I received it from Mr. Westcott—

Q Was it a gift to you?

A No sir. It was this, I transacted a great deal of his business, and when I took anything belonging to him, either in cash, or in bonds, or in stock and put it into the trust company, I did it for this reason, that I wanted it down here to draw checks against—it was to avoid a trip to New York.

Q I dont understand your answer, exactly. Suppose that there is an entry under a certain date "Received from R. F. W", opposite a certain deposit in The Union Trust Company, what would that mean?

293 A It mean that there was a deposit put in The Union Trust Company of what had received from Mr. Westcott. What I mean is this, here is an account in the Union Trust Company which is Mr. Westcott's—

Q Did you make those deposits?

A Yes sir, I did, and sometimes he did.

Q Where did the money come from that he deposited?

A It was his, it came from himself.

Q Will you explain why a business man like Mr. Westcott, in New York, making deposits in the Union Trust Company of his own money, should make them in your name, rather than in his own name?

A It was in order that I should have an account that I might transact business for him.

Q Did he add and add to that account until it amounted to as much as, say \$40,000.00?

A That account in The Union Trust Company, very likely. I dont know whether he put that in, I think that as a rule that I put it in from his funds when he was not in town, although he may have put it in for me when I was down here, so that I could draw.

Q Suppose the deposit amounted to as much as \$30,000, made in your account, did he continue to add to it, in or-
294 der that you might have an account to draw on for your personal expenses?

A No sir, I say it was done—this account was put in my

name in the Union Trust Company, and when I wanted to make an investment, very often I made them by correspondence with his brokers, I could draw a check against it in New York.

Q Do you mean to say that Mr. Westcott made deposits of his own money, (and) without notice of the deposits coming to you, and you corresponded with his brokers in order to determine how to invest this money?

A No, usually I determined it before hand. I dont believe that those things were put in there by him, I think that they were put in there by me during his absence. I can tell from my memorandum book.

Q (By Col. Gillespie) Where is your memorandum book?

A In the letter case here, sir, I think.

Q See if you can find it?

A Yes sir (Witness examines case.) I think it may be in New York.

Major Raymond: You can produce it in New York.

295 Capt. Carter: Here they are. Now if you will give me dates, I have the memorandum books here.

Major Adams: A deposit was made on February 10, 1893 of \$5,850?

A I find the books for '90, '88 and '96, I dont find the others. Mr. Brown packed all these things away for me.

Q Look for a deposit on March 14, 1893 of \$7,000.00?

A That was put in by me, because I was in New York at that time and it must have been.

Q You put that in yourself?

A I think I must have done it, because when I was in New York Mr. Westcott would not go down town.

Q You can tell from the bank statement how that was put in?

A Yes sir.

Q Look that up?

A Yes sir. I don't think I have that bank statement, but I will see.

Q When you were in New York was it your habit to make deposits by mail?

A Sometimes I did when I didnt go down town, just depended on the weather, if the weather was bad I did it.

296 Q March 14, 1893, \$7,000.00; how was that amount deposited?

A I imagine that it was cash; It dont state here in this memorandum book.

Q The deposit was made by letter; can you tell the source from which the money was obtained?

A I dont remember, but I can find out.

A A deposit was made on July 22, 1892 of \$8,100, how was that made?

A That was cash.

Q Who made that deposit?

A That must have been made by me, because I was in New York on that day.

Q Do you know that it was you that made it?

A I dont know, but I presume it was, because the day before I was at Richfield Springs; I presume I must have made it myself.

Q Did Mr. Westcott ever receive cash from you to put in his own box?

A Nothing, except what came from the sale of securities of his; there was no cash that I had coming to me.

Q Will you look for a deposit made on April 12, 1893, one \$400.00 and another \$3,000.00?

297 A Yes sir, they were made by myself.

Q October 14, two deposits, one of \$400.00 and one of \$3,000.00?

A (Reading from memo book). "In town this morning; arranged about some of Mr. Westcott's affairs and went up to dinner in the evening." That must have been made by me.

Q Look for October 15, 1893?

A I dont seem to have that—\$850.00.

Q Yes, who made that deposit?

A October 15, 1893, that must be a mistake; it is marked here Sunday, but I was in New York, and I presume that it was myself. I dont remember about it, but I notice in here that it was Sunday, evidently that is a mistake.

Q Did Mr. C. H. Vandeventer ever act as your agent?

A As Mr. Westcott's agent.

Q Did he ever make any deposits for you in The Union Trust Company?

A I dont remember; he made some purchases for Mr. Westcott, acting as agent for him.

Q Did he ever receive and deposit money for you?

A Not unless it was from Mr. Westcott; I dont remember about that.

298 Whose property is that file case there? (Referring to file case in the room where the examination was being held).

A It is the property of The United States.

Q When was it purchased?

A It was—I dont remember.

Q How was it purchased?

A I dont remember. Usually the furniture I purchased the usual way I did it was by buying the material, and employing men, men who were carpenters and sending the pay roll to them to sign.

Q Where was it made?

A In New York, or Washington; it was made in Washington by The Woodruff File Case Company.

Q How was this particular case paid for?

A I don't remember that particular case, the desk—

Q I am asking you about the file case; it evidently contains official business and it may contain private business? Can you show the pay roll or the voucher?

A I dont know that I can; my chief clerk attended to all those things.

Q Who was your chief Clerk?

299 A Mr. Sterly.

Q Can he assist you in determining that?

A He very probably can.

J. W. O. STERLY called by Major Adams:

Q (By Major Adams) How was that file case paid for?

A It was paid for on the pay-roll.

Q Can you produce the pay-roll?

A I dont know which pay-roll it is. It was made in 1892, or 1893.

Capt. Carter: You can find out by looking at the letter press copies of letters when you sent the pay roll on, when you sent the roll to be signed by the laborers?

A I did not send it on.

Capt. Carter: I told you to do so?

A No sir, you didnt tell me to send it on.

Capt. Carter. The instructions were when we purchased cases like that, that the material should be purchased and then that the laborers should sign the pay-roll. For instance, there was a man named Hildbrand who made us some

furniture and we paid for the material and sent on the pay roll for the men to sign.

300 Mr. Sterly: We did that in one instance.

Capt. Carter: We did it in every instance.

The Witness: No sir. I did that under your own directions. You certainly gave me instructions to put that on the pay roll

Capt. Carter: You mean the pay roll that the men signed?

The Witness: No sir, the pay roll, to add it to the mens times.

Capt. Carter: You had no such instructions as that?

A Yes sir, I had instructions to that effect in several instances.

Capt. Carter: To put it on the pay roll and not have the men who did the work sign the pay roll?

A Yes sir.

Capt. Carter: Then you deviated from my orders, Mr. Sterly?

A I have not deviated; I did it under your instructions.

Capt. Carter:—I gave you instructions again and again when you came to me that under no circumstances should there be any suspicion of wrong-doing, and that nothing should be put on the pay-roll, unless the men who did the work should sign for it?

301 The Witness: No sir.

Capt. Carter: Mr. Sterly, that statement is false.

The Witness: No, Capt. Carter, it is not false.

Q (By Major Adams) Can you produce the pay-roll?

A I will try to Major. I dont remember exactly when it was. You (Capt. Carter) have got a receipt for that case.

Capt. Carter: Where is it?

The Witness: I dont know.

Capt. Carter: When was it purchased?

The Witness: I dont remember, Capt. Carter, I think it was in 1892.

Capt. Carter: I would like to see the pay rolls for 1892: (The witness produces a roll of papers).

Col. Gillespie: What are those papers?

A They are pay rolls. I dont know exactly whether it is on those or not.

Col. Gillespie: Then it is no use to bring them.

Major Adams: Capt. Carter asked for them.

The Witness: It was ordered in 1891. There was a long correspondence referring to it.

Q (By Major Adams) Was there a receipt in the office for that case?

302 A I believe that there was a receipt, Major.

Q What was the amount of the bill?

A I think that it was about \$82.00.

Q How did you make up the pay roll?

A The amount of the bill was added to the mens' times.

Q Whose time?

A The men who worked on the pay roll.

Q Men dont work on the pay-roll, they worked making the case?

A The men who furnished the articles did not sign any paper.

Q The men who made the articles, did they sign the pay-rolls?

A No sir.

Q Who did?

A I added it to the laborers time.

Q What laborers?

A The men who were employed working for the Government on Fort Clinch. Then I invariably put a memorandum with the retained voucher, showing just exactly what amounts were paid on the voucher, so and so, item so 303 and so, and then showed it to Capt. Carter.

Q Do you know of any other pay rolls that were increased in amount that way?

A Yes sir, I do.

Q Can you produce the pay rolls?

A There are quite a number of them.

Q Who paid out the money?

A I paid out the money.

Q Did you keep an account of it?

A Yes sir. I burned everything when Capt. Carter went away.

Q When did you burn those papers?

A On the impulse of the moment. I was thinking something might happen.

Q (By Major Raymond) You said you filed the retained vouchers?

A That was a mistake; I was mistaken about that; they were all in an envelope, I had them altogether, all those memoranda—anything I put on the pay roll in red ink—you (Capt. Carter) remember me showing you that in several instances.

Capt. Carter: There never was anything, except when the men who did the work were put on the pay-roll. Little things were sometimes put on the pay rolls, and they were required to sign the men in all cases; the foreman where they bound the books—the professional books were bound at the cost of The United States—I told you to have the men sign the pay-roll, but you were permitted to allow the foreman to sign, but under no circumstances to put it on in any other way.

The Witness: I never received such instructions from you, Captain Carter.

Q (By Major Adams) Examine the pay-roll which I hand you, and see if there are any items there that have been raised?

A Yes sir.

Q Name them.

A Reading from pay roll) Charles Spangenberg, Herman Meyer, Frank Kliner and Louis Spey.

Q Give the stenographer the number of the voucher?

A Voucher number 66, December 1894.

Q Do you know all the men who signed those names?

A No, I do not. There are four names which are fictitious names.

Q Who signed those names?

A I signed those names.

305 A I signed those names.

Q They are forgeries?

A In one respect you may say that they are forgeries, I dont know what you would call them. The names are fictitious.

Q Did you sign the receipts?

A I signed the receipts.

Q Why did you do it?

A I showed them to Captain Carter and showed him the bill and he said that they should be added to the pay-roll.

Q Did he tell you to sign those names?

A He didnt tell me sign exactly those identical names, but he told me that the best thing to do would be to use fictitious names.

Q He knew that you used those fictitious names?

A Yes sir, he did.

Captain Carter: That statement is absolutely false, and I must protest against it. I have put small articles on the pay-rolls; it is incorrect, I know. I have purchased things by

having the material bought in open market, and my instructions were to my clerk to send the vouchers to the men from whom they were bought and have them sign; that was not in accordance with the regulations either, but in both cases 306 it was for material and for labor that the United States received. I have not given any such instructions, on the contrary, my instructions to my chief clerk, in whom I had every confidence, and whom I would have trusted with my life, that under no circumstances should anything be done that had the appearance of wrongdoing. Even when I came here it was the custom to put all sorts of things of that kind on the payrolls. I followed that for a while, and then I made up my mind that I would not do that any more, because, while the Government received the benefit of the work, it was irregular, and might be called in question, so I gave instructions to my chief clerk that under no circumstances should a thing of that kind be done, and to the best of my knowledge and belief it has not been done.

The Witness: Captain Carter, I laid it before you in every instance.

Captain Carter: Dont you remember once or twice coming to me, and making suggestions that such things should be done, and I said to you that you must not do it that I would not have that sort of thing; not to put anything on the rolls that was improper, and as far as those fictitious names are concerned, Mr. Sterly, under no circumstances is that true?

307 The Witness: That is true. The fictitious names I showed you, and everything.

Captain Carter: That is absolutely false Mr. Sterly.

The Witness: Captain Carter, I feel extremely sorry, more than I can express that such a thing could have happened; I am ashamed that such a thing could have happened, but you knew of it.

Captain Carter: That is not true, Mr. Sterly.

The Witness: Captain Carter, that is true.

Captain Gillette: Mr. Sterly has a memorandum attached to this voucher to which these names are added, which comes very closely to the price of the book case. Can Capt. Carter produce his voucher showing the purchase of lumber to make that book case.

Capt. Carter: I dont know that I can do that, because I always left that to my chief clerk, the correspondence was

carried on by him, the material was obtained by him, and when he brought in the papers properly signed I made out a check for them.

Major Adams: Have you any record in the office of this transaction?

A Ordering the book case?

Major Adams: Have you a bill for this book case?

The Witness: I have not the bill.

308 Q Do you know where it is?

A Capt. Carter has got it.

Capt. Gillette: Where is the memorandum you showed me the other day from Hilderbrand?

A Here it is.

Col. Gillespie: This statement reads as follows; "New York, Sept. 14, 1897. Mr. J. W. O. Sterly, to Rudolph Hilderbrand, dr., 319 E. 64th, St. Dec. 22, 1894, Mr. J. W. O. Sterly, \$160.33. Aug. 29, 1893, Capt. Carter, \$163.10; May 1 1893, Capt. Carter, \$132.95." Opposite the first mention of Capt. Carter's name is "Bookcase", and opposite the next is a pencil mark, "Cedar boxes for Capt. Carter". The next item is Dec. 7, 1892, Corps of Engineers, \$19.57"; Opposite that is the pencil mark, "Voucher". The next is "Dec. 7, 1892, Corps of Engineers, \$351.08". Opposite that is the explanation, "Capt. Carter, \$138.88, Lieut. Reese, \$212.02". The next is "Sept. 2, 1892, Capt. Carter, \$50.59" with pencil mark "Reversible bookcase". "June 11, 1891, Board of Engineers, \$163.10; Dec. 2, 1890, Capt. Carter, \$502.26." The total is \$1,542.98.

Major Adams: How were those items paid for?

A They are all on the payroll.

Capt. Gillette: Accompanying that statement is the 309 following letter:—

"Mr. J. W. O. Sterly, Savannah, Ga.

Dear Sir:—Herewith I beg to hand you in compliance with your request, a list of bills which have either been paid by yourself or Capt. Carter. It is as complete a list as I can get together, and trust it will meet with your satisfaction.

Very truly yours,

"RUDOLPH HILBRAND."

Major Adams: Have all those items been paid for, has the whole amount been paid?

A The whole amount has been paid.

Major Adams: How were those different items paid for?

A "1890 Dec. 2, \$522.26". I think that those were those cases and the table; that was paid on a voucher. I know there was one desk in there, that high desk; the amount on the voucher is \$125.00 for cypress.

Q What do you by a voucher for cypress.

A It was, I think for 200 feet of cypress.

Q Did you receive the cypress?

310 A We did not receive the cypress.

Q Can you produce the voucher?

A I think Capt. Gillette has the voucher.

Col. Gillespie:—Did you get authority from the Chief Engineer to buy those articles?

Capt. Carter: No sir.

Col. Gillespie: In procuring office furniture, did you ask authority of the Chief Engineer, to purchase it, before you procured it?

Capt. Carter:—Some of it I did, and some of it I purchased in open market in this way.

Col. Gillespie: Without authority?

Capt. Carter: Yes sir.

Major Adams: Mr. Sterly, do you know anything about that voucher? (Handing witness a paper)

A Yes sir.

Q Was that material received?

A That material was received and was charged—no sir, that was not received, that was in payment of this box, and Capt. Carter had it charged as so much cypress.

Major Adams:—This is for 2,000 feet of yellow pine, and 228 feet of cypress, expended in repairs on the United steam launch, Angler. Was that material received?

311 A That was for book cases, those cases. The total of this voucher is \$502.26.

Q Who signed the receipts on the pay roll?

A Those were signed by the men working for Mr. Hilderbrand in New York?

Q Have you a bill for this item of \$502.26?

A I have sent for it. I have sent for an itemized statement. I have tried my best to trace those things. That bill was received and sent back for correction. You remember Capt. Carter, that you wrote to Mr. Stone (?)

Capt. Carter:—You corresponded with Mr. Stone. I told you to have his laborers sign it.

The Witness: What is the reason you had it charged to the Angler as cypress?

Capt. Carter: I dont believe it was.

The Witness: It is charged to the Angler.

Capt. Carter: Cypress was used on the Angler.

The Witness: When those articles were received, you instructed me to make it out this way, to charge it to the Angler, and you gave me a memorandum of it, and I got those men to sign it.

Major Adams: Where is the memorandum?

A I have not got it.

312 Capt. Carter: It is useless for me to talk to this man here, I can demonstrate that those instructions were not given him. If there has been anything wrong on those rolls, it has been unknown to me. I trusted everything to my chief clerk. I dont remember about those things, in fact, I remember very little of the clerical work of my office. I had a lot of work, and I trusted entirely to the assistants in my office.

The Witness: You never signed a pay roll until you saw that everything was right. If anything was put on the pay roll you were invariably told of it and knew it.

Q (By Major Raymond) You had a memorandum of those things?

A Yes sir.

Q And you destroyed them?

A Yes sir.

Q When did you destroy them?

A In July.

Q Why did you destroy them?

A On the impulse of the moment.

Q What caused that impulse?

A My true reason was this, because I had been loyal to Capt. Carter as a man can be, more than I properly
313 should have been, and I was afraid if anybody should find them, they might think that something was wrong.

Q In whose handwriting were those memoranda?

A Mine.

Q You were afraid then that if you preserved them it might make trouble for Capt. Carter?

A Yes sir.

Q When did you change your mind about that and conclude that you would tell all about those things and make trouble for Capt. Carter, when did you change your mind and conclude that you would tell all about those things?

A I did not change my mind. I determined to tell the truth about everything.

Q You destroyed the memoranda because you thought they might make trouble for Capt. Carter?

A Yes sir, I did it on the impulse of the moment.

Q When did you afterwards conclude that you would make a statement of those things?

A I will tell you how that came about; there was a man came here by the name of Shelley, who wanted to see the pay roll.

Col. Gillespie: When was that?

A Some time about the beginning of September.

314 Q This year?

A Yes sir. He came and wanted to look at the pay-roll. Capt. Gillette told me to produce the pay-roll. The man had not been working on the Angler. The Angler was repaired by the Burns Estate, there was so much for material and the rest for labor. Capt. Carter required that the pay-roll be signed by the men, and Mr. Ely could not find all of his men, and got those men to sign, then the pay-roll was made out in the office for the amount due him, and this man heard of it, and came to see the pay roll. He said Mr. Ely made him sign the pay-roll, and that he never worked under him.

Capt. Carter:—How did Mr. Ely come to put him on the pay-roll?

A He had to furnish signatures. I dont remember the circumstances any more, but I think that Mr. Ely could not get hold of all his men, so Shelley's name came on the roll, I have forgotten the circumstances. I can't tell the amount of the pay-roll, but it was the amount due Mr. Ely, he was the Estate of Burns.

Major Adams: Do you know of any other fictitious pay-rolls?

A Yes sir, we have some, I can't tell now Major.

Capt. Carter: Who put those fictitious names on those rolls?

A I did.

315 Q (By Major Raymond) What is this? (Handing witness pay roll)

A That man Flint did some repair work.

Col. Gillespie: Was all that was represented by this money done for the office?

A Yes sir. The money all went out for the government.

Q The work represented by those men on that pay roll was done for the office at odd times?

A Flint, I dont know what he did; Oakman, probably made some rubber stamps and that was put on the pay roll.

Capt. Carter: I should like to have an opportunity to find out whether these are fictitious, and if so, why.

Q (By Col. Gillespie) Were you directed to write fictitious names?

A I said that the best thing would be to use fictitious names.

Q You suggested that you use fictitious names?

A Yes sir.

Q (By Major Raymond) Those four names which you say are fictitious, and which you wrote yourself, Charles Spangenberg, Herman Meyer, Frank Kliner, and Louis Spey; they all appear to be written, they all have the appearance of being written in a different handwriting, and yet you 316 say wrote them all yourself?

A Yes sir.

Q Then you disguised your handwriting purposely?

A I can't tell exactly.

Q Look at them;—have they not the appearance—I have not analysed them, but do they not appear to be written by different people?

A They were all written by me.

Q You attempted to make them look as if they had been written by different people?

A Yes sir.

Col. Gillespie:—Do I understand you to say that you suggested that they should be put on that way?

A I told Capt. Carter that he had better use fictitious names for them. I showed Capt. Carter the pay-roll and he signed it. I showed him the bill.

Q (By Major Adams) Did Capt. Carter know that you wrote those four names?

A Capt. Carter knew of it.

Major Raymond:—I want that distinctly brought out—

The board adjourned until Friday, September 24, at 9:30 A. M.

317 The board convened, at 9:30 A. M., pursuant to adjournment.

Col. Gillespie: On yesterday some testimony was given by yourself in regard to the existence of a patent covering certain of the work which you were doing. I dont know that I thoroughly understood you. I dont know whether this patent covers a mattress, a combination of fascines, a method of tying, or whether it covered simply a method of launching them.

Capt. Carter: I have not seen the patent.

Q Then how could you have been afraid of it?

A I knew it from conversation with contractors.

Q (By Major Adams) Name the men with whom you had the conversation?

A William T. Gaynor, I had a conversation with him; I had a conversation as I remember, with R. G. Ross, and my impression is that I had conversation with other people in regard to this, but when that was I am not sure.

Q Do you know when that patent was dated?

A I do not know definitely, but it was during the progress of the work here.

Q About what year, approximately?

318 A I should say it was about 1894, as I remember it.

Q You know nothing about the patent?

A No, personally I do not.

Q You dont know what it covered?

A I understood that it covered the method of sinking.

Q Then you wrote your specifications so as to cover the patent, without knowing what the patent was.

A I had not seen the patent, I didn't know definitely what it was, but the method as I understood it, would have given them an advantage over other contractors, which I desired to avoid.

Q Did you ever ask Mr. Gaynor what his patent covered?

A I believe I did ask him, but my memory is indistinct as to exactly what it did cover. My impression is that it covered the method of launching, whether it covered anything else, I dont remember.

Q (By Major Raymond) You knew at the time?

A Yes sir, I knew at the time because we discussed it, but I dont remember now.

Q Ought you to have had definite information as to the patent when you drew the specifications?

319 A I did not consider it necessary at the time.

Col. Gillespie: You knew of the existence of the patent, or believing that you knew of its existence, you thought that was definite enough information. How could you prepare specifications to prevent an infringement of that patent?

A By leaving out anything concerning the method of sinking.

Q You also gave testimony yesterday which on reflection I did not clearly understand. That was in regard to the increase of the material?

A Yes sir.

Q You were asked if the increase of material under the contract of the amount in the specifications used for canvassing bids, would not be an injustice to disappointed bidders?

A I said I did not think it would.

Q Why could not that be so; why was it not so?

A I can concede that an excess of that kind might occur, but I believe that it was not an injustice, because, so far as I could ascertain, the contractors were deriving no more advantage from doing things as I wanted them done, than they would have derived by carrying on the work with
320 the exact quantities given in the specifications, whereas, the United States by carrying it on in that way would be the loser.

Q Is not a contractor usually benefited by an increase in the quantities delivered?

A No sir, not necessarily, because the benefit is just about the same, in other words, the stone would have benefited them about the same as the mattress.

Q Was not the price largely in excess of the contract immediately preceding this one, for mattresses?

A I don't remember that definitely; the records will show it.

Q Take Cumberland Sound. The contract price in 1896, was \$1.10?

A Yes sir.

Q The contract immediately preceding that, by Mr. Bangs, in 1894, was fifty-seven cents?

A Yes sir.

Q In Savannah harbor, in 1892 and 1896, we have two prices exactly the same. If the Atlantic Contracting Com-

pany in 1896 were willing to bid at the same price they got in 1892 for the same work, is not that an indication that they did not lose any money on that contract?

321 A I presume it is.

Q The presumption would then be that by largely increasing the quantities of material delivered the net earnings would be increased?

A Yes sir, if the quantities were increased absolutely; if both were increased then the earnings would have been increased.

Q Do you think the decrease on the stone proportionately as great as the increase on the brush?

A I think they were approximately as great.

Q I have called for official drawings of the identical mattress that you have adopted, and I cant find them.

A I dont know there is one in existence.

Q Did you ever prepare one of this combination mattress that you have adopted on your work?

A I dont remember whether I did or not.

Q Did you ever prepare official drawings of the three designs, for the information of the Chief Engineer?

A It seems to me that I did, but I dont know. Those are things I dont remember.

You do not know then whether the Chief Engineer ever had drawings of these mattresses?

322 A No sir, I am not sure.

Q No bidders that ever came for the profiles, ever saw any drawings?

A I dont know whether they did—I think that—I am not sure about that.

Q We are talking about a matter within a year, within a short period, less than a year?

A I know that. As I remember it. I did not have any official drawings, I think that I made a pencil sketch.

Q Did you go to all that trouble for every man who came and asked for a profile?

A Yes sir. If any contractor came in and wanted information, I gave it to him.

Q Did you ever furnish a pencil sketch to distant bidders?

A I dont think I did.

Q You furnished distant bidders no information except the specifications?

A I sent one copy of the specifications to each of the

distant bidders, and then if he desired to bid, I would be glad to furnish the two remaining copies and give them any information they wanted.

Q (By Major Adams) Those types of mattress 323 were adopted a long time ago?

A The first two types—all of them were adopted some time ago. The first type has been adopted since the days when it was—it was first used I believe, in Wilmington.

Q When you originally adopted them, did you make a drawing of them?

A They were adopted before I came here, and I dont remember whether there was any drawing or not. My impression is that when I first came here that for my own information I made sketches for the profiles, showing those things.

Q In your official notes, may you not have some sketches, if you do not have official drawings?

A I may. I dont remember about that, but my conviction is that I have made them, and when the contractors bid on the work in 1892, I think, I had them. I think the majority of the bidders, I think every one of them, saw the work and was told and knew that it was the same kind of work that was in the specifications, the same kind of work that was going on.

Q Thus, if you made original drawings some years ago, you might not have thought it necessary to renew 324 them afterwards?

A I dont remember. The way I usually did was this, when I came across anything in my district that was new to me, I worked it out, and then after that I didn't think much of it. It was in my mind clear, and I may have presumed that it was as clear to every one else. I may have neglected of later years to make them. I may not have thought it necessary. I would like to state this, that I submitted very few things to the department or to my superior officers, relying upon showing them the work when they were here. What I did was based upon my idea, it may have been a wrong idea, that I had the right to change the details of the work, provided I conformed to the general plans, and that is the way I carried it out.

Col. Gillespie: Q Does the act contemplate that this work should be done under your sole responsibility, or under the responsibility of the War Department?

A I dont remember what it says. Under my plans—

Q Is the expenditure on a river and harbor under the responsibility of the officer in charge or is it under the responsibility of the War Department?

A I dont know exactly how to answer that. I am responsible to my superior officers and I am responsible to 325 the Chief of Engineers, and he is to the War Department.

Q Is it not absolutely essential that the Department should have complete information of whatever is done?

A I think it had complete information. I didn't think it was necessary to give them further information, for if I had thought so, I certainly would have sent it to them.

Capt. Gillette:—It was testified to yesterday that some guide piling driven by the contractor, for the purpose of aiding in sinking the mattresses, was paid for by you as linear feet of pile dam. You didn't cover that in your explanation.

A That was not put there for the purpose of sinking the mattress; the mattress could have been taken off without that, but I wanted the piling put in the work for the purpose of giving close work, and also for the double purpose of protecting the small boats coming from Dafuskie. There were a number overturned and the darkeys thrown in the water. I allowed the contractors the benefit of those piles. They were for the benefit of the United States, and it was proper for me to allow them, and I concluded it was fair that they should be allowed and paid for.

Q That was on Cockspur Island training wall?

326 A Yes sir. The contractor could have sunk the mattress without them. I wanted the brush fascines forced into one another and I could only do it in that way, therefore I paid for that piling as linear feet of pile training wall. There was a contract in force and by authority I had permission to do work under it, in the nature of repairs, for the pile training wall, and as these piles had to be driven, little by little ahead of the work that was being done, it was more economical for me to have them driven in that way by the contractor, than it would have been if they had had to come down and drive a few piles, to go down and come back, because they would have had to charge more for them.

Q Who originated the idea of putting them in, you or the contractor?

A I required them to be put in, as I remember it.

Q Do you know whether there has ever been any official letter or order about that?

A No sir, I dont remember. A great many of those orders, a majority of my orders were given by orally, in person, to the inspectors and contractors. My assistant engineers in this district have been practically inspectors, because I have been on the work nearly every day, and in conversation with my assistants I have found out how the 327 work was going on, and whether it was being done properly, and I did not require reports. If I had had an assistant in local charge of the district as I was in charge of this district, of course, I would have required more reports. My memory may be in fault as to that.

Capt. Gillette: I find on the 12th of March a voucher in which you pay for 200 linear feet of guide piling, and a memorandum in your own handwriting says, "100 linear feet of pile work equal estimate for barge and hose," indicating that you paid for the barge and hose as linear feet of pile work. The date of that voucher is March 10, 1895.

Capt. Carter:—Let me see that. Can you find out when the work was done at Fort Pulaski, when the mining casemate was built at Fort Pulaski? This is evidently an estimate of pile work for some other work done down there. I remember that I got a barge and hose from the contractor down there and I believe that that was the price of that, and for convenience I put it on here as estimated linear feet for pile work.

Major Adams: Were you in the habit of paying for articles used or articles purchased as linear feet of pile dam?

Capt. Carter:—I dont think so, but I have done this, when I would have a certain amount of work done, and there 328 was difficulty in getting the bill or something of that kind from the contractors, I have ascertained from my assistant or inspectors the price of that and have allowed that to be estimated in the work as work.

Major Adams:—Afterward you certified to the voucher in making this payment?

A Yes sir.

Q Did you make a false statement?

Major Adams:—Was the pile dike paid for constructed?

A No, it actually was not.

Major Adams: When you signed the certificate to that effect, that the voucher was correct and just, did you not think you were making a false statement?

Capt. Carter: I was not, if this position of mine was correct. I would like to be permitted to state here, not in estenuation of anything which may be considered improperly done, but in explanation of why those things were done; without desiring at all to avoid any responsibility, purely and simply to explain how those things may have been done. The first work of this character that I ever did was on this coast here, and when I came here I found the method very different than

it was in the military division of the department of Mississippi; finding things absolutely different, I very naturally, as assistant, had to fall into doing the work in

exactly the same way in which I found it being done, and I have continued that more or less up to the present day, so that I feel sure, in some instances, my vouchers will show that actual linear feet of pile work paid for was not done. There was no attempt to conceal this at all. It was in my own handwriting, or in that of my clerk. I felt perfectly justified in doing it. This particular voucher I don't remember. The only possible explanation that I can give is that it was made in payment of some work of that kind. You will find in all of my reports anything of that kind put down in red ink, so that you can go back to the original vouchers and find out every single thing.

Major Raymond: Is that on your retained vouchers?

A I think so. They were all approved by my Assistant Engineer and by myself. The report to the engineer was a bare statement of what was done, but on the retained report an explanation of every item that has been sent to the Chief Engineer should be found.

Q In this particular case a receipt can probably be found?

A I think so.

Capt. Gillette: I would like to see you find it. Can you find the explanation in this case if I produce the full report?

A The chances are that I can. Of course, I may not be able to do so.

Q What reports would you like to have?

A I would like to know whether the works at Fort Pulaski were not going on then. If I look through the reports, I may find some memoranda which will explain this.

Col. Gillespie: I wish that you would look in the records of the office and find it?

Capt. Carter: It is possible that I may not be able to find it.

Col. Gillespie: You have free access to the official records of the office to enable you to answer any question that is asked.

Capt. Carter: It may have been that this was for the survey; I don't know what it was for now.

Col. Gillespie: Would you like to refresh your memory by an examination?

Capt. Carter: When those things were reported by my assistant engineers and inspectors I would make a memorandum of them.

Q Who was your assistant engineer at that time?

331 A Mr. Cooper was assistant engineer.

Q Would not Mr. Cooper remember?

A I think he ought to.

Q Would you like to call Mr. Cooper?

A I would like to have Mr. Cooper.

Capt. Gillette: I let Mr. Cooper go back to the work to-day. He will be here tomorrow.

Col. Gillespie: If Mr. Cooper is not accessible, will you get a statement from Mr. Cooper to that effect, Capt. Gillette?

Capt. Gillette: Yes sir.

Capt. Carter: It may have been during the survey. I remember that I got some barges to make some examination. It may have been for something of that kind. Mr. Geisler may remember.

GEISLER called:

Capt. Carter: Mr. Geisler I find in my memoranda here 100 linear feet of pile work, which was estimated as barge and hose; do you remember whether I used that on the survey, do you remember anything about that item?

A I remember the item; I don't remember what it was used for. I made a note of it in my own report to you.

332 Q You don't know what it was for?

A I really don't know. I only had my information from you.

Capt. Gillette: Was it for the construction work, or work on the survey?

A I know that it was for some necessary work on the

river not actual pile work, and it was paid for as the equivalent of that. (The stenographer's notes do not show whether this answer was by Capt. Carter or Mr. Geisler).

Major Adams:—In this voucher it is stated that the application is for jetty work; the certificate signed by Capt. Carter is as follows, "I certify that the above account is correct and just, O. M. Carter, Captain, U. S. A." Is that a true or false certificate?

A I consider that it is a true certificate. Anything connected with the jetty work and necessary to carrying on that work is the jetty itself.

Q Did you not suggest that it might be something connected with Fort Pulaski?

A Yes sir.

Q And next that it was something connected with the survey?

333 A I did.

Q Is either the first or second supposition jetty work?

A Strictly speaking it is not jetty work. I see the criticism and admit it.

Col. Gillespie: Is there anything in the specifications, or in the contract that called for any jetty work on this breakwater; was there anything in the specifications that called for anything like jetty work?

A No sir, those were put there for survey purposes.

Capt. Gillette: You may want to state something further about the soundings which showed the necessity for an increased amount of brush work on the Tybee breakwater?

A That I dont remember, Captain Gillette; I will have to see the master of my boat and find out. He may remember where the boat was. It was my habit to do a great deal of my work in this district right by myself from the deck of my boat, and have the men on board make soundings in various portions of the river, and I would note them down either on a scratch book, or on a memorandum book I had in my pocket.

Q Do you think you may have done that in this case?

A Of that I am not sure. The fact that I made those soundings must be true, because at the time I wrote that
334 letter it was evidently fresh in my mind. I dont remember whether they were made by myself, the inspectors, or who.

Q What peculiarity of the water, or depth of the water would it be that you based this increased estimate?

A There were two things which I may have based it on it may have been that after the mattresses were sunk, sounding over them showed that I did not get the height that I expected, and that they required more brush, or it may have been that along the line of the work I found deeper water than I had anticipated when my project was made, and therefore it required more brush. I don't remember. I don't suppose that there are any official records of those soundings in the office, otherwise they would have been found.

Q Could you go out to the breakwater in your boat to day, do you think, and tell when you were on the site of the breakwater, and would soundings show anything at all?

A Unless I knew where the line of the work was, without instruments, I could not.

Q How could you tell where the line of the work was?

A I could only know it by the ranges.

Q Do you know that there are such ranges?

A I know that there are, or have been.

335 Q What do they consist of?

A Clusters of piling driven there which we used as survey stations. Then there were single piles in addition to that.

Q The two causes which you say would require an increased quantity of mattresses, were shrinkage or sinking of the mattresses and increased depth; are there any other things that could have caused the necessity for a greater quantity of brush?

A Either a shrinkage, or a subsidence, or an increase in the depth of the water.

Q Which of those could be properly designated "new soundings?"

A Any soundings that I took later than the original soundings.

Q Which of those facts, a subsidence, or a shrinkage, or an increased depth of water who show that more mattresses were required by new soundings?

A All three would be shown by new soundings.

Q If new soundings had shown a subsidence or a shrinkage of the mattresses, would you not say something of that kind in your letter?

A Not necessarily. I was writing the letter, not you.
336 Q I was trying to find out what your idea was?

A I dont know how it is with other men, but for me it is very difficult to carry on a large amount of work and remember whether I did a certain thing, or whether I made a certain statement.

Col. Gillespie: It is apparent from the question of Capt. Gillette that he trying to ascertain exactly why you recommended the increase in the quantity of brush?

A From some new soundings that were made. How they were made it is impossible for me to say.

Capt. Gillette: The documents which I filed with the Board yesterday, indicate that you made a statement concerning the inside route to Beaufort, which was not borne out by the facts. In your report of a survey for a steamboat channel between Beaufort and Savannah you discussed two routes, a third route, the one that has always been used, you did not discuss at all; why not?

Q Because it was not necessary to discuss it. It is not a proper route.

Q Why not?

A Because, since the building of that training wall down there and the deposition of dredge material shoaling has 337 taken place to such an extent that the route will not keep open. Furthermore, it is not proper for another reason, that I needed the flow in Wright's river across Tybee knoll.

Q That is the reason that you didnt discuss it at all.

A I dont know whether that was the reason in my mind at the time. They are two and sufficient reasons why it should not have been discussed.

Q The same objection you make to it applies also to what you call "Route 1"?

A I dont think the objection of shoaling applies to route 1 so much as the objection of drawing off the water from the Savannah river.

Q What caused the shoaling?

A Two causes. The main cause was the construction of the training wall along the river, and then another cause was the deposit of a certain amount of dredge material.

Q In this channel?

A Not in the channel, somewhere in the vicinity. The route is not very wide.

Q (By Major Raymond) About how much dredging material was deposited in that vicinity?

A I dont know, I dont remember. There was an open-

ing left in this dam, but my intention was to close it. I
338 may say here that route 2 has been objected to by masters
of vessels, on account of its length, but I consider that
entirely out weighed by the benefit of the improvement to the
Savannah harbor.

Q Here is a letter to you by a man by the name of Hirt
from Indiana (Reading letter.)?

A I received that letter.

Q Did you receive the check for \$132.10, mentioned in it?

A Yes sir.

Q What did you do with the funds thus received?

A There was a certain amount, nine or ten, or eleven dol-
lars, which I paid out of my own pocket to bring back that
outfit. I had better explain how this was. Mr. Hirt was agent
of a boat called the "Santee," that used to run from here up
the Ocmulgee river, and it sunk. He came here and wanted
the use of the snag boat to raise it. We used to be permitted,
under conditions where no wrecking plans were obtainable to
use the snag boat for this purpose. I told him that he could
have the use of the snag boat, but I could not guarantee that
his boat would be raised, and he made deposit of a certain sum,
four hundred or five hundred dollars. I gave Mr. Bur-
339 nett, who was assistant engineer, and who had had more
experience in that sort of work than anybody else, leave
of absence on full pay, to go out on this work. They did not
succeed in raising her, and Mr. Hunt was very much disap-
pointed at the matter, but he kept staying on the matter
until the money he had left here was all used up on the pay
rolls, and I notified Mr. Burnett that he must come back. As
I remember then, when he got back to Doctortown he could
not get under the bridge and there was a delay of a couple of
days, and when they got back I found that they had left the
diving outfit. I needed the diving outfit and asked Mr. Bur-
nett why it had not been sent down. Mr. Hirt came to see
me and I told him that it must be sent back; finally I had to
send for it; I think it cost nine, or eleven dollars, then I fig-
ured up how much the boat was delayed in coming back and
found out how much money he ought to pay, and I made
\$132.10 the balance due. When the check came I turned it
over to my chief clerk, and wrote to Captain Goethals who has
charge of the money accounts to know if I could deposit to
the credit of the Ocmulgee River appropriation, and he told
me that I could not. I had that money on hand and no way

to get rid of it, and sometime after that Mr. Sterly told
340 me that he had used the money when he went to Pat-
chogue, and wanted to know if it was not a proper use of
the money, because he was a clerk here in the office and his
expenses could be paid out of the various appropriations, he
asked me if it was a legitimate use of the money, and I told
him, no, I thought not, that he had better retain it for the
present, that he had better put it back. Then I forgot about
the money. The money is still in the hands of Mr. Sterly.
Whether he has put it back I dont know.

Major Adams: Do you know of any reason why money be-
longing to the United States should not be deposited in the
Treasury under the head of miscellaneous receipts?

A If it had been deposited as miscellaneous receipts it
would not have been used for the work for which it was in-
tended.

Major Adams: That is the proper disposition of it, under
the law and under the regulations?

A My idea was this, that if any expense be incurred on
a certain river, when the money came for the reimbursement
of that it came out of that appropriation.

341 Q You stated yesterday to the board that this wooden
file case belonged to the United States? (Referring to a
file case in the office where the examination was taking place).

A I think it does.

Q We find in that case the records connected with two
accounts in the Union Trust Company, New York, the first
account in the name of R. F. Westcott, O. M. Carter, Attor-
ney; the first deposit was made October 19, 1891, \$5,000.00;
the second account is in the name of O. M. Carter.

A I think you have got the two accounts changed. The
first was in the name of O. M. Carter, and the second in the
name of O. M. Carter, Attorney.

Q I am correct in my statement. Tell me when the second
account was opened, the one in the name of O. M. Carter?

A The first account, in the name of O. M. Carter, was op-
ened in 1891.

Q The fact is that they were both opened on the same
day, October 19, 1891?

A What account?

Q One in the name of R. F. Westcott, O. M. Carter, At-
torney, the other in the name of O. M. Carter?

A You are mistaken about that, Major, because R. F.

Westcott's account was not opened until way along late in 1894 or in 1895.

Q The information which I have about this matter comes from the records, which are here?

A May I look at them, I feel sure that you are mistaken about that.

342 Q I have taken my memoranda right from the records and it is hardly worth while to waste any time over that. I want to ask you questions, and not you ask me. After I am through questioning I shall be glad to have you say anything you please; for the present I want to ask you questions. I want to know what the amount of the first deposit was?

A I don't remember, I think that it was five thousand, or ten thousand dollars.

Q Who made that deposit?

A Mr. Westcott. I think that was in 1891.

Q The deposit was made on October 19, 1891?

A Yes sir.

Q The amount amount of it was \$5,183.33. From what source was that money derived?

A I don't know what source, except that Mr. Westcott took me down to the bank, introduced me to the trust company, and made a deposit for the purpose of sending me to Roanoke, Va., for the purpose of having me look after some of his private affairs.

Q What about the other account in the name of R. F. Westcott, O. M. Carter, Attorney?

A I think that that is a mistake, Major.

Q I find a check drawn on the account of R. F. Westcott for clothing from Hatfield & Son. Was that clothing for you or for Mr. Westcott?

A For me.

Q In the same account I find a check drawn in favor
343 of R. S. Burnett. Who is R. S. Burnett? That check was for \$365.00?

A He was my assistant Engineer.

Q Was Mr. Westcott indebted to him?

A No sir, in no way. I don't suppose Mr. Westcott ever heard of him.

In drawing that check did you act as the attorney of Mr. Westcott

A Yes sir.

Q I find here a check drawn in favor of Lucinda M. Carter. Who is she?

A My mother.

In drawing this check did you act as the attorney for Mr. Westcott?

A In what account was it?

Q In the account of R. F. Westcott?

A As his attorney.

Q I find a number of checks drawn in favor of I. Stanton Carter? Who was he?

A My brother.

D. P. Carter?

A He was my brother too.

Q In drawing these checks in favor of them, those two brothers, did you act as attorney for Mr. R. F. Westcott?

A If they were drawn out of his account, I did.

Q They were drawn from the account which we are discussing, the account of R. F. Westcott, O. M. Carter, Attorney.

I find another check drawn in favor of B. D. Green for 344 \$910.00. It appears that B. D. Green is associated with the contractors for the work which has been under your charge. You testified yesterday that you had no business relations with B. D. Green. You have admitted that you borrowed \$1600.00 from him. Was this \$910.00 in part payment of that loan?

A No sir, I think that it was this, if I remember right I had him make a payment to a woman in New York, I think it was in that way.

Q For a payment made to whom?

A To a woman in New York, that I didnt want Mr. Westcott to know about.

Q This check says that it was for services, for whose services was it?

A Hers—It was not services really. I didnt want to draw the check directly to her, and that was the way it was put down.

Q The object of these questions is to find out, or to have Captain Carter explain to the Board whose account this is, to find out who are interested in this account of R. F. Westcott, O. M. Carter, Attorney?

A I can tell you Major.

Q I would prefer to have you answer my questions. Under date of May 1, 1895, the balance standing to the credit of

R. F. Westcott, O. M. Carter, attorney is \$26,056.08. It appears from the record that \$24,851.83, belonged to some person known as "A" that \$1,204.25, belonged to some person known as "B". The sum of these two amounts is \$26,056.08, the total balance. Who is "A"?

345 A They were not people, as I remember it. As I remember that account, this was transferred back to him, and this large amount was taken by me for the purpose of making certain purchases for him, in other words some private matters of his, which were transferred back to his own account; that is my recollection of it.

Q We can say then that for your purposes of bookkeeping, "A" meant Carter?

A Yes sir.

Q And for your purposes of bookkeeping "B" meant Westcott?

A They were both Westcott, but A was the account of Mr. Westcott that I was taking care of, the other was an account that he was taking care of himself?

Q The account is balanced again on June 13, 1895; the total balance is \$41,927.57. It appears that of that sum \$37,984.97 belonged to "A". Was that Carter?

A "A" was the account that I was responsible for, for purchases.

Q \$2,905.26 belonged to "B"; the difference between these two sums and the total balance is \$1433.34. It is suggested that this is for collections in June not yet divided. What does that mean?

A It means this, that they were certain of those rentals that I put—rentals of his, which I put in his own account.

Q You had an account in your own name in this trust
346 company?

A Yes sir.

Q The next balance is June 27, 1895, total \$27,303.98. Of this sum \$27,186.37 belonged to A, and \$117.61 belonged to "A", making the sum of \$27,303.96, the total balance. It is noted in the record, behind the "B", the letter "W", in pencil. Who is "W"?

A I think that "W"—I sometimes used "A", "B" and "C"—that is a private account, not this general account, which I had charge of for the purpose of investment, this was a private account, I think that was the way of it.

Q I wish you would remember that statement. The next

balance is on October 21, 1895; total \$6559.98. Of this amount \$2867.67 belonged to W and \$3692.31 belonged to "C". Who is "C" and who is "W"?

A I presume that "W" and "C" are the same as "A" and "B". I sometimes used one and sometimes the other for convenience in dividing this responsibility which I had.

Q Those balances run along this way, two in which the designations are "A" and "B"; the third designation is "A" and "B", or "W"—the third one the balance belongs to "W" and "C". The fourth is December 5th, 1895; total balance \$4308.90; of this amount \$2370.82 belonged to "W" and \$1938.08 belonged to "C", total \$4308.90. I notice here that the balance has dropped down from say \$42,000. to \$4,000. What use did you make of the money that you 347 drew out?

A I dont remember but the records will show. I was allowed to draw against this for my own private use, and then the rest of it I invested for him and turned over to him.

Q Invested in his name, or in your name?

A Sometimes in one and sometimes in the other.

Q Did you make any reference to the investments in distributing the balances between "W" and "C"?

A I dont think that I did, because all that was placed in the safety deposit vault.

A All that?

A The money was put in my name or his.

Q Please remember that?

A Yes sir.

Q The next balance is January 1, 1896, \$3,336.09, of which sum \$2911.79 belonged to "W", and "424. belonged to "C". The next balance is February 1, 1896; total \$3184.54; of this amount \$2661.61 belonged to "W" and \$522.86 belonged to "C". The next balance is March 1, 1896, total \$4374.66; of this amount \$3,999. belonged to "W" and \$375.66 belonged to "C". The next balance is May 1, 1896; on it is noted "R. F. W", \$5986.07" Who is "R. F. W."

A Mr. Westcott.

Q Explain who Mr. Westcott is?

A He is my father-in-law.

Q The balance as stated in the check-book, entered at 348 the top of the left page, \$6,533.48; May 6, from O. M. C \$144.84"; who is "O. M. C."?

A Myself.

Q "May 9, J. B. S" \$1,139.99". Who is he?

A Mr. Solly.

Q Who is Mr. Solly?

A He is the father of Mr. Westcott's son-in-law.

Q In what capacity did he act in making the deposit?

A I know that he collected rentals from time to time; Mr. Westcott sent me a statement of them—I dont remember.

Q The sums last mentioned are added up and the total is \$7818.31; from this sum is deducted \$Checks \$1381.65". the difference is \$6436.66. Behind that is noted "Balance May 11"; next "Transferred back to R. F. W. on that date". Who is "R. F. W" in this case?

A Mr. Westcott.

Q In this interval, covered by the balances just mentioned you made several investments. On October 4, 1895, page 426 of your letter book you order from Reed & Flagg 200 shares of Delaware & Hudson Canal, at 130; 200 shares of Delaware, Lackawana and Western at 170, "To be registered in my name". was that money your money or Mr. Westcott's?

A It was Mr. Westcott's.

Q Why did you have the stock registered in your name?

A I did it for the reason that I expected to dispose of the stock, and having it registered in my name—I dont
349 know why I did it, except that it, was my desire to have it done.

Q Have you disposed of it?

A Mr. Westcott has, he has both of them in his possession; I know that The Delaware, Lackawanna and Western had been transferred, I dont know whether the other has or not.

Q Why was it transferred to him?

A Because it was his.

Q On February 26, 1896, you wrote a letter to Reed & Flagg, asking that the dividend on the Delaware and Hudson be deposited to your credit; was it so deposited?

A I think that it was.

Q Have you ever collected the dividends in your own name since?

A On the Delaware and Lackawanna I think I collected them until it was sold.

Q When was it sold?

A That I dont know; there is a record of it I think, in the books. I am not sure that the Delaware and Hudson has been sold; I think that the other is sold.

Q Here is a bank statement of May 3, 1897; the balance to the credit of O. M. Carter is \$6519.25. This account is the name of O. M. Carter, in the Union Trust Company, New York. In this statement I find this entry, "1897, January 20, cash dividends Delaware, Lackawanna and Western, \$350.00". "March 15, 1897, dividend, Delaware and Hudson Canal Co, \$250.00." I find also "April 2, coupons 50 L. & G. 6's, 1500". "April 20, Div. D. L. & W. \$350." To go back to the transfer of the first account to R. F. Westcott, will you inform the Board whether you are still acting for R. F. Westcott, and whether you have drawn any checks?

A I dont think that I have drawn any checks since then.

Q It is of record that you have drawn checks since May 11, 1896?

A Then the power has not been revoked.

A I want to go back again to a question I asked you yesterday. I asked you whether "R. F. W." or R. F. Westcott drew checks in his own name, from this same account, I mean from your account as attorney, you were in doubt about that?

A I remember some—I dont know.

Q It is of record that a number of checks were so drawn by "R. F. W", or R. F. Westcott?

A After he came back he may have—he was in Europe one or two years, I am not sure.

Q Have you ever made any investment jointly with Mr. Westcott?

A We have made investments in this way, we have made investments jointly in which he was to give me out of those advances a certain share. I remember that there was some property in Orange, where he had some property, where I agreed with him that he was to put in a certain amount; it was to be jointly and he was to give me that.

351 Q Was there any correspondence between you and Mr. Westcott on that subject?

A I think so, we talked about it anyway.

Q In discussing that subject did you make any proposition as to such an investment?

A We must have discussed it, but I dont remember in what way. We met and talked it over and he is building those houses out there now.

Q Did you propose to Mr. Westcott, using your own words, "That we put in from fifty to sixty thousand dollars each?

A I expect that I did, because that is the way that we talked about it.

Q In this particular case of investment in Orange what did Mr. Westcott put in?

A I think that he transferred the land he had there—a half interest in it to me, and then I transferred from that account I held for investment an equal sum with him.

Q Did you consider that your money, or Mr. Westcott's money?

A It was his, but he had given it to me, otherwise I could not have given it back to him. There has been no distinction between Mr. Westcott's money and mine.

Q How much money has Mr. Westcott turned over to you since January 1891?

A That is pretty hard for me to say.

Q Can you approximate it?

352 A He turned over to me all that I have spent during that time, except what my salary was, then he has turned over some things to me which made investments for me.

Q Where did he get the money to make those investments?

A I dont know how he got the money; he had the money; I dont know where he made it, I suppose in the various corporations; I dont know the source, because he had this money when I first knew him.

Major Adams: The letters in which the investment in Orange is discussed are between Capt. Carter and some one who signs his name "Daddy", and they are to be found in letter book No. 8, pages 368 to 373, under date of January 25 and January 27, 1897. These are letters addressed to "Daddy".

Q Who is "Daddy"?

A Mr. Westcott.

Q Major Adams: The letter written by Capt. Carter, and addressed to "Daddy, is found in letter file case, No. 11, dated January 25, 1897.

Q I dont understand how you could make a proposition in which he puts in certain lands and you put in fifty-five to sixty-thousand dollars, which you describe as putting in that amount each, without you had some ownership in that \$55,000.00 cash?

A My relations with him were different—they were not business relations, they were personal relations; he loved me very dearly, and he does yet. I had access to his safe deposit

vault; I had a power of attorney from himself and from
353 his wife; and while the money came from him, I could
do as I pleased with it; he gave it to me, he was liberal
to me.

Q How many children has Mr. Westcott?

A He has three.

Q Living?

A Yes sir.

Q His wife is living?

A Yes sir.

Q When you came to Savannah some years ago, you borrowed \$1600.00 from B. D. Green. What resources did you have at that time of your own?

A I had very little.

Q How many payments did you have to make to return that \$1600.00?

A I had to make a lot of them, it is pretty hard work for me to remember.

Q It seems from these letters, that in 1897, it appears that you are undertaking to put from fifty-five to sixty thousand dollars in an investment; where did that money come from?

A It was all derived from Mr. Westcott, except the little bit that I may have saved myself, very little.

Q How much have you received from Mr. Westcott?

A I have received what I have expended, and then he has put some property in my name; I don't remember. He put a house in my name, and then I gave back into his possession things which I had had of his, things that I had been buying, 354 coupons that I had been clipping dividends that I had been receiving, turned over to him the balance that I had, and then when I went away he gave me a letter of credit; that was all I asked.

Q I have here a statement of account from the Union Trust Company, New York, dated January 16, 1897, the account is in the name of O. M. Carter, the balance is \$4985.37; "Deposited December 1, 1896, 10 coupons St. Paul, Minneapolis and Omaha Railroad, \$300.00; 10 coupons Morris and Essex; 20 coupons Lake Shore \$700.00. Deposited by letter December 14, \$200.00. December 15, dividend Del. Lackawana and Western, \$350.00; by R. F. W. \$2142.45." Was Mr. Westcott still making you gifts by depositing to your credit; this is under date of December 15, 1896?

Q He either did that, or he allowed me to take his money and deposit it to my own credit. Sometimes he would make deposits and sometimes I would make them.

Q Did those bonds belong to you or to Mr. Westcott?

A To Mr. Westcott.

Q Is Mr. Westcott able to deposit his own coupons?

A Certainly.

Q I have here a statement of account in The Union Trust Company, with O. M. Carter, balance November 4, 1896, \$6,422.15; deposited September 15, 1896, dividend Delaware and Hudson Canal, \$350.00; Oct. 8, cash Coupons \$2425 (?); by letter October 12, \$270.21; Delaware and Lackawanna 355 dividend, \$350; 50 coupons U. S. 5's, \$625.00. Can you tell us, approximately, how much money has been turned over to you by Mr. Westcott, all told?

A To me to handle for him?

Q Deposited in your name in the Union Trust Company?

A I know it was quite a large sum, to be it appeared to be large.

Q Do you think that it amounted to as much as \$100,000?

A I expect that it does.

Q Why did you close this account in the name of R. F. Westcott, O. M. Carter, Attorney?

A Because he came back to America. He only opened it because he went away. That was the short account, the other is the long account.

Q Has Mr. Westcott ever acted as your agent?

A In what?

Q In anything?

A I think he has.

Q Has he ever received money from you?

A If he has—I know that he has not received any money for me, because I didnt have any that he could receive, I dont know, I dont know that I understand you.

Q Have you any explanation that you want to make to the Board of the facts presented in connection with the two accounts in the Union Trust Company, New York?

A Yes sir, I can explain that very readily. I think 356 that The Union Trust Company and Mr. Westcott can tell you the whole thing. If you will permit it I would like to have the small account book showing the first deposit in the bank in my own name; it is a small book.

Col. Gillespie: What kind of a book is it?

A A small check book. That is it. This book shows that that account in 1891 was opened in my own name, and not in Mr. Westcott's.

Major Adams: Both are on the same date?

Capt. Carter: It is not possible.

Q Is that right (Handing witness paper.)?

A I presume that it is right. This was in 1891.

Q Here is a statement (handing witness paper)?

A That is mine.

Q You are satisfied as to that one?

A I think so. I know that the account was put in my name in 1891, because I remember the circumstances.

A Is this the account under which you acted as attorney?

A No sir.

Q The first deposit was made in your own name in October, 1891?

A Yes sir, that is correct; the first deposit in my name was made in October, 1891.

Q The first item of the other account was taken from the record, October 19, 1891, from R. F. W., \$5,000?

A He put it to my credit, not to his own credit.

Q This is your account?

357 A Yes sir. That is my own name, not Mr. Westcott's name.

Q The sum is \$5183.33?

A Yes sir

Q And on the very same day, October 19, 1891, we find in the other account, "From R. F. W. \$5,000.00", to your credit as attorney for R. F. Westcott?

A There is a mistake about that. I never drew checks as attorney on that account.

Q This is the one we are talking about?

A I am sure that there is a mistake about this. Mr. Westcott took me down and introduced me to The Union Trust Company as his son in law, and deposited \$5,000 to my credit; that was in my own name and I signed checks in my own name. I never signed anything "R. F. Westcott, O. M. Carter, Attorney, until he went to Europe.

Q The two deposits were made on October 19, 1891?

A I know this, I know that I never signed Mr. Westcott's name as attorney until after he went to Europe, because I didnt have power to do so. He may have said to the bank, "This is my agent, my attorney or son-in-law. The account was put in my name—I dont know whether I make that clear.

Q The record is very clear, and your explanation of it is not. Is that your account, or the account of R. F. Westcott? (Showing witness paper).

A That is the account as attorney.

358 Q This other statement covers the same period?

A This is for 1895. The two accounts were running at the same time. This one was not opened until sometime after the other one. This one was opened in 1891, and this one was opened later. I see by the check book that this one was opened on February 4, 1895.

Q Opened by a deposit?

A He had an account in the Union Trust Company in his own name, he gave me money in my own name, and then when he went to Europe, he gave me power of attorney so that I could sign his name to checks; formerly I could not do that; formerly I had to get money from him and put it in my own name; now I could sign his name, and I used that account; the other one I left there and didnt use so much until he came back, when I used it again more. The bank will straighten that out for you.

Major Raymond: I think I see that.

Capt. Carter: In 1891, he took me down to the Union Trust Company and introduced me, and I left my signature. He introduced me as his son-in-law, or his attorney, saying "Everything that is mine is his and everything that is his is mine." He deposited a sum of money, that was in 1891, in my own name, and from time to time after that I made investments for him in things that in my opinion would pay, I kept on right straight along doing this business for him, clipping coupons for him and other things, until he went to

Europe, then he took me to the bank and gave me a power
359 of attorney to sign his name to checks; up to that time

I only signed my own name, then during his absence I had this check book, and I used it from the time he left for Europe until he came back.

Q This account carries you through the investment in Roanoke; you were not acting as attorney then?

A Not in the bank, I could not sign his name in the bank. I was his agent, but I had no power to sign his name in the bank. He had to put money in the bank in my name I didnt have power to sign his name as attorney until that time.

Q Under date of April 8, 1895, a check is drawn in favor

of Reed & Flagg for \$6,500; check No. 27, what was that for?

A I dont remember, it must probably have been for some purchase.

Q Under date of April 9, 1895, check is drawn in favor of Reed & Flagg for \$6,956.25, what was that for, check No. 29?

A I dont know without seeing the stub; it is probably marked on the stub what it was for.

Q Under date of June 7, 1895, another check is drawn payable to Reed & Flagg for \$13,945; what was that for?

A I cant tell without I see it, it is probably on the stub.

Q Have you any recollection of that?

A I dont remember now, no. I made purchases from time to time from that certain firm.

Q On June 29, 1895, a check was drawn, payable to T. M. Cunningham, for \$10,000.00; check No. 77; what was that for?

360 A That was for a mortgage Mr. Westcott made in Atlanta, I think that it was in Atlanta.

Q On June 29, 1895 there was a check drawn payable to the order of John Lyons, for \$15,000?

A That was another investment of his in a mortgage here in Savannah.

Q On July 1, 1895, there was a check drawn payable to the order of O. M. Carter for deposit in The Southern Bank of The State of Georgia. Did that money belong to you, or to Mr. Westcott?

A It belonged to Mr. Westcott.

Q On July 1, 1895 there was a check drawn payable to the order of I. Stanton Carter, for \$2500.00. This is noted as a present?

A Yes sir.

Q Did you make your brother of \$2500.00 belonging to Mr. Westcott?

A That was with his permission; it was not done without his permission.

Q On October 4, 1895, a check was drawn in favor of Reed & Flagg for \$10,000.00. It is noted that it was for the purchase of Delaware & Lackawanna stock; was that sufficient to make the full payment?

A That I dont remember, but from the amount I suppose

that it was only a check to enable him to make the purchase, and the balance was sent later.

361 Q On October 9, 1895 a check was drawn in favor of Reed & Flagg for \$1238.67 on 400 sh. D. L. & W; 200 sh B. & H., and the note here is "O. M. C." and a small "p." What does that "p" mean?

A I dont remember what that "p" meant. "O. M. C." must have been myself.

Q When you closed out this account on May 11, 1896, why did you make this small deposit of \$144.84—why did you make that small deposit on May 6?

A Before closing out? I dont know why it was; does it not tell what it is there.

Q There is a note that it is from "O. M. C"?

A It may have been mileage; I dont know what it was, major—it could not have been my pay, I dont know what it was.

Q Captain Carter, I would like you to explain to the Board how you could make presents amounting to \$2,500.00 from this account, to your own relatives, and why it was necessary at the same time to divide the balance between yourself and Mr. Westcott?

A I had an account of his which came in from certain 362 rentals and various things that Mr. Solly had possession of; then I had certain payments that I made for various things; then I had that general account of Mr. Westcott's, for which I responsible to him, and for our convenience and for determining my responsibility to him I divided it into two sets, then from this large account I drew out what I needed myself and the rest of it I invested; then from time to time I would write him what investments I had made and what my personal expenses were.

Q These checks are signed "O. M. Carter," drawn on the Union Trust Company, New York, "February 8, 1897, pay to the order of I. Stanton Carter." Is that a present, like the other?

A Yes sir.

Q Was that made by yourself, or by Mr. Westcott?

A It was made by myself, out of his property.

Q You assert then that the money standing in your name with the Union Trust Company belong to Mr. Westcott?

A Yes sir, it belongs to Mr. Westcott. He has allowed me to expend out of what I want. I have been very extravagant,

and then from time to time purchases have been made out of that.

363 Q On March 29, 1897, there is another check in favor of I. Stanton Carter for \$500.00: Is that a present from you, acting for Mr. Westcott?

A Yes sir. I presume I had better explain that in this way, that Mr. Westcott never required me to show him those checks; what I did with the money he didnt ask.

Q About how much did you spend each year?

A I spent a good deal?

Q How much?

A I dont know, I suppose three or four times my pay.

Q On March 27, 1897, a check is drawn in favor of D. P. Carter, for \$200.00. Was that a present?

A You could call it a present. It was something I sent him.

Q How much money did you turn over to your own relatives, acting as attorney for Mr. Westcott?

A Quite a good deal.

Q How much?

A I dont know, I expect more than \$10,000.00.

Q On April 8, 1897, a check is drawn in favor of M. A. Connolly, for \$100.00. Who is M. A. Connolly?

A He was my second clerk.

364 Q Was that a present to him?

A I used to let my clerks have money when they needed it, Mr. Connolly and Mr. Sterly, etc.

Q Was that your money, or Mr. Westcott's?

A Mr. Westcott's; that money was returned; those clerks returned that money, or some of it.

Q On April 12, 1897, a check was drawn in favor of D. P. Carter for \$125.00. Was that also a present?

A I think that was something I wanted him to give my mother.

Q July 13, 1896, a check was drawn in favor of I. Stanton Carter for \$500.00. Was that also a present?

A Yes sir.

Q On June 29, 1896, a check was drawn in favor of D. P. Carter for \$50.00; June 29, 1896, I Stanton Carter \$150.00; October 10, 1896, Mrs. E. D. E.—; who is she?

A She is a lady who lives in Connecticut.

Q Was that a present?

A No sir.

Q If you wish you can make any explanation you desire?

A Only this explanation, that I was always permitted to expend what money I wanted for my private affairs, and
365 I did it.

Q This account was standing in your name?

A I know it was.

Q October 15, 1896, a check was drawn in favor of D. P. Carter for \$1400.00. I understand you that all these checks in favor of your two brothers are presents?

A Yes sir, from me. Mr. Westcott permitted me to do it out of my allowance.

Q On October 22, 1896 a check is drawn in favor of R. F. Westcott for \$10,000: what was that for?

A To give him back some of his money; he needed it for some purpose, I presume.

Q October 28, 1896 a check is drawn in favor of D. P. Carter for \$200.00; check in favor of I. Stanton Carter, January 25, 1897, for \$500.00; December 30, 1896, check was drawn in favor of D. P. Carter for \$250.00; December 10, 1896; I. Stanton Carter, \$100.00; December 10, 1896, D. P. Carter \$200.00; December 9, 1896, check was drawn in favor of B. D. Green for \$1,000. What was that for?

A To give to "E. M. T." It was a lady to whom I wanted to give that. I can give you her name and address if you want it. She is now in this country, she was, then, I think, in Paris.

366 B. D. Green, then, has acted as your agent?

A In things like that. He was my friend, whom I knew that I could trust to attend to private matters with which I didnt want to have anyone's name connected. He was a gentleman and I could trust him.

Q November 17, 1896, Tiffany & Co. \$245.00; January 3, 1896, Number 205 1/2, pay to the order of—somebody, what is that "Chickamore"?

A I dont know what that is.

Q The check is signed, "R. F. Westcott, O. M. Carter, Attorney," and endorsed "Annie Chisamore," for \$25.00; March 21, 1896, check in favor of D. P. Carter for \$250.00; December 23, 1895, D. P. Carter \$200.00, signed "R. F. Westcott, O. M. Carter, Atty"; November 21, 1895, check in favor of A. Minis, \$2220.00, signed "R. F. Westcott, O. M. Carter. Attorney? What was that for?

A I dont know, I imagine that it was on account of a mortgage in South Carolina. Mr. Minis is a lawyer here.

Q November 8, 1895, in favor of William Elliot, \$3780?

A That was for the same thing as Mr. Minis.

Q That was an investment?

A Yes sir.

367 Q During the period that you were acting as attorney and drew checks as attorney—here is a check, drawn August 5, 1895, in favor of H. C. Whitman (?), for \$25.00, signed "R. F. Westcott"; it appears that Mr. Westcott did draw checks during that time?

A Yes sir, that is the one I referred to the other day. I think he drew a few.

Q October 17, 1895, there is a check in favor of O. M. Carter for \$1051.20, signed O. M. Carter, Attorney; October 12, 1895, in favor of B. D. Green (?), \$500.00; October 4, 1895, in favor of Reed & Flagg, for \$10,000, signed O. M. Carter; October 2, 1895, D. P. Carter \$83.33, signed O. M. Carter, attorney; July 5, 1895, in favor of O. M. Carter, \$5000.00, signed "R. F. Westcott, O. M. Carter, attorney, endorsed, "Pay to the order of The Union Trust Company, New York." Why was that transfer made, why was that transfer made from one account to the other?

A What date was that?

Q July 5, 1895?

A Think that that was a letter of credit, I remember that I was going to Europe—I dont remember, Major, you can tell by the stub.

368 Q January 7, 1896, in favor of the Union Trust Company, for \$2,000, signed "R. F. Westcott, O. M. Carter, Attorney." What was that check drawn for?

A I dont remember, Major, you can look at the stub and see.

Q Where are the first of those stubs?

A I think the first were away back in Leavenworth. (Here Major Adams seem to be referring to a lot of check stubs which are before the Board.)

Q These are all Union Trust Company?

A These are all things I have had since coming to Savannah.

Q Is the stub check book here belonging to you, referring to your account in The Union Trust Company?

A Yes sir.

Q Where is it?

A It is here; that is it, that is the first deposit I spoke to you about; that is what I meant when I said that it was in my name instead of Mr. Westcott's

Q This you say is the first check used in the personal account?

A The time Mr. Westcott gave me the money, for the money he gave me.

Q Check No. 6, drawn in favor of "O. M. C" that is 369 yourself?

A Yes sir.

Q That is for \$100.00; it is marked "For personal account"; that date is October 22, 1891. It then appears that as early as 1891, you made a distinction between your personal expenses and checks on account of Mr. Westcott's business?

A Yes sir, I made a distinction. I dont know whether I always made it or not.

Q Check No. 8, drawn October 27, 1891, in favor of Chas. P. Rogers & Co., is marked "Personal"; October 27, 1891, check No. 9, to the order of Arnold, Constable & Co., for \$13.50, is marked "personal"; October 30, 1891, No. 11, \$18.00, to the order of J. W. Scully, for fuel, marked "personal". I would be glad to have you explain to the Board, having in mind, first, that you made a distinction in 1891 between your personal expenses and checks drawn on account of Mr. Westcott's business, and having in mind that you carried this distinction through this personal account, through this account as attorney, down to the date of May 11, 1896, when you transferred the balance due to R. F. Westcott, amounting to \$6,436.66, having all that in mind, please explain to the Board just when you ceased to discriminate between the money that belonged to yourself and the money that belonged to 370 Mr. Westcott?

A I dont know when that took place. It took place gradually, as I knew Mr. Westcott better and he got more confidence in me he took me into his affairs and I began to make investments for him. I think it was about the time my wife died, as I remember it.

Q How long have you been associated with Mr. M. A. Connolly?

A He has been my clerk for a good many years, I dont know how long.

Q On November 28, 1891 a check is drawn in favor of M. A. Connolly (Or M. A. C.), for \$125.00. What was that drawn for?

A I dont remember at this date. It was my custom to give my clerks money sometimes to make purchases, some-

times they wished to make purchases and sometimes I would make them temporary loans.

Q Is Mr. Connolly now in the employ of The United States?

A He is.

Q In what capacity?

A He is clerk to the Nicaragua Canal Commissions.
371 He is on leave of absence. He is not employed at this moment.

Q April 11, 1892, Check No. 69, in favor of Thomas H. Reese, \$100.00; what was that check drawn for?

A For Lieut. Reese.

Q Did you employ him?

A No sir, he was an officer in the Corps of Engineers, and he was my assistant here. I think it was a loan.

Q It appears for services on bridge work?

A Yes, I do remember that. I was employed as consulting engineer by some of those bridge companies, and I let Reese do the work and get the money for it. I know that I had a lot of work of that kind along the Ocmulgee river. I dont know what particular case that may be.

Q May 13, 1892, No. 77, in favor of R. F. Westcott, \$641.98, "For balance due on account". You did then, as early as 1892, distinguish between money that belonged to you and money that belonged to Mr. Westcott?

A I distinguished a great deal more than than I did later.

Q After drawing that check, did the balance of the account belong to you?

A I dont remember. At that time I dont think I made any investments for him. I dont think I did until after
372 he began to know me better. until after my wife died, or about the time of her death.

Q September 28, 1892, check in favor of R. F. Westcott \$345.13. It is noted, "Return of money advanced". Did that indicate that you were distinguishing between money between money belonging to you and money belonging to Mr. Westcott?

A That I dont know. He may have advanced me money for some purpose and I may not have used it, and returned it.

Q It does indicate a distinction between money belonging to you and money belonging to Mr. Westcott?

A He may have given it to me, perhaps for himself, perhaps for me, I dont remember.

Q December 31, 1892, check to the order of C. H. Vende-

venter, \$1126.25, "For balance on Erie bonds". Was that investment made for Mr. Westcott?

A That was Mr. Westcott's.

Q Why did you not transfer that money to him when you transferred the balance on the last check?

A I dont know why I didnt.

Q February 11, 1893, check to the order of C. H. Vandeventer, \$5150.00, "For bonds". Bonds purchased for yourself, or for Mr. Westcott?

373 A For Mr. Westcott.

Q March 15, 1893, check to the order of C. H. Vandeventer, for \$5,000.00, "for loan on call at 6 per cent"; March 24, 1893, to the order of I. Stanton Carter, \$200.00; April 17, 1893, order of R. F. Westcott, "To buy bonds", \$2,000, check No. 193. Were those bonds purchased for yourself?

A No sir. He gave me some stock shortly after my wife's death, as I remember, but I dont think he gave me any bonds.

Q That money, then, belonged to Mr. Westcott?

A It may have been his; the bulk of everything I received was his.

Q May 3, 1893, check to the order of I. Stanton Carter, \$100.00, check No. 200, marked "present". June 23, 1893, check No. 211, to the order of D. P. Carter, \$1,000.00. You then began making those presents to the members of your own family from funds belonging to Mr. Westcott, to the amount of \$1,000?

A They were funds belonging to him which my wife was to have had after her death, and then I began to use the money which would have been hers, and I have continued to do that to the present day.

374 Q Do you hold anything today in your own name?

A I do.

Q Does it belong to you?

A Some of it does, the rest of it—I dont know whether I should say that it belongs to me or not, it was put in my name in order that I might—some of it I consider does belong to me.

Q What is its value?

A I should say about \$18,000: I dont remember.

Q July 1, 1893, No. 217, check to the order of L. M. Carter, \$125.00. It is marked, "Allowance up to October 1"; is that right?

A Yes sir.

Q Check No. 241, September 7, 1893, order of Mrs. E. D.

Griffin, \$500.00, "Marked "For Emerson's schooling; \$400.00 full term, \$100.00 as extra funds". Did Mr. Westcott make that donation to Mrs. Griffin or to Emerson?

A He allowed me the money for the education of that little boy. At that time I was permitted to begin his education, and I have kept it up ever since.

Q October 31, 1893, check to the order of I. Stanton Carter, \$250.00, check No. 254; November 1, 1893, check No.

255, to the order of I. Stanton Carter, \$250.00. Can you 375 explain why Mr. Westcott contributed those two checks, within the space of two days, to I. Stanton Carter?

A Because I wanted it done, I suppose; whether it was within a few days I dont know.

Q December 21, 1893, check No. 276, to the order of B. D. Green, for \$200.00; December 23, 1893, check No. 278, to the order of "I. S. C'", \$250.00. Is that I. Stanton Carter?

A Yes sir.

Q On February 21, 1894, check No. 303 to the order of I. Stanton Carter, \$100.00; March 9, 1894, to the order of I. Stanton Carter \$100.00; March 13, 1894, check No. 314, to the order of Lucinda M. Carter, \$100.00; April 11, 1894, check No. 322, to the order of I. Stanton Carter \$100.00; April 17, 1894 check No. 326 to the order of I. Stanton Carter \$100.00; April check 327, to the order of B. D. Green, \$194.65; April 23, 1894, check No. 331 to the order of I. Stanton Carter \$100.00; May 25, 1894 check No. 340 to the order of I. Stanton Carter \$250.00; June 5, 1894 No. 344, to the order of B. D. Green \$500.00; June 18, 1894 check No. 345 to the order of I. Stanton Carter, \$250.00; June 18, 1894, No. 346, to the order of L. M. Carter \$125.00; July 19, 1894, check No. 357, to 376 the order of I. Stanton Carter, \$200.00; August 4, 1894, check No. 354, to the order of I. Stanton Carter. \$200.00; Sept. 6, 1894, to the order of I. Stanton Carter, \$200.00, No. 358; No. 359, Sept. 17. 1894, Lucinda M. Carter, \$125.00; No. 361, Sept. 28. 1894, I. Stanton Carter \$500.00; October 3, 1894, No. 362, to the order of O. M. Carter, \$1,000.00, indorsed to Sterly for payment of employees. Have you any explanation of that?

A I believe I used to give my chief clerk money and when the men came in before the end of the month, he would take their signatures and pay them, and then at the end of the month I would be reimbursed. I advanced my own funds in that way to pay those men that had families.

Q Your own funds? .

A I let the chief clerk have the money.

Q You said you advanced your own funds.

A Funds in my possession.

Q Your money or Mr. Westcott's money?

A I don't know which, but I presume it was his, because what I had was infinitely small compared with his.

Q Check No. 369, Dec. 15, 1894, to the order of "L. M. C." \$125.00. Is that L. M. Carter?

A Yes sir.

Q No. 370, Dec. 15, 1894, to the order of I. Stanton 377 Carter, \$100.00; No. 382, "D. P. C" that is D. P. Carter?

A Yes sir.

Q Jan. 29, 1895, for \$250.00, marked "For January, February and March, 1895". At that time did you make an allowance to D. P. Carter?

A No sir, that was for my mother. My mother was living there.

Q Are those on the Union Trust Company?

A I don't think they are. (Major Adams is here referring to a stub check book which he has in his hand)

Q This book which I have in my hand was found in the file case, which you say belongs to the United States. It is marked on the outside, "Certificate Book of the Empire Construction Company". Certificate No. 1 is in the name of Benjamin D. Green, 1,980 shares and across the face is written, "Cancelled, B. D. Green, President". The date is June 10, 1891. Certificate No. 2, A. M. Newton, five shares, signed James E. Chandler, secretary; Certificate No. 3 Jas E. Chandler, five shares, signed James E. Chandler, Secretary. Certificate No. 4, John M. Waddell, five shares, signed James E. Chandler, Secretary, and on the back is written, "Transfer to Edward H. Gaynor". Certificate No. 5 five shares, John A.

Roebuck, signed James E. Chandler, Secretary, B. D. 378 Green, President. Certificate No. 6, John F. Gaynor, five shares. Certificate No. 7, Edw. H. Gaynor, 5 shares. Certificate No. 8, Neal McLaughlin, 100 shares, and across the face, "Cancelled, B. D. Green, Prest." Certificate No. 9, Thomas Riley, 100 shares, and across the face, "Cancelled, B. D. Green, Prest." Certificate No. 10, W. Hegeman. Are those initials correct?

A I am not sure.

Q This is the same Hegeman that I was asking information about yesterday?

A I saw Mr. Hegeman a few times.

Q I find in this same case a telegram from W. W. Hegeman, in which he calls for a check on account of work at Fernandina, and says that the "Captain" wants it, who is the "Captain"?

A I dont know, a telegram to whom?

Q To you.

A I dont know unless he means Capt. Green; that's the only captain I know of.

Q B. D. Green?

A I suppose so.

Q Certificate No. 5, Col. John F. Gaynor, 800 shares, and written across the face, "Cancelled, B. D. Green, Prest."
379 The last certificate is not numbered. It is drawn in blank for 1,980 shares, signed B. D. Green, Prest., and indorsed on the back "B. D. Green." Would that certificate be good in the hands of any man who might hold it?

A I dont know.

Q How did it come into your custody?

A It came here, as I remember it, by either Capt. Green or Mr. Gaynor bringing the book up here, and leaving it on my desk, and I picked it up when they went out, and saw that it was a private book and put it inside my desk, where I supposed it was. Evidently it must have been forgotten and left there, and Mr. Brown packed it away.

Q Why would Capt. Green bring this book here?

A I dont know why. I dont know that it was he. Evidently it was one of those men.

Q When was it left here?

A That I dont know; it is so long ago that I have forgotten.

Q What was this company organized for?

A I dont know.

Q What did you say yesterday that it was organized for?

A I dont know exactly, my impression is now that
380 Mr. Hegeman was thinking of bidding on some work, railway work, up in New York, and that's what it was organized for. Mr. Hegeman was also engaged on the East River tunnel.

Q Did you ever carry on any correspondence at any time with a view of securing work for the Empire Construction Company?

A I dont know whether I carried on any correspondence with that object in view.

Q Did you write any letters of recommendation?

A I wont be sure, but I think I did.

Q Have you ever written a letter of recommendation for Capt. B. D. Green?

A I dont know, I would have done so if he had asked me, but I am not sure.

Q There is a copy of such a letter in the letter press book.

A Then I must have written it. I would have done so with pleasure if he had asked me.

Q Did you propose to do any work in the state of Ohio for this construction company?

A I think not.

Q Did you undertake to secure any work?

A I dont think so.

381 Q Did you write any letters of inquiry in regard to it?

A That I dont remember. I remember going to Ohio, as I said yesterday, but I dont think it was in connection with any work for that company.

Q Did you or Mr. Westcott have any communication with Mr. Rossiter of the New York Central Railroad, with the view to securing work for that company?

A I dont know whether it was with the view to secure work for that company, or to secure work for Capt. Green. We had some talk about work I know, but exactly what it was for, I dont believe that I could tell.

Q In that oak case we found a communication from Mr. Rossiter to Mr. Westcott. Has that communication any relation to this work proposed for the Empire Construction Company?

A That I can't tell.

Q What did you say about it yesterday; didn't you say something about a railroad somewhere in the Adirondacks?

A I know there was a railroad up there somewhere, but whether this letter refers to it I dont know.

Q Did you write any letters yourself on that subject?

A That I am not sure of. I know at that time there
382 was a question about my resigning and accepting service in the New York Central Railroad, and I became acquainted with Mr. Rossiter and other men, but whether I wrote him letters, or whether I introduced those people to him, I dont remember. I should have done so if they had requested it.

Q The object of asking these questions is to find out

whether you have been associated with B. D. Green, John F. Gaynor or W. W. Hegeman, or Edward M. Gaynor in any business enterprises.

A I have never been associated with them. I have talked over matters with them, but I have never done anything that could put me under obligations to them in any possible way.

Q I understood you to say yesterday that you had had no business relations with any of the contractors connected with this Atlantic Contracting Company?

A My relations have been personal. I have not had business relations—that depends on the interpretation, if by personal relations you mean business relations—it depends on the interpretation of "business relations." I have had no business relations with the view to being association with them in any thing that might be improper. I have tried to assist them in several cases.

383 Q Do you know anything about the West End Land Improvement Company of Petersburg, Va?

A I think I do, I am not sure about that?

Q Have you taken any interest in it, or had any correspondence about it?

A Yes sir, I think that I had some correspondence about it.

Q Land at Roanoke in 1891?

A Yes sir. (Here Major Adams is referring to memoranda which he has in his hand)

Q Street railway company in Savannah?

A Yes sir.

Q Manganese, deposits in Georgia?

A Yes sir.

Q Phosphate deposits in Florida, 1889?

A Yes sir.

Q Savannah Lighter Company, 1891?

A Yes sir.

Q Paving Company in Savannah?

A I dont think I had any interest in that paving company.

Q Cotton compress?

A I dont think I had any interest in that.

384 Q Hydraulic jack?

A Yes sir, I was interested in that.

Q Who was interested with you in that?

A Mr. Minis, and I believe Capt. Green and Mr. Gaynor. I am not sure about that, I would like to look up the records and see. That was a cotton compress and it started with Mr.

Minis, who was a cotton factor, and he suggested a man by the name of Clay to manage it. I know Mr. Minnis was in that.

Q The question is mainly to find out whether you have had any business relations with your contractors, you said yesterday you had not?

A No, I have not. That jack was a little thing, we put a little money in it and nothing came of it.

Q Where did you get the money to go into these enterprises?

A I think we only put about \$50.00 apiece or something like that.

Q I have asked you these questions in regard to the contractors, and I have invited your attention to these checks with a view to your giving the Board any information you may be disposed to in regard to your relations with these contractors, the Gaynors, Capt. Green, Mr. Hegeman and 385 also Mr. Westcott?

A I have no information in my power which I would not willingly give the Board. There are many things that I don't remember without looking them up. There never was any secrecy about these matters. About this hydraulic jack, Mr. Minis and several others put in \$50.00 or \$100.00 apiece. I am not sure who the others were, I remember Mr. Minis because he was the man who suggested it.

Q Did you ever take an interest in a stone quarry?

A Yes sir, but I didn't put up the money. Other men put up the money.

Q Did you have any correspondence with Capt. Green as to the sale of this stone?

A Yes sir.

Q Could you properly have such a correspondence when Capt. Green was agent for the contractors under this contract?

A I think so, major, because there was nothing which I did from which I received any benefit. It was a personal correspondence which I carried on with him, and which I felt at liberty to carry on with any contractor, my feelings being that so long as I did not use them for any purpose, or make anything out of them, or put myself in the way of 386 business under any obligations to them, it was all right.

Q When you borrowed money from Capt. Green, were you under obligations to him?

A To that extent I was, sir.

Q Have you ever employed him as your agent?

A Never, except in some cases where some little private affairs were concerned. He has kindly done those things for me as a friend would do.

Q Has Capt. Green received or borrowed money on your account, or in your interest, at any time since 1891?

A I dont know, I dont think he has. I dont think of anything where he could have done so.

Major Raymond: At the time you borrowed this money from Capt. Green, was Capt. Green a contractor, or connected with the contracting?

A That I am not sure about, major. It was a long time ago, when my father died, and I dont remember. I remember that I paid him back and I paid him interest on it. The question came up in my mind as to whether I could properly do it, and I concluded that I could. About the other matters here I was unaware that anything I might have been doing could have been construed as looking as though I was under obligations to the contractors. Everything that I did

387 I did openly and feeling that I had a perfect right to do it. There is nothing which I want to hide from the Board, on the contrary, I would like to bring all the circumstances connected with them, before the Board; I would like to bring Mr. Westcott and the Union Trust Company before the Board, and I think I can show the Board that every thing I did was all right in every respect. I have made no concealment, everything has been perfectly open, except a few, matters, which brought in the name of a woman, that is all that I have that I would wish to keep private. I cannot express how shocked I have been that acts which I considered innocent, should have been construed as guilty, and I know that I shall be able to demonstrate to you absolutely that there has been nothing in my mind but the good of the service, and that I have done my duty honestly, fairly and faithfully, without any benefits to myself, except professional benefits, and I would like to have time to bring up those things, and I feel sure that I could demonstrate this to the minds of the Board. It is impossible that I should not be able to make clear to others what is so clear to me.

Col. Gillespie:—So far as that is concerned, the Board is required to submit its report at the earliest possible date.
388 The intention is that after adjournment here, a session be held in New York, where you can call witnesses.

Capt. Carter: I would like to ask Capt. Gillette whether

he has ever addressed one line to me, or ever suggested that these matters should be gone into between us, before presenting them in the shape of charges against me.

Capt. Gillette: I had no communication with you at all.

Capt. Carter: Then I would like to ask you if that is the customary method to pursue among officers?

Capt. Gillette:—I have had no experience whatever in such cases as this before. When I found things apparently all wrong, terribly wrong, to my mind, and when it came to paying for work done while you were in charge, I felt that I could not conscientiously do it, and I wrote a letter to the inspectors, as you see in my report, and recognizing that I could do nothing more just to you or to the government than report the matter at once verbally to the Chief of Engineers, and at the first opportunity, I did so, and he told me to go back and make a report, to make my letter official, but not to copy my letter in my letter book. I did so, and he informed me that he would send a copy of the letter to you

at once, but he changed his mind. (Capt. Gillette, after 398 ward requested permission of the Board to withdraw the remark that the Chief of Engineers had changed his mind. See page _____ of this report.)

Capt. Gillette: Capt. Carter, do you know a man by the name of J. B. Connolly?

A Yes sir.

Q What is he?

A I dont know what he is now.

Q What is his occupation?

A I think he is a writer on a magazine in Boston.

Q Was he ever employed under you?

A Yes sir.

Q In what capacity?

A As inspector.

Q Is he familiar with the mattress work?

A I dont think he is; I think he was inspector of dredging.

Q Is he familiar with the use of a transit?

A I dont remember. I know he was on a dredge down there, but whether he was an expert transit man, I dont remember.

Q Do you remember whether he did any survey work?

A I dont remember.

Q From this payroll does it not look as if he was 390 employed as a surveyor?

A Yes sir.

Q Do you remember what the survey was?

A I dont remember.

Q Do you know whether there was any survey work going on at that time?

A I cant say. The date of that was Feb. 1896, during the month of February—my custom was always to look at the number of men on the roll and see whether it was signed properly.

Q If you had seen that he was on there as a surveyor and there was no surveying going on, you would probably have noticed it?

A Probably.

Q Have you ever certified the rolls when you didn't see the occupation of the men filled in beforehand?

A No, I think I usually—I dont remember whether I had my clerk fill that out or not, or whether I just had him simply fill out the names and the signatures. I may have signed the roll when he brought it in with the names signed here, and let him fill it in at his leisure afterward.

391 J. W. O. STERLY, recalled.

Capt. Gillette:—Look at that payroll, on which the name, J. P. Connolly appears, was he at that time in the employ of this office?

A Not as a surveyor.

Q Where was he at that time?

A He was in Boston.

Q How did he come to sign that roll?

A I think that Mr. M. A. Connolly sent him the roll and told him to sign it. Mr. M. A. Connolly went North on leave of absence, and this is traveling expenses for Mr. Connolly.

Examination of Capt. Carter resumed.

Capt. Gillette: If you saw a name on that roll, Capt. Carter, you would probably know whether the man was in Savananh or Boston?

A Certainly, if I signed that and he was in Boston, I was negligent.

Q Here is a copy of an endorsement, Capt. Carter, on

a letter, dated Sept. 29, 1894, in which you state, 392 "But no checks were ever drawn or payments made before the rolls were properly completed and had been presented to me and signed by me." How do you account for that, when you state that in this case you dont know whether it was filled up after you signed it or not?

A My explanation for that must be this, I knew about those rolls principally from my chief clerk. If he brought the rolls to me and said the roll was checked, I left the checking of the roll with him, I signed it. If I gave the impression that I checked the roll myself, then that is incorrect. So far as the word "complete" is concerned, it is wrong. That it was checked and signed is true. That it was perfectly complete, is a mistake. I remember having signed rolls that were not perfectly complete.

Q The gist of the man's complaint to the Chief Engineer was that they were not complete, and the gist of the reply seems to have been a mistake?

A The gist of his complaint, I think is a mistake.

Capt. Gillette: This is a letter written by Mr. Schneider, to the Chief of Engineers, complaining that Capt. Carter didn't keep the payrolls properly.

Capt. Carter: I think that must be a mistake, because 393 I remember that I signed rolls that were checked and signed, but which were not perfectly filled out, the clerk coming in and saying that he was pressed for time.

Capt. Gillette: This Schneider matter was in 1894, and the Connolly matter in 1896; you may have changed your system after that?

A I dont know when I did it. I remember certifying to rolls and drawing checks before the rolls were entirely written out, the chief clerk coming to me and having the signatures and amounts and saying that they were correct. What time I did that, I dont know, but I know that I have done it.

Q Mr. Hirt, the man who attempted to raise the boat, it seems paid Mr. R. S. Burnett \$140.00 for his services from the 26th of April to the 16th of May. It also appears that Mr. R. S. Burnett received from the government \$200.00 for the entire month of April, and \$200.00 for the entire month of May?

A I explained that this morning. I gave Mr. Burnett leave of absence on full pay.

Q Is that leave of absence on record?

A I dont think any leaves of absence are on record.

Q. Mr Burnett was responsible for the safety and
394 and care of the government property?

A Yes sir, I trusted him.

Q He was on leave of absence and in charge of government property?

A Certainly.

Q You stated yesterday that you sometimes had small amounts put on the payrolls, can you tell us what they were, some of them?

A I dont remember. I remember this that at times I would have the porters pay the post office box rent, and at the end of the month their pay would be increased by the amount of the box rent.

Q I find this telegram to you, "O. M. Carter, Upper Basin, Wyoming: Burnett asks for authority to put in one extra course of grillage timber in foundation for mining casemate. This will save about \$500.00. Will organ tomorrow. Sterly. Official business Government rate, paid." That does not appear on the voucher?

A I paid myself for a good many of those telegrams.

Q How?

A I would have Mr. Sterly pay them at government rate and they would not go on the voucher when I was away.

Q On official telegrams?

395 A Yes sir.

Q Why did you do that?

A I simply thought that the United States in those cases ought not to pay for them.

Q When they were official business?

A I have always attended to my official business when I have been on leave of absence just the same.

Q Did you receive a telegram like this, and pay for it, "August 11, 1894, O. M. Carter, Hotel Ryan, St. Paul, Con-
dor; Mail forwarded as directed. Shall I organ today, as intimated by letter of 4th? Sterly. Official business, Government rate, paid." Did you receive and pay for any such message?

A I dont remember this particular message; I know that my custom was to inform my chief clerk that telegrams whether on official business, should be paid for, by the United States, if I was ordered away, and if I was away without authority, I would pay for them myself.

Q Did you receive that message?

A I remember that he sent me a telegram during that time.

Q Were you in St. Paul, August 11, 1894?

A Yes sir, I think so, I can't remember the date.

396 Q What does the word "Condor" in that telegram mean?

A I dont know, we had a code for the purpose of saving expense on telegrams, but I dont remember now what that code was.

Q Could you identify that code now if you saw it?

A I presume it is in the office, I dont know.

Q "Condor", in this code in this letter book means, "Everything all right in district". Do you know what "Organ" means?

A I dont remember, isn't it there?

Q Can you tell by referring to this?

A I dont know. If I went out of my district without authority, I would take leave of absence and tell Mr. Sterly to report it. Sometimes I would go beyond the limits of my district without reporting my departure.

Capt. Gillette: I find this letter in the letter book: "August 16, 1894: Brig. Gen. Thomas L. Casey, Chief of Engineers, U. S. A., Washington, D. C.—Gen.:—I have the honor to report my departure on a seven days' leave of absence, taken by myself in accordance with Par. 45 A. R. 1889. My address will be Savannah, Ga. Very respectfully, Your Obt. Servant,—"

Major Adams: On that date you were in St. Paul?

397 A On the 11th, I was in St. Paul.

Q Do you know whether you signed that letter?

A I presume I did.

Q Your name does not appear here? It is headed Savannah?

A I presume it was written here and copied in this book.

Q I find the following telegram: "August 13th, 1894, O. M. Carter, Mammoth Hot Springs Hotel, Yellowstone Park; Condor. Sterly. Official business, Government rate, Paid." August 17, 1894; O. M. Carter, Upper Basin, Wyoming, Condor. Organ is yesterday; Sterly. Official Business, Government rate, paid." A telegram as follows:—August 20, 1894, O. M. Carter, Hotel Templeton, Salt Lake City. (To arrive) Department disapproves change elevation Pulaski; expect Cicero and Caesar tomorrow, or Wednesday, when I shall Paris and forward project and Cresus, Savannah, or

organ later; condor. Official business, government rate, paid. Sterly." Do you know what "Cicero", "Paris," and "Cresus", mean? "Paris" is "Your presense urgently required"; "Cicero, Caesar" and "Cresus" are not given?

A I do not know what they mean.

Major Adams: This letter would indicate, with your 398 statement that you were absent from Savananh on August 11th, and that you did not return until some time after the 16th, and yet, with the assistance of your chief clerk, you reported in writing your departure on leave of absence on August 16th. Was that a correct statement?

A If that was meant to convey the idea that I departed from here on that day, it is not correct.

Q Was it intended to convey that idea?

A I dont think it was. Sometimes I would leave to attend to some business for Mr. Westcott, and I would be away four or five days, and I remember speaking to the Chief of Engineers about it and I said "Can't I go without reporting it?" and he said, "I can't give you authority," and I said, "I am going to do it until somebody objects" and he said nothing, and I have been away from time to time without authority from my station.

Q When you made your personal report at the end of the month, did you report these absences?

A I reported absent when I had leave of absence, but when I was away without leave of absence, I did not report it.

Q Was that a correct report?

399 A It probably is not, but it was not intended to deceive, because I always kept them informed in Washington.

From a strict interpretation, it is not a correct report.

Q When you made your efficiency report at the end of the year, on June 30, did you put those days of leave of absence without leave in it?

A I dont remember, probably I did. I dont remember how I did that.

Q You remember that there is a blank form of certificate attached to it, that it is a correct statement. Did you make a correct statement when you submitted that report for the year?

A I presume that I did. I dont remember whether I reported the number of days that I was away without leave or not. If I reported only the days I was away on leave of

absence as the days that I was absent from the station, then the statement is incorrect. I dont remember how the report reads.

Capt. Gillette: It reads, "Present on duty; present sick; absent on leave; and absent without leave."

Major Adams: Did you report those absences without leave?

A I dont remember, but my report will show whether I did or not.

400 Q Did you report in your monthly report to to the Chief of Engineers, the days that you were absent without leave?

A I dont know whether I did or not, I dont believe I did.

Q If you had reported that you were absent without leave, do you suppose that you would have been called upon to explain it?

A No sir, because I always told it at Washington in coming back. I remember once Capt. Black came in and said, "Look here, I am going to call you down. You and Bixby and a lot of others have been going around without leave and I am going to call you down."

Col. Gillespie: Did you take those leaves of absence every month?

A Not every month, but frequently.

Major Adams: How many days in the course of a year do you suppose you have been absent that way without leave.

A I dont know. Perhaps as many as twenty days without leave, or not so much—that is mere guess work.

401 A. R. STEWART, called by Capt. Carter:

Capt. Carter: Did you examine the specifications for the work at Savannah which were awarded in 1896?

A Yes sir.

Q For the purpose of preparing bids on those works?

A Yes sir.

Q Did you notice how many designs of mattresses were in the specifications?

A Yes sir.

Q Were you told how many of those designs would be used?

A My recollection is that you told us on specific inquiry

that probably not any of the second would be used, or very few, but the most would be of number three. That was my understanding.

Q As a matter of fact, on what basis was your bid made?

A I think on No. 3, I think it was called in the specifications.

Q Did you base your bid on these designs as built previously in this work?

A We based our estimate on the work as it had been done before, and our understanding was that it would be of the same general character as what was done before.

Q Were you informed whether or not you might built those mattresses more than one at a time?

A I don't understand your question. If it means that we could build one layer on top of the other instead of laying the layers singly, we might lay them as they had been laid before, we understood that we could do that way. We intended to build and launch our mattresses the same as the present contractor, who had done work previously, had done.

Q If there had been any change in those specifications, would it have affected the price which you intended to bid on the mattresses, I mean if the specifications had been written so as to describe the mattresses as lying on top of one another, would it have made any difference in your bid?

A I am not sure that I understand your question, except this, that we based our estimate on making them and launching them as had previously been done, that it was not imperative as to the manner they should be launched, whether singly, or as had been done before.

Q If that had been written out in your specifications would it have made any change in your bid?

A. No sir, because we based our estimate on the understanding that we could lay them singly or as they had been previously laid, just as suited ourselves.

Q What would you consider, from your experience in mattress work, would be a fair price to a contractor for the mattress work at Cumberland sound?

A I think about the figure that we estimated would have been about right. I think the amount as bid was about a dollar.

Q A square yard?

A Yes sir.

Q What kind of stone did you understand could be used for fourth class stone?

A Florida stone.

Q So far as you understood, was that the general understanding?

A It was the understanding of all the contractors bidding on the work. I say so advisedly, for I know all the contractors who bid on the work, and we had made up our minds before we bid. We made up our minds not to bid on the work for certain reasons that I don't suppose enter into this matter, but we were bidding on furnishing the stone
404 to all the contractors who were bidding. We were bidding closely on furnishing the Florida stone, and there was no other stone considered as fourth class stone, and for the simply reason that this was a stone that we had heretofore been furnishing and that had heretofore been used for this purpose from Jacksonville down. We were bidding to furnish them fourth class stone, thinking it meant nothing else than Florida stone.

Q Suppose you had all understood that Florida stone could not have been used for fourth class stone, would that have made any difference in your estimate for fourth class stone?

A Undoubtedly.

Q Would it have been higher or lower?

A Higher, of course, it would have involved more freight. Of course, other stone is as cheap as Florida stone, but the difference is in the cost of freight.

Q Do you think that if the number of cubic yards of stone were decreased and the number of square yards of mattress were increased, that it would make any difference in the contractors' profits?

A Based on the contractors' prices, without going into the figures closely, my impression is, no. If I were doing
405 that work I would be glad to have the mattress work decreased and the stone work increased at any prices that I know of except the price for No. 3 stone.

Q It would be more advantageous to you to increase stone work?

A Yes sir, that is my impression.

Q Have you seen Florida stone, or the equivalent of Florida stone, used along this coast?

A I have furnished it for the Jacksonville work, for the Savannah work and for the Fernandina work. I am now furnishing it for Jacksonville.

Q Regarding the mattresses; you stated that you understood how they were to be built, and had been built before?

A Oh yes, I was quite familiar with the work that had been done before.

Major Adams:—I understood you to say that you estimated the cost of the mattresses described in the specifications as No. 3 at a dollar a square yard?

A I think that was it. It might have been a cent or two above or a cent or two below.

Q Did you make any estimate of the cost of the No. 1, log mattresses?

A Yes sir, I think that was about \$1.25.

406 Q Would that not have brought the cost up?

A It would not have affected it. I don't think it would have made any change. Perhaps if No. 1 was to be used exclusively or No. 2, it would, but it would not make very much difference as to the price we bid on it, because while No. 1 or 2 might be used, we knew that the probability was that No. 3 would be used, or a large proportion of it.

Q Did you put in a bid on this work?

A No sir.

Q Did you say you estimated the cost of the log mattress?

A The cost or the price at which we intended to bid?

Q The cost of it.

A Yes sir. I don't remember just exactly what the estimated cost was in either case, if you were going to ask about the estimated cost of stone, I could tell you.

Q Do you know the relative cost of designs No. 1 and No. 3?

A I don't think it would make any difference comparatively in making the bid. Of course, it would depend on the locality. The stuff varies in different localities. If you could get the stuff in No. 1 and No. 3 in the same neighborhood, it would not make much difference in price.

Major Raymond: Were you present when the bids were opened?

407 A Yes sir.

Q I understood you to say that you were acquainted with the other parties who bid on this work?

A Yes sir.

Q Did you hear any complaints among them that there was any unfairness?

A No sir, I never heard a word.

Q From any of the bidders?

A No sir, I never heard a word.

Q Did you ever hear any charge of favoritism being shown, or that the specifications were drawn so that they favored one bidder more than another?

A I never heard anything of the kind.

Capt. Gillette: Where is your headquarters?

A At Columbia, though we have an office in Savannah.

Q Did you have a contract with the Atlantic Contracting Company to supply stone?

A Yes sir.

Q When was it made?

A Just about the time of the letting of the contract.

Q Before or after?

A It was confirmed afterward.

Col. Gillespie: How long have you been a contractor?

408 A I have been a contractor in this neighborhood for the last seven or eight years.

Q Have you ever made any mattresses?

A I have, but not her.

Q Have you ever made them for government improvement?

A No sir. I have made them for other contractors, not for myself.

Q For what improvement?

A Georgetown was one of them?

Q Have you got any plant?

A We have a quarry plant.

Q Have you a plant for making mattresses?

A There is really no plant required, except scows and a tow boat. We have got a tow boat and scows.

Q If you had taken a contract for the mattress work, could you have readily gotten a plant here?

A We would have done what most everybody else did, we would have built most of it.

Q Would it have required a very large amount of plant?

A Yes sir, we considered it a good large plant.

Q What would you estimate what would be the cost of the plant required in the execution of this contract?

409 A Either one or both?

Q Say for the Savannah station, or the Cumberland sound, just as you choose?

A I should think it would take a plant of about \$50,000.00 to be in reasonably fair shape to do either one of them.

Q Have you any intimate knowledge of the plant necessary to do this work?

A Yes sir, I have investigated it.

Q Could you for \$50,000.00 acquire a plant to enable you to carry out one of those two contracts?

A I meant \$50,000.00 for each of them. I didn't mean to say that we could have completed the contract with that, but we could have started the work. We have about \$70,000.00 invested in the Columbia quarry plant. We could have brought a good deal of that here. I meant it would cost us \$50,000.00 in addition to our own plant.

Q You think with a \$70,000.00 plant you could carry on those contracts satisfactorily?

A Either one of them.

Capt. Carter: At that time could you have carried on this work with no funds available; as you remember it, could you have started on that work without an enormous amount of money?

410 A No sir, I explained to those who were going to be interested in it we might have to do the whole first year's work, and we might have to put in \$300,000 or \$400,00.

Capt. Gillette: Did you understand that you would have to do a whole year's work before any money would be appropriated?

A I thought it would be eight months or a year.

Q Did you think you would have to advance money for eight months' work?

A Yes sir.

Q What made you think that?

A Because there was no money available.

Q Did you think that you had to work before the money was appropriated?

A Yes sir, I thought we would be required to do that.

Q What made you think that?

A The specifications indicated that when there was no money available for this work, the contractor might go on and do the work.

Q Did you think that you had to go on for the first eight months, until the expected appropriation was made?

411 A There was some difference of opinion as to that, some of us thought we would and others thought we would not.

Q Did you consult anybody?

A We consulted one another.

Q Did you ask Capt. Carter?

A I don't know that I did.

Q This was a very important matter, and you understood or you didn't understand that the work for eight months until an appropriation could be made would or would not have to go on?

A It didn't become a question like that with us. We made up our minds if we got the work to go on with it.

Q You didn't know whether you had to put up an enormous amount of money for those first eight months?

A I thought we would have to.

Q Where did you get that idea from?

A From the specifications.

Q You say that was your opinion from the specifications?

A Yes sir.

Q Did you ask Capt. Carter?

A No sir.

Q Do you know any more important question than that?

412 A Yes sir, the cost of doing the work were of a great deal more importance to us.

Q You didn't ask Capt. Carter about this very important question?

A I don't know that I did, because it was generally discussed among the contractors, and others had asked him.

Q What was the general impression?

A I asked an attorney what the specifications required regarding that, and he was as uncertain about the matter as the others.

Q The attorney could not understand them?

A No sir.

Q Is he a good lawyer?

A It is generally thought so.

Q Do you mean to state that your lawyer did not understand those specifications?

A Yes sir, generally he could.

Q About that particular point?

A No sir, I don't think he very well understood it.

Q You felt that you had to advance all this large sum of money for eight months' work?

A The question was whether we could get the estimates in the shape of certificates for the work done. The question with this lawyer was not so much as to whether we would have to carry this work on as it was as to whether we could get government certificates, and have them in such shape as to be able to hypothecate them.

413

Q I asked you whether you and the other contractors understood that you had to work eight months, until the close of the next fiscal year, without funds being furnished?

A We understood that we would have to go on with the work.

Q Where did you get that impression from?

A From the specifications.

Q Didn't you ask Capt. Carter?

A I said I didn't remember having asked him.

Q Do you remember anybody who did ask him?

A I was under the impression that nearly all the other bidders asked him or intended to ask him.

Capt. Carter: You say that you got that impression; do you know whether you got it from me?

A No sir, I don't know how I got it.

Major Raymond: How long would it take anybody who got that contract to get up a plant necessary for this work?

A They could buy a tug boat most any where and 414 they could have their barges built here.

Q Supposing there was no money available, a person who got that contract would have to go to work and get up a plant, whether the money was available or not; the contractor would have to invest a lot of money whether there was any money available or not?

A Yes sir, he would have to invest money in the plant before he got the benefit of the money even if it was appropriated.

Q If you didn't go ahead, you would lose money, the interest on the value of the plant?

A Yes sir, but that was a much less consideration with us than the consideration of whether or not those certificates would be good as collateral. If they were, the money consideration was no trouble to us.

Col. Gillespie: If you had the certificate from the United States, that the work was done, it would be no trouble to get the money.

A No sir.

Capt. Gillette: I want to understand whether you thought you had to work for eight months before there was a government appropriation?

A That didn't impress me so much at the time at all, 415 as we had all made up our minds that we would go on with the work without regard to the appropriation.

Major Raymond:—You would either have to go on at your

own expense or let the plant lie idle and lose the interest on the investment in the plant.

A Yes sir.

Capt. Gillette: What is the price that you told me when going out on the train that you were supplying rock to the present contractor for?

A Fifty-five cents a ton.

Q Delivered on the cars?

A Yes sir.

Q For both works?

A Yes sir, I refer to Florida stone.

Q How far is it from the quarry where you get the stone to Fernandina?

A I supply it from several places in Florida. The stone is peculiar; it is not in shape to quarry, it is scattered.

Q What is the nearest and the farthest distance?

A I think the nearest place would be about 90 miles, and the farthest would be about 160. That's the nearest that I can get at it.

416 Q Do you know what the freight is from the nearest quarry to Fernandina?

A The contractors pay the freight, and I don't know.

Q What do you think?

A I think it is in the neighborhood of a dollar, perhaps a little more. I think at one time it was \$1.25. From the quarry that is 140 miles away, the freight was \$1.50, and then I think they reduced it to \$1.25. I have I have paid \$1.50 and I have paid as low as \$1.

Examination of Capt. Carter, continued.—

Col. Gillespie:—Before awarding those contracts, or recommending them to the Chief of Engineers for awardment, had you ever made any special investigation as to the probable cost of the stone?

A I made that at the time I made the project for the work.

Q What year was that?

A That was in 1895.

Q What part of 1895?

A I think it was in December, 1895.

417 Q One year before the contracts were awarded?

A Yes sir. The conditions, of course, didn't vary.

Q Were you frequently in the brush camps when those fascines were being made?

A I have been there very often.

Q At any time during the last contract?

A Yes sir.

Q The contract begun Dec. 1896?

A No sir, I have not been in the brush camps more than twice each year

Q Have you ever been personally on the ground when the mattresses were delivered for sinking?

A Yes sir.

Q Under this last contract?

A Yes sir.

Q How many times?

A That I cant tell.

Q More than once?

A O, yes, I have been down there a number of times. How many times I dont know.

At this point the Board adjourned until Friday, Sept. 24th.

418 The Board convened at 9 a. m. Sept. 24th, 1897.
Present, the same as before.

Col. Gillespie: Capt. Gillette makes the request that the name of the Chief Engineer be omitted from testimony given by him yesterday.

Capt. Gillette: Except that I reported to the Chief of Engineers and thereafter did as he requested. I would like to withdraw the statement that he changed his mind. Of course, I do not know whether he changed his mind or not.

(See page 389 of this record.)

CHARLES C. ELY, called by Capt. Carter.

Q Have you been engaged in the contracting business for some time?

A Yes sir.

Q Did you make an examination of the work proposed to be done either at Cumberland sound or at Savannah in the latter part of 1896, with a view to estimating the cost of the same?

419 A We examined the Savannah river work, about Cumberland sound, we did not examine that, as we did not

want to bid on it. We didn't examine it on this letting. We examined it before after the last letting.

Q Are you familiar with the character of the mattress work required under those two contracts?

A Yes sir, I think I am.

Q How many designs are there, do you remember?

A I think there were three under the last specifications.

Q Were you aware as to which design would be the one used?

A I didn't know which design according to the specifications.

Q The first design was a log mattress, the second design is a mattress made with brush fascines, and the third design is a brush mattress upon a grillage of poles?

A It was the third design.

Q Did you understand whether in bidding for this third design you could build those mattresses singly, or on top of one another to any desired height?

A I understood when I bid on them that I could build them in such number of courses as the work required and the 420 engineer desired.

Q Understanding this, would it have made any difference in your bid if you had found that written out in those specifications?

A No, it would not have made any difference.

Q Was it generally understood that the contractors would have the privilege of building those mattresses in this way?

A We supposed so. That is the way we took it ourselves.

Q What kind of stone did you understand was meant by fourth class stone?

A Florida rock.

Q Was or was not that generally understood?

A That I couldn't say. We understood it.

Q Have you ever had any difficulty in getting any information from this office concerning any part of the work that you desired to be informed about?

A No sir.

Q Did you or did you not feel that it was a fair, open competition in every way?

A We did.

Q Did you make an estimate of the probable cost of 420 the work to be done?

A Yes, sir, I did and put in a bid for it.

Q What do you remember was your estimate of the cost

of the mattresses built on top of one another in any way you desired?

A You mean the price we bid?

A Yes sir.

A I think somewhere between ninety cents and \$1.

Q Could your bid have been made lower than that?

A I would not have bid a cent below that.

Q Are you familiar with the local conditions at Cumberland Sound?

A Yes sir, I am familiar with them.

Q Do you remember whether the price of \$3.50 would be considered by you a very high, a very low or a fair price per cubic yard for Florida stone put in the work?

A I would not say that that was out of reason. That is an exposed position. I dont know what price they were giving for it.

Col. Gillespie: You know of the way in which those mattresses were put into the work?

A Yes sir.

Q Who gave you that information?

422 A I got that from our previous knowledge of the work, and also from information furnished by Capt. Carter that we asked for.

Q Did the specifications supply that information?

A I dont think they did, but I would not say that positively.

Q You say that you bid on this work?

A Not myself, Mr. Ross, I got prices on all the work and submitted them to him.

Q Did Mr. Ross, or did you, as agent for Mr. Ross, or individually, for yourself or anybody else, supply any part of the materials for doing any of the work which has been executed under that contract?

A No sir, that Savannah river contract, no sir.

Q Did you for the Fernandina contract?

A No sir.

Q You stated that you offered bids only for Savannah?

A That was all we bid on. We didn't bid on Cumberland sound.

Q Did you supply for the contractors any part of the material or do any of the work necessary in the execution of this contract?

A No sir, we did not.

423 Capt. Carter: Are you reasonably familiar with the plant required to do this work?

A Yes sir.

Q How much do you suppose it would cost, approximately, for a new plant for executing the work in Cumberland sound under the specifications, or in Savannah harbor?

A Roughly, I would say somewhere between \$60,000.00 and \$80,000.00, in that neighborhood.

Q Suppose you intended to go ahead and execute a piece of work without waiting for funds to be appropriated; suppose you received the contract and intended to go ahead with the work, would it have been necessary for you to have had a large credit, if not actual cash?

A What do you speak of now, in regard to the plant?

Q Capt. Gillette: Give the articles, I mean the articles of the plant which you estimate on.

A I suppose it would take, say, three tug boats, say in round numbers \$10,000.00 apiece, \$30,000.00.

Capt. Gillette: In your estimate on tug boats, do you mean tug boats that are absolutely new?

A Not absolutely new. You may buy a small first-class boat for \$10,000.00, or you could buy a larger second class boat for the same money, or you could spend \$15,000.00 for a boat. Then I suppose it would take about twelve to fifteen lighters, that would cost from \$2,000.00 to \$3,000.00 apiece, and then you would have to have mules and carts and all that sort of thing.

Q Do you know whether the contractors are pushing the work properly at Fernandina?

A No sir, I do not.

Q It is of record that they are pushing it very rapidly. Do you know what plant they have?

A No sir.

Q He has one tug boat and four or five lighters in use.

A That is all he has? I dont know anything about that at all.

Q You had a contract in 1889 at Brunswick harbor?

A We had one down there, I dont know what year it was.

Q It is of record that you sent a check for something over \$2,000.00 to B. D. Green?

A Yes sir.

Q Was not an Act of Congress passed to have a re-issue of that check?

A I think there was.

425 Q Why was the check sent?

A We hired them to work for them (?)

Q What do you mean by "them"?

A Green & Gaynor.

Q You bid on the work March 4, 1893, at Brunswick harbor and didn't get it, had you gotten it, would you have hired Green & Gaynor?

A I could not say. I bid high on the work and didn't expect to get it; I didn't expect to get it when I bid on it.

Q In 1891 you bid on a contract for Brunswick harbor and Jekyll, Feb. 14, 1891?

A I did (?) If my name is there, I must have bid on it.

Q Were you ever asked to put in a bid by anybody on any work in this contract?

A I don't remember of such a thing.

Q You always put bids in on your own volition?

A Do you mean me or Mr. Ross?

Q Your bid.

Q On my own volition.

Q Without any suggestion?

A Yes sir, according to my own dictation. Some-
426 times I bid for Mr. Ross.

Q You don't remember about bidding on Brunswick harbor and Jekyll creek in 1891?

A No sir, I don't remember the circumstances at all.

Col. Gillespie: You put in your bid for Savannah harbor; Savannah harbor and Cumberland sound bids were opened on the same day in 1896, were they not?

A Yes sir.

Q Why didn't you bid on Fernandina?

A Because we didn't want it.

Q Because you didn't have plant enough?

A We didn't want the work, that was all. We can't bid on everything.

Q You didn't get you bid on Savannah?

A No sir.

Q Savannah bids were opened first, were they not?

A I could not say that, I don't know which was opened first. They were all opened about the same time.

Q Did I understand you to say that you were bidding individually or as agent for Mr. Ross?

A As agent for Mr. Ross, he was here himself.

Q Why did you not put in the bid in his name?

A Well, sir, I think the bid was in his name. He did
427 the bidding here himself at the time.

Capt. Gillette: You said a while ago that you hired Green & Gaynor to do some work for you under this Brunswick contract; did you work there at all, were you there at all?

A I suppose I was, I cannot say positively now, it was so long ago.

Q You didn't take charge of the work and direct it, you simply turned it over to them?

A No sir, I didn't I hired them to work.

Major Raymond: Is the firm named "Green & Gaynor?"

A No sir, now it is the Atlantic Construction Company.

Q You mean that Green & Gaynor are now the Atlantic Construction Company?

A I think they are, I suppose they are.

Q What part does Green take in it?

A I don't know, I don't know a thing about it.

Col. Gillespie: Did Mr. Ross supply any material under that contract?

A No sir.

Q Or do any of the work?

A No sir.

Capt. Gillette: Here is the pay roll for repairs on the 428 boat "Angler" for the month of November, 1890; the name, "M. Shelley," eight days at \$3.50, \$28.00 appears on it. You had a contract as executor of the Burns' estate to repair the "Angler?"

A A contract,—no sir.

Q Did you have charge of the repairs on the Angler at that time?

A Yes sir,—I know I did some repairs on the Angler at one time.

Q Did you ever see that pay roll as far as you know?

A In that shape?

Q With this name, in any shape?

A I think I furnished this name, the names of the men working there, with the amounts and occupation. I was asked to do it.

Q What did you do that for?

A I will explain that. At that time the Angler had been hauled out, and I was doing the work by day's work. I submitted the bill, some where between \$900 and \$1,000, and a few days after that Mr. Sterly sent for me and I went over there and he said they would have to have the signatures of the men who worked on the boat. I told him that I couldn't

furnish any signatures because the men were scattered
429 all over and had been discharged. Mr. Sterly said we
would have to get them, I told him I would do the best I
could. I got the signatures of all the men I could find, but it
took me probably a week to get them, and I brought it back
to him with those signatures on it, and he gave me a check
for part of the money and cash for the balance. That was the
last I saw of the pay roll.

Capt. Gillette: I submit the board an affidavit from Shelley, stating that he has never worked on the Angler, etc.

Capt. Carter: Have you ever had a conversation concerning this matter before?

A Yes sir, I have.

Q Repeat the details of that conversation?

A Yes sir, as well as I can. About two weeks ago Capt. Gillette sent for me, and showed me a paper, I think that affidavit from Shelley was it, I think that was the paper, and he asked me to explain the matter, which I did the same way in which I have explained it now. After the explanation he sort of held it over my head and threatened me. He wanted to get some information.

Q Of what kind?

A Testimony in this case, about things which I
430 didn't know.

What did he state?

Capt. Gillette:—Give everything that was said, as near as you can, or give the gist of it.

A After showing me that paper, he said something about the Atlantic Construction Company's affairs, and said I was implicated in it. I asked him how was I implicated in it, and he then referred to this matter, and to the different bids that we had been bidding on around here. Then he said that he didn't want to push that matter, and that he was after information. He seemed to think that I could testify to things I didn't know. He made a remark I believe, that B. D. Green was at the bottom of affairs, and that Capt. Carter was in with him, and he then said that if I would testify he would suppress this thing and not bring it up. I told him I didn't know a thing, only what concerned myself. That's about the whole thing.

Q Did he make any statement concerning what he would do concerning your character, in case you didn't give information?

A I see that you have heard something that I repeated.

Yes, he said that it would besmirch my good name if he pushed it through, whether I was innocent or guilty, 431 and if I would testify to things I didn't know, he would suppress it.

Q In other words, if you didn't testify to things you didn't know, it would besmirch your good name?

A He said it would besmirch my name if it was brought up.

Capt. Gillette: Did I not say that the matter was probably outlawed?

A No sir, you did not.

Q Did I say that I proposed to let you explain that matter in the courts?

A No sir, you didn't.

Q Did I say anything about the court?

A No sir, you didn't say anything about the courts..

Q I asked you if you had put in straw bids in this contract and the previous bidding.

Q You didn't say those words, but it was to that effect. You asked me about the Fernandina work only. That was the bid you asked me about.

Q Did you say that you didn't like to answer that question?

A I said that I declined to answer it one way or the other.

432 Q Did you state that if you answered it in the affirmative it would injure you among business people?

A Not that, no sir, not for that bid.

Q Did I state to you that I was investigating a case of great importance, and this being of minor importance it could be overlooked in the case of important testimony in the greater case?

A Yes sir, just as I have stated, that is the impression you gave me.

Q You know that in investigating large cases what is termed State's evidence is used, where one man involved is exculpated for the purpose of convicting more important people?

A Yes sir.

Q (By Capt. Carter) Do you know of any case where a man knows of nothing wrong, is required to give information and threatened if he does not, his good name will be besmirched, information that he has not got; would you call that State's evidence?

A I dont know enough about it.

Capt. Gillette: Did I give you the impression that I was going to besmirch your good name whether you were innocent or guilty?

433 A You certainly did.

Q I certainly didn't mean to.

A I apologize if I misunderstood you.

Q You told me you didn't know anything about it, and you gave an explanation of this pay roll?

A I didn't know anything about it, no sir.

Q And you gave the explanation about the pay roll that you gave here?

A Perfectly, to that effect.

Q You suggested yourself that you probably had some other men sign when you could not find the men.

A No sir, I didn't suggest it. I tried to explain my recollection of it, and I said I didn't remember the men that signed the roll. I said that the men had been discharged and scattered around, and I went around and got them up and did the best I could, as Mr. Sterly told me to.

Q Didn't I say, "It looks very awkward for you, Mr. Ely?"

A I dont remember, you might have said something like that.

Q Did I indicate to you that I had only begun an investigation of the matter, and I didn't know what the trouble was?

434 A That was my impression.

Q I indicated to you that very probably you had a good explanation of it?

A When I left you I think you were satisfied with my explanation; that was my impression.

Q Did I lead you to think that I believed you one of the Atlantic Construcion Company?

A I dont think you did. The impression that you left me under was that you were trying to bluff me. That was about the impression I was led to.

Q Did I not say that so far as I was concerned, if you could demonstrate to me that you were innocent, the matter would not be pushed?

A That was about all there was to it.

Q I didn't intent to give you the impression that if you were innocent I would besmirch your good name and force you to testify something that you didn't know.

A I made the remark when you said that, "Captain, I think you are fair."

Capt. Gillette: My object in the matter was to find out the truth of these enormous bids, which appeared to me to be wrong. I tried to get Mr. Ely to admit that he put in a straw bid and he practically admitted it. He said "I 435 will not tell you, but if you put me on the stand, I will not perjure myself."

Mr. Ely: That is so.

Col. Gillespie: Have you had any business relations in contracting work with Mr. B. D. Green?

A I have not.

Q Has Mr. Sanford Ross?

A If he has, I dont know it. Of course, I dont know his business except down here.

Capt. Gillette: In talking with Mr. Ely, I asked him if bids were not put in for the accommodation of the Atlantic Construction Company, and he admitted to me that such things were frequently done.

Mr. Ely: Yes sir.

Col. Gillespie: That he did it?

Mr. Ely: No sir. I did admit that such things had been done. I want to say this, that when you spoke to me about this thing, after we had talked over this pay roll, I said "I dont believe, Captain, that you would think that there is anything wrong about that pay roll and myself."

Capt. Gillette: Yes.

Mr. Ely: And you said, "Well, I hope there is not."

Capt. Gillette: It looked wrong, but it was so small in 436 comparison with those other things that I was willing to drop it if you would testify in regard to the other things. Did I give you the impression that I wanted you to testify to something that was not true about those things?

A You didn't give me that impression, no sir.

Capt. Carter:—Pending your investigation of what you thought was wrong in this district, and before the arrival of the Examining Board, have you not spoken disrespectfully of Capt. Carter and publicly insinuated that he was guilty of wrongdoing?

A No sir, not to the public.

Capt. Carter: To men occupying public positions?

Capt. Gillette: Men occupying public positions?

Capt. Carter: Men occupying public positions who come daily in contact with the public.

Capt. Gillette: Men occupying public positions have come to me and stated that they thought that your administration was all wrong, and I may have agreed with them that I thought the same thing.

Capt. Carter: Did you not of your own accord go to strangers comparative strangers, men whom you did not
437 know very well, and before the arrival of this Board, and speak disrespectfully of me and insinuate that I was guilty of wrongdoing?

Capt. Gillette: I dont recall it at all.

Capt. Carter: Since your arrival in Savannah, have you or have you not been on very friendly terms with the agents of the Venable Construction Company?

Capt. Gillette: Certainly not at all unfriendly.

Capt. Carter: Have they or have they not assisted you in one way or another in preparing your presentment of the charges against me?

Capt. Gillette: Not the least assistance that I can think of. Mr. Hancock had said that Green & Gaynor went to San Francisco after my orders to come here were out. I asked him about that, and he didn't remember, he came to me and said he had tried to refresh his memory and as near as he could remember, it was before my orders were out. With that exception I have not had the slightest conversation with the Venable Construction Company, or with any of its members concerning you, so far as I know.

Capt. Carter: Did you or did you not say to some one that you knew a good deal about the work in this district, intimating that what you knew was not of a satisfactory character, before you arrived in Savannah, before you came
438 to Savannah?

Capt. Gillette: The only comment I recall having made on the Savannah district was to Col. Suter; I read in one of your reports an item stating that one tree was girdled, and I said that I thought that was getting reports down to a fine point. I dont recall expressing any other opinion.

Capt. Carter: Before you came to Savannah?

Capt. Gillette: I dont recall it. I had no such idea. I came to Savannah, thinking that everything was in first class condition.

Capt. Carter: Speaking of girdling one tree, have you had experience in snagging rivers?

Capt. Gillette: I have had charge of a river with a snag boat in operation.

Capt. Carter: Rivers similar to these rivers, with swamps twenty to thirty miles wide, and banks easily erodable?

Capt. Gillette: There were small swamps.

Capt. Carter: Have you had any experience on works in a harbor like this?

Capt. Gillette: I have had charge of the jetty work at Humboldt harbor.

Capt. Carter: Is that an estuary on a tidal coast?

439 Capt. Gillette: It is a bay with streams flowing into it smaller than this.

Capt. Carter: Is it similar to this estuary?

Capt. Gillette: It is not an estuary as you mean it.

Capt. Carter: Have you had any experience in connection with the work on the Atlantic coast which would entitle you to consider yourself an expert on engineering matters in this district?

Capt. Gillette: I think I am capable of judging good engineering in this district.

Capt. Carter: Are you intimate with the tidal and physical conditions of the Savannah harbor?

Capt. Gillette: I can form a reasonable idea of the inflow and outflow of the tide.

Capt. Carter: What do you mean by reasonable?

Capt. Gillette: I can measure it with the tidal prism.

Capt. Carter: Have you done so?

Capt. Gillette: No sir.

Capt. Carter: Have you made a detailed examination of the physical conditions of this harbor since you have been here?

Capt. Gillette: I have not.

Capt. Carter: Have you made a detailed examination concerning the physical conditions,—personally of the improvements at Cumberland sound?

Capt. Gillette: What do you mean by "personally?"

Capt. Carter: Making a detailed examination of the physical condition of the work there.

Capt. Gillette: All my soundings have been taken by my assistants.

Capt. Carter: Do you know anything by personal experience of the results of the inflow and outflow of the tide on Cumberland sound over the jetty?

Capt. Gillette: No, no experience, except what I saw when down there.

Capt. Carter: Are you personally familiar with those three routes between Savannah and Beaufort?

Capt. Gillette: I am not, except from the maps.

Capt. Carter: Have you been over the Mud River route?

Capt. Gillette: I have not.

Capt. Carter: Have you been over the other route?

Capt. Gillette: I saw the dredge work on Route 2.

Capt. Carter: Do you consider yourself familiar with the local conditions as a man who has been on the works for years?

Capt. Gillette: Certainly not.

Capt. Carter: Do you personally know anything concerning the influence of Wright's river, in connection with the flow across Tybee Knoll?

Capt. Gillette: I take the testimony from your subordinates.

Capt. Carter: Have you made an examination of that yourself?

Capt. Gillette: Certainly not, have you?

Capt. Carter: I have. Do you know of your own knowledge whether the construction of dam 31 across Turtle island is necessary?

Capt. Gillette: I have an opinion.

Capt. Carter: May not a man have an opinion concerning something which he knows nothing about.

Capt. Gillette: Certainly.

Capt. Carter: In connection with the affidavit of Marion Twiggs, referring to the building of mattresses according to the designs and specifications, I would like to submit a report of May 10, 1897, in which he says, "Seven brush mattresses of the third design, 22,900 square yards, were sunk"; also report from Marion Twiggs of June 30, 1897, stating that three brush mattresses of the third design were sunk; June 20, 1897 eight brush mattresses of the third design, were sunk in the jetty; June 11, 1895, seven brush mattresses of the third design, were placed in the jetty:—1st, 1897, that eleven brush mattresses of the third design were placed in the work; July 10, 1895, six brush mattresses of the third design were sunk in the work; Feb. 28, 1897, that one brush mattress of the third design was sunk; Feb. 20, 1897, that two mattresses of the third design were

sunk; Feb. 11, 1895 five brush mattresses of the third design were sunk; March 31, 1895, six brush mattresses of the third design were sunk; March 20th, four brush mattresses of the third design were sunk; March 10 that three brush mattresses of the third design were sunk; May 31, that nine brush mattresses were sunk; May 20th, 1897, that five brush mattresses were sunk; April 10th, five brush mattresses of the third design were sunk; May 1st, that six brush mattresses of the third design were sunk; May 10th, that seven brush mattresses of the third design were sunk. It is stated in all those reports of Mr. Twiggs that those mattresses used were as provided for by the specification and according to the third design.

Capt. Gillette: Col. Haines asked Marion Twiggs how he accounted for the fact in the face of those reports, and 443 he stated that on the face of the reports there was a column headed, "Designs of Mats"; that these reports were on this arbitrary form and to explain the matter he put above the word "Three" the word "Brush." The third design is used there in a Pickwickian sense. The word "Brush" was put there for Capt. Carter's information, as he would understand it.

Capt. Carter: I understood and my assistant understood, that the mattresses were being built according to the third design. The word "Brush" would indicate the third design. I would also like to submit his statement in which he reports the mattresses standing up properly, which statement was denied.

Capt. Gillette: You are mistaken about that, they were standing up in the Savannah river, but not in Cumberland sound.

Major Adams: I suggest that Capt. Carter make his statement, and then Capt. Gillette make his.

Capt. Carter: I also submit several reports of Feb. 11th; recommending that the mattresses be placed in certain spaces, "believing it to be best" Also report of April 8th, Capt. Gillette stated that the loss was entirely due to compression and not to subsidence, and in a report of March 23, 1897, 444 he says, "The bottom is scouring off and filling in after the mattresses are sunk.

Capt. Gillette: Marion Twiggs told me that the mattresses were so shrunk, and the volume had been so decreased, as to make them enormously expensive, costing \$13.69 per cubic yard.

Capt. Gillette: Capt. Carter has introduced a lot of reports here, and I would like to know whether it is necessary to have copies of them made.

Capt. Carter: I don't think it is at all necessary, I think that all I require is in the record.

Capt. Gillette: Is there any other evidence from the files that you wish to use in your defense?

Capt. Carter:—I would like to have blue prints of everything that has accompanied those reports from Mr. Marion Twiggs. Also copies of all of those matters that have been taken up by the Board, so that I can examine them in the presence of the Board.

Capt. Carter:—Did you suggest that I be not given access to my private papers?

Capt. Gillette: I said that no one should be allowed to enter that room until the Board came.

Capt. Carter:—Did you not detain those things in disobedience of orders from the Chief of Engineers, prior to receiving that second telegram, giving me authority to hold them?

Capt. Gillette:—I did nothing in disobedience of orders.

Capt. Carter: You received a telegram from the Chief of Engineers, giving me access to the records, and a second one denying it?

Capt. Gillette: In explanation of why I took that step, I will state that at 10:30 o'clock on the night that your secretary, or the Nicaragua Commission clerk, came to Savannah, he came to this office at 10:30 P. M. and demanded the key of the room and of your house. I told him I had nothing to do with your house, but that I had the key of the room in my possession, and I would not turn it over to him. Then I put a watchman over in that room. I put Mr. Austin over there, and he states that at three of half past three the following morning, a man came to the room door, and he called out asking who was there, and received no answer. The man started to run and he threatened to shoot, and the man got away. I telegraphed that latter fact to the Chief
446 Engineer, in the interim between those two telegrams.

Capt. Carter: Was that man sent by you?

Capt. Gillette: He certainly was not. I will state further that Mr. Austin told me that the next day he said to Mr. Connolly, "What did you come up to that room for last

night?" and he said, "That was not me—why, yes, I came up for the key."

AUSTIN, recalled:

Capt. Gillette: Will you detail to the Board the event which occurred concerning that room, 23 in the other building?

A At ten o'clock or shortly after that, perhaps eleven, I was put in charge of that room in the other building by Capt. Gillette. I had a mattress and cot brought up there. I occupied that cot. I heard the hours strike up to three o'clock, and about three o'clock or shortly after, between three or four, I was roused from a doze by hearing some one coming up the stairs. I waited until he got to the top of the stairs, or almost to the top of the stairs, when I called out to know who it was; I said, "Who is that?" and I received no answer. I got 447 up out of bed and called again, and as I called this person, whoever he was ran down stairs, and I ran down stairs after him, and hurt myself at the foot of the stairs, at the foot of the third landing on the iron step, being in my bare feet. The next I saw of the person he was running down Bryan street towards Bull.

Capt. Gillette: Did you have any conversation with Mr. Connolly after that?

A I met Mr. Connolly on Bull St., and Mr. Connolly passed the time of day with me, and spoke about different matters, and I asked him, I said, "What were you doing in the building last night?" and he said, "That was not me," then he said, "What building?" and turned the conversation off. He couldn't have meant this building, as I had seen Mr. Connolly up here that same night.

Capt. Carter: He came up to see Capt. Gillette and saw him in the hallway; was there anything in that conversation which would lead you to believe that it was the other building?

A Not necessarily so. He may have meant this building, but I don't see how he could have said, "It was not me."

Capt. Gillette: What possible explanation could you have for his saying, "It was not me," if he did not mean that building?

A I could not give any. He certainly knew that I saw him here.

Q Do you know any reason he would have to deny his presence in this building?

A No, he could not deny his presence here. I said to you the next morning that I was pretty certain that it was not Mr. M. A. Connolly. I knew from having been associated with Mr. Connolly, that it was not he.

Q Did he give you the impression of knowing that some one had been there?

A That might be an important question. Probably I might have arrived at that impression.

Capt. Carter: Do you think you necessarily derived that impression?

A Not necessarily, no sir.

Q You say that as you know Mr. Connolly, it might be some one else?

A I know it was some one else.

Q Any special person?

A No sir, I could not tell, but I think it was a white man.

449 A Have you any idea that it was any special person who came up there for any special purpose?

A No sir, I did not. I did not expect anybody to make me a visit that night, and I was very much surprised when come one came up.

Col. Gillespie: Are any of those rooms occupied on that floor?

A There is a room just below on the next landing, and it is occupied by the gentleman who sleeps there.

Capt. Gillette:—Is the light on the lower landing usually lit?

A I understand that the watchman puts it out at twelve o'clock. It was put out that night.

Major Adams: Had you at any time any objection to the records in that room you are speaking of, coming into the possession of the Board?

Capt. Carter: Not the slightest, except that there are one or two memoranda, as I explained to you, which might involve two ladies, and even that I had no objection to going into the hands of the Board privately and personally. I may say
450 this, that I did have objection to anything of mine coming into the hands of Capt. Gillette, because I felt that

I would not receive any fairness or justice from Capt. Gillette. I didn't know what might be done with my papers, rightly or wrongly. I have received from Capt. Gillette no receipts for any funds or for any property nor have I received from him any letter of any description concerning the things turned over to him.

Capt. Gillette:—I receipted for the property and funds from you the day I got here, without even checking anything.

Capt. Carter:—Mr. Cooper says that none of those mats were made according to the designs in the specifications. Here are several reports which show that they were built according to the specifications. April 4, 1897; Oct. 8, 1897;—that should be 1896—and April 20, 1897.

Major Adams: (Referring to reports mentioned by Capt. Carter) Where did you find that statement made?

Capt. Carter:—"Design of Mat?"

Major Adams: "Built according to specifications."

A The third design.

Q What we want is the record, you should say just what you find there?

A Well, built according to the third design.

Major Adams: Why not put, that which is there, 451 "Design of Mat three." You ought not to add that.

A "Design of Mat Third" should be in each case, it should be instead of "The third design." April 20, 1897, there is a report in the handwriting of Mr. Daniels, signed by Mr. Cooper, made by Mr. Cooper, which refers to design of mat 3rd—I don't think it is necessary to go through with all of these, I simply want to show this generally.

Major Adams: I think what you have is enough.

Capt. Carter: I would like the Board to examine the physical condition of the work.

Col. Gillespie: Is there any part of the work above water that the Board can see?

A Not in the last two contracts, that is all under water. The other is above water. If there is any question as to the condition of the work, or as to its successful accomplishment, I would like to have the Board see it.

Capt. Gillette: There is no doubt that the depth of water that you claim, has been obtained in Savannah harbor. I have no engineering objections to any of the mattresses that have been put in.

Capt. Carter: The question then is the divergence from the specifications, the idea being that the specifications ought to have been different if those mattresses were constructed?

Capt. Gillette: Yes sir, and the question of paying enormous prices for the mattresses used

Col. Gillespie: Capt. Carter, is there any necessity for the Board staying here longer?

Capt. Carter: I don't think so.

Major Raymond:—You stated that we could not see any of the work done under the last contract; the work previously done has been in position for a considerable time.

Capt. Carter: Yes sir.

Major Raymond: Could the Board by examining that previous work determine anything which you think would be to your advantage?

Capt. Carter:—I think they could determine by seeing the previous work that the new work will be approximately the same.

Col. Gillespie:—Was not the work of a different character?

Capt. Carter: The mattresses were of the same character.

Col. Gillespie: But for an entirely different purpose, one was on the bar and the other on the river?

453 Capt. Carter:—I know that one is a jetty and the other a training wall, but for the purposes of construction, they are practically identical.

Major Raymond:—What I want to get clear in my mind is whether Capt. Carter considers it to his interest that we should go and look at the work that was constructed under the previous contract, the success of the work not being questioned.

Capt. Carter: I feel that the work constructed under the previous contract is so satisfactory to myself that there is no necessity for the Board seeing it, but if the Board is not satisfied of that, I would like them to see it.

Major Adams: How much time do you desire to prepare the testimony of facts which you desire to submit to the Board?

Capt. Carter: I can't tell, because there is a great deal of testimony here, which may have escaped my memory. I can't tell, really.

Major Adams: Can you do it in a week?

Capt. Carter: I should think so, it is very hard to tell.

Major Adams:—Do you prefer to have the next meeting here?

Capt. Carter: No, I think New York will be just as satisfactory.

Major Adams: I think that practically settles the case.
454 If you desire it to be here, let it be here. Is that perfectly satisfactory to you?

Capt. Carter: That is perfectly satisfactory.

Col. Gillespie:—You can notify me by telegraph when you are ready to go on.

Major Adams: I think Capt. Carter should have as many days as he wants to prepare his testimony. When I asked him the question whether he could do it in a week, he did not say that he could.

Col. Gillespie: The Board is at your convenience, Capt. Carter.

Major Adams: If Capt. Carter wants ten days or two weeks, I think he should have it.

Capt. Carter: I may be able to do it in that time, or maybe in less. I can determine a little later.

Major Adams: Do you desire the Board to remain here during that interval of two weeks?

Capt. Carter: I am very familiar with all the local conditions, I know where all the brush is obtained, and where all the logs have been obtained. The character of the brush seems to be called in question, and the only reason I would wish the Board to stay here, would be if they desired to look into that matter.

455 Col. Gillespie: Is there any important reason why the Board should stay here?

Capt. Carter: No sir.

Col. Gillespie: You have full and free latitude to examine any papers that you want to in the office. Notify the Board when you will be ready to appear before them at a point selected by you, it will be entirely satisfactory whether we meet at Savannah or New York.

Capt. Carter: That will be perfectly satisfactory to me. The Board adjourned subject to call.

TESTIMONY BEFORE BOARD OF OFFICERS.

Stenographic report of an examination by a Board of Officers of the Corps of Engineers convened at New York City, October 12, 1897, by virtue of general orders No. 32, headquarters Corps of Engineers, September 17, 1897.

The Board convened for the taking of testimony and the hearing of evidence at ten A. M. on October 12, 1897, at the Army Building, New York City.

Present:

Colonel G. L. Gillespie, Chairman.
Major Charles W. Raymond.
Major Henry M. Adams,
who constitute the Board of Officers and
Captain O. M. Carter, and
Captain Cassius E. Gillette
and the stenographer.

COLONEL PETER C. HAINS was called to the stand and examined as follows:

By Colonel Gillespie:

Q Colonel, you are the Division Engineer of the southeast division in which Savannah and Cumberland Sound lie, and the Board has called you for the purpose of getting what information you may have in regard to the work that was constructed there during the time that you was Division Engineer, or the time previous to your assuming charge of 459 that Division. You are familiar with the specifications issued by Captain Carter for the improvement of Savannah harbor and Cumberland Sound under advisement dated June 6, 1892, are you not?

A To a certain extent, yes.

Q They call for three different types of mattresses?

A Yes.

Q Are you sufficiently familiar with the cost of such work on the South Atlantic Coast from Charleston to the mouth of the St. John's river to know whether the cost of these several types is relatively the same?

A All those three types mentioned in the specifications?

Q Yes.

A Well, I don't know that I am sufficiently familiar to state what the difference would be between the different

types, but I should say that there would be considerable difference.

Q Were you a contractor, could you have known from the specifications without personal conference with Captain Carter what type he expected to use, and could you have intelligently bid without such conference with Captain Carter?

A No, I don't think I could. I would have to bid on the highest type of mattress; that is the one that cost the most.

Q Was it right and proper for Captain Carter to ask for only one price for all types?

460 A I should say not.

Q Are you familiar with the type actually adopted and constructed by Captain Carter?

A No I am not familiar with it. I know in a general way the kind of mattress that was used and know that from the statements of his assistants; but I did not know from observation.

Q Did you at any time see what was represented to be one of these mattresses?

A Yes, I saw a mattress being constructed at Cumberland Sound and I also saw mattresses constructed for the Savannah river.

Q Do you think this type that you saw was cheaper to the contractors to construct than any of the other types mentioned in the specifications?

A Decidedly cheaper.

Q Do you think it right and proper for Captain Carter to have adopted and constructed this type without the knowledge of the Chief of Engineers?

A No.

Q Do you think such a modification was provided for by the specifications?

A No, I think that the specifications provide for certain modifications but I don't understand that any such modification was agreed upon.

461 Q Had you known that Captain Carter was building a type of mattress not mentioned in the specifications would you have conceived it to be your duty to notify the Chief of Engineers of the fact?

A Yes, I would.

Q Do you think it right and proper for Captain Carter to have adopted this type and then authorized its construction without first having agreed upon a price reduced to correspond with the diminished cost of construction?

A I do not.

Q The price actually paid by Captain Carter for the type adopted by him was \$1.10 per square yard. Are you sufficiently familiar with the cost of construction of this class of work in that locality to express an opinion whether the price paid was reasonable or excessive?

A Well, I should say the price was excessive, but I don't know whether I am sufficiently conversant with the cost of that style of mattress to make that statement absolutely as a truth.

Q Had you found out by one of your inspections that Captain Carter was building a mattress not provided for in his specifications at an excessive cost, would you have conceived it to be your duty to report it to the Chief of Engineers.

A Yes, if I had noticed that fact I would of it not, to 462 the Chief of Engineers, I would have at least called Captain Carter's attention to the fact that the mattresses were not being constructed according to the specifications.

Q The specifications say that the quantity of mattress work required for canvassing bids for Savannah harbor would be 350,000 square yards. Do you think it right and proper for Captain Carter to increase this quantity to 1,360,000 square yards, the quantities of the other materials being correspondingly reduced, without the knowledge of the Chief of Engineers?

A Not without the knowledge of the Chief of Engineers, no.

Q The specifications say that the stone to be used for sinking the mattresses shall have a specific gravity of 2.4. Captain Carter accepted, used and paid for stone having a specific gravity only a little greater, if any, than 2. Do you think it right and proper for Captain Carter to have done so without the knowledge of the Chief of Engineers and in equity to other possible bidders who had no means of knowing that such a concession would be made.

A No, I don't think he should.
Mamor Adams:

Q Do you know of any disappointed bidders who did not know that that concession was to be made?

A I do not.

463

Cross-Examination by Captain Carter.

Q I would like to ask this question. You stated Colonel, that you thought that the three types given there varied considerably in price?

A Yes.

Q Would you have confidence in the judgment of men who have done that sort of work for a great number of years, competitors, and in no wise interested whatever in the company who had this bid as as to what they considered the relative value of these three types of mattresses—men of character?

A I don't think the opinions of anybody would alter my own as to the difference in value of the three types of mattresses.

Q Do you not think though, that men who have actually done this sort of work and know what it costs, do you not think that their opinions would be of value?

A Most certainly, they would be.

Q Suppose, Colonel, that there was a difference in price, but every bidder understood what was to be used. Would there be anything unfair then to the men who did not get the contract if they knew as well as those who did what type was to be used? In other words, if they bid on the same type, would there be anything unfair?

A If they bid on the same type there would not be anything unfair; but, the specifications distinctly say the Engineer may select any one of three types and in my opinion there is considerable difference in those types. I don't know whether that answers your question. What I want to get at is this—

Q Hardly, Colonel. If two men, competitors, bid on the same thing understandingly, even though, in your opinion there might be a difference in the types, is there anything unfair in that competition?

A Well, I should not regard it as fair to call for a certain thing to bid on with the expectation that something else was to be furnished.

A Oh no, not at all. Suppose they bid on the thing actually furnished, was there anything unfair in that?

A Do I understand you—

Q Suppose there are two men, competitors for a certain thing. Both of those men understand exactly what is to be

used and bid on the same thing. Is there anything unfair in that?

A But they bid on something that was not to be used.

Q Oh no.

A That is the case.

Q Oh no.

A I cannot understand the question if they don't bid 465 really on something that is to be used.

Q What I mean is this: if two contractors bid on an article which is to be used and it is used, is there anything unfair then?

Major Adams:

Q I would like to invite the attention of the Board right here to the fact that Captain Carter has already testified that he did not intend to use the articles specified.

A (Captain Carter) Major, you are mistaken, I intended to use one of those types and of that all those bidders had been informed. If you will pardon me, Major, I intended to use one of those types and the bidders were informed of that. Major Raymond:

Q I understand that Captain Carter wants to know whether if all the bidders understood that a certain thing was to be bid upon, although it was not expressed definitely in the specifications, whether there was anything unfair to those who did not get the contract.

A (Colonel Hains) Well, I don't know, there might be. You are making a hypothetical case.

Q (Captain Carter). No sir, I beg pardon, Colonel, I am making an actual case.

(Colonel Hains) Well, as a matter of fact as I under- 466 stand it, three types of mattresses were specified and were bid on. That is so, is it not?

A. (Captain Carter). Yes sir. As a matter of fact, the plans were made for the third type of mattress, which was the type used.

(Colonel Hains) But I don't understand what the other two types referred to were put in the specifications for?

(Captain Carter) I put them in for this reason, Colonel: in some of the old work there was log mattress work and in some of the places where I thought flexible mattress was needed, I might use some of the second design; and I desired to have the United States obtain what few mattresses might be required of those two types at no extra cost to the United States, the number being so small as to make no difference

in the price to the contractor. I don't know whether I make myself clear.

A I think I understand what you mean. Well, then the question you want answered is this:—

Q (Captain Carter) I want simply to find out if everybody understood and bid on the same thing, was it unfair?

A I cannot understand how anybody could bid on the same thing—

A (Captain Carter) Well, as a matter of fact, they did and—

A If an Officer could tell who the bidders were all to be, but how many people were there who did not bid at all
467 after they saw the specifications? You could not really communicate with every person who intended to bid.

Q Well, as a matter of fact, Colonel, would any contractor bid on a large amount of work, say \$2,000,000 in an exposed place on an ocean bar in a dangerous place like Cumberland Sound, without looking into the matter, either in person, or by one of his agents?

A No, I should think not. I should think a contractor would be very foolish under those circumstances not to look carefully into the matter.

Q These specifications went through your office, did they not Colonel?

A Yes. Which specifications are you referring to?

(Captain Carter) July, 1896.

A Yes, they went through my office.

Q You were aware that I had prepared them in this manner, were you not Colonel?

A Yes, I should have known.

Q Well, I most certainly thought you did. It was not with any intention of keeping it from you on my part.

A Well, the specifications passed through my office.

Q And you state, Colonel, that you think a type enormously cheaper than the type mentioned, was actually used?

A I did not say enormously.

Q Well, a type cheaper than the type mentioned was
468 actually used.

A Yes.

Q Suppose a type not cheaper than the one mentioned, the third design, varying, however, only in minor details, such change being provided for in the specifications themselves, would that have been improper?

A That I don't think would have been improper provided an agreement had been made with the contractor as provided in the specifications?

Q Do not the specifications distinctly state, Colonel, that such an agreement shall be made in case only of a variation of the price?

A Exactly.

Q Suppose there is no variation in cost and the change is minor and provided for in those specifications, is it necessary to report such minor changes any more than it would be the method of sinking a mattress, whether by one method or another?

A It does not seem to me that that was the case.

Q In view of those facts, would it have been necessary to report those changes if made under those circumstances?

A I think where there is a material change in the specifications involving a considerable difference in the cost, I think it should be reported to the Chief of Engineers.

Q Yes sir, but that is not an answer to the question, Colonel. I say, suppose it does not make any difference in the cost, and the change is very slight, involving no increase nor decrease—

(Colonel Gillespie) Don't you think you are bringing out the question of your discretion in the matter, rather than—

(Captain Carter) If you will pardon me Colonel—

Major Raymond: It seems to me that Captain Carter's questions are rather important.

(Colonel Gillespie) I don't see that they bear upon the case at all.

Major Raymond: In my opinion it is clear that they do.

(Captain Carter) If I may state this, I don't want anything except the truth of this matter, Colonel.

(Colonel Gillespie) It should be brought out by direct questions, Captain Carter.

(Captain Carter) Can I see if I can make this a little shorter, Colonel? Colonel Hains stated here, Colonel, in reply to your question that he did not think it would be right and proper without the knowledge of the Chief of Engineers to change a type of mattress and introduce one which was somewhat cheaper, and I asked him if—I said—I think you will find that Colonel Hains' reply states that it is a cheaper type and I wanted to find out if it is not a cheaper type.

470 (Colonel Gillespie). Ask the question.

Q (Captain Carter). If the type adopted was not a

cheaper type and varied from the rigid design only in minor details, such changes from that being authorized in the specifications themselves, would it be necessary to report such minor changes to the Chief of Engineers?

(Colonel Hains) If it was a minor detail I should think not. I would like to say though, in reference to that, that I don't regard this, the change that took place actually, as a minor detail by any means.

(Captain Carter) The question was asked, Colonel, whether it would be proper to do this without any reduction in price, to make the change. Suppose the cost to the contractor in completing this work were not reduced, would there have been any necessity for a supplemental agreement with him, the changes being provided for in the specifications?

A I don't think the matter of cost affects the question so very much. There was a radical change in the specifications, that is, in the type put in, as I understand, from what the specifications described.

Q If you will pardon me, that is where you are in error, Colonel, there was not a radical change and that is the reason why I asked this question.

A Well, I don't know about that. I only say one or two mattresses that were used in the whole work.

471 (Colonel Gillespie:) Captain Carter says that the eight course mattress as represented on the tracing before the Board is false.

(Captain Carter) That is false.

Q You were asked, Colonel, if it was proper for me to have increased the amount of mattress work from 350,000 square yards to over a 1,000,000. square yards without the knowledge of the Chief of Engineers. Suppose that were reported in writing to him and to the Division Engineer every month, is not that sufficient notification?

(Colonel Hains) I should say not, because a report of that kind would not be noticed if it was in the Report of Operations. Such a report would not be noticed.

Q Ought it not to be?

A I don't think, Colonel, that is the question this Board is investigating.

Q Having made my written reports to the Chief of Engineers.

A You mean monthly reports?

Q I mean my monthly reports.

A I would not consider that as proper, because that might not be noticed in that shape.

Q Well, Colonel, what is the object of those monthly reports, then?

A Well, I don't know as it is necessary for me to answer that question, Captain. That is going off into matters that don't seem to be pertinent to this case.

Q You were asked if calling for stone of a specific gravity of 2.4, it was right and equitable to disappointed bidders to have used a lighter stone. Suppose all bidders bid on the stone actually used and the 2.4 was an error by the chemist who determined the specific gravity, would there be anything unfair in that?

A O, but if an error like that had occurred I think it should have been brought to the attention of the bidders.

Q Suppose they all understood that and bid actually on the class of rock intended, would there be anything unfair?

A Each bidder you mean is bidding on the same class of rock, if each bidder bids on the same rock there can be nothing unfair to any of them as a matter of course.

(Colonel Gillespie) Captain Carter, you don't mean to use language contrary to the evidence, there is evidence that there is some question of an error by the chemist, but, it is a matter of your own inspector's report that lighter stone was used, and it is in evidence. When was that report submitted?

A It is in the evidence, I don't know when it was submitted.

Q Is it in the records?

A Do you mean that it was reported to me before I left Savannah?

Q I think so.

473 (Captain Carter) I think that is an error.

(Colonel Gillespie) The point was the question of the lightness of the stone was not determined alone by the chemist, it was determined by the inspectors as well.

(Captain Carter) I knew the kind we wanted and it did not occur to me that there was an error in the specific gravity until this came up.

(Captain Carter) You were asked, Colonel, whether the price of \$1.10 per square yard for mattresses was reasonable or not at Cumberland Sound. You know the conditions of exposure at Cumberland Sound.

(Colonel Hains) Well, let me understand that. I was asked

if \$1.10 was a reasonable price for what you used for mattresses. Which one of the mattresses?

Q I don't know what the question was.

(Colonel Gillespie Reading The Question).

The price actually paid by Captain Carter for the type adopted by him was \$1.10 per square yard. Are you sufficiently familiar with the cost of construction of this class of work in that locality to express an opinion whether the price paid was reasonable or excessive?

Captain Carter. You said, I believe, Colonel, that you had not examined carefully the details of construction of one of those mattresses.

(Colonel Hains) A. Yes.

474 Q Could you form an accurate idea of its cost without such a personal familiarity with it?

A I think I might form a tolerably accurate idea without ever seeing one, provided I knew how it was constructed.

Q I don't think that there is anything else that I want to ask.

(Colonel Gillespie) Do you know what the price of a similar mattress built in 1894 was, built in the same locality?

A I believe it was 57 cents a square yard.

(Captain Carter) Is that the cost to the contractor, or the cost to the Government? Did it cost the contractor that, or did it cost the Government that?

A I don't know anything about what it cost the contractor, that is what the Government paid as I understand it.

(Captain Carter) Was not the cost of mattress work in the project for Cumberland Sound estimated at \$1.00 per square yard—I mean in the report of the Board of Engineers?

A I don't remember.

(Colonel Gillespie) I asked Captain Carter the question whether the mattress that was bid for and which was estimated for in the report, to which you referred, was the one which was constructed?

(Captain Carter) Yes sir, I made both estimates.

(Colonel Gillespie) Is it the one the Board understood?

475 (Captain Carter) I think it is the one they understood. It is the one I intended them to understand.

(By Captain Gillette)

Q Did Captain Carter explain to the Board when they

made this estimate of \$1. per square yard, that this eight course variety of brush mattress was to be used?

(Captain Carter) That has nothing to do with the case.

Q Yes sir. It has. I submit that Colonel Hains understood better what the Board understood than Captain Carter. Is that your idea that that big mattress of eight courses was to be used?

(Colonel Hains) Most emphatically not. I did not understand it that way.

(Captain Gillette) As a matter of fact, it is eight mattresses.

(Captain Carter) Well, there is where I differ with you.

(Captain Gillette) Did the Board understand that, anything like that system of construction was to be used when it made its estimate at a \$1. per square yard?

(Colonel Hains) I don't know what the Board understood, I know I did not.

(Captain Carter) The kind I intended was the kind I used. Whether I went into the details of that, I don't remember, but being familiar with it myself, I may not have mentioned that to the Board. That I don't remember. I want to 476 state further that whether there should be one course or eight courses was in my mind immaterial, because whether I put one mattress down or whether I put eight depended entirely upon the depth of water and how quickly the sand would fill.

(Captain Gillette) Did you in any one instance use only one mattress?

(Captain Carter) Not in the present contract. I have in other contracts.

(Colonel Gillespie) Did you in any one instance use two mattresses?

(Captain Carter) During the present contract in Cumberland Sound I don't think I did, because when I left there we had not put the work in shoal water; it was in deeper water.

CAPTAIN WILLIAM M. BLACK, was called to the stand and examined as follows:—

By Colonel Gillespie.

Q Captain Black, will you please state to the Board your service in the improvement of the St John's river and the adjacent locality, and the dates on which that service was rendered?

A I was placed in charge of the Florida District in April or May of 1886, and remained in charge of that District 477 until November of 1891.

(Colonel Gillespie) What was the character of the work that you did at the mouth of the St John's river?

A The construction of jetties, consisting of mattresses and stone.

Q What was the character of the mattress that you used in that construction?

A In 1886 the mattress was of the design which had been used by General Gillmore on all of the works. Two designs were called for, one of them consisting of a layer or raft of logs covered with brush. The second design I don't remember so clearly. It was more brush, but it was never used. That was used under the first contract made under me. I have some notes of that Colonel; if I may get them, in the other room, I can remember probably.

Q We just want the general design?

A But it proved unsatisfactory. During the continuance of that contract I first tried two or three mats in the north jetty, consisting of a log raft alone, without any brush. That was also unsatisfactory, and by authority I obtained permission to construct a supplemental mattress of brush over fascines, made after the design of a contractor, M. R. G. Ross, and two or three were put in so that when the contract for 1888 was let, the fascine brush mattress was the only one 478 called for. In 1888 this mattress consisted of a grillage of poles at the bottom spiked together. On that was a closely compacted layer of brush fascines, which were made so that the fascines should be continuous for the entire length of the mattress. The brush was laid in carefully so as to break joints and it was specially provided that there should be a sufficient quantity of brush, so that when choked by the ordinary form of military choker and bound at intervals of two feet, there should be solid wood to the diameter of 9

inches at the points where bound. It was choked down at intervals of two feet until it was solid. On this layer of fascines was placed a second layer of fascines, spaced at intervals of 6 feet, and placed at right angles to the bottom layer. On top of this was placed another gillage of poles similar to the bottom grillage. The fascines of the lower layer were jammed together by heavy layers as they were placed laterally. When the top grillage was placed on, the ropes which had been attached to the corners of the lower grillage were drawn up through, hauled tight to the full breaking strength of the rope, by a lever and made fast to the intersections of the top grillage. The mattress was made on ways close to the shore. When ready for placing, which would depend upon the state of the weather and the stage of the tide, the mattress was launched as short a time as practicable before the time of placing in the jetty for the reason that 479 the free floatation was so exceedingly small that the mattress had to be held up on the water by attaching it to barges on the sides, or by placing floats over it. It was then taken out, swung in place over the jetty and lowered away, being covered with stone as it was being lowered.

Q Was it the invariable custom to sink these mattresses separately and cover them with stone?

A Invariably.

Q Do you remember what the cost of such a mattress per square yard was in place?

A Yes, the cost of construction on share was from 50 to 55 cents, the cost in place ranged in the neighborhood of 60 to 65 cents.

Q Have you seen the specifications issued by Captain Carter for the improvement of Savannah Harbor and Cumberland Sound, issued under advertisement of June 6, 1892?

A Yes sir.

Q They call for three different types of mattresses, do you know from your experience in the St John's river and vicinity whether the cost of these several types is about the same, or whether there is a variation of grade?

A The cost of the second design of Captain Carter's should have been practically the same as the cost of the design used on the St John's river.

Major Raymond: It would make no difference in what 480 place it was to be? U mean the cost of the mattress in place—would it cost more to put it in place in Cumberland Sound than it would in the St John's River?

A I cannot say as it would. As I recollect, the difference in towing did not amount to much.

Colonel Gillespie: How about the third type?

A The third type should have cost about the same as the second, the difference being that in the second type, as in the type in the following contract, the 1890 contract, for the St. John's, the top and bottom grillages could be made of one layer of poles only, instead of being square. In Captain Carter's third design, the top and bottom grillages were to be of two layers of poles, but the top layer of fascines at intervals of 6 feet was omitted, so that it would amount to about the same thing.

Q You mean that the cost of the second and third types were about the same?

A They ought to have been about the same, Colonel. I have not made any figures on it. There could not be much variation.

Q Having read the specifications which I refer to, were you a contractor, could you have known from the specifications without personal conference with Captain Carter, of the special type he expected to use, and could you intelligently bid without such conference?

481 A No sir.

Q Could you have intelligently bid, after he had informed you verbally of the design he was going to use?

A I should have had to bid under the specifications and should, therefore, have had to protect myself by bidding for the mattress of the highest cost.

Q Had you been the constructing officer, would you have thought it right and proper to ask of the bidders only one price for all these three types?

A No sir.

Major Raymond: I object, Colonel, to the question.

Colonel Gillespie: If an officer had not had experience in that kind of work, I should have thought your objection pertinent.

Major Adams: As I understand it, Mr. President, that was the reason he was called.

Colonel Gillespie: Had you been the constructing officer would you have thought it right and proper to have adopted and constructed a type of mattress different from what the specifications called for without the knowledge and authority of the Chief of Engineers?

A No sir.

Q Taking the specifications as they are written, had you been the constructing officer, would you have thought it right and proper to adopt this type and authorize its construction without first having agreed upon a price reduced to 482 correspond with the diminished cost of construction?

A No sir. The specifications expressly forbid that.

Q The specifications say that the quantity of mattress work required for canvassing bids for Savannah Harbor would be 350,000 square yards, had you been the constructing officer would you have thought it right and proper to increase this quantity to 1,360,000 square yards, the quantities of other required materials being correspondingly reduced?

A No sir.

Q Would you have deemed it sufficient to have made a report of this increase by a monthly report alone, or would you have deemed it necessary to make a special report direct to the Chief of Engineers upon the subject?

A I should have deemed it a radical departure from the terms under which the contract was let and, therefore, requiring special authority.

Q The specifications state that the stone to be used for sinking the mattresses should have a specific gravity of 2.4, would you, as the constructing officer, have deemed it right and proper to have accepted, used and paid for stone of less specific gravity without the knowledge of the Chief of Engineers?

A No sir. The same stone was used on the St John's river and in the last contract particularly stone was 483 brought down and weighed, and when it did not come up to the specific gravity required, or nearly so, the contractor was given the option of removing that stone, all that was faulty, or of placing it all in the jetty and receiving pay for what we deemed to be the portion of good stone in it; as for instance, if we deem that 75 per cent of that total amount was good stone, he was given the option of weeding out the stone that was faulty or of putting the entire amount in the jetty and receiving pay for 75 per cent of the total amount of stone used.

Major Adams: Are you familiar with the kind of a mattress used by Captain Carter on the Savannah River?

A No sir, I have never seen them excepting from the specifications.

Q Are you familiar with the kind of mattress used in Cumberland Sound?

A No sir, I have never seen them, excepting the log mattress which had been used in the earliest contracts.

Q I would like to have Captain Carter state what he used at Cumberland Sound?

Captain Carter: Very well, what I used was the third design of brush mattress with the following modification: that when these mattresses were built, one mattress on top of another, the bottom grillage of the upper mattress was omitted and the top grillage of the mattress underneath used, the
484 amount of fascines being increased to make an equivalent of the poles which would have been put in that grillage. Do you want to know why I left that second grillage out in building these mattresses on top of one another?

Q Yes.

A The reason why I did that is this: when I put these mattresses one on top of the other, if I had a grillage here the top grillage of the bottom mattress, the bottom grillage of the top mattress coming on it, left in some places where there was a pressure of water against it, work more open than I desired, and in order to get closer work to facilitate silting or sanding up, I wanted to avoid this space. Therefore, I required the contractor to put in fascine work, which was closer and omit that extra grillage. That is why I did it.

Q I would like to ask the witness one or two questions. Do you understand the form of construction as stated by Captain Carter?

Captain Black: Yes sir.

A Can you give us an estimate of the cost per square yard of mattresses of the kind described by Captain Carter when placed in position as stated, eight courses at a time?

A I have the figures, but I can't give them to you without getting my figures and working them out. I have never worked them out.

485 Q How long would it take to do that?

A Fifteen minutes maybe.

Q I should like to have that at some time, if you can arrange to give it to us after the examination ends?

A I have a detailed cost of all the intricate parts of the mattress that we made and it would be a simple matter to make it up.

Colonel Gillespie: As I understand this, it combined a construction of eight courses of mattress and a single covering of stone?

A That is it.

Q And how many tons of stone per mattress was used?

A That I don't remember, but my object was to use just as little as I possibly could.

Q Don't you remember the limit?

A I do not. I limited it in this way—

Q Can you give the approximate limit?

A I don't think I can for Savannah harbor, whether I gave that limit in Cumberland Sound I am not sure.

Colonel Gillespie: Can't you give us an approximate estimate?

A The amount of stone necessary to hold eight of those mattresses, one on top of the other, each mattress being, say 100 feet wide and 50 feet long, would be from 125 to 200 cubic yards.

486 Captain Carter:

There is very little difference, Colonel, you can hold eight of those mattresses down there with just about the same amount of stone that you could hold a single mattress.

Colonel Gillespie: In your bids you asked for 200,000 cubic yards of stone for 350,000 square yards of mattress.

Captain Carter: That is an entirely different thing, Colonel.

Q Would not that give you your average for the entire width?

A Oh yes, for the finished work.

Q I am speaking of putting it in place?

A My method has always been to put the foundation in as many mattresses on top of one another as I needed in place at once. In order to facilitate this work, rush it, as little stone as was necessary to hold this in place was used, the object being to finish with the foundation work and then convert everything into stone work and then bring up the amount of stone necessary on top of that.

Q The record is actually that you used the 1,360,000 square yards of mattress and you used 127,000 cubic yards of stone.

A Well, that was in Savannah harbor.

Q And in Cumberland Sound you used about 446,000 yards of mattress and 11,000 yards of stone?

A That is the foundation. All the rest of the stone 487 has got to get on there.

Q The point was, as I understand it, that you diminished your quantity of stone on the mattresses to prevent the sinking of the mattress into the sand?

A That was simply for sinking.

Q And if that be true then, there was some time or other when that mattress has to sink.

A Not necessarily, I hoped this: I hoped that this mattress would fill with sand and then when the mattress work was filled in with sand it would be in condition to support its load of stone without compression; whereas, if the entire load of stone had been put on the mattress immediately before the interstices had been filled with sand, there would have been very great compression.

Q I will dismiss the subject with one more question, that is, this operation of sanding up did not occur as you had expected?

A Oh yes, but I had the Cumberland Sound work watched very closely.

Q Do you know what the actual result was?

A It was reported by the engineer that it sanded to the crest.

Major Raymond: I want to ask Captain Black a question or two. You said that the cost of the mattress in place varied from 60 to 65 cents?

488 A Somewhere in that vicinity, Major.

Q Was that the actual cost of construction?

A Yes sir.

Q So that if you were going to make an estimate to do a piece of work by contract, of course you would load that actual cost for the contractor's profit and risk, and his insurance, interest on the plant, and the other expenses which always have to be taken into consideration in determining a contract price from the actual cost?

A Yes sir.

Q About how much would you load that to get a reasonable price?

A I have always deemed the contract price under Ross, 75 cents a square yard, as a fair price.

Q If you were receiving bids upon a piece of work like that, would you draw the line at 75 cents, at which you would recommend the bill as a reasonable one, or might you put it a little higher?

A I might put it a little higher, because I think there was a very small margin at that price. The last contractor had it at 70 cents and he really failed.

Q When you get bids on that sort of work don't you find as a fact that they vary a great deal in price, or in every

kind of work, in fact, don't you find that the bidders will
489 vary in their bids within pretty wide limits so that the
opinion of one man with respect to the cost would be
very different from that of another man, although they are
both experienced?

A The work down there was a little peculiar because there
are a very few bidders and I don't remember that there was
much variation. It was a work that was considered dangerous
to a contractor, a risk work, and we did not have at the
mouth of the St. John's river very many bidders.

Q One man bidding on that kind of work would want to
allow more for the risk, which was an uncertain quantity?

A That seemed to be a function for the experience of the
contractor.

Q So that in bidding on that kind of work the price might
range from 75 cents to \$1.25 without creating any astonish-
ment?

A I should not have let the bid at the major price.

Q You might have let it at a dollar?

A I might have.

Q Or a \$1.10?

A That would be near the limit.

Q You speak of this price which would be practically 75
cents per square yard for your St. John's river work. About
what difference in cost would there be between that and the
first type, the log raft covered with brush?

A Twenty five to thirty cents a square yard.

(Colonel Gillespie: You were a member of the Board
490 of Engineers in December, 1895, and prepared a project
for Cumberland Sound?

A Yes sir.

Q It is stated in evidence that Captain Carter proposed to
use and made an estimate in that report for the type of mat-
tress which he has actually constructed under the contracts
we are now considering. Did you understand that such a mat-
tress would be used?

A No sir.

Q For which a bid of \$1. was estimated in the report?

A No sir.

Major Raymond: What kind of mattress did you under-
stand that the Captain was to use?

A The type that was used at St. John's River.

Q The type that was actually used at St. John's?

A Yes sir.

Q At the time of the adoption of that report, did you think the estimate was too high of \$1. a square yard?

A I thought they were high enough, but not too high.

Colonel Gillespie: I want to call your attention to a part of the testimony here in which your name is mentioned and have you confirm the same by your own testimony?

A Yes sir.

Q Captain Carter, as a witness, (Colonel Gillespie reading from page 401 of the stenographer's minutes),

491 "Q Did you report in your monthly report to the Chief of Engineers the days that you were absent without leave?

A I don't know whether I did or not; I don't believe I did.

Q If you had reported that you were absent without leave, do you suppose that you would have been called upon to explain it?

A No sir, because I always told it at Washington in coming back. I remember once Captain Black came in and said 'Look here, I am going to call you down, you and Bixby and a lot of others have been going around without leave and I am going to call you down.' "

Q Do you remember any such conversation?

A No sir, not at all.

Q (Captain Carter) Don't you remember at one time, I think it was in 1895, when I had been going off occasionally without General Craighill's knowledge, don't you remember you said you were going to stop it or call me down?

A No, I don't think I ever said that for, when I was in the Chief's office I was very careful to say that I was not going to do anything. I do remember this, however,—that when it became known in Washington that you and others were absenting yourselves from your stations without leave, I reported the matter to the Chief of Engineers and on the basis of that report a circular was issued requiring officers to state in their monthly reports all the days of their absence from their stations and the authority for the absence.

Q I can remember that too. I think I feel very sure about the conversation?

A Well, I don't think I ever used those terms.

Q Well, the exact impression might have been a mistake, but the fact that we did have such a conversation I feel very sure of.

A Well, I don't know. I would not like to say that it is so or it is not so.

Colonel Gillespie: Do you mean to—

Captain Carter: I mean this, Colonel; until Captain Black came there I had been for some time previous, I have forgotten just when, occasionally absent without permission, and I remember from a conversation with him that it was going to be stopped and was stopped. I don't remember the exact language for that I may have gotten wrong, but the fact that we talked it over, I remember.

A Well, that may very possibly, be correct.

Q Of course, if I have gotten the verbiage wrong, I am willing to rectify it, whether you said it or not, I am not sure but that is my recollection.

(Captain Carter continuing: You were speaking about your contractor Mr. R. G. Ross. Do you consider him an experienced contractor in whose opinion you would have confidence?

493 A Yes sir.

Q You stated that your mattresses were invariably sunk in single layers, with stone on top of each layer?

A Yes sir.

Q Would it have been possible in the water or practicable to have sunk those, the several mattresses on top of one another at once, could you have floated them out, with the method you had?

A No, they would not float, I don't think.

Q Suppose you had a very soft bottom, where the load on the mattress sunk your mattress down and you wanted to hold your mattress there until it would fill up with mud or sand and stay there. Would you have felt it your duty in a case of that kind, if you could have devised a method of sinking your mattress, one on top of another, by lightening the load of stone to get that result, to have done so?

A I would not say that. That is an exceedingly theoretical question, inasmuch as I have never known a brush mattress to sink at all in the sand and if a case comes up in which it had been necessary to make a modification I should certainly have asked for authority.

Q For a modification in the method of sinking a mattress?

Q A modification as radical as that.

A Modification that materially affects the cost to the contractor.

Q That is true if it does affect the cost to the contractor. Suppose it does not affect the cost to the contractor, would
494 it make any difference then? You say that made a difference in cost to the contractor, would you ask for authority on these minor modifications as to how you would sink your mattresses. You would not consider it necessary to have authority if there were no change in cost to the contractor?

A I would not consider it necessary to have authority to sink a mattress directly from ways on a barge rather than to tow it out and sink it. That has nothing to do with the construction of the mattress or with the construction of the jetty.

Q Would you consider it necessary to ask for authority to change the amount of stone that you found was necessary to hold a mattress down. Suppose you found that you used 6 inches, suppose you found that it was settling and you could get along with two inches. Would you consider it necessary to ask for authority to make this change in building up your mattress?

A That would depend entirely upon my project.

Q Suppose the methods of construction were left to you, the Engineer officer in charge. Would it be necessary to report this modification?

A You mean that I had not any form of construction of jetty approved?

Q No detailed approved form, but you should have a foundation course of mattress and loaded that with stone?
495 A I always made my project so definite that there was no doubt, and I cannot answer that question.

Q You were asked, had you been the constructing officer, would you have thought it proper to adopt a type reduced to agree with the diminished cost of construction? Would you have considered it right and proper to have adopted this modified type and authorized its construction without first having agreed upon a price reduced to correspond with the diminished cost of construction? If there had been no diminished cost of construction, would it have been necessary to agree upon a new price?

A I consider that type of mattress totally different from the mattress authorized.

Q That is not the question I asked. I asked this: whether it would be necessary to agree upon another cost, another

price when there was no change. It was asked, was it right to agree to this, to permit this, to go ahead without an agreement as to the reduced cost when there was no reduced cost? Suppose there was no reduced cost, would that agreement have been necessary?

A If the agreement as to price was if there were any change in cost, no modification of the contract might have been necessary; but as the method of construction of the jetty was radically changed, authority for such modification from the Chief of Engineers would have been necessary.

496 Q What was this modification? You said there was a modification?

A How full do you want me to make this answer?

Q You say you have not seen any of these mattresses constructed and I want to know what makes you think there was a radical change in the method of construction?

A When the Board on Cumberland Sound was in consultation, the question of the number of mattresses and the thickness of brush mattress to be used in the jetty was considered and, as I supposed, settled, that the jetty was to have no brush in the jetty proper, but only in the foundation course, and aprons. As I recollect the conversation we had then, I desired in the report to state that this foundation must consist of but one course of brush mattresses. I think that I was overruled there. But the Board itself in its ultimate jetty cross section has spoken, has provided only for a foundation strictly of brush, the jetty proper being built upon a hearting of all light stone covered with heavy stone.

(Colonel Gillespie) Was that the mattress work that was contemplated to be built at \$1 per square yard?

A Yes sir.

(Captain Carter) As a matter of fact, it was estimated 425,000 square yards of mattresses approximately in the project?

A I don't remember now.

497 Q I think the length of jetty to be covered was about 6,000 feet—Well, the exact figures are immaterial. What I want to find out is this: the length as I remember it, over which those mattresses had to extend was about 6,000 feet. Was it not absolutely necessary in order to have arrived at that yardage, that there must have been several courses of mattresses?

A That is not as I understood it. The figures were taken from your estimate.

Q Well, my estimates were made on that basis. Whether you understood it that way I don't remember.

Colonel Gillespie: Was there a cross-section of the mattress that was to be erected before the Board? Any drawing?

Captain Carter: No sir, I think not. There may have been but I don't remember any such. I don't think there was.

Colonel Gillespie: Did the Board send with its report any drawing?

Captain Black:

A I think not sir.

Captain Carter: I estimated for a number of courses of mattresses in this foundation, as the yardage will show. Whether I made that clear to the Board I cannot say. It appears now from Captain Black's testimony that I did not, but I thought I did and it would have been very simple to have seen that by taking the yards that there must have been several courses intended for this foundation course, with-498 out the stone.

Colonel Gillespie: I don't understand yet how you could have signed that report with one provision made for only one course of mattresses, when you had in mind eight courses?

A I did not make any provision for one course in the Chief of Engineer's report.

Colonel Gillespie: (Reading from the Annual Report of the Chief of Engineers for 1896 at page 1,292).

"The following type of jetty is proposed; the foundation and apron courses should be of brush mattresses 100 feet in width and loaded with riprap stone. The ultimate jetty section should be composed of a foundation of brush mattresses, with a load consisting of a hearting of small stone covered with heavier stone. In going seaward the covering stone should increase in weight from 1,000 lbs. to five tons as the low water depth increases from zero to 12 feet. Beyond that depth still heavier stone should be used. The side slopes should be as steep as such stone can stand. An ultimate crest width of ten feet at mean high water is sufficient."

Colonel Gillespie: That was my idea of the way they should be built. Is that correct?

Captain Carter: Mattresses for as many courses as I

needed for my foundation, and that was to be laid with stone.

That was what I made estimates on.

499 Q Your mattresses extend all the way up to the top of the work?

A Oh no sir, that is only the foundation, Colonel. The stone has to go on top of this.

Q How would you get your hearting in there?

A It would come in later on top of this foundation.

Q How high was that foundation to be according to the design you had in your mind?

A The foundation of brush? It was variable, depending on how high the sand would fill.

Q Give us an approximate height?

A About 8 feet, but my intention was to bring it to any height the sand would fill.

Q How high was the jetty to be?

A The jetty was in some cases 12, 18 and 20 feet. I don't remember now, but there was quite a good deal of water in some places there.

Q I did not get that idea from the report at all.

A I thought the language was clear. I think so yet. If I failed to make it clear to the Board it was my mistake.

Captain Black: When I tried to make a jetty of absolutely a single thickness of mattress in the foundation there may have been some mention made of two courses, Colonel, I don't remember with certainty, but my whole impression and the whole intention in this report and in this cross section—

and I supposed the Board was a unit on that—was to 500 make a jetty that had no more brush in it than could be avoided.

Q You did not contemplate a foundation rising to 8 feet in height?

A No sir.

Captain Carter. We disagreed absolutely I remember on the amount of brush to be used and Captain Black's idea was as little brush as he says, and my idea as much as the sand would fill.

Q Do you wish us to understand that you carried the Board as against Captain Black on that principle?

Captain Carter: I thought I did, that was what I was pleased with about the report, but of course I may have been mistaken.

Q Was Colonel Hains a member of that Board?

A Yes sir, Colonel Hains was.

By Captain Gillette: Was the idea of using 16 brush mattresses of this type, one on top of the other, ever discussed before the Board?

A Never.

Q Here are three photographs of two mattresses, one of one mattress and one of two others. Which of those would you consider to be the mattress contemplated by Captain Carter's specifications?

A (Pointing) That would seem to be the one.

Q Is that practically the mattress that you built at St John's River barring the single course of fascines?

501 A That I cannot tell. That would depend upon the construction of the fascines themselves, with which we had more trouble than with any other one thing.

Q Judging from those two photographs, assuming the same area on the bottom, would you consider that this mattress in the work was worth to the United States eight times a single course mattress?

A On the contrary, I consider it worth less.

Major Adams: You mean the eight course mattress worth less than the single course?

A Yes.

Captain Gillette: All of those eight courses you considered worth less than the single course?

A Yes.

Q That is the first mattress which I inspected at Cumberland Sound, built under Captain Carter's instructions? I was in charge but had never seen the work or issued any instructions whatever, that was built and paid for as eight mattresses, it was 7.9 feet in heights and so loose that I went in nearly to my waist in trying to walk across it.

Major Adams: Mr. President, will you permit Captain Black to give us in connection with his estimate of the mattress as constructed by Captain Carter, another estimate of the cost of the mattress "described by Captain Gillette and shown in this photograph?"

502 Captain Black: There would be one difficulty about that, Major, and that is this, that my estimates are for tightly built fascines that were jammed closely together, requiring a certain number of fascines to the square yard, and of course you can see if the fascines were not so made and jammed, it makes a vast difference in the amount of material in them.

Major Adams: We have your estimate of the cost of your

work, 65 cents per square yard. We want to get, if we can, an estimate of the cost of the mattress described and built by Captain Carter; next, the cost of the mattress described by Captain Gillette and shown in this photograph.

Captain Gillette: I can give you the proportions of materials used in that mattress in that photograph and the materials in the photograph of this one, which you say was according to the specifications, from weighing them.

Captain Carter: It seems to me, if I may be permitted to state, Colonel, that this method of weighing this material when the idea was not weight but bulk, the whole idea of the thing, and when this is a mattress which I have not seen, and the truth of falsity of which statement that it is an average mattress I am not advised—in view of other false statements of the witnesses upon whom testimony is based—it seems to me that this is hardly a fair proposition to make, to have an estimate on that mattress as described by Captain Gillette.

Colonel Gillespie: The weight of the two types is governed by the relative quantities of brush in each type.

503 Captain Black: We will suppose that the conditions were the same, the brush was cut at the same time.

Captain Carter: I mean that the conditions were not the same and the brush was cut six weeks before it was used, in one case.

Colonel Gillespie: I think those estimates can be gotten under equal conditions.

Captain Carter: Yes, I can give them.

Colonel Gillespie: Suppose you take Captain Black out and give them to him.

Captain Carter: You were speaking about the stone, that you would not allow it to go in, of less specific gravity than mentioned without the knowledge of the Chief of Engineers. You were paying for your stone by the ton, were you not?

A Yes sir, by the ton 2,000 lbs.

Q Suppose you were paying for stone by the cubic yard and it was your intention to get that Florida stone and the stone came up to what you wanted to use in that work. Would you have deemed it necessary to have determined the specific gravity of each load?

A No.

Q You stated that when stone did not come up to the specifications, the contractor was allowed either the option of putting it in without pay, or weeding it out?

A Yes sir.

Q If you were buying stone by the cubic yard that would be done in the same manner? You would pick out the
504 stone and if it did not come up to the specifications, reject it or give him his option?

Captain Black:

A We judged of the stone largely by its appearance and by handling it and without weighing definitely each piece.

Captain Gillette: Which would you consider most disadvantageous to the United States to accept stone too light bought by the cubic yard, or stone that was too light bought by the ton?

A If the stone is heavy enough to stay in place, the greater the bulk obtained for the same money, the more advantageous, other qualities of durability being equal.

Captain Carter: Suppose you were paying for it simply by bulk, then does it make any difference? I mean when stone is good enough to go into the work and you are paying for it by bulk?

A There are good and bad qualities of stone, and the contractors bid higher or lower by the carefulness with which the specifications are going to be carried out, and I think in all cases of that kind the contractor who does not get it is bound to have you enforce your specifications fairly; that you are bound in fairness to enforce your specifications.

Colonel Gillespie: Is specific gravity an important item?

A Yes sir, but when I said I would not weigh in every case, I think I put in a good deal of stone that was somewhat lighter than we specified.

Captain Gillette: Do you consider it fair, wanting
505 Florida stone, to put in specifications which would take only a very small percentage of Florida stone, practically to require a contractor to put in granite or other heavy stone in case you chose to enforce the specifications? Would that be fair to the bidders?

A To be perfectly frank I think it is exactly what I did. When I first weighed the Florida stone I found that I could get it at 145 lbs. to the cubic foot, and I don't believe that I was ever able to get it or that it was to be had after the first contract, and I think after that, that while I rejected the very poor stone, the bulk of the stone ran under 145 lbs. and I think in later years, if I mistake not, they have modified the specifications, as calling for a stone that could not be had.

Captain Gillette: When did you modify those specifica-

tions? About when were they modified, to bring them down to stone that could be had? About what year?

A I don't know, I have not followed that up.

Q How long have you been away from there?

A Since 1891. We began using the Florida stone in 1886.

Captain Carter: You said awhile ago that as near as you could judge you picked out what you wanted and let it go in there and the question came up in my mind when you are paying for that stone by the ton, suppose you are paying for that simply by the cubic yard; is it as necessary to determine the specific gravity of that? When the stone is of the kind specified, is it necessary then to determine the specific gravity?

506 A Just simply to determine that it comes up to the specifications; that is all.

Q I had a sample measured and I assumed that to be Florida stone. Since I have been away the determinations show that Florida stone doesn't reach that specific gravity, but as I was paying for it by bulk, by the yard, as everybody bid by the yard, if the stone came up to what you wanted, would it have been necessary to determine its specific gravity?

A I would say no, modifying my statement by judging from its appearance and handling it.

Colonel Gillespie: When Captain Carter says the stone you wanted, he means the best you could get there?

A Yes, and the best the contractor could get. It was the best to be had, Colonel, of its variety.

Captain Carter: I found it to be the best in the work.

Colonel Gillespie: When you call in your specifications for $2\frac{1}{2}$ specific gravity and accept a stone below 2, you accepted that because it was the best you could get?

Captain Carter: There is a great deal of difference in the stone that was there, but just what its specific gravity is I don't know.

Q In the execution of your contract you tried to live up to your specifications 2.5, but in order not to delay the work you agreed to accept something less than that because
507 it was the best you could get? Is that it?

A Yes sir.

By Captain Gillette: You did reject large quantities of Florida rock?

A Yes sir.

Q Captain Carter did not.

COLONEL PETER C. HAINS was re-called to the stand and examined as follows:

By Colonel Gillespie:

Q The Colonel desires to be recalled in order to answer the question which Captain Carter put to him when he was on the stand before relative to the specifications as prepared by Captain Carter, passing through his hands on their way to the Chief of Engineers. Colonel, you are now to be heard on that question.

A I understand that Captain Carter asked me if I approved the specifications. I don't remember what my answer was, but it was to the effect that they passed through my hands. They were not approved by me and I would like to read the indorsements I put on the specifications that were sent through my office. The specifications, I think, were dated June 4, and on June 6 I put on this indorsement. This is for Savannah River:

508

"1st Indorsement,
U. S. Engineer Office,
9 Pleasant Street,
Baltimore, Md.
June 6, 1896.

Respectfully submitted to the Chief of Engineers. I have no official information that an appropriation for this work has been made, nor have I any that the specifications have been drawn in accordance with an approved project.

Attention is invited to the following:

Par. 34 seems to be a change in the form prescribed by the Department. Orders require when any change is made the reason for it must be given.

Par. 39, last part—2nd and 3d line from bottom—is not understood.

Par. 40. There is nothing to guide the bidder as to length of haul. The place of deposit is to be somewhere at a locality to be approved by the Engineer, but if it is one mile, one price would be bid, and if it was ten miles the price would be greater.

Par. 44. Prices for stone are by the ton in some cases and in others by the cubic yard. I would prefer all to be by the ton, but Captain Carter may have some reason for the difference which I do not know.

Par. 49. Last part not understood.

509 A circular is referred to in the form of proposal, but it is not clear what the circular is.

These papers are submitted to the Chief of Engineers at the request of Capt. Carter, who it is understood will see him personally on June 8 in regard to them.

Peter C. Hains, Col., Corps of Engineers, U. S. A., Div. Engineer, S. E. Division."

Colonel Hains: That was my indorsement on the specifications that he sent in for Savannah River so that you see that I did not approve them.

Colonel Gillespie: The Chief of Engineers was General Craighill?

A I think so.

Q Did the Chief approve them?

A I don't know. There were some things that passed through my office after that, I expected he must have approved them, but the records don't give, apparently, every thing that took place.

Now in regard to the specifications for Cumberland Sound, I put on this indorsement:

"1st Indorsement,
U. S. Engineer Office,
9 Pleasant Street,

Baltimore, Md., June 6, 1896.

510 Respectfully submitted to the Chief of Engineers. I have no official information that the work contemplated is provided for by law, or that a project for the expenditure has been approved. The specifications, however, are defective in the following particulars.

1. On the fourth page there is printed matter evidently intended to be stricken out, but has been overlooked.

2. On the next page (5)—description of third design—at line 14, something has been omitted and must be inserted to make sense. The whole paragraph seems to be duplicated in part, and confused.

3. Par. 44 (Prices), page 8, does not accord with form of proposal on page 12. In one case the price is stated to be 'a price per cubic yard for third-class stone' and in the other, 'For third-class stone Dollars and cents (\$.....), per ton of 2,000 lbs.' In my judgment both third and fourth-class stone should be bid for by the ton and not by the cubic yard, as well as the first and second classes.

4. Par. 44, has an evident error on the third line tons meaning pounds.

I submit these papers to the Chief of Engineers at the request of Captain Carter, who has informed me that he expects to be in Washington on Monday, June 8, and wishes to see the Chief of Engineers in regard to them.

PETER C. HAINS,
Col. Corps of Engineers, U. S. A.,
Div. Eng. S. E. Div."

Colonel Hains: That was the indorsement I put on the specifications. Subsequently I don't know what took place. There were some more indorsements and they came through me again. This is my endorsement, the fourth:

"4th Indorsement,
U. S. Engineer Office,
9 Pleasant Street,
Baltimore, Md.
June 15, 1896.

Respectfully submitted to the Chief of Engineers. These papers now seem to be all right, but as stated in the first indorsement, I have no official knowledge of the appropriation having been made and no project for the expenditure has yet passed through this office or been approved.

PETER C. HAINS,
Colonel, Corps of Engineers, U. S. A.
Div. Eng., S. E. Div."

Colonel Hains: Now, a project was afterwards approved, that was dated June 15, 1896.

Colonel Gillespie: What was dated June 15, 1896?

512 A This last indorsement. On July 7 this passed through my office, a letter to Captain Carter reading as follows:

"Subject: Savannah Harbor.

Office of the Chief of Engineers,
United States Army,
Washington, D. C., July 7, 1896.

Capt. O. M. Carter,
Corps of Engineers,
Savannah, Ga.

Captain:

Your letter of the 4th ultimo, to the Chief Clerk of the War Department requesting authority to publish advertisement and print specifications for improving Savannah Harbor, Ga., has been received and I have to advise you that

consideration of these papers is withheld in this office pending the approval of a project for the work.

No action is being taken at present on projects for continuing contracts authorized by the act of June 3, 1896.

By command of Brig. Gen. Craighill:

Very respectfully, your obedient servant,

A. MACKENZIE,

Lieut. Col., Corps of Engineers.

Through Col. Peter C. Hains,

Corps of Engineers,

Division Engineer, Southeast Division.

15,553.

513 Colonel Hains. And that was transmitted to Captain Carter. (Reading).

"1st Indorsement.

U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md.

July 8, 1896.

Respectfully transmitted to Captain O. M. Carter, Corps of Engineers, U. S. A.

PETER C. HAINS,

*Colonel, Corps of Engineers, U. S. A.
Division Engineer, Southeast Division."*

Colonel Hains: Now on June 22nd that is the next in order, Captain Carter submits through me this project for expenditure in Savannah River:

"Subject: Project for Expenditure—Savannah Harbor, Ga.
United States Engineer Office.

River and harbor improvements and fortifications in Georgia and Northeastern Florida.

Capt. O. M. Carter,

Corps of Engineers, U. S. A.,

in charge.

Savannah Ga June 22, 1896

Brig. Gen. Wm. P. Craighill,

Chief of Engineers, U. S. Army,

Washington, D. C.

(Through Colonel Peter C. Hains,

Corps of Engineers, U. S. Army,

514 Division Engineer, Southeast Division,

Baltimore, Maryland.

General:

In compliance with your letter of instructions of the 19th inst., I have the honor to submit the following project for the

expenditure of \$5,000 appropriated by Act of Congress of June 3, 1896, for "Harbor of Savannah, Georgia: Continuing improvement."

The Act referred to provides further: "That contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete the project of further improvement recommended by Captain O. M. Carter in his reports of December seventh, eighteen hundred and ninety-four, and July first, eighteen hundred and ninety-five, and to complete the project for the steamboat channel between Beaufort, South Carolina, and Savannah, Georgia, recommended by Captain O. M. Carter in his report of December fourth, eighteen hundred and ninety-five, and mentioned in that report as route two; to be paid for as appropriations may from time to time be made by law, not to exceed the amount of one million dollars, exclusive of amount herein or heretofore appropriated."

The projects referred to in this Act contemplate (1) the extension of the Cockspur or Oyster Bed training wall, (2) the construction of a detached portion of the latter for the purpose of sheltering the anchorage in Tybee Roads and protecting the channel, (3) the maintenance of the existing channel depths in the harbor and (4) the opening of a steamboat channel seven feet deep at mean low water between Savannah, Georgia, and Beaufort, South Carolina, which latter is to be accomplished by connecting dam number 31 with Turtle Island and by dredging Ramshorn Creek and at the mouth of Wrights River.

The cost of the above work was estimated at \$1,148,950, provided all operations were completed by July 1, 1897, and at a sum greater by \$50,000 for each year thereafter required for the completion of the work. The Act of June 3, 1896, which provided that the Secretary of War shall not obligate the Government to pay more than \$400,000 in any one fiscal year, increases the necessary cost of the improvement to \$1,248,950, which is \$243,950 more than the total sum for which the Secretary of War is authorized to enter into contract.

The locality is well worthy of the improvement contemplated by the authorized projects, but the limit of cost should be extended to that required for completion.

No work has ever been done by the United States on the inside route between Savannah, Georgia, and Beaufort, South Carolina.

The condition of the improvement in Savannah Harbor is given in detail in my last Annual Report.

516 Work under the existing contract in Savannah Harbor will be completed about July 15, 1896, and the balance available, which will be about \$15,000, together with the \$5,000 made available by the Act of June 3, 1896, will be required for engineering and contingencies.

The United States owns no suitable plant for executing the work and any work done should be done by contract, as provided in the Act of June 3, 1896, that method being more economical and advantageous to the Government.

All work should be done according to the projects approved by that Act, which are given in my reports of December 7, 1894, February 4, 1895 and July 1, 1895 to which I respectfully refer for details.

Very respectfully, your obedient servant,

O. M. CARTER,

Capt., Corps of Engrs., U. S. A."

Colonel Hains: Copy for me, Colonel Hains. That is June 22, 1896. Now June 26 on that project I put this indorsement:

"1st Indorsement,

U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md

June 26, 1896.

Respectfully submitted to the Chief of Engineers, U. S.

A.

517 In view of the fact that the work is estimated to cost '\$243,950 more than the total sum for which the Secretary of War is authorized to enter into contract' it is obvious that a contract for completion cannot be legally made at this time, and one for a part of the work is not authorized.

PETER C. HAINS,

Col., Corps of Engineers, U. S. A.

Div. Engineer, S. E. Division."

Colonel Hains: On August 11 the Chief of Engineers sent through my office this letter:

"Subject: Savannah Harbor, Georgia.

Office of the Chief of Engineers United States Army.

Washington, D. C. August 11, 1896.

Capt. O. M. Carter,

Corps of Engineers,

Savannah, Georgia.

Captain:

Your letter of June 22, last, submitting project for expenditure of appropriation made by the River and Harbor Act of

June 3, 1896, for harbor at Savannah, Georgia, was duly received and submitted to the Secretary of War with endorsement of which the following is a copy:

518

‘2nd Indorsement.

Office of the Chief of Engineers,
U. S. Army,

August 3, 1896.

Respectfully submitted to the Secretary of War.

The River and Harbor Act of June 3, 1896, in the item appropriating \$5,000 for continuing improvement of harbor at Savannah, Ga. provides:

“That contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete the project of further improvement recommended by Captain O. M. Carter, in his reports of December seven, eighteen hundred and ninety four and July first, eighteen hundred and ninety-five, and to complete the project for the steamboat channel between Beaufort, South Carolina, and Savannah, Georgia, recommended by Captain O. M. Carter in his report of December fourth, eighteen hundred and ninety-five, and mentioned in that report as route two; to be paid for as appropriations may from time to time be made by law, not to exceed the amount of one million dollars, exclusive of amounts herein or heretofore appropriated”

This provision of the Acts is based upon reports submitted by Captain O. M. Carter, Corps of Engineers, and printed in the Annual Report of the Chief of Engineers for 1895, pp. 1449-1462 and 1521-1525.

The project formerly adopted by Congress for the improvement of Savannah harbor, has been successfully completed under the continuous contract system, and the conditions are now favorable for letting the contracts for the work authorized by the Act of June 3, 1896, on terms advantageous to the Government.

It appears that the interest of Commerce and of economical work, and the necessity of protecting existing depths in the harbor, alike require that arrangements should be made as early as practicable for carrying on the work authorized. I. therefore, recommend that contracts be entered into for the completion of the work, in accordance with the provision of the Act quoted above, and the regulations of the Department.

Under the terms of Section 5 of the Act, the Secretary of War cannot obligate the Government to pay more than \$400,-

000 on this work in any one fiscal year, beginning July 1, 1897.

A. MACKENZIE,

Acting Chief of Engineers.

519 The project was returned to this office by War Department endorsement of August 6, "Approved as recommended by the Acting Chief of Engineers in the preceding endorsement hereon".

Very respectfully, your obedient servant,

A. MACKENZIE,

Acting Chief of Engineers.

Through Col Peter C. Hains, Corps of Engineers.

Division Engineer, Southeast Division."

7913

6

Colonel Hains: That is August 11. You see there is a hiatus here. Some of these papers did not go through me and some of them did, but the point to which I wish to call the Board's attention was that on October 22, 1896, I put on this indorsement, that is, the indorsement on his letter of October 20, 1896. Captain Carter's letter of October 20, 1896 shows that it will cost \$1,248,950 (reading from Captain Carter's letter of October 20, 1896):

"The estimated cost being greater than the sum authorized in the Act providing for the improvement, it will be necessary to leave some of the work in an unfinished condition. I respectfully suggest that the steamboat channel between Savannah and Beaufort be completed and that the 520 works in Savannah Harbor be carried as far as the funds remaining available will permit.

Instructions are requested.

Very respectfully, your obedient servant,

O. M. CARTER,

Capt. Corps of Engrs. U. S. A."

(Now on the 22nd of October, 1896, that passed through my office and I put on this indorsement:

"1st Indorsement.

U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md.

October 22, 1896.

Respectfully submitted to the Chief of Engineers.

The suggestion of Captain Carter would be a sensible way

of going at this work, if it could be done legally. My opinion is, that such a course would not be legal. The River and Harbor Act provides that contracts may be entered into for completion only of the projects, and it would be illegal to make contracts that did not provide for completion within the sum specified by Congress.

Whether contracts may not be made within the estimates and within the sum fixed by Congress, could only be satisfactorily determined by advertising for proposals for the entire work.

PETER C. HAINS,
Colonel, Corps of Engineers, U. S. A.
Div. Eng S. E. Div."

Colonel Hains: The Chief of Engineers indorsed that as follows:

"2nd Indorsement.

Office Chief of Engineers, U. S. Army, Oct. 24, 1896.

Respectfully returned to Captain Carter. It is noted that the estimated cost of work, exclusive of maintenance and superintendence and contingencies, is as follows: 10,500 feet training wall, \$945,000. Route 2 \$97,000, total \$1,042,000.

It is understood that this work, and in addition, 1,125,000 cubic yards of dredging for maintenance are included in the following contracts:

Atlantic Contracting Co.....	\$835,000
Rittenhouse Moore	162,500
	<hr/>
	\$997,500

It would therefore appear that the prices at which contracts have been made are sufficiently below the prices at which estimates were made to permit of the carrying out of all the work contemplated in the projects adopted by Congress. Under any conditions the law under which contracts have been let would seem to require the completion of the work in Savananh Harbor and on route two, Savannah to Beaufort, and while it may be hereafter considered proper to estimate for maintenance of completed work, it will not be permissible to call for more money for completing each
522 of the works. Any further information Captain Carter desires to present in this connection will have careful

consideration. This paper to be returned through the Division Engineer.

By command of Brig. Gen. Craighill:

A. MACKENZIE,
Lieut. Col., Corps of Engineers.

7913

7

Through Colonel Hains &c.

Colonel Hains: The third indorsement was as follows:

"3d Indorsement.

U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md.

Octo. 27, 1896.

Respectfully transmitted to Captain O. M. Carter, Corps of Engineers, U. S. A.

PETER C. HAINS,
*Col., Corps of Engineers, U. S. A.,
Div. Eng. S. E. Div.*

Colonel Hains: The fourth indorsement is:

"4th Indorsement.

U. S. Engineer Office, Savannah, Ga., Nov. 5, 1896.

Respectfully returned to the Chief of Engineers, U. S. A. (through Colonel Peter C. Hains, Corps of Engineers, Div. Eng. S. E. Div.)

The estimated cost of the work in Saxannah Harbor 523 and route two being \$243,950 greater than the sum authorized by Act of June 3, 1896, proposals for only 9,000 linear feet of training wall were called for since completion was required and the sum authorized would complete only that length.

Should the cost of maintenance be less than estimated, or the work be completed sooner than required, it may be possible to build a greater length of wall than 9,000 feet.

O. M. CARTER,
Captain, Corps of Engineers, U. S. A."

Colonel Hains: The fifth indorsement is as follows:

"5th Indorsement.

U. S. Engineer Office, 9 Pleasant Street, Baltimore, Md.

Nov. 9, 1896.

Respectfully submitted to the Chief of Engineers, U. S. A.

PETER C. HAINS,
*Colonel, Corps of Engineers, U. S. A.
Div. Eng. S. E. Div."*

Colonel Hains: These are the communications that passed in reference to this matter at Cumberland Sound and Savannah River so that it will be seen that I did not approve of the project so far as that was concerned, and my answer must be qualified.

524 Captain Carter: I had forgotten, Colonel, that you had.

Colonel Hains: The point I made was that the contract for a part of that jetty was illegal and could not be made, and the specifications had been sent in before there had been any approved project and I did not make any approval of them.

Colonel Gillespie: Colonel, in the testimony given by Captain Black, a few moments ago, in the report of the Board of December, 1895, of the Board of Engineers who considered Cumberland Sound, Captain Black says that his own idea was at the time that that report was written, that the project recommended by the Board was a single course of mattresses at the bottom with a superstructure of stone. Captain Carter on the contrary says that it was series of mattresses build according to the design that was adopted at Cumberland Sound, rising even to eight feet in height.

Captain Carter: Colonel, I think I said this: I said that it was my intention in making the estimates, and I thought the Board understood—

Colonel Gillespie: I asked the question if before the Board you had carried that principle as against Captain Black and you said that you had.

A Yes sir.

Q The Board would like to know whether at the time the Board of Officers in 1895 adopted this project, did they contemplate the use of a series of mattresses built according to the plans which Captain Carter says he built eight
525 courses high and rising to eight feet, or was it a single course covered with a superstructure of stone?

Colonel Hains: Well, I could not say. I don't remember the discussion that took place. I think there was some discussion about it but I don't know what the members of the Board had in view. My idea was that it was principally to be the mattress that was referred to in the first design, a single mattress, and I supposed it would be a log mattress, logs with brush. It is called in here a brush mattress. I suppose that it would be for a part of them, but I don't remember to have had any definite understanding about that.

It was a detail that I thought the engineer himself would carry out, as would appear advisable when he came to the construction.

Colonel Gillespie: It was very clear in your mind at the time the report was written and signed, what the phraseology in that last paragraph meant?

A My idea was that it was a single mattress.

Colonel Gillespie: It says (reading from the Annual Report of the Chief of Engineers, 1896, Part 2, page 1292):

"The following type of jetty is proposed: the foundation and apron courses should be of brush mattresses 100 feet in width and loaded with riprap stone. The ultimate jetty section should be composed of a hearting of small stone covered with heavier stone. In going seaward the covering stone should increase in weight from 1,000 pounds to 5 tons, 526 as the low water depth increases from zero to 12 feet.

Beyond that depth still heavier stone should be used. The side slopes should be as steep as such stone can stand. An ultimate crest width of 10 feet at mean high water is sufficient.

Estimates.

425,000 square yards brush mattresses, at one dollar per square yard.....	\$425,000
300,000 cubic yards of second class stone, at \$3.25 per cubic yard	975,000
125,000 cubic yards first class stone, at \$6. per cubic yard	750,000
Engineering and contingencies.....	200,000

Total,.....\$2,350,000

The above estimate provides for building the jetties higher and for extending them farther seaward than was contemplated in the projects of 1879 and 1891.

From a study of the changes which have taken place at Cumberland Sound since the original project of improvement was adopted, it will be seen that the failure to provide funds adequate for the proper prosecution of the work has greatly increased its cost. Should funds be provided in the future as they have been in the past, in inadequate amounts or at irregular intervals, not only will the development of Commerce be retarded but the cost of completing the improvement will be further increased. Should, however, sufficient funds be made available to carry forward the work continuously and with proper vigor, the improvement can

be completed successfully in three years and within the estimated cost.

Respectfully submitted,"

(Captain Carter). If you will pardon me, Colonel, as I remember, the principal discussion came up between Captain Black and myself because Captain Black is an enthusiastic advocate of as little brush as possible, while I wanted as much as the sand would fill; and the yardage of course shows conclusively that for the length I must have contemplated a number of courses, otherwise I never could have got that yardage and I thought I made it clear to the Board; and felt gratified that those details were left to me to carry out. If I failed to make that clear it was my fault. I thought I made it clear and thought I had carried the point.

Major Raymond: Would not the number of square yards estimated for in the report of the Board as compared with the lengths of the jetties indicate whether one or more layers of mattress were to be used?

A I don't know.

Captain Gillette: Do you remember, Colonel, who worded that portion of the report?

A I do not.

Captain Carter: I think the whole language is mine.
528 Colonel Hains: I think the whole report, possibly with some changes in the phraseology, was drawn by Captain Carter. The Board left the matter entirely with him to draw. He was requested to draw up a report for consideration.

Captain Carter: I think if you will compare that report of December with my report to the Chief of Engineers of June, you will find them practically identical.

Captain Gillette: Then, if indefiniteness of the wording of this report mislead the Board as to what it was reading, the responsibility would rest with Captain Carter?

Captain Carter: That is a matter that would have to be determined by somebody else.

Q The report is indefinite.

Major Raymond: If the Board wanted a definite report they could ask for it.

Colonel Gillespie: Any other question that you know of? (Continuing)—I think it proper as your name has been mentioned in the proceedings that occurred at Savannah, that the testimony should be read. It is the testimony of Captain Carter. Captain Gillette was the speaker. He says (reading from page 230 of the stenographer's minutes):

"Capt. Gillette: Have you ever visited the work at Cumberland Sound, with the Division Engineer, Col. Hains?

Capt. C. I think I have.

Capt. Gillette: Did he ever see the mattresses as constructed by the Atlantic Contracting Company?

529 Capt. C: I presume he must have seen them.

Capt. Gillette: Do you remember whether he saw one being built on the barge, at the reservation, when Gen. Craig-hill was here?

Capt. C: I presume he must have seen them, if he was here when the work was being erected.

Capt. Gillette: Do you remember explaining to him whether the mattress he saw on the barge was one mattress or eight, and that you paid for those in layers instead of as one mattress?

Capt. C: I dont remember at this date. The mattresses are about eighteen or nineteen inches thick each, whereas this was enormous; he must have known that this was a combination of mattresses.

Col. Gillespie: When was this?

Capt. Gillette: That was under the present contract.

Capt. C: Some time last winter or in the early Spring.

Col. Gillespie: Less than a year ago?

Capt. C: Yes sir.

Capt. Gillette: The work on the contract began in December 1896? The first brush used on the contract was gotten from the reservation?

Capt. C: I can very readily by referring to my notes. I kept a memorandum of the work. I dont remember now.

I remember of his being down here. All this was as
530 clear to me of course, as the sun shining on a bright day, it was in all my reports, but whether I especially explained the matter to him, or whether he asked me, I dont remember.

Colonel Hains: Are those Captain Carter's replies?

Colonel Gillespie: Yes, those are Captain Carter's replies. Have you any comments to make on that testimony?

A It is true that I inspected that work about February, 1897, I think it was, and I saw a mattress being built.

Colonel Gillespie: I might go on a little further and give the testimony: question by Captain Gillette again, (reading from page 231 of the stenographer's minutes).

"Capt. Gillette: Did he know you were paying \$1.10 a square yard for each layer?

Capt. C: I suppose he did; that was the contract price.

I presume that he must have known that we were paying it. The new estimate price is a dollar."

Captain Carter: That ought to have been the original estimate price, I think.

Colonel Gillespie: (Continuing)

"Did you have any conversation with the Division Engineer as to the type you were building, and as to your departure from the specifications in building it? Capt. C. I don't remember whether I did or not. When he came down we went on the work, and I showed him the work and how it was being done. I explained this fully to him, whether
531 I explained it to him clearly or not I don't know."

Colonel Hains: As I said I inspected the work and I saw a mat being made on a barge. I don't know how thick it was or how thick it was to be when it was finished, but on another occasion when I inspected work in the Savannah River, seeing a very thick mattress on a barge, I asked Captain Carter how much this mattress cost and I got the idea from his answer that it was ninety some cents per cubic yard.

Captain Carter: No, Colonel, I could not have said that.

A. I would not say that you said that. You may have said ninety odd cents a square yard, but it did not convey that idea to my mind because the mattress was a big mattress and I did not see how you could measure it by the square yard and I supposed of course it was by the cubic yard.

Q As I say, I don't remember whether I explained this to Colonel Hains or not, but I took it for granted because the contract price was by the square yard and I took it for granted that Colonel Hains understood that.

A You may have said that. I would not say that you did not.

Captain Gillette: What contract was this?

A The Savannah River.

Q The big contract of 1892?

A I think it was, yes.

Q It is of record that that contract was for brush
532 mattress by the square yard and brush fascines by the cubic yard?

A That is right.

Colonel Hains: This was a heavy mattress made up of fascines and brush, apparently, and I did not go on to the mattress; we passed close by it and I noticed that it was very thick and my impression was that it would not answer the purpose, but he stated that it would answer the purpose better than a thinner mattress.

CAPTAIN DAVID DuB GAILLARD was called to the stand and examined as follows:

Colonel Gillespie: You have served on the South Atlantic coast on harbor and river improvements, have you not?

A Yes sir.

Q Between what dates?

A Between April or May 1887 and November 1891.

Q What work did you have in charge?

A I was in direct charge of St Augustine Harbor and an assistant under Captain Black on the St John's jetty. I had some other dredging work and snag work.

Q Was the work at St Augustine similar to that at St John's River?

A No sir. St John's was all contract and St Augustine all hired labor.

533 Q I mean similar in character?

A Yes.

Q What was the length of your experience upon the St John's river improvements?

A I was there practically—I had experience almost continuously—from 1887 to 1891.

Q Then you knew absolutely the character of the work and its cost as determined by the contracts?

A Yes sir, I did at the time.

Q Have you read the specifications issued by Captain Carter for the improvement of Savannah River for the improvements of Savannah Harbor and Cumberland Sound under advertisement dated June 6, 1896?

A I have read almost all of them. I have read Cumberland Sound entirely and most of the others.

Q They call for three different types of mattresses. Are you sufficiently familiar with the cost of such work, considering your experience at St. John's River and St Augustine, to know whether the cost of these several types was the same or whether they should differ in any way?

A I can only answer from experience in St John's and there they did differ.

Q Which type would cost the most?

A The second type of mattress would cost the most and the third would be practically the same.

534 Major Raymond: The log mat you said?

A The log mat was there the cheapest at contract price.

Colonel Gillespie: Were the specifications for Cumberland Sound which you said you have read, perfectly clear to you as to what Captain Carter desired to get a bid on from contractors? Could you determine which one of the three types he wanted?

A Well, I understood anyone of the three types might be called for. That was the idea, that the contractor might be called on for anyone of the three.

Q If you had been the constructing officer, would you have thought it right and proper to have asked for only one bid for three types?

A I would have asked for separate prices on log mattress independent of the fascine mattress.

Q Do you know the type actually adopted and constructed by Captain Carter?

A No sir.

Q You have had an independent command, have you not?

A Yes sir.

Q Do you feel authorized as a constructing officer to depart in any material way from a project approved by the Chief of Engineers without first informing the Chief of Engineers of that fact?

A Not in a material way.

535 Q The specifications of Savannah Harbor of September 6, 1896, (June 6, 1892), which we are considering, say that the quantity of mattress work required for canvassing bids would be 350,000 square yards. Do you think it right and proper as a constructing officer for Captain Carter to increase this quantity to 1,360,000 square yards, the quantities of other required materials being correspondingly reduced, without the authority of the Chief of Engineers?

A I think that would be a greater increase than I would make without calling attention to it in some way.

Q You understand the question? The specifications call for 350,000 square yards and in construction it was increased to 1,360,000 square yards. Would you have made that increase without the authority of the Chief of Engineers?

A Not so material an increase.

Colonel Gillespie: Anyone else?

Captain Gillette: What was the cost per square yard of the mattress you constructed at St John's River?

A I constructed mine at St Augustine by hired labor.

Q What was the cost per square yard?

A Sixty one and one-third cents in place, exclusive of the stone ballast.

Q How were the fascines made?

A They were 9 inch fascines choked every two feet and bound with number 14 wire. I think it was the ordinary fascine wire.

536 Q Brush trimmed?

A No, no trimmed brush.

Q How were they choked?

A They were choked with the ordinary choker, almost exactly like the military fascine choker. Our handles, if I remember correctly, were possibly four feet long. That is purely from memory of several years.

Major Raymond: Suppose you were going to get that same kind of mattress in a contract, what would you consider a reasonable price, such a price as you could recommend to the Chief of Engineers, for acceptance, per square yard for such a mattress from a contractor?

Q We did get such a mattress and we got it one year for 70 and another year for 74 or 75 cents. I consider both of those reasonable. I think the 75 cents was quite reasonable. It was at the same time I was making this, and it seemed to me that that allowed a fair profit.

Captain Carter: Captain Black stated that the price was 75 cents at the St John's and that there was another contract at 70 cents where the contractor lost money. Dont you think in an exposed place like that that a fair, a wider variation, considering the risk to a contractor, would be permissible than five cents a yard?

A I think a matter of five cents in that case is simply a matter of individual judgment. What I might consider
537 a reasonable profit, another man might not consider it so. This is my individual judgment that 75 cents was reasonable.

Colonel Gillespie: Would you have accepted \$1.10 per square yard for it?

A Not after having made the one at St Augustine.

Captain Carter: Would not that depend very largely upon where the mattresses were to be placed, the exposure of the work, the depth of the water, the haul of the material and everything else?

A O, then it would. But I am speaking of St John's bar and St Augustine harbor, Florida.

Colonel Gillespie: Are you familiar with Cumberland Sound?

A I have only been there once.

Q Is it generally considered that that is more exposed than St John's River?

A I cannot say positively what the general opinion as to the two is.

Major Adams: You think the other conditions are as favorable at Cumberland Sound for the making and placing of mattresses as at St John's River and St Augustine?

A I could not say. I have never been out of the city of Fernandina for any length of time.

Captain Carter: The conditions are not as favorable on an ocean bar as they are inside for sinking, to a contractor?

A No.

538 Q Now, with this cheapest mat that you speak of, it is a matter of record that they were lot only a few years ago at Wappoo Cut for \$1.10 per square yard, so that, being a more favorable place than an ocean bar, is it not conceivable that there may be conditions where ocean bar work may be let at similar prices and still not be extravagant?

A Well, it might be conceivable that there was such a place, but I have no knowledge of such a place.

Q You were asked if you thought that as a constructing officer you would be authorized to depart from a project in a material way. Suppose the general details under that project were left to you as a constructing officer and there came up minor questions, questions which you considered minor questions of construction, would you not feel authorized to make such changes as that, yourself?

A If the general details were left to me and minor modifications arose in the execution of the work and became necessary—

Q Would you not feel justified in making those changes then?

A If I regarded them as minor.

Captain Carter: The case under investigation is this: The details of the project were left to the Engineer officer in local charge.

Major Adams: Is that strictly true?

Captain Carter: I think it is strictly true.

Colonel Gillespie: I doubt very much if that be true.

539 Captain Carter: I think it is so stated in the project. If it is not I can correct that later. These are the words

Colonel, in the project, the approved project of June 30, 1890, under which this contract of 1892 was let (reading from page 1, 261, Annual Report of the Chief of Engineers 1890, Part 2):

"In pursuance of the same object it may be become necessary to close the Northern opening either by continuing the present jetty, number 31, to the shore, or by building a training wall from Long Island Flats to Oyster bed; further to construct a training wall running easterly from the lower end of Cockspur Island and finally to extend and raise the Oyster bed training wall."

Then comes in this:

"For the successful accomplishment of this improvement"—, that is the whole project,—"great freedom of action should be allowed the local engineer, the necessity for the various works and their execution being accompanied and guided by continued careful investigations of the influence exercised by the completed portions."

Major Adams: Does that refer to the location of dikes or training walls at Savannah?

A It refers to Savannah, yes.

540 Q Does it refer to the modification of the contract or of the price paid per yard for work under the contract?

A O no, not if the cost to the contractor is changed. That is provided for in the specifications. In the specifications I have that, but the question was asked, Major, if he would depart from the project; and that is the reason why I asked this question, it was not the other question at all.

Major Adams: The project describes the construction?

Captain Carter: No sir.

Q Does the specification?

A Yes sir, it does.

Q It is the specification and the contract that form the most important part of the investigation?

A This question was asked, Major, and I simply want to find out—it says would you feel authorized to depart from a project in a material way.

Colonel Gillespie: It meant depart from the project under which the specifications were drawn, and your specifications being the guide?

A Well, this was the project under which he—

Colonel Gillespie: But the project I referred to in the

question was the project immediately preceding the application of the money that had just been appropriated.

A That, Colonel, I have not here; it is in my box at Savannah, but I have never stated anything in this project
541 as to methods at all. It was only about how much of the approved project I thought I could with the money. That was all.

Colonel Gillespie: The object of the inquiry was to ascertain from Captain Gaillard what he conceived to be his duty in relation to notifying the Chief of Engineers.

Captain Carter: And the question was asked him if he would feel that it was right and proper without special authority to increase the quantities largely. I would like to ask this: If you were carrying on a work as in Savannah Harbor and you found that it became absolutely necessary to the success of that work that one of the items called for should be increased and another item diminished, and after careful investigation you found that that made no material difference in the price to the contractor, would you not feel that the success of the work being dependent upon that change, you were authorized to make that change?

A No, I would state that to the Chief of Engineers and ask authority for any great departure.

Q But suppose you were carrying along a piece of work and change after change in quantities became necessary and you reported this in writing each month to your Division Engineer and to the Chief of Engineers. The conditions being as stated, first in my question, would you consider that as sufficient?

A I think not for so great a change. If I understand it, it refers to the change that Colonel Gillespie refers to
542 in the quantities, about three times.

Q That is looking back after the work is completed, when neither you nor anyone else could tell before beginning?

Major Adams: Would you not make this question apply to the thing we are looking into? You are making it a general question instead of a special one. You did not report these changes with a view to a modification of the contract. You simply mentioned them in the monthly report. Is that true?

A That is true.

Q Will you explain that?

Captain Carter: I will explain to Captain Gaillard what I did. In Savannah Harbor I made an estimate for a certain

number of square yards of brush and a certain number of cubic yards of stone, those quantities being based upon as careful a study of the River as I was able to make. In carrying out that project scour developed in some places unexpectedly, threatening the stability of the works. It became necessary to put some of those—necessary to stop that scour. This was done. It was successful. In other places the mattresses when loaded with stone sank down to the bottom and disappeared, and then it became necessary to build those mattresses one on top of another in such a way as to economize on the stone and make the load enough to hold those mattresses in place until they could silt up.

Major Adams: Will you state the amount of the increase in mattresses?

A Yes, when I get through.

Captain Carter: These changes being brought about by daily experience on the work and being considered by you absolutely necessary for the successful accomplishment of the project, then coming near the mouth of the River, finding that those mattresses would silt up and not be eaten by the torredo and that it would be possible in that soft bottom to use them and thus saving your stone, causing a still further increase in mattress work, such changes being brought about gradually day by day and the amounts used being reported to the Division Engineer and to the Chief of Engineers in writing, and the changes being discussed orally, frequently, with the Division Engineer, and the necessity for them and the difficulty being discussed with him and with other engineers,—could you have foreseen under such conditions as those how much it would have been necessary to increase this mattress work, and the change in the mattress work having brought no increase in profits to the contractor, so far as you were able to determine, would you under those circumstances have made any other report, or do you think it would have been practicable to have made any such reports to the Chief of Engineers and the Division Engineer, the final result having been after four years of this work an increase in the quantity of mattress work of about four times what was originally contemplated? That, however, having determined after the work was over and the necessity for these changes prohibiting your foreseeing what that increase was going to be, having made those reports and discussed the changes with the Division Engineer and feeling sure that while there was large gain to the Government, there was no

resulting gain to the contractor, do you think that you would have acted, probably, any differently from what I did, or are you able to determine it?

A Well, I think I understand this, it is a rather involved supposititious case.

Major Adams: You have not yet stated the increase which you made?

Captain Carter: Yes, I said nearly four times.

Q I would like to have a report showing the amount you canvassed for in bids.

Captain Carter: The amount I asked for was about 350,000 square yards and the amount I used was about 1,350,000 square yards. Coming up after four years of work daily, as I described, struggling to make the work a success but not being able, and no man being able to foretell what changes would be required, do you think under those conditions, is it conceivable that under those conditions, you would have acted differently on your own judgment under the conditions described? Have I made it plain to you how these things come up unforeseen day by day? To meet local conditions there, to save the work there that was going clear down, dis-
545 cussing these things with the Division Engineer every time I got a chance to see him, reporting the case to the Chief of Engineers in writing every month and being satisfied that while there was a chance to save the work it had better be taken, I made the modifications accordingly. I have put you as nearly as I can in the condition that I occupied. Of course it may be impossible for me to do so actually.

Captain Gaillard: Under those conditions, such as have been described, I could see how quantities might have overrun the original estimate very largely; but my own action would have been as soon as those changes promised to be progressive, my action would be to write to the Chief of Engineers that I found from the existing conditions that I was exceeding my original estimate of mattress work in this case, described the condition of affairs to him, urged upon him the necessity of allowing me to do what I thought was proper to preserve the work and gotten his sanction for the change in the design.

Major Adams: Would that have required a change in the contract as well?

A I think it would, except in that contract, if I remember correctly, it was provided that any change in the style of

mattress, any material change could be made by agreement beforehand with the contractor and increasing, as I understand it, or diminishing the price proportionately, if the change was made.

A The changes made as I understand it, did not come 546 under that head.

Captain Carter: It comes under that head, Major, because there was no change in cost. You see that says without a change in cost.

Q Who determined that? Did you invite bids on the thing put into the work?

A Yes. You mean in the original contract, or when this change was made?

Q I mean in the last contract for work at Savannah, Georgia. Did you invite bids on the kind of mattresses that you put into the work?

A Yes, I consider that I did. I made this minor modification of the specifications as I have explained.

Q I understood you to say you explained to the Board that you did not depart from the specifications?

A Oh no. I made this minor modification. It is practically no departure at all.

Q You realize that the charges made by Captain Gillette rest on exactly that modification?

A My understanding is absolutely different from what he states.

Q I would like to ask the witness one more question. Under the circumstances as described, would you have considered it necessary to investigate the question of cost of the kind of mattress put in?

Captain Gaillard: Under the conditions just described 547 by Captain Carter, I would think my whole decision dependent to some extent on the cost of that mattress.

Q Before making the change then, he ought to have investigated the question of cost?

A I think most decidedly the question of cost is a most important one.

Q And if it appeared that the mattress substituted would cost less, you would consider a supplemental contract necessary providing for that?

A Necessary, with the approval of the Chief of Engineers.

Captain Carter: But, suppose in the execution of your work with the man representing the company, you have difficulty in getting these modifications made, because they in-

creased his cost, the cost to him, or because they involve a little change by which he may have felt that the cost is increased to his company; suppose you became convinced from your investigations and almost daily presence on the work that it would be almost absolutely impossible not only to get no lower bids, but impossible, perhaps, in case of a new letting, to get bids as low as you had, would you not strive to have the contractors go ahead and do that work at the prices he then had?

A With the approval of the Chief of Engineers, I would if I felt that way about it. If I was convinced that that was the type of mat desired, that its cost was practically the same as that of the mat on which he had bid, I would under
548 that clause authorizing a modification, write for the authority of the Chief of Engineers to make the change and state on what I founded my beliefs as to cost &c., and get his approval.

Captain Carter: There is one other condition which has not yet come in: suppose you were making these experiments day by day and you became convinced from your efforts to do this work that it would be impracticable, impossible for you to get even the same bid from the company if you attempted to have a supplementary contract signed, would you not try to ease the matter along for the benefit of the United States and put in what you needed without putting yourself in a position to get higher bids by asking for a new contract?

A I cannot conceive of a case where the contractor would object to signing a supplementary contract, if his amounts were not decreased, and the case was practically the same.

Q The case is very simple. Here is brush being hauled say 15 miles, the more you say the longer is the haul, until it is hauled from 50 to 70 miles. If a contractor knew in the beginning that there was to be an enormous amount, he would have to provide in his profits for that haul; but, finding that day by day, having mattresses ordered, he will sometimes, rather than refuse to do work under his contract, do it at a less price having a contract, then he would make if he had to make a new contract, as he would have the advantage
over everybody bidding, all the rest of the work and
549 his plant being there. In other words, that with a new letting he would be practically the only man to bid.

A That was not my understanding. I thought this referred to a supplemental contract under that clause in the specifications which allows, if there be a material change in

the price or character of the work, for a written agreement between the contractor and the officer in charge.

Q That is true.

A That is what I had in my mind.

Q It is this way: These changes come about little by little, without anybody being able to foretell what the extent of these changes would be, and investigations as to cost determined the facts to be as I have stated to the best of my judgment, and my object was to get this thing carried through and to get my successful results without an increase in price.

Colonel Gillespie: Captain Gaillard, if you were a constructing officer, constructing a work under the authority of the Chief of Engineers, calling for a specific quantity of material, and you found that after you had begun construction that this violent and progressive decay and deterioration was going on that is described by Captain Carter, would you not think that something was wrong in your plans, and that it was time to stop and find out where you were?

Captain Carter: I beg pardon, Colonel, there was no decay or deterioration in the materials. It was subsidence 550 which was unusually great, that was the trouble.

Colonel Gillespie: I want to know if you had noticed that in your work and found that the only conditions there were such as beyond peradventure, would enormously increase the quantities you were going to use—

A In that case it would, but I was told in the actual case it increased the quantities of one material but did not increase the general cost.

Captain Carter: That is the truth.

Colonel Gillespie: It is changing the conditions under which the contractor began work.

Captain Carter: Changing the relative quantities, I should say.

Colonel Gillespie: If such a thing occurred, would it not be your duty to report it to the Chief of Engineers?

A Yes sir.

Captain Gillette: Of those two photographs which would you consider, would you consider either of them as being built under the specifications you have read under Cumberland Sound, the third design?

A I would consider that that was built (pointing) according to the third design, as they seem to be fascines. As near

as I can tell I would say that that was built, probably, in accordance with that design.

Q Is that too the mattress, (pointing) on which, the kind of mattress on which your price was given, 63 cents, as-
551 suming that this represented the price.

A I can only say that in general appearance it was almost exactly like our mat, except that we always have the 6 foot fascine on top.

Q Is your mat as regular as that?

A The ones that I built myself were, except that they had leaves on. We trimmed no leaves off. It is not exactly the same, no sir.

Q Would you think, with the exception of the leaves, that the specifications of this third design approximately described this mattress?

A Well, I should certainly think that that mattress would come under that design, looking at the photograph. If they were properly choked, I would say that that was at least as good a mat as this called for.

Q Having specified a mattress something like that, would you consider yourself justified to authorize a contractor to go to work and put in a mat of eight courses at once, without notifying the Chief of Engineers?

A I think I have answered that question once.

Q This is a different case, the first mattress put in under contract.

A Then I would certainly get the authority of the Chief of Engineers if I considered that type to be more desirable than the other; but, if that were the first mat, the beginning of a contract, and my work is not in danger, as was
552 represented in the other case and the delay would not be as critical as in the former case, I would ask permission from the Chief of Engineers to re-advertise the work.

Adjourned to 2:10 P. M.

The Board met in pursuance with adjournment.

MR. JOHN W. RUTHERFORD was called by Captain Carter and examined as follows:

Captain Carter: Will you state your profession?

A Civil engineer and contractor.

Q How many years experience have you had in engineering and contracting, about how many?

A About thirty years; actually 28 years, exactly.

Q Are you familiar with the specifications which I sent out in 1896 for work to be done by the United States at Cumberland Sound, Florida?

A Yes sir.

Q Have you examined the locality?

A I have sir.

Q For what purpose?

A For the purpose of making a bid upon the work called for by your advertisement.

Q In reading that specification, was the character of the work to be done clear to you?

553 A Very.

Q In those specifications three designs of mattress are called for?

A Yes sir.

Q Will you tell me whether or not there is any material difference in the cost of those three designs, in your judgment?

A The three designs, as I recollect, from photographs made at the time do not vary considerably in regard to cost. My understanding of the situation was that you explained them to me in your office. I asked in regard to the specifications in several particulars. You told me that the greatest amount of mattresses would come under the third specification clause, the largest amount, and that the others would be less in quantity. I wanted to know positively what was going to be done, so that I could make my bid govern the general work to be done; but, as I recollect it just now, there was a very little difference in the cost to me, as I estimated it, between the three classes of mattresses. (Question by Capt. Carter.) Suppose the price had been put in, would you have felt that you had any guarantee, in case there was any difference in the cost, as to which design would be used? There were three designs called for at the same price, you stated they don't vary materially in cost.

A Yes sir, I so stated.

Q Suppose you had not been clear in your mind that
554 there would be no variation in cost and desired to enter into a contract, could you have been protected in that case?

A Well, I certainly should have tried to protect myself by having it understood before I signed any contract.

Q Was that possible?

A It was certainly possible or else you would have thrown me out; but I made up my mind that there was not enough difference to justify me in changing my contract in case I came to the front.

Q Did you examine the language of the specifications concerning the rock required?

A Oh yes.

Q What kind of rock did you understand was required for fourth-class rock?

A You told me Florida stone. In that case I don't mean to say that I looked into the question of the specific gravity of the rock, but in general terms you stated Florida rock.

Q Did you bid on the work finally?

A I did not, sir.

Q Will you tell me why you did not bid on the work, as far as you feel as liberty to do so?

A I had it understood with certain parties in New York who were to identify themselves with me in the work, and also to furnish the bonds, and who would do so on my calling on them. After the examination I came back here and the gentlemen who had agreed to go on the bonds withdrew 555 and, I therefore, did not put in any bid.

Q Did you examine the conditions thoroughly and prepare prices for that work?

A I did and handed the prices over to my associates and the report of my examination.

Q Do you remember what your bid was for mattress work?

A Yes sir.

Q How much was it?

A \$1.05.

Q Do you remember what your bid was for fourth-class stone?

A I think it was \$3.10.

Q At those prices, in which work would there have been the most profit to you?

A Decidedly the rock work. I must say in explanation of that, that the processes of reasoning that go through a man's mind in bidding on a piece of work, vary with the circumstances. In this instance there was one thing that entered very largely into my decision as to what to bid. I took it for granted that the man who had been previously there at work on similar contracts, such as were advertised, would have his

plant together, his men together, his arrangements made for the purchase of the materials of different sorts and I thought he could build the mattresses pretty cheaply, and I wanted to force him down on that and I knew that I had for getting stone, facilities that he did not have. Therefore, I made
556 my bid a little lower on the mattresses and a little higher on the stone than what I afterwards found out to be the figures he bid.

Q Are you not mistaken as to the stone?

A I cannot tell about his bid, but the aggregate of my bids was about \$32,000 less than his on everything, including mattress and stone.

Q Did you examine into the character of the work done at Cumberland Sound under previous contracts?

A I went down the channel. As near as I could examine it in the time I had to do it in—I took a sailboat there with a channel pilot—and made a pretty fair examination.

Q Did you examine into the methods used by the previous contractor?

A No sir, not distinctly.

Q Were you familiar with the general methods used by him in building and sinking mattresses?

A Only as I examined into the question by interrogating men who had been in the former contractor's employ, his engineer, his workmen in the woods, &c.

Q Are you familiar with fascine construction?

A I am.

Q Do you remember the specifications for the construction of fascines written by me, these specifications for Cumberland Sound and Savannah River?

A In a general way, I recollect them, yes.

557 Q What kind of fascines do you consider contemplated or meant by those specifications? I mean what kind of brush, and how that brush is to be treated?

A The brush of the country such as you could get on previous work.

Colonel Gillespie: Where did you do previous work?

A St. Joe, Mo., and Fernandina, Fla. At St. Joe I had charge of protecting our influent pipe for the water works.

Captain Carter: Did you understand by these specifications that the fascines are to be what are called military fascines, trimmed of leaves, twigs and etc?

A No, I did not understand them to be anything of the sort; branches of small scrubs and willows bound thoroughly;

but as to trimming off the branches, as I considered it, to make a foundation I always wanted to have the branches untrimmed. The leaves and the small twigs left on. As I understand, a military fascine is an entirely different matter, it is all trimmed and bound together and you have everything bound thoroughly and lopped off, but for construction I never found that it would do to build them that way.

Q Did you investigate the relative cost of building mattresses singly or building them on top of one another?

A I did not go into that thing particularly, no. I asked you in the Savannah office about the mattress and you told me the style of the mattress. You said there might be 558 two, three or four put on top of one another, there was not very much difference to me because if you allowed me to build those mattresses four or five on top of one another, there was an extra risk in getting them into place to begin with. If I made a loss of one of those mattresses I made a very substantial loss. If I only lost a single mattress it was immaterial how much I made on the balance of the contract.

Q Did you understand, however, that as a matter of fact if you desired to do so, you could sink as many as the depth of water would permit?

A That devolved upon the engineer. I recollect you showed me a paper, a plan of what had been done and I recollect your calling my attention to the fact that in some of the other mattresses they might have lapped over and other mattresses had been required to be put in on top of those. In new work you explained to me most thoroughly that I could take one or two or more. You did not require me to put in those double binders there or two thicknesses of grillage, but you would allow the top grillage of the one mattress to be the bottom grillage of the next one.

Q As a matter of fact, which would you rather put in, a grillage or an equivalent in fascine work?

A Well, I don't know as it would make any difference to me. I did not want to put in too many at a time on account of the risk in putting them in place, in getting four of five on top of one another.

Q Were you afforded every facility for investigating the work down there?

A Every facility I could possibly ask for. You were very kind to me in this respect.

Q As to the exposure—did you look into the exposure at the North jetty at Fernandina?

A Yes sir I did.

Q How near do you estimate now that you can get any barge of rock or tow-boat or other boat full of rock to that jetty at high water?

A The day I was down there examining the work, there was a slight breeze from the Northwest and it raised quite a pot of water on the bar and I don't think I would risk very much machinery there in that neighborhood even at that time.

Q As a matter of fact, then, to get the stone in on that north jetty, you could not use a floating plant?

A No sir, I decided that after looking the situation over.

Q So that it would, or would it not, very largely increase the cost of your plant when you finally came to finish up the work?

A Yes, the outer end if very dangerous work, very heavy work to do. I would put in trestle work there.

Q How long could that stand there?

A I did not expect it to stand there very long. No 560 longer than enough to complete the work, if it were done in four years. I expected in the meantime to have sufficient of the jetty built to afford me a harbor of refuge at any time for the plant.

Captain Gillette requested the meaning of "Veni vide" used in a telegram from the witness to Captain Carter concerning which he wrote the following letter to the witness:—letter from Captain Gillette to Mr. John W. Rutherford, dated Savannah, Georgia, October 7, 1897.

(Mr. Rutherford) That telegram was sent from Yulee, Florida. I had been down there on business and went into the telegraph office to telegraph Captain Carter and some other persons were in there writing telegrams and looking around and I did not want any person to look over my shoulder and read what I was writing, and so I put these words, the words I thought would do. This is my explanation of it.

There was some side talk concerning Captain Carter's not giving facilities to the bidders to enable them to make their bids, &c. and the use of Florida rock, &c.

561 Colonel Gillespie: I wish to say that I received a letter from Mr. Schermerhorn, President of the American Dredging Company, dated October 6, 1897, concerning Flor-

ida rock. I think it is of sufficient importance to read and put on file.

(Colonel Gillespie read the said letter, which is marked file No. 96).

Captain Gillette: Speaking of bidders not being given the specifications and not bidding, I have an affidavit here from a gentleman about a difficulty of getting specifications.

Major Raymond: You charge that Captain Carter did not give him the specifications?

A This man came to the office and had difficulty in getting them. I will read the affidavit:

(Captain Gillette read the affidavit of James Foley verified October 7, 1897, marked file No. 93).

Captain Carter: Do you know whom Mr. Foley is?

Captain Gillette: I have never seen him but once. I believe he is a commissary who feeds the men down at the Fort.

Captain Carter: If the Board is willing I would like to have several of the reputable citizens of Savannah state to the Board what sort of a man this man is.

562 The Board gave their consent.

Captain Carter: There is one thing I am going to ask Mr. Rutherford if I can bring him back, and that is with regard to the increase or decrease of materials, whether it would make any difference to him, as a man having had experience. May I send out and get him?

(Permission granted).

Captain Gillette: The question came up as to improper payrolls with fictitious names on them and with enlarged amounts opposite the names. Captain Carter stated that those things were done by his Chief Clerk. Here is a roll in which the name of W. Raymond appears for an amount of \$12.50 which very plainly bears the mark of having once been \$12.45. The man is marked as a laborer, W. Raymond, and is marked by M. A. Connolly, witness. I would like to ask Captain Carter if, when he signed that payroll, the certificate to that payroll that the roll was correct and just, he knew what he was signing?

Major Raymond: Do I understand that it has been altered to the extent of five cents?

Captain Gillette: Yes.

Colonel Gillespie: The pay roll for December, 1896, for improving Savannah Harbor.

Captain Gillette: The man is down as a laborer, he is
563 probably employed at something of that kind, and I
want to ask Captain Carter if he knows anything about
the man and if his system of signing pay rolls is such that he
must have known that the services for which he was paid
were rendered.

A Well, I suppose I must have known it at the time.

Captain Gillette: Here, bearing about the same date, is a
bill from W. A. Raymold, for uniforms for the "Angler"
which is not found as paid by any other voucher.

Major Raymond: What is the amount?

Captain Gillette: \$12.45, the same as the payroll before
erasure.

Capt. Carter: This is Raymold. I have not the faintest
idea who he is. Being signed by a mark he is a negro, I sup-
pose, because that is the way they usually sign. That is the
way they always sign with me so far as I know. I would like
to know how this 45 cents was put in.

Captain Carter: I would like to know if this 45 cents was
put in—I could get that from Mr. Connolly. The only thing
is, of course it must have been right.

Captain Gillette: Mr. Sterly states that that signature on
the payroll was to cover this bill; that he drew the amount
out of the bank excepting he could not quite make it come 50
cents by the rates of pay, so he had to make it 45 cents and
gave his check to Captain Carter for \$12.45 and that check
is here with Captain Carter's indorsement on it. So prob-
ably Captain Carter knew what he got that check for.

Major Raymond: If this was paid on January 4, then it
was not paid with the proceeds of this check.

Captain Gillette: No. The explanation is that Captain Car-
ter paid this bill and this check after drawing the money out
of the bank, that Mr. Sterly drew the money out of the bank
and paid Captain Carter, stating that Captain Carter had
paid the bill himself.

Captain Carter: I had implicit confidence in Mr. Sterly.
Usually these checks coming in about the first of the month
were to pay me back over and above the money I had given
him to spend during the month before. I think Mr. Connolly
ought to be able to tell about that because of his signature.
He is the clerk of the Nicaragua Canal Commission.

MR. JOHN W. RUTHERFORD was re-called by Captain Carter and examined as follows:

Captain Carter: In speaking awhile ago of your examination of Cumberland Sound and your stating that there was less profit on the mattress work than on the stone work, would you as a contractor bidding on a work, feel that your successful competitor on a work for which you had bid, was being treated in such a way as to make it unfair to you, if the quantities on which you both bid were changed, provided they be changed in such a way as not to increase his profits?

A I could answer that very easy by stating that there was a clause in the specifications by which a contractor could 565 not receive bad treatment. The quantities were either to be increased or diminished and a corresponding price allowed or deducted.

Q No, I mean in case there was no material change, what I am striving to get at is this: suppose, for instance, you both bid for 100,000 square yards of mattress work and 100,000 cubic yards of stone work and in carrying out that work the engineer found that it was necessary to increase the one and diminish the other, such change not resulting in any gain to the contractor. Would it be unfair to any of the other bidders on the work?

A I don't see how it would. It would not affect my prices at all. If I thought it was unfair, I would call attention to the clause in the contract which allowed the application of the rule of either increasing or diminishing the work and a corresponding price either added to or deducted from the contract.

Q Yes, that is in case it changes. I asked, suppose it does not change the price to the contractor.

A Then he has nothing to say about it; then there is no harm done.

Q Is there any harm done anybody else?

A I cannot see how there could be. Certainly the only one to be hurt would be the contractor. If the engineer was going to make a change in the cost to the contractor of materials he would talk about it at once.

566 Q Do you know of any instance as an engineer where a contractor has a contract and it becomes necessary sometimes to slightly modify the work he is doing, whether he

will go on with the work even though it is not as advantageous to him in some respects, without increasing the price?

A I will give you my experience as an engineer. I have built 38 different public works in the United States. I don't want to change contracts by introducing a new element in a contract, wanting to do a similar class of work that is already being done, by asking different prices for it. I find out that a man will go on doing work that may be slightly disadvantageous to him, if he can establish a general average on his work. There are a number of cases where I did not advertise for work but let it without advertising because I considered it for the best interests of the work I was in charge of. An engineer in charge of a piece of work is supposed to be looking out for the best interests in his dual capacity, the best interests of all parties; but, if I were to re-advertise for work the man who was then on the work, with all his plant and all his facilities for doing it, would stand a better show, a great deal better show, to get the work again and might bid a higher price for it, knowing that he was in charge over every part of the work and that any other contractor coming in there would be subject to a great many inconveniences. I am merely talking now as an engineer in civil employment. I 567 would always consider the best interests of the company I was working for, whatever decision I made.

Q Is the price bid on a piece of work by a contractor conclusive that he is making money on that work?

A Not by any manner of means.

Q Suppose a man bids, say 50 cents per unit on a certain piece of work and then sometime afterwards bids a \$1 on the same class of work. Is that conclusive proof that the latter bid is excessive?

A Not at all. Contractors sometimes take work below cost. I have taken pieces of work, certain classes of work, below cost because I was that better able to do the other classes.

Colonel Gillespie: If a great number of contractors bid for 50 cents, would that be regarded as establishing the fact that that was the cost of the work?

A At the time the contract was let it may be.

Q And if someone steps in and bids a dollar that would be regarded as excessive?

A On the same bid, yes. In the same locality 50 cents would be considered the price at that time. If there was

no great interval of time between the bids, it would be considered the price at that time:

Colonel Gillespie: When a \$1 unit was bid, it is to be considered equally with the 50 cent unit, which was the price established at that time.

A Yes sir.

568 Captain Carter: May there not be conditions arising within a few months apart causing variation in bids?

A There are conditions that affect work in a few months when you take into account the contiguity of materials, when one year I might bid 50 cents a square yard and then another year a dollar.

Colonel Gillespie: Mr. Rutherford, was not the country full of brush?

A No sir.

Q Would one seasons work clear it all out?

A No sir, I am basing my figures of a \$1 on the price of material that I could secure for the work.

Captain Carter: What I want to ask you is this: If a number of contractors testified that the work cost them from 60 cents to 80 cents a yard and a contractor bids 50 cents, then is that man necessarily who bids 50 cents making money?

A No, there are a number of circumstances that might be taken into consideration in making that bid. I may quite willingly bid that price to get some other man out of the business so that I will have a better price the next time I bid.

Q Is that recognized as business generally?

A Well, it is done. I don't know whether it is recognized generally as business.

Q Is it done in the railway business?

569 A Yes, they are cutting there all the time.

Colonel Gillespie: If that thing of bidding 50 cents continued for a series of years, would it not establish the fact that 50 cents was ordinarily the lowest rate you could get?

A I should think that would be a reasonable supposition.

Q But if that was immediately followed by \$1.10, would you think that a little excessive?

A I should consider it so.

Captain Carter: Which would you rather bid, at 60 cents or 70 cents receiving your pay in gold, or one dollar and ten cents receiving your pay in silver?

A Well, I knew I was going to get United States money

for it and anything they would give me would be good enough, if it was down in Mexico I would answer that question.

Captain Carter: Suppose work costs 65 cents a square yard for mattress work, that being the figure as determined by the United States actually doing the work. What would you consider a fair margin to a contractor for work which would cost the United States actually 65 cents a yard?

A Do you include your plant, interest on plant and all of that in your estimate for the United States?

Q Well, that I cannot say, as I did not make the estimate.

A The contractor has got to do that, he takes his superintendence into account. Then there are delays and rainy days and so on, and I don't suppose the United States does that.

I should say 20 per cent added and then ten per cent for 570 contingencies would be a fair margin. The 20 per cent ought to be added anyway.

Q But, suppose none of those things were included?

A Then the figure should be plus the amount I have mentioned.

CAPTAIN WILLIAM M. BLACK was re-called and examined as follows:

Captain Black: We have a considerable amount of data as to the exact cost of brush fascine mattresses based on actual experience with mattresses of exactly those designs at St. Augustine and at the mouth of the St. John's River. In comparing the various specifications, "the difference between the three designs of mattresses proposed for the Savannah District and the designs used in the Florida District are as follows:"

Captain Black here read his detailed estimate as to cost of mattresses in evidence, the same being marked file No. 97).

Board File No. 97.

CAPT. WM. M. BLACK'S ESTIMATE OF COST OF MATTRESSES.

Referred to Board Record p. 570.

Difference between the three designs of mats proposed for the Savannah district and the designs used in the Florida district.

1st: Savannah District, design log mat, covered with brush, is like that used at St. John's Bar, Florida, except that the latter had five inches of brush, while the former had six inches. The St. John's mat was required to have at least three binders to hold each log in place, in case regular binders 8 feet apart did not fulfill the condition.

2: Savannah District—design fascine mat.

This mat is essentially the same as that used at St. John's Bar, Fla., and St. Augustine Harbor, Fla., except that in the Savannah District design it is specified that "the brush will be as straight and well trimmed as can be obtained," while in the Florida District fascines were not made of trimmed brush. In the 5th Augustine mats both bottom and top grillage were composed of double rows of binders.

3: Savannah District design; fascine mat.

This differs from the Florida design in the omission of the top layer of fascines, six feet apart, and in requiring the brush to be trimmed as in the 2nd design of the Savannah District.

Based on contract of 1886 at St. John's Bar, Florida, design one, Savannah District, would cost 45 cents per square yard.

Based on prices of labor and materials of mats made by hired labor at St. Augustine, Florida, 1889-1890, and cost of spikes and superintendence at St. John's Bar, Fla., designs 2 and 3 of the Savannah District, would cost practically the same amount, 60 cents per square yard in the jetty, exclusive of cost of stone ballast.

Cost of eight layer facine mat, assuming each layer to be composed of well choked 9 fascines and to have a top and bottom and seven intermediate layers of double grillage poles.

Assumed size of each layer 75'x120'.

Assumed price of labor 15 cents per hour. Prices based upon mats built at St. Augustine Harbor, Fla.

64,800 lin. Ft. fascines—at—\$3.16.....	\$2048
9 sets of grillage poles—at—\$30.00.....	270
27 keys of 60d. nails—at—\$2.50.....	70
2500 lbs. of manilla rope, at 13 $\frac{1}{2}$	341
Labor of assembling mattress	
135 as many fascines as 1/2 as many poles per layer	
— as St. Aug. mattress, estimated at \$100.00 per	
161 layer	800
Cost of launching, towing and sinking, estimated at....	125
Superintendence	75
	<hr/>
	\$3729
8,000 sq. yds. cost per square yard.....	\$0.468

The cost of each fascine will vary very nearly in proportion to the amount of brush it contains, and if the amount of brush in each fascine is diminished, the cost of the mattress will be reduced in nearly the same ratio.

Captain Black: Now, I have here a printed statement which was taken from my notes and which gives the cost and method of the construction of the mattress at St. John's and also 571 the amount of brush it contains for one mattress.

Captain Carter: May I ask you how it is, if you build a mattress with the grillage underneath, with a fascine layer and a grillage on top, and build another mattress replacing your grillage by fascine work, an equivalent amount of fascine work, how you make the difference in the cost?

A You cannot put in more fascines in a layer to save your head.

Q But men very often have two fascines instead of one depending upon the size of the fascines?

A I am just taking your specifications and putting the mattresses on top of each other.

Colonel Gillespie: Captain Black, do I understand you to say in your estimate that you now give of 47 cents a square yard, that the fascines are the regularly built fascines which are known since this investigation came up as military fascines, or were they loosely bound brush, as defined by some of the Inspectors?

A They were fascines, but not military fascines. Military fascines are trimmed close so that they resemble a log of wood. A fascine for jetty work is choked as tightly as a military

fascine, but the brush is not trimmed, in order that it may bulge out between the binders.

Captain Carter: Take a fascine built for civil purposes in that way, made of green brush, choked tightly and expose it for several days or weeks, lying on the earth, to the sun of summer. What effect would that have upon the binders?

572 A To loosen then, (witness going on). Now, there was some question as to the weight of stone used on the St. John's River, and I have here the weights of stone, all under the same specifications that we used. In 1888 the Florida rock under these specifications weighed 2200 pounds per cubic yard.

Captain Black read from a paper which was introduced in evidence and marked file No. _____, giving weights of stone used in St. John's work). 2200 lbs. per cu yd.

Major Adams: Have you made any estimate of the cost of the mattress actually used by Captain Carter?

A No sir, I could not get sufficient data to get at it. I tried to but could not make it.

Major Adams: You have read the testimony here, have you?

A I only read over the portion there that you showed me relating to it.

Q What we are reaching out for is an estimate of the cost of the mattress actually used in the work?

A What I tried to do from the data was to obtain the actual weight of a mattress properly made of the size of the one that was made and then comparing it with the weight of the one that was made, the difference would necessarily be in the amount of brush contained; and I found that I could
573 not get at it properly and it was impossible to find out how much should be attributed to the weight of the gril-lages and how much to the fascines.

Captain Carter: It seems to me that this is an unfair statement.

A I retract it, I call it mattress number 2 and mattress number 3. I desired to make no reflections at all in the matter; simply designs numbers 2 and 3 of the designs showed us.

(There was some side talk here, not reported, which grew into the following).

Captain Carter: What I was going to state was this; that the statements made by these assistants to Captain Gillette differed from the statements made to me, extending over a

number of years. Not all, some of his assistants, one especially, is telling the same story now that he told then. The other men who have been discharged or who have gone away from the District, without exception, so far as I am able to find them, make the same statements now that they made then. The men who remained in his employ are the only ones, so far as I can ascertain, who are making to him different statements from the statements they continually made to me. The fact that these men made these statements to me, I shall prove

conclusively, because I have a number of people and the 574 affidavits of a number of others, whom I can get to come here, so that I say that a mattress built upon the statement of the men here, my assistants, but who have since, coming under the influence of Captain Gillette, made different statements from what they have made before, it seems to me that it is rather hard.

Major Raymond: So far as I know, the Board has not objected to your presenting any statement or any evidence that you desired to present?

Captain Carter: No sir.

Q Now, two members of the Board ask that you make this statement.

Captain Carter: I have no objection to it at all. It seemed to me only fair that if they are going to make an estimate of the cost upon what these men now say, that they should also make an estimate of the cost upon what those same men stated to me and which I believe to be the truth in the case.

Colonel Gillespie: In that regard you must be fair to the men themselves. The reports they submitted were on blank forms given by you and we have the testimony of those men that what they regarded as being in accordance with the specifications, was in accordance with the interpretation of those specifications as given by you?

A Yes, but I also have further than that.

Q You must be careful not to do them an injustice?

575 A You can see that there is nothing that can be said in reference to this matter that I would object to.

Q We have been waiting 17 days for you to bring it out?

A Major, it has not been possible for me to get this information before the Board.

Major Adams: You cannot afford to place yourself in the position of objecting to the Board's getting information.

A I don't, Major, I only suggested that it seemed to me fair that two of those estimates be made.

Major Raymond: I suggest that we wait until we find out whether this design, this estimate, rather, that you want has anything to do with the case. I have no objection to your estimating on anything, only it seems to me, that we have been wasting a good deal of time on these estimates.

Q How do you know, Captain Gillette, that the Inspectors, after Captain Carter left, required the same thing that they did before?

Captain Gillette: The Assistant Engineer, whom I found in charge, told me that that mattress was as good as any.

Q Who is the Assistant Engineer?

A Marion Twiggs is the man. He began with the work and went through with it. That is, the entire contract he has been in charge of.

Q There is no reason in the world to believe that he should make any statement that is not true in regard to the construction of the mattresses?

A None that I know of.

576 Q When had you seen him?

A I saw him when I inspected the mattress.

Major Raymond: I thought you said once, Captain, he was a brother of a disappointed contractor?

A Yes, he is.

Colonel Gillespie: I am perfectly willing to assent to the request of Major Adams that the cost of that particular mattress be estimated, if you can estimate it.

MR. M. A. CONNOLLY was called to the stand and examined as follows:

Colonel Gillespie: There has been presented to the Board a payroll of December, 1896, in which your name appears as a witness to one of the signatures of a colored man?

A Yes sir, that is my signature.

Q And apparently, you wrote the name of the man also in there?

A Yes sir.

Q You knew the man?

A I believe I did, but I take it for granted that every man brought to me whose cross mark I witnessed, was, in every case, a colored man. I don't remember witnessing a cross mark on a white man's signature during the time I was in

that office there. I must have witnessed many signatures
577 and in every instance there was a man produced responding to the name, but I don't pretend to know every darkey in Savannah or around that District. But I took the word of any man in the office.

Q Did you know of anyone who went by the name of Raymond?

A In a way, I did, yes sir, but if there was one produced before me and said his name is Raymond I took it for granted that it was Raymond. Does the Board want me any longer?

Colonel Gillespie: Yes.

Captain Carter: Do you know anything further than that you witnessed that signature?

A I cannot remember all the details. This is my signature.

Colonel Gillespie: Then you don't know anything about the roll as a roll?

A This is Mr. Sterly's writing, as I remember it, undoubtedly. Undoubtedly when I was asked to witness the signature of any employee, if I did not know the man, the man was brought to me by Mr. Sterly or some clerk in the office, saying, this is W. Raymond, and if I did not know him I assured myself beforehand in this way. Therefore, in this case this man was brought in to me by Mr. Sterly or some other clerk in the office and it was undoubtedly a colored man, as I remember no instance in which a white man who could not write was brought before me in that District.

Captain Gillette: Then if Mr. Sterly would bring you a colored man you would witness his signature?

A I would undoubtedly.

578 Q Why did you not say, Mr. Sterly, if you know him why don't you witness the signature yourself?

A May be I did in some instances talk to Mr. Sterly in that way.

Q Do you remember the roll at all?

A Oh no, I cannot.

Q In what capacity did you act in that office?

A As clerk, attending to the correspondence. I had very little to do with the vouchers because I had enough to do with the other work and Mr. Sterly was very zealous in his work on vouchers; he did not like to have them in different handwriting.

Q Did you have to witness many of those signatures?

A I don't think I witnessed very many, not so very many.

Q It was only six months ago, how has it happened that you cant remember if you only witnessed a very few?

A I cannot remember all the signatures of Savannah men or in Savannah City that I witnessed. I am sure that I always made it a practice, if I did not know the man, that he was properly vouched for. I dont recollect W. Raymond just now. I suppose Mr. Sterly would recollect him.

Major Adams: Mr. Connolly, did you ever draw up any bids for contract work of any contractors connected with the Savannah office?

A Well, when I was United States Commissioner in Savannah, for five years until June 30 of this year and for five years preceding that, during all the time I was down 579 there, I acted as Commissioner, United States Circuit

Court Commissioner, I did not make out any papers for any contractors, but I had them swear to them. They came before me and produced men who swore that they were sureties on guarantees. I made lots of those for lots of contractors in that District. I had an office in the United States Custom House office by courtesy of the Marshall. I was appointed I think in 1891, early in the spring of 1891. I was United States Special Commissioner in Admiralty under rule 47 of the equity practice; and some one came to me one day and said, Mr. Connolly here are some sureties on this work, producing some specifications and wanted me to swear them. I said I dont know whether I could as United States Special Commissioner in Admiralty swear these men in. It says underneath who could swear in the sureties. I wanted a Judge's opinion on it first, but Judge Emory Speer, who is a District Judge, was at that time in Macon and I wrote the Judge and sent him a copy of the specifications and asked him if he thought that I, knowng that I occupied a position in a Government office, could swear in these sureties. And Judge Emory Speer wrote me that I could not swear in such sureties, and he said that I did not have authority to do so, but he said in the same letter, substantially this; you can do this work as a United States Circuit Court Commissioner and I herewith enclose your commission as a Circuit Court Commissioner and now you will enjoy the dignity of being 580 called Judge. I remember that extract from it, it shows that he knew that I was in the office. Then after that, when anybody came to me in the office and asked me to do sureties, I did as I was legally empowered to do.

Major Adams: Were you at that time employed by Captain Carter?

A Oh yes; but, the Judge liked me and gave me this appointment because he said he knew I deserved it and thought I could fill it. Captain Carter objected at one time to this and I told him that Judge Speer, who was a good judge of law and a good authority in such a case, wrote me that I could do it, so I continued to do it with my other Commission work.

Q When were you first employed by Captain Carter?

A I went to work there September 1st, 1888.

Q What were you doing at that time?

A I was a clerk in the Post Office at Boston with Mr. Edward T. Barker, Superintendent of the mail delivery.

Q Did you make application to Captain Carter for employment.

A The way I entered his employ was this: some shorthand man in New York, a publisher, sent me some shorthand books and we corresponded and once he said there was a good position which he thought, if I wanted it, I could get it, and he gave me the name of Captain O. M. Carter of Savannah, Georgia, and I remember within a month after that, of seeing my original application down there with about 13 enclosures of typewriting work. I did not know of Captain Carter until

August 1888 or July 1888. Then I looked him up in the 581 Army Register. As soon as I found out who the officer was who wanted a clerk, I made application.

Q Did Captain Carter ever send you away from Savannah to do any kind of work for the United States?

A Send me away from Savannah to do any kind of work for the United States?

A Yes.

A I dont remember just now of doing any kind of work away from Savannah for the United States.

Q Dont you remember coming up here to New York anywhere? Did you not go around doing work for him?

A Oh yes, in his District. I went to Fernandina once.

Q Did he ever send you any place in the state of New York?

A I dont remember of any.

Q Did he ever send you to Patchogue, Long Island?

A No sir, I have never been there.

Q Is J. B. Connolly a relative of yours?

A He is my brother, a younger brother.

Q Has he ever been employed by Captain Carter?

A He is.

Q In what capacity?

A As clerk, making out vouchers and so on.

Q Did he ever send him to the state of New York to do any work for the Government?

A Not to my knowledge, no sir. I dont know anything about his sending him to New York or any other place.

582 Major Adams: Do you know which Connolly was sent to New York?

A No.

Q I understood you to say that you had never been sent north from the Savannah office to do any work for the United States?

A Oh, I have been north on my vacation.

Q Did Captain Carter ever pay your expenses?

A I paid all my own expenses. I borrowed money from Captain Carter on two instances when my family was up here and I came up here.

Q Did he refund you your expenses for any of these journeys?

A I never made any journeys for Captain Carter. On two instances, when I went north, I borrowed some money from Captain Carter so I would not be short on my trip and when I took my family back, which I repaid him later on.

Q Did the Captain ever refund you the expense of these journeys?

A No sir, I made no journeys for Captain Carter. They were all my own journeys. I have been up north every summer, or once a year anyway.

Q Captain Carter, did you make any statements to the Board about the journeys made by Mr. Connolly?

Captain Carter: No sir, I dont think I ever did.

Q I understand you to say that you went to Patchogue, Long Island?

Mr. Connolly: Hardly; it was Sterly, you have got it mixed up.

583 Captain Gillette: Do you remember where your brother was when you went to Boston, the last time you went there on a vacation?

A I dont remember the last time he went to Boston on a vacation.

Q The last time you went to Boston on a vacation, do you remember where your brother was, J. B. Connolly?

A I believe I met my brother Jim every time I went to Boston.

Q Met him in Boston?

A Oh yes, met him here in New York too.

Major Adams: Where is your brother now?

A In Boston; he was yesterday.

Q What is he doing?

A He has an interest in a magazine, an amateur sporting or athletic magazine called "Land and Water" and he writes for various sporting publications.

Q When was he last employed by the United States?

A I cannot remember just now. He went to Harvard I know and left there. He was there about one year and left there just before those Athenian, those Olympian games, took place at Athens. He went on to Athens with his college for his club and he has not returned to college since, and therefore, I suppose he left Savannah in the fall of 1895. He has been in newspaper and magazine work since.

Major Adams: When were you last in Savannah?

584 A Sometime in September; the day before Captain Carter got there; not this last trip, but the second last trip; about the middle of September I started down there, I dont know the date.

Q What did you go there for?

A My family was coming up north and Captain Carter's lease on his house expired about the same time mine did, September 30. My family came north to live here and all the furniture was down there packed for shipment. Captain Carter stated to me that his furniture was down there and very likely, on account of some troubles that had arisen, it would not be taken care of, and Captain Carter wrote me a letter in Washington late in July or August or September; when Admiral Walker appointed me under the Commission he stated that I would undoubtedly have an opportunity to return to Savannah and bring my family up, and Captain Carter told me to see that his house and furniture was not disturbed and to have it watched.

Q Did you go to Savannah on your own account or on Captain Carter's account?

A I went particularly on my own account and I went on his account and I was glad to combine the two duties and told him so. I was glad to have an opportunity to do anything I could for him.

Q What instructions did you get from Captain Carter?

A The Captain said to me substantially this: probably,

now, my house is not occupied and it may be entered
585 by burglars down there and my furniture may be scattered and I wish you would be kind enough to attend to the shipment of my goods; that is, assure yourself that they are safe. He said, if the house is deserted, please see that somebody is taking care of the house and its contents, and any other of his effects that are abandoned.

Q Did you have anything to do with the books and papers stored in the old office of Captain Carter?

A Do you mean that I had anything to do with the preparing of them? I had nothing to do with them in that way, only the day that the Board left. After the Board left the city, I shipped Captain Carter's boxes of books via the steamship company, to New York, and mailed Captain Carter the bills of lading.

Q Had you anything to do with these books and papers previous to that?

A No sir, never touched them at all. The only book I ever saw was a letter book in which they copied an occasional letter.

Captain Carter speaking: I will state the details of uniforming my men. I don't remember, but my impression is that when I first uniformed them I increased their pay over
586 a certain length of time, so that the United States really paid for the uniforms by increasing their pay.

Later, when the uniforms were simple working suits, as I remember, no increase in their pay was given, but the men bought them themselves. That is, in those cases I very often paid the bills or let my chief clerk do it, and let the men pay me from time to time as they could save money out of their salaries. This I don't remember, but I think I could find out from Raymold how it was paid.

(The Board adjourned until 10:30 a. m. October 13, 1897.)

587 October 13, 1897.

The Board met pursuant to adjournment.

Present, the same as before.

Captain Carter: When I was in Savannah just before I left, I asked Captain Gillette if there was anything further which he would bring before the Board in order that I might look into such matters and reply to them, and he told me there was nothing further. Yesterday he brought out this affi-

davit of Mr. Foley and the statement of my former Chief Clerk; and I would like to ask the Board if there is anything further to come up, if I cant have it all at once, and I think it is only fair, Colonel, that I should have everything together first.

Colonel Gillespie: That was not a new matter, Captain Carter.

Captain Carter: What I would like to know is this: whether or not it would be considered perfectly agreeable for me to have all these things at once.

Captain Gillette: I will say, Colonel, that this man Foley, I have never seen in my life until Captain Carter left Savannah.

Captain Carter: You see the unfair position, Colonel, it puts me in. I would like to know everything that is to come up and then I can go and get evidence.

Captain Gillette: I would like to say that if that is the desire of the Board there is one entirely new matter 588 which I knew nothing about when Captain Carter left

Savannah. It is this: it appears, about four months ago a man by the name of Brown brought a suit against the Atlantic Contracting Company for payment for rock that had been rejected as being smaller than the limit of the specifications. The case was brought to trial March 11. As nearly as I could find out from the evidence I could get, Captain Carter in that case testified that rejections were made and the rejected rock was not paid for, but that the contractor, was allowed to dump it either in or along side of the jetties, but it was not paid for. That was the testimony as near as I can get it.

Colonel Gillespie: You have not explained what this court was for?

Captain Gillette: It was a civil court. A widow of a man by the name of Brown brought the suit against the Contracting Company. The records of the office show, and Mr. Cooper informs me, that absolutely no rejections were made during the period covered. I sent to the Clerk of the Court, to all of the jurymen and to the bookkeeper of the Atlantic Contracting Company. The Clerk of the Court makes affidavit as I have indicated. Ten of the jurymen, nine of the jurymen did not remember much of anything about it. The two of them make affidavit to a portion of that of the clerk, corroborative as far as they went. The twelfth man, after refreshing his memory, declined to answer. The Secretary

of the Atlantic Contracting Company at the time makes affidavit to the same thing as the clerk of the Court. It would, therefore, appear on the surface as if Captain Carter had made a wrong statement under oath to favor the Atlantic Contracting Company. This I knew nothing about until the last few days. I have these documents that I speak of here. I would like to submit them. There is the testimony of Robert L. Colding, J. B. Law, John James Conlin, James L. Gallagher, a copy of the bill of rock delivered by James B. Brown, from the files of the city record, a statement by A. S. Cooper.

Major Adams: May I ask, Captain, if there is a report of that trial?

Captain Gillette: There is a stenographic report of it. I have been unable to get it, it is in possession of the attorneys of the Atlantic Contracting Company.

Colonel Gillespie: Where are they?

A They are in Savannah. I believe they will give the Board that testimony if Captain Carter will ask for it. They won't give it to me.

Colonel Gillespie: Are you willing, Captain Carter?

Captain Carter: Certainly.

Colonel Gillespie: Then I can telegraph for that report with your consent. Will you give me the names?

Captain Gillette: Lester and Ravenow.

Major Adams: Would it not be a better plan to have Captain Carter telegraph for it?

Captain Carter: I would rather not for this reason: I would rather not ask the attorneys for a copy that belongs to them.

590 Colonel Gillespie: Is it the will of the Board that this matter be taken up?

Major Adams: Yes.

Colonel Gillespie: That is all.

Captain Gillespie: The evidence that I have here, while there may be some mistake or misunderstanding about it, is the best I could get.

Colonel Gillespie: (Writing a telegram) What is the name of the case?

Captain Carter: The stenographic report of Brown vs. the Atlantic Contracting Company.

(There was some side talk here in which it was decided that only a copy of Captain Carter's testimony in this case was wanted.)

Captain Gillette: I also have a case which I have been looking up at intervals for some time and have only finished it recently. In fact, the copies of the documents only came this morning. It is this: the Savannah City quarantine station occupies a point of land down the River. The Harbor lines were established there by the Secretary of War at Captain Carter's suggestion; after the works were built, a fixed harbor line was recommended, but a temporary harbor line, for reasons given, was recommended further back—sort of a tentative harbor. Under that line, after the fixing of 591 that line, and upon recommendation of Captain Carter, the City of Savannah was directed by the Secretary of War to remove all structures, ballast, etc. in front of the temporary harbor line.

Colonel Gillespie: Is there any map of the place?

Captain Gillette: (Showing a map). Yes, this shows everything but the harbor line.

Captain Carter: The harbor line as adopted is shown on another map.

(The Board examined the map).

Captain Carter: (continuing) There are two lines on the other map. One lies like that (indicating), and the other one further back.

Captain Gillette: (Continuing). The city of Savannah were directed to remove all structures, ballast, buildings, etc. from in front of the temporary harbor line. Captain Carter recommended to the Secretary of War the location of a harbor line and used these words:

(Paper introduced in evidence and marked filed No. 83)

Captain Gillette: (Continuing). The City of Savannah were directed by the Secretary of War upon Captain Carter's recommendation, to remove all structures, ballast and so on, in front of this provisional harbor line, and broken 592 line that was then the harbor line and had been adopted temporarily. This order, the Mayor of Savannah objected to, but he got peremptory orders from the Secretary of War to carry it out literally. About that time the Atlantic Contracting Company came forward and made an offer for the ballast deposited there at a very low price. The city, being unable to remove that ballast to any other place, and being required to get it out of the way at once, let them have it. Then the subject was dropped. The buildings have never been moved. The orders of the Secretary of War have not been carried out. Captain Carter has since authorized

the City Engineer to repair the trestles, and there has been no modification of the peremptory order of the Secretary of War that I have been able to find in the office.

Colonel Gillespie: What was the date of the establishment of those lines?

Captain Gillette: Somewhere in 1893, I think.

Colonel Gillespie: Four years ago?

A Yes sir. (Continuing) The station was built in 1890. The removal of the rock was more recent; I have forgotten exactly. The dates are all here. It is rumored and said that the reason of that order was to enable the Atlantic Contracting Company to purchase rock at a cheap, low price and force the city to sell it, and the papers that I have here are simply a record of the official action taken. There is nothing direct indicating that that was the reason for it, but, as 593 far as I have seen, the indications point strongly that way.

Captain Carter: May I ask one question? he says "rumored reason." May I ask from whom these rumors come?

Captain Gillette: To tell exactly who has said it, I don't know that I can. I have heard it from, I should think, half a dozen different people.

Captain Carter: Can't you mention one?

Captain Gillette: Oh yes, I can mention several, but I may be mistaken as to some particular individual. Marion Twiggs mentioned it and said it was common talk in Savannah at the time. Mr. Cooper mentioned it quite positively. A member of the Council at the time, whose name I have forgotten, mentioned it.

Captain Carter: Can you find out his name?

Captain Gillette: I think so.

Colonel Gillespie: Before you go any further, is it the wish of the Board that this matter shall be considered?

Captain Carter: May I say a word, Colonel? I am perfectly willing to have anything considered in relation to this matter.

Major Adams: I think that Captain Carter should be permitted to make answer, or suggestion.

Colonel Gillespie: Is there any objection? (Continuing): There is no objection.

Captain Carter: May I ask Captain Gillette, if there 594 is anybody else, besides the member of the Council, Mr.

Cooper and Mr. Twiggs, that you remember now out of the half dozen? It will help me to get hold of this thing.

Captain Gillette: I am not quite positive but that a gentleman from Savannah, with whom I talked three or four days ago, mentioned this quarantine station matter, or the price obtained by the Atlantic Contracting Company for the purchase of the old stuff some years before, and as I am not positive that he discussed this Company, I will not give his name. I will take the responsibility for the assertion and assert to the Board that the indications strongly point, to me, from this official record, that Captain Carter never intended to cut off that point; that he got this action taken for the purpose of enabling the Atlantic Contracting Company to buy that rock. It looks so to me from the official records.

Captain Carter: It seems to me this: that when these things come as common talk, it seems to me that I ought to have the names of as many of these people as possible, because I know the character of the people down there, and the fact that Captain Gillette states it, it seems to me that Captain Gillette has only been there a little while and I have been there 13 years and I would be as well able to determine the value of these statements as Captain Gillette, and it seems to me that I should have an opportunity to do so.

Captain Gillette: There are some things I have here 595 that bear on previous cases. They are more of preparation for rebuttal evidence to Captain Carter's explanations. For instance a charge has been made or a statement has been made, that Captain Carter apparently made a false official statement to the Chief of Engineers concerning an increase in the quantity of brush to be used in the Tybee breakwater. Now, I am prepared with evidence in rebuttal of any explanation that Captain Carter may make.

Colonel Gillespie: You may withhold that. Is there any new matter?

Captain Gillette: Yes, here is another pay roll matter. The fourth name, R. A. Rowlinisky appears. I don't think we have had that before. I would like to ask Captain Carter if he knows a man by the name of R. A. Rowlinisky?

A (Captain Carter): I don't know R. A. Rowlinisky. I know a man by the name of Rowlinisky.

Q Who is he?

A He is a chemist.

Q The man you sent the rock to?

A I don't know.

Q Where is his place of business?

A In October, 1897, at the Corner of Broughton and Brayton streets.

Q Did you ever have a man by the name of Rowlinsky employed as a deck hand?

A I dont know the names of the deck hands I have.

596 Q The man R. A. Rowlinsky appears on your payroll as a deck hand for \$8.25, I have obtained a copy of a bill of medicine for the snagboat Toccoa for the same amount, and presumably, for the same thing. Mr. Sterly tells me that that signature on the payroll was of a Mr. Rowlinsky to pay for that bill of drugs and that Captain Carter knew it. The bill of drugs was used for Government work.

Colonel Gillespie (looking at the bill): Who put the word "medicines" in there?

Captain Gillette: I think I put that there.

Q Who put the red mark?

A I think I put that there, too.

Q The \$4.17 was in payment of telegrams. Official or private?

A I believe telegrams on official business, when Captain Carter was absent presumably without authority; I dont know positively; that is my impression.

Q Have you endeavored to get the bill?

A I did not. I did not think of it (continuing;—) that is all that I believe I have that is new. Here is something that bears on that subject. It is an estimate submitted by Mr. Cooper of his own volition of the cost to the Atlantic Contracting Company for running their works when they were going heavily. estimates of what they paid their men and of the cost of their plant. He has one item of which, of course, he knows nothing, and it had better not be in, but as it is in I will leave it in. This is an item for lobbying
597 a River and Harbor Bill through Congress.

Captain Carter: Could I have a copy of that?

Captain Gillette: Yes sir, I have one right here for you. Everything is in duplicate.

Colonel Gillespie: That closes all your papers, Captain Gillette?

Captain Gillette: In new matter.

Major Adams: Captain Carter, do you propose to call Captain Greene for the defense?

Captain Carter: Well, what I intended to do was this: I did not think that it would be necessary to do so—

Q You are not able to answer that question?

A No, I have not gotten to that point yet. I wanted to find out what is necessary to answer.

Q Do you propose to call Mr. Westcott for the defense?

A I propose to call Mr. Westcott, yes.

Captain Gillette: Here is another new matter I find that may have some bearing on the case; copies of letter from Captain Carter, dated July 12, 1897, asking the Atlantic Contracting Company if they would not take rock off from spur 598 dams already constructed, and their answer saying they would be willing to do so, their reply of July 17.

(These letters were read in evidence and marked, respectively, file numbers 81, 82.

Colonel Gillespie: What is the point involved.

Captain Gillette: The point is, that it appeared to me to be an attempt to give away Government stone to these contractors. When I went there they were ready to remove this stone and I stopped it.

Colonel Gillespie: No stone was removed before your arrival?

A No sir, I think no stone was removed at all. I countermanded the permission, if one had been given.

Colonel Gillespie: Your idea was that the stone would be delivered at contract rates?

A Yes.

Captain Gillette (continuing): Here is also a letter to me in compliance with my verbal request, from Mr. Sterly, explaining how his expense for the trip to Patchogue were paid, and what he did with the money obtained from Mr. Hirt for the expenses of the boat, \$132.10.

(Letter from Mr. Sterly, dated October 8, 1897, was read in evidence and marked file number 73).

599 Captain Gillette: It was stated in Captain Carter's testimony that that money was used for Mr. Sterly's expenses when Captain Carter went north for the summer, his expenses to Patchogue, and that Captain Carter had told him to refund it, that he could not use it properly that way.

Captain Carter: I think that is a mistake. I found out afterwards that the money was not received until about six months afterwards. It was something Mr. Sterly told me and I will correct it if it is not so.

Captain Gillette: Who paid, and how, for the subscription for the Daily Sun which comes to the office.

Captain Carter: I pay for that.

Q Out of your own pocket?

A Yes.

Q Why did you have it addressed to the engineer office rather than to Captain O. M. Carter personally?

A Because I wanted it at the office. In fact, I don't know how it was addressed.

Colonel Gillespie: There are a great many items of expenditure here. Were they paid for on the pay roll?

A None of these were paid for at all, that I know of. I don't know anything about them. This is an entirely new matter to me and I will have to look into it.

Major Raymond: So far as you know, you don't know that any of them were paid for?

A No sir, this is a new thing and I don't know anything about it, or that sort of thing. Can I ask Captain

Gillette two questions in connection with these things? I want to ask you, Captain, in connection with these rumors that you stated you had heard about various matters, did you make any statements derogatory to me within a few days after your arrival in Savannah?

Captain Gillette: No sir, I did not in the least.

Captain Carter: Have you furnished to the public in Savannah any information concerning the present investigation?

Captain Gillette: I stated to a newspaper reported that I was responsible for the initiative of whatever might be going on.

Captain Carter: Did you furnish him with any other information?

Captain Gillette: That is all, I don't know of anything further having been published.

Colonel Gillespie: Are you through with everything?

Captain Gillette: Yes sir.

Captain Carter: I am afraid, Colonel, these things may delay me a little bit because they are new.

LIEUTENANT HARRY BURGESS, was called to the stand and examined as follows:

Colonel Gillespie: During what years were you an assistant to Captain Carter?

A From the 30th of September, 1895, to the 27th of February, 1896.

Q What was the nature of your duty when you were there as assistant?

A Principally, work in the office and to some extent, surveys; also, on work on taking up wrecks in the channel.

Q Did you have anything to do with mattress construction.

A No sir.

Q Did you ever see any of the work?

A Any of the mattress work? No sir, it was completed before I arrived.

Colonel Gillespie: That is all.

Cross-Examination.

Captain Carter: Will you tell me if you are familiar with the general instructions given by me to my assistants in the office?

A I don't know that I heard any definite instructions with reference to the papers, but I heard some of the clerks mention at various times that Captain Carter was very particular about his papers.

Major Adams: You heard the clerks say that?

A Yes sir.

Q What clerk?

A Well, Mr. Sterly for one, and I think young Connolly, Tom Connolly, I think for another.

Colonel Gillespie: When you say "particular" about his accounts, what do you mean?

A Well, that he was very particular in carrying out the regulations with reference to having the pay rolls made up before they were signed and all matters of this kind.

Q Did they speak to you positively on that subject?

A I am sure they did, Mr. Sterly did, because he was, to a certain extent, showing me the papers of the office under Captain Carter's direction.

Captain Carter: Were you not given full access to all the papers in the office?

A I was.

Q Will you tell Mr. Burgess what you thought I wanted you to do in the office, my aim in having you in the office?

A It was to get a complete knowledge of all papers that are connected with a District Office of Engineers, to examine all the methods used in the office, this office, and I was also given instructions to make out a set of the various sets of papers connected with contracts, pay accounts and others, from my personal note book. That is all, I think.

Q Will you state to what extent you investigated and went through, during the time you were there, the papers in the office?

A I went through one set of every paper, so far as I know, that was used in the office. I did not look at and examine every individual paper, but one of each kind, and I copied 603 a large number, also.

Q Will you tell what your impression was as to the methods of carrying out the papers in my office, of carrying out the regulations, so far as the papers were concerned? What your impressions were?

A My impression was that the regulations were strictly carried out with reference to all the papers that I ever saw.

Colonel Gillespie: Have you ever read the regulations?

A Yes sir, I have.

Q The Army regulations?

A Yes sir, the Army regulations and also the regulations from the Chief's office.

Major Adams: The Corps of Engineers?

A Yes sir.

Captain Carter: Will you tell me what your impression was from your conversation with my Chief Clerk, Mr. Sterly, and from your investigations in the office during the entire period you were there, how the regulations were obeyed in that office? I think he has answered that question. What was your impression as to the action that would have been taken by me had I suspected any departure from these regulations on the part of my assistants, my clerks?

A Well, my impression was that it would most certainly be corrected and what the punishment for the clerk would be I have no idea.

Colonel Gillespie: Did you get that impression from
604 what Captain Carter said himself?

A Rather, from what the clerks said. I don't think I ever had a conversation with Captain Carter about his papers.

Q He told you, then, to go into the office and look at the papers.

A Yes sir, and he gave Mr. Sterly instructions with this in view.

Q Were you told at the time you went there that you were given liberty to examine all those papers? You went there to examine the records and ascertain what papers were prepared in the office?

A Yes sir, and the methods of preparing them.

Q The question of their accordance or nonaccordance with the regulations did not come up?

A No sir. It was never mentioned except in a general way.

Major Adams: While you were on duty in that office did you ever hear any intimation from any assistant engineer, or clerk, or other person, that there ever had been any irregularity in that office, either with or without Captain Carter's knowledge?

A No sir, I did not.

Captain Carter: Is there anything else that you feel that you could state concerning the impressions that you received from your investigation of my papers, during the time you were there, concerning the way in which my office was conducted generally?

A The idea I got and Mr. Sterly stated in so many
605 words to me, and that it was the model engineer office of the United States and my impression was that he meant to imply that it was carried on in accordance with the regulations and also with neatness.

Colonel Gillespie: Were you ever left in charge of the office?

A No sir, not of the whole office.

Q Who took charge during Captain Carter's absence?

A Well, I don't think Captain Carter was away more than two or three days at any time I was there and when he was away mail was forwarded to him.

Major Adams: Who was in charge of the office during his absence?

A I don't know that anybody was placed in charge. The

Chief Clerk ran his department and the other clerks ran theirs.

Colonel Gillespie: You mean to convey the idea that no definite instructions were left? I mean instructions so far as you knew?

A No sir, none so far as I knew.

Major Adams: How were the payrolls made up in the office—who made them up?

A I think Tom Connolly, the young Connolly, made them up.

Q What data did he have to make them up from?

A Most pay rolls, I think, were made up actually by the engineer in charge of the work. The amounts were filled 606 in at any rate, and the names placed in when they came in the office and I think they were mostly made up by the engineer in charge of the work. For instance, on the snagboat the roll was made up there and sent to the office to be completed. I don't think it was completed on the snagboat.

Q What was done on the snagboat?

A The amounts were filled in, the number of days rather, and the names of the men. That is my recollection.

Q Any other papers received from the assistant engineer to show that one of these pay rolls was correct?

A Yes sir, I think the reports of monthly operations—ten days reports rather, showed the number of men employed and the rates of pay received. I am under the impression that this was so.

Q Anything else?

A Well, I don't know of anything else except a letter of transmittal, which I think certified that the pay rolls were correct.

Colonel Gillespie: Are you giving information of your own knowledge, or simply impressions?

A This letter, Colonel, is rather impression.

Q You have no definite knowledge as to it?

A No sir, the answer to this last question.

Major Adams: How much time did you have to make yourself familiar with the papers in the office?

A I was at Savannah five months and I think at least 607 two and a half months were spent in the office.

Major Adams: Suppose that you had been in charge of the office and had to draw checks in payment of these rolls. How would you have satisfied yourself as to the correctness of the rolls?

A I think that I would have had to rely on the certificate of the engineer in charge of the work, unless I could have made a personal inspection.

Q Did you see any such certificates?

A Yes sir, I think so.

Q In what shape did they come?

A I answered that question, that my recollection was that it was in a letter of transmittal certifying to the correctness of the roll.

Q Did you see any time rolls?

A Yes sir, I think so.

Q What did the time rolls show?

A I would like to say in reference to the last question you asked, the question previous to this, my recollection is that I did see time rolls there.

Q Who made up vouchers in the office?

A Usually young Connolly made them up.

Q Where did he get his information upon which to make up the vouchers?

A He got the information for ordinary vouchers for expenditures from the bills which were certified to as being correct by whoever received the article for the Government, either the assistant engineer, clerk, or others.

Q While you were examining these papers and making yourself familiar with the business methods of the office, did you take any steps or make any investigation to find out whether the men paid were employed?

A No sir.

Q Did you have any such opportunity?

A No sir, I did not.

Q Did you have any opportunity to examine the bills to find out whether the things paid for were received?

A In a few cases I did; the articles that were received in the immediate vicinity, for example; I was at work removing wrecks. I was not in charge of the work, but merely present on the boat when they were taking up the wrecks. I had an opportunity of examining all the goods received on that boat and ascertaining the number of men employed in the city, in the office and about the office or near the office.

Q Did you have time rolls?

A I do not remember.

Q Suppose that a man was employed in the city or about the city or near the office, how was he paid?

A He was paid on the office pay roll. That included all the clerks and other employes about the office.

Q Who certified to his employment?

A I do not know, I do not remember.

609 Q Was your investigation of the office methods or the business methods limited in any way? Had you any opportunity to find out about these things?

A Yes sir.

Q Did you find out?

A No sir.

Q Well, then, your impressions as to the correctness of the methods came not from your personal examination and investigation?

A Well, I made the examinations, I may not have gone into all the details as well as I should have done.

Q I did not want to bring that out, what I want to find out is what your impressions, as stated under Captain Carter's examination, arose from?

A Well, from my examination and from my conversation with the clerks of his office.

Q Give me the points, then, of your examination which tend to show that a man paid, worked, that the things paid for were received? Where did you get that information?

A In no case did I examine to see whether the things were actually received. I saw the certificates on each bill from the assistant who received the articles, that this bill was correct and that the goods were actually received. That was the form of certificate, I think, that the goods were actually received and the bill was correct.

Colonel Gillespie: Is that only for articles that came
610 under your own observation, or do you apply than generally?

A I apply it generally.

Major Adams: Was it possible for a man to receive pay who rendered no service?

A It would require a false certificate from some member of the office force in order for him to do it.

Q Was it possible for the Chief Clerk, Mr. Sterly, to make a false pay roll?

A I should think it would be.

Q Was it possible for him to make a fictitious pay roll with false signatures? What check would you have on that?

A I don't think there was any good check on Mr. Sterly's

own statements that this was performed, for work that he certified to.

Q Did he certify any pay rolls himself?

A I don't know whether he had a certificate to that effect.

Q What was his form of presenting these pay rolls to Captain Carter? How did he do it?

A Well, that was something I do not know, as I don't think I ever saw him present one, as Captain Carter's office was separated from mine.

Q Did you make an examination of pay rolls or vouchers in detail as to their correctness to such an extent that you satisfied yourself that the pay rolls were correct and just?

A I would like to know if you mean by that that each man there on the roll had actually performed the work for which he was paid?

611 Q Yes.

A No sir, I did not.

Q What is the form of certificate on the pay roll?

A I do not remember.

Q What is the form of the certificate on a voucher?

A The certificate from the engineer disbursing officer? I don't believe I can say what that is.

Q I don't want to confuse you about this matter at all. My object in asking the question is simply to find out whether you made such an examination of these papers as will enable you to form a correct opinion as to the business methods of the office, and in that, as to whether the men paid actually rendered service. Did you get any information in your examination that would enable you to pass an opinion on that subject?

A I should say that I thought I had made such an examination, but I noticed that it depended to a large extent on the faithfulness of the assistant.

Colonel Gillespie: Did Captain Carter at any time ask you to watch the operations of his office so that you might be able to detect anything wrong there in the way of false vouchers or false accounts or anything of that kind?

A No sir.

Q The examination that you made was with reference to the printed forms issued by the Engineer Department?

A And also those printed in his own office and in use there.

612 Q You were to familiarize yourself with the general forms adopted there?

A Yes sir.

Q But the specific application of those forms you had nothing whatever to do with except with the works solely under your charge on snags? In other words, you were not required to examine the time rolls as they came in, and not to compare the vouchers with those time rolls, nor to examine the vouchers after they had been certified for payment?

A That was part of the instructions to do that, but not to do it with reference to finding out mistakes, but simply to give me instruction.

Colonel Gillespie: Did you examine with a view to find out whether they were prepared in accordance with the bills and the time rolls?

A I compared them on several occasions to find that out.

Q Was it your duty to do so?

A No sir.

Q Therefore, you did not make it a general operation?

A No sir.

Major Adams: Here is a pay roll. When did you say you left Savannah?

A On the 27th of February, 1896.

Q Were you there in January, 1896? Do you know anything about that pay roll?

A I was present on the boat at that time.

Q What service did R. A. Rowlinson render?

A I do not remember, sir. I see that he is marked as deck hand, but there were so many deck hands that I do not recollect this particular man.

Q Do you know anybody in Savannah by that name?

A No sir, I do not. I cannot remember the names of any of the deck hands.

Q Did you make up the time roll for this snag boat?

A No sir, Mr. Burnett made it up.

Q How was the payment made there?

A I think it was made from the time roll. I think Mr. Burnett made up the time rolls on the ten days reports and also at the end of the month.

Q You say you were present on the snagboat at this time, January, 1896?

A Yes sir, that is, at Ramsborn Creek.

Q Do you remember this man? (Pointing to pay roll).

A No sir.

Q This man? (pointing).

A No sir, I do not remember either of those men.

Q Any man on the roll?

A No sir, I do not remember any man on there except Mr. Burnett.

Q How long were you on the boat?

A I was there, I think, about ten days.

Major Raymond: What became of the time rolls upon which these payments were based? Were they filed in the office?

A Yes sir, I think so.

Q Who kept the time rolls on the snagboat?

614 A Mr. Burnett.

Q He was the assistant engineer?

A Yes sir, he was in charge of the work.

Major Adams: Was the time rolls for this boat for January, 1896, approved by you?

A No sir.

Q Was it certified by you in any way?

A No sir, it was not.

Q Did you ever see it?

A No sir. I was not in charge of this work at all. I simply went down after the work was begun and stayed on the boat so as to watch the operations. I did not have charge.

Major Raymond. You went there for instructions?

A That is all.

Captain Carter: You stated you were not required to examine them for the purpose of detecting any false vouchers. Was there any reason why you should?

Colonel Gillespie: I suppose you mean irregularity?

Captain Carter: Well, irregularities. Did you see anything at the time you were there that made you suspect that there were any irregularities or violations?

A I did not.

Q If you had suspected that there were any irregularities being made by a clerk, would you or would you not, have examined the matter?

A I would have examined them very carefully.

615 Q For what purpose?

A To determine whether there was any such irregularity and to call your attention to it.

Q You said you were not required to examine into the specific application or the making out of the rolls, and to determine whether or not each man whose name is on the roll,

worked. Did you, or did you not, however, have every facility, if you desired to do this, to have made such an examination?

A I did.

Q Did you or did you not think when you were there that it was necessary to have made such an examination from your experience there?

A No sir, I do not think I should.

Q Had you been disbursing officer, from what you saw there would you, or would you not, have accepted the statement of the Chief Clerk that a roll was correct?

A If the Chief Clerk had been my Chief Clerk for ten years and I had found him always correct in that time, I should have been willing to take his certificate.

Q From your experience with my Chief Clerk what was the opinion you formed as to his faithfulness concerning the duties entrusted to him?

A I thought he was faithful—I should say he was very faithful, that was my impression.

Q Did he make any statements to you at any time indicating, or were his actions such as did indicate to you, whether or not I believed everything he did was done properly? I mean in connection with his clerical work?

Major Adams: I don't understand that question.

(The last question was repeated by the stenographer).

A I don't remember whether he ever said anything to me or not about the confidence which you had in him, but my impression was that he thought you had very great confidence in him. That is all I can answer of that.

Captain Carter: You were asked whether or not you were permitted to have an opportunity to examine these bills. Did you or did you not have every facility in the office to examine them in every respect and examine everything that was done in that office, if you had desired so to do?

A Yes sir.

Q Did I, or did I not, give you the impression that I desired you to acquaint yourself thoroughly with every detail of the office?

A You did. I think this answers the question.

Major Adams: Did you say that you were left in charge of the office when Captain Carter was absent or not?

A I say I was not.

Q Do you know why not?

A No sir, except that I had just left the Academy a

617 very short time and I knew very little about the methods of the office.

Q At that time, in case of Captain Carter's death, who would have been in charge of the office?

A I would not like to say.

Q In case of Captain Carter's absence could you have taken charge of the office?

A I might have done so for a few days only.

Q The question is whether you could have taken charge of the office in his absence. Don't you understand that?

A I don't think I could sir.

Q Why not?

A Because there was a large amount of work there that I was not well acquainted with on the River and I should not have been able to say whether this work was properly done or not.

Q Who was able to say it?

A The Assistant Engineer.

Q Was he in the office?

A There were several in the office, the work was divided, each Assistant Engineer had charge of a certain part of the work. Some of them were not in the office; some of them were actually on the Rivers.

Q Whom did you understand was in actual charge of the office then, when Captain Carter was absent?

A No one was put in charge.

618 Captain Carter: I might state that I always remained in direct charge of the office.

Captain Gillette: Did Mr. Sterly impress you as being an honest man?

A Yes.

Q Did he impress you as being devoted to Captain Carter?

A Yes.

Q Much so, or very little so?

A Much so.

Q Do you think he would be loyal to Captain Carter if anyone said anything against Captain Carter, or Captain Carter was in trouble? Was that your impression?

A Yes sir, it was.

Q Was he a man of strong personality, or not? Strong character?

A I don't think that I have an opinion on that at all or did have.

Q Do you think from the impression you got that if Captain Carter told him to make any little irregularity in the office records, he would do it or not?

A Well, as a matter of fact, that never occurred to me, so that I don't think I would have said one way or another, and could not have answered that question at all, because it never would have occurred to me that Captain Carter would have suggested such a thing.

Q Did you think that he would do anything that was 619 not according to regulations in his clerical work and hide it from Captain Carter?

A No sir.

Q Did you think he was a man capable of any deep scheme which was to be worked out far in the future?

A No sir.

Q He seemed to have great confidence in Captain Carter?

A Yes sir.

LIEUTENANT THOMAS H. REES, was called to the stand and examined as follows:

Colonel Gillespie: Lieutenant Rees, will you please state to the Board the period during which you were assistant to Captain Carter?

A I was with him from early in November in 1889 until about the last of April in 1893.

Q Where was your office during those services?

A It was in the same building.

Q I don't mean the building, but the town?

A In the Southern Bank Building in the City of Savannah.

Q What was the nature of the duty required of you by Captain Carter?

A My duties were very varied. I did not have any special work to do all the time I was there, but went from one 620 work to another and made inspections of the work, made the annual examinations generally while I was there; made some of the more important surveys.

Q Did you have charge of any special work of construction?

A I did not have charge of it, I was detailed to lay out some of the work of construction and inspect it.

Q Lay out what kind of work?

A Some of it was the work on Savannah Harbor. I laid out the locations of some of the dams on the north side of the River by Long Island; I don't remember now just what they were. I could point out the place on the map.

Q You had no immediate charge of construction?

A No sir, except in the way of inspection.

Q Were you in charge of any work?

A Yes sir. I had the repairs, had charge of snag boats, the control of snagboat work on the Rivers for a part of the time.

Q Did you have charge of the construction of any work of importance?

A No sir.

Q Did you have any facilities for knowing what that work was?

A Yes sir.

(Lieutenant Rees was excused temporarily in order that Captain Black might add something to his testimony; but as Captain Black was not yet ready, Lieutenant Rees was recalled and examined as follows:)

Colonel Gillespie: What improvements were you familiar with?

Lieutenant Rees: I was familiar with all the work going on in the District.

Q Have you seen the specifications of the work that was carried on since you left there in 1895?

A Yes sir, I have seen these for 1896, but I did not have time to study them.

Q The specifications of 1896 for Savannah Harbor called for three different types of mattresses. Are you sufficiently familiar with the cost of such work in that vicinity to know whether the cost of these several types is relatively the same?

A I am sufficiently familiar with that work, and I should say—

Q Was it right and proper to call for a single price for the delivery—

A I did not finish my answer. I should say to the best of my judgment and belief the cost would be practically the same. Of course they might vary, depending upon the actual manner of construction, some variations being allowed by the specifications; one might be made to cost more or another

might be made to cost more; but practically, I should say,
622 that there was no material difference in the cost of those three types.

Q On reading those specifications, would you be able to determine what special type Captain Carter expected to use or wanted bidders to offer proposals for, and could you intelligently have bid without a conference with Captain Carter, or an explanation from him?

A I could not tell, of course, what kind he would expect. So far as the different types were concerned, I think I could bid a uniform price on those three and expect to make about the same profit out of whichever one was called for; but, I dont think I would bid on a work of that kind without having some conference with the officer in charge of it.

Q You make that statement on the ground that the specifications were obscure?

A No sir, I would not bid on any work without a personal examination of it.

Q I was referring to the clearness with which the specifications were drawn. The specifications for Savannah Harbor of June 6, 1896, say that the quantity of mattress work required for canvassing bids for Savannah Harbor would be 350,000 square yards. Do you think it right and proper for Captain Carter to increase this quantity to 1,360,000 square yards, the quantities of other required materials being correspondingly reduced, without the knowledge of the Chief of Engineers?

623 A I dont think it would have been if the extra amount that would be required was known as the time the 350,000 square yards was first exceeded, or if there had been any attempt to conceal from the Chief of Engineers the fact that this large amount was being used.

Colonel Gillespie: Do you find—

A I would like to finish that answer, Colonel. I know that the Division Engineer was interested in the work down there and had inspected it and knew the character of the work that was going on and was in accord with Captain Carter's ideas of it. I have heard him commend the work and he stated to me on one inspection that I was very fortunate to serve in a District where such important works were being carried on under such an able and energetic officer as Captain Carter. I believe, therefore, that there was no attempt or idea of keeping from the Chief of Engineers or Division Engineer the fact of this increase of the amount, and there could not

be inasmuch as it had to be reported every month, the actual amounts that had been used; and knowing that the Division Engineer, who afterwards became the Chief of Engineers (Craighill), was in accord with his purposes and aims and his policy on that work, I cannot see that there was anything wrong in not making a special report to the Chief of Engineers, of this fact of the increased amount under the circumstances.

Q When he had increased the amount four fold over 624 his authority?

A Not when those amounts were reported every month, and while I was there the Division Engineer was down every year, at least, making inspection and knowing just what was going on.

Q Does the District Officer get his instructions from the Division Engineer for conducting his work?

A I dont know whether he does or not; but I should suppose that the Division Engineer ought to have something to say in the construction of the work if he desired.

Q Who makes the project for the work?

A The District Officer.

Q Whose approval on that project is the authority for commencing and conducting the work?

A That of the Chief of Engineers.

Major Raymond: How was this increase made, all at once or little by little?

A It was made little by little, as the contingencies arose that required it.

Q When this increase over the original amount commenced—could it have been anticipated that the increase would be so large?

A I dont think that the amount could have been anticipated.

Major Adams: Mr. Rees, do the specifications under which bids are invited, invariably form a part of the contract?

A Yes sir, I believe they do, all that I have known of do.

625 Q In case that you may desire to increase the amount of material wanted, in case that you may find it necessary to order other things or other work done, is there a provision in the contract itself for the modification of it?

A There is, yes sir.

Q Who has to approve that modification?

A Any material modification has to be approved by the Chief of Engineers, I believe.

Q Do you know that?

A Well, I am sure that any material modification would have to be approved by the Chief of Engineers.

Q How can you modify a contract?

A By changing the character of the design.

Q Oh, I am talking about the contract, the legal instrument signed by the engineer and the contractor. How can you modify that?

A By a supplementary agreement.

Q Who approves that?

A The Chief of Engineers approves that.

Q The regulations require the Secretary of War to approve it?

A I did not know that.

Q Would it be proper, then, in case of putting in material, that cost less than the material provided for in the specifications, to make a modification of the original contract by a supplementary contract?

A Yes sir, if it cost less it would be proper.

626 Q In case you wanted to put in more material than is provided for by the contract, would it be proper to make such a modification of the contract?

A I dont see why a supplementary agreement would be required in that case if it is not any addition to it.

Q It is required, in fact, by the regulations; that is the only way you can modify it.

A I did not know that.

A In that way it would be brought to the knowledge of the Chief of Engineers, would it?

A Yes sir.

Q Is not that the proper way to bring it to his knowledge rather than by monthly report?

A I think that is probably the way that I would have brought it to the knowledge of the Chief of Engineers, because I would not have felt that with the amount of experience that I had at that time that I would like to have undertaken that responsibility on my own account in making that change; but, in Captain Carter's case I believe he felt that he had been allowed a large discretion. I know that he had, and I dont know that this was any more than he thought would be approved by the Chief of Engineers.

Q You understand that any discretion which is allowed the constructing officer permits him to modify a contract?

A No sir, not to modify it materially as to the manner of construction or as to the amounts.

627 Q Have you a definite knowledge of the kind of mattresses used in the work on Savannah River?

A Yes sir; I have.

Q Have you read the specifications that accompanied the different contracts?

A I am familiar with those of 1892 and I have just read over those of 1896. I have not studied them carefully but they appear to me to be much the same as those of 1892.

Q What form of mattress was used in this work?

A It was the third design of the specifications.

Q Did you see any of these mattresses?

A Yes sir, I saw them.

Q Where they built in accordance with the specifications for the third design?

A They were not all of them strictly in accord with the description given under the third design.

Q What was the departure from the specifications?

A Some of them were built in successive courses without stone between the courses, as a block of several courses with a single layer of stone on top.

Q Were the single mattresses built in accordance with the specifications?

A Most of them that I remember were. There was one design which I believe varied from it in the fact that the grillage was not used, was left out, the pole grillage. There was substituted for that several layers of fascines, I think
628 three or four in a width of 15 or 20 feet of wire, which was woven over and under the fascines as they were successively put into the mat.

Q What was the actual cost of the mattresses used compared with the cost of the mattresses specified in the contract?

A I cannot say definitely, but I don't see any reason to suppose that it would vary materially from the cost of the mattress specified in the third design, or of the others, which I think were about the same.

Q Did you ever make any estimate of the cost of the mattress here?

A No sir, I have not figured it out, I have not tried to figure it out accurately. I don't know as it is possible to

get a very close result without experience, without actually constructing them.

Q Have you a sufficient knowledge of it from actual contact with it to make such an estimate?

A I think I have. I could state a sum which I think would come fairly close to the cost of that kind of work.

Q Will you state it?

A I should say that the design actually constructed, that design with the wire substituted for the grillages, would cost in the neighborhood of 65 to 75 cents a square yard.

Q In answering one question you spoke about the work being carried on under the direction of the Division Engineer, is that so?

629 A Yes sir.

Q Do you know what the regulations of the Corps of Engineers provide in that matter?

A No sir, I dont remember exactly.

Q You seem to be in some doubt. There is a paragraph in the regulations that describes exactly the duties of the Division Engineer. Do you know what that is?

A I dont, no sir.

Captain Gillespie: I would like to ask Lieutenant Rees if he remembers at the time at the point in the construction when 350,000 square yards was reached? Do you remember how much was done and how much remained to be done under the project?

A No I do not.

Q Then you dont know that there might have been 350,000 yards more to do without any extra requirements?

A I dont understand that question.

Q The work might have been done or one-tenth done, or any other fraction. When 350,000 square yards had been used, if only a small fraction of the work projected had been completed, the officer would know about how many yards would be required, provided no excess, no undue requirements developed? You dont know when that point was?

A I dont know definitely. I probably did know at the time just about the time when that amount was reached.

Q Supposing it were about half done, the work was about half done. Would you consider it, if you were doing it, 630 your duty to make a formal report to the Chief of Engineers for authority to exceed the amount, as the requirements would then indicate?

A I dont know that I could tell when the work was half done whether any more would have been required or not.

Q Assume that you have already used 350,000 square yards and the work is half done, or less, or a little more, would you consider yourself justified then in going on using these enormous amounts without making a special report to the Chief of Engineers?

A If I could have foreseen that enormous amounts would be required to finish the work I dont think I would have gone on without making some special report.

Q Could you avoid foreseeing that a large amount would have to be used beyond 350,000 yards?

A Well, that would depend upon the character of the work which was yet to be done. If that work was in the specifications and it was the original intention to construct it largely of stone, and it was found when the work was begun that fascines would be more satisfactory and that additional work was required, I think that the amount might have been exceeded without special authority to do so, in as much as the specifications provide that these amounts are only approximate and may be increased or diminished.

Q On what do you base your estimate of 65 to 75 cents for the wire woven mattress?

631 A It is principally a matter of judgment with me because I have not figured accurately on that, but just looking at the work that would have to be done to make those mattresses; and comparing them with the other kind, which I have figured on, I cannot see that it would vary materially from them.

Q Did you make any estimate as to the cost per square yard of these thick mattresses, eight or ten courses thick?

A No, I have not tried to figure on the actual cost.

Q Then your figures simply apply to those woven wire mattresses?

A That is what I was asked to give and what my figures refer to.

Q Was a small or large percentage of the mattresses used, of the woven wire type?

A Up to the time I left there a small percentage of the mattresses were of this woven wire type.

Q Are you prepared to give any estimate of the cost per square yard of the mattresses used in many courses?

A I can give my judgment on it.

Q But you have no facts to base it on?

A Oh yes, I have facts to base it on. I have figured on similar work of that character and I can state closely what that character of work would cost.

Q How much do you think it would cost per square yard?

A That would cost from 70 to 80 cents a square yard for mattress of that design, the design actually used.

632 Q What wages for common labor do you allow in that amount?

A The labor there costs from \$1 to \$1.25 a day.

Q That is what you figured on?

A Yes, \$1 per day.

Q A day of ten hours?

A Yes.

Q What do you estimate the cost of the plant required to do the work?

A To do all the work required?

Q To do that work of putting in those mattresses referred to in your estimate of 70 to 80 cents per square yard.

A About \$30,000.

Q What do you estimate the cost of brush per thousand yards of mattress, the brush growing or per acre of brush, in the estimate which you used?

A Well, I don't know that I would figure it in any of those units that were given.

Colonel Gillespie: I think you might suspend all that.

Captain Carter: Do you think that the type of mattress actually used was any cheaper for the contractor to construct than the types mentioned in the specifications, assuming that this type would be different from that type?

A I don't think it did differ materially in cost from this.

Q If it were intended to permit the contractor to use the cheapest form of mattress that would accord with the specifications, which form do you think would probably be selected?

633 A Well, of the brush mattress, I think the second design could be constructed perhaps a little more cheaply than the third design allowing for the minimum requirements which are there specified. If the maximum requirements specified were met, it would probably not be cheaper.

Q Have you been around the mattress camps and on the works in Savannah Harbor, and are you thoroughly familiar with the conditions attending the work under my charge during the period you were my assistant?

A I have been in the mattress camps and on the works

frequently and I am thoroughly familiar with the work carried on.

Q Do you think that the type of mattress actually used by me does differ materially from the third design mentioned in the specifications?

A I don't think it does differ materially as to cost. Of course leaving out the grillage and substituting wire is quite a different method of construction.

Q I mean the method of building the mattresses on top of one another?

A No, I don't think that differs from the method mentioned in the specifications. Those of 1892 I remember, stated in terms that one or more courses of brush mattresses would be used and some stone. It does not say that the stone would be on each of the mattresses.

Q When did you last see one of these mattresses?
634 A I saw them right up to the time I came away; in 1893, I think the last time I saw them was when I was sent down to make an inspection when Mr. Ensey was Inspector and there was apparently something wrong with his reports, which did not tally up. I was sent down by you to find out what the trouble was and to see if there was anything wrong in his inspections, whether he was favoring the contractor, and to ascertain just what was the difficulty.

Major Adams: What year was that?

A That was in the spring of 1893, a little while before I left.

Captain Carter: Do you know of any instance where any Inspector would have been permitted in any way to favor a contractor?

A I know of no instance. I am sure in fact that any attempt of any Inspector to favor a contractor would have led to his immediate dismissal. I know that one was dismissed because he was not on the ground where he could see what was being done by the contractor.

Q What inspector was that?

A Inspector Felber.

Q You have stated that the type actually used did not cheapen the cost to the contractor. Do you think that the specifications authorized, therefore, the minor modifications that I have made without entering into a supplementary contract?

635 A I do.

Q As a matter of fact, familiar as you are with the

conditions existing there, would it have been desirable to have attempted to enter into a supplementary contract, in your opinion?

A Well, I think in general, it was rather a risky proceeding to try to enter into a supplementary contract. If it was intended or desired to get a lower price, I believe the contractor would immediately jump at the chance to raise his price, if he was told there was going to be any change made in the construction or in the amount.

Colonel Gillespie: Do you know what a supplementary contract is

A It is an agreement entered into between the United States and the contractor to do certain extra work or to do the work in a little different manner at a different price from that agreed upon in the original contract.

Q How would that give the contractor an opportunity of raising his price without a mutual agreement with the engineer?

A It would give him an opportunity to demand a greater price or else not enter into a supplementary contract.

Captain Carter: Are you familiar with the locality and the cost of construction of similar work at Cumberland Sound?

A I am.

Q Are you familiar enough with it to express an opinion as to whether or not \$1.10 per square yard for mattresses is reasonable or excessive?

A I think I am familiar enough with that, I made an estimate of the cost of improving Brunswick Harbor by works of similar designs to those at Cumberland Sound. I have figured closely on the cost of that work and I believe my estimate for brush mattress in the large quantities that would be required, was \$1. per square yard.

Q The same kind of mattresses?

A The same kind. I think I stated in my report that that was contemplated—the same kind of mattress to be used in all work as for Cumberland Sound.

Q Are you familiar with the character of work of fascines entering into the construction of these mattresses?

A I am.

Q Were they properly choked?

A Yes.

Q Will you describe the form of choker used

A The one I saw in use down at Cumberland Sound was

a rope with a loop in each end, long enough to go once and a half about around the bundle of brush, and two levers were placed in the ends of the rope, and by bearing down the rope was drawn tight and the fascine choked.

Major Adams: Will you give the date of that, approximately?

A I cannot remember just when I was down there. I was down there frequently on surveys and examinations.

637 Q How long ago?

A I cannot remember one occasion.

Colonel Gillespie: Major Adams, evidently, wants the year, not the special month.

A The one occasion that I particularly remember was when I was down there making an annual examination of the work done there and I think it was the last winter I was there.

Colonel Gillespie: That would make it 1892 or 1893.

A Yes sir, it might have been the year before, but it seems to me that that was the time when I remember of being there.

Major Adams: Have you any knowledge of the mattresses used since 1893?

A No sir.

Captain Carter: What measures the value of a fascine for this purpose? Its bulk or its weight?

A It is bulk that is all that is required.

Q Can any intelligent comparison or estimate of value be made by comparing its weight?

A No, I don't think that element enters at all into the question.

Q As a matter of fact, using, for instance, myrtle or black jack, will, or will not, the weight vary between two and three hundred per cent, according to the character of the material used?

A It would vary quite largely. Black jack is heavy and myrtle is light.

638 Q Suppose the fascines were made only to contain woody matter. Would that, or would it not, be a difficulty in this kind of work?

A I don't think it would. I think the advantage of the fascine is that it will catch and hold the sand and sediment in the water and fill up with a material which is much more permanent than the woody fibre, and that the extra bulk that is obtained in this manner is so much gained and saved without cost.

Q Can any intelligent estimate as to the relative value of two mattresses made of brush fascines be made by comparing their weight

A Of their cost or value?

Q Of their value in the work. Can any intelligent estimate of the cost be made in that manner, the wood varying in weight?

A No, it would cost just as much to make fascines if the material was heavy as it would if the material was light, the amount of material being the same.

Q Are you familiar with the class of stone known as Florida stone?

A I am.

Q Will you state whether or not in your opinion it is a desirable stone to use at Savannah or Fernandina?

A I think it is a desirable stone to use for the reason that it becomes covered in a year or two with a shell growth which binds the stone together and increases the volume of the work; whereas harder stone, like granite or limestone, compacted limestone, do not acquire the shell growth but remain smooth and slippery and more liable to be displaced by waves than the lighter stone after it has been bound together by a growth of shells and barnacles.

Q Is there another reason why it is more desirable—on account of its specific gravity being less?

A The lighter stone would, of course, cause less settlement of the work.

Q Taking the actual cost to a contractor of fascine mattress, brush mattress, what do you consider would be a fair allowance for contingencies and the contractor's profit? In other words, what would you consider would be a fair increase over the actual cost?

A To include risks and profit?

Q Everything.

A On an ocean bar I should say 25 per cent would be not at all excessive.

Q May not this vary within very wide limits?

A It may.

Q Does the price bid by a contractor, if low, necessarily indicate that the contractor is making a profit on the work?

A It does not always.

Q Does the price, if higher than the former bid, necessarily indicate that it is excessive?

A No, it does not.

640 Q Were you present when any proposals were received for construction work in Savannah?

A At the opening, do you mean? Yes.

Q Have you ever heard of any contractor or prospective bidder, who felt that he had not received thorough information, that there was any unfairness whatever in any respect?

A I have never heard any complaint of any unfairness or lack of information from work down there.

Q Are you familiar with the method of keeping accounts in the Savannah office?

A No, I am not very familiar with the method there. I was not in the main office very much. I know in general the method.

Q Were you in the office enough and in the District long enough to know what would have occurred had any clerk, anyone employed there, done anything improper, had that came my knowledge?

A I believe that any dishonesty of any kind on the part of any employe in the District would have led to his immediate dismissal. I feel sure that no connivance at wrong, no favoring of the contractors, no irregularities which involved dishonesty of any kind, would have been countenanced by you. I know of a case in which Mr. Sterly was threatened with dismissal but on his explanations and excuses he was pardoned at the time with a warning that if anything of that kind happened again, he would be dismissed.

Q What was that?

641 A That was a case that arose in the Cumberland Sound work where Mr. Sterly had made a mistake in not deducting the ten per cent from the monthly payment of the contractor. In order to cover his mistake he wrote down to the Inspector at Fernandina asking him to increase the amounts that he had reported by an amount sufficient to make the payment a proper one with the ten percent deducted. That was done by the Inspector.

Q Who was the Inspector?

A I dont remember who was the Inspector down there then, whether it was Coulson or Cooper.

Colonel Gillespie: What year was this?

A I think in 1892. (Addressing Captain Carter). It came to your knowledge through the contractor, I believe. You told about it afterwards. You spoke to him about the

large amount of work he had done and he answered that he did not know that he had done an unusual amount; that he had done about the usual amount, and it came out from that conversation that the amount that he had supposed had done in was different from the amount that had been reported to the office.

Major Adams: What was the amount of money involved in that? What was the overpayment?

A I dont remember, but it was a good month's work for that contract. I dont remember what the two amounts were. I figured up just what the contractor had actually been paid and just what he should have been paid, and then found that the two amounts finally agreed after it had been adjusted 642 and Captain Carter in his monthly report stated that through a gross clerical error in his office, this mistake had been made and that the payment for the succeeding month would have to be corrected to allow for the over payment of the month before.

Major Adams: Do you say that the Chief Clerk, Mr. Sterly, attempted to make up a voucher with an increased amount of work, or did he make up such a voucher?

A He did on reports from the Inspector that he got by writing to him and asking him to put in some of the succeeding months work of the previous month, so that his error might not be detected.

Captain Carter: So as to keep his error from me?

A Yes.

By Major Adams: Q Who first detected it?

A Captain Carter, by this remark of the contractor. He told him that he had put in a big months work down there at Fernandina and he said no, he did not think he had done any more than usual, and Captain Carter looked up the records and found the error.

Q As I understand you, then, Mr. Sterly then made up false vouchers?

A Yes sir.

Q What year was that?

A I think it was 1892. The monthly reports will show just when it occurred.

643 Major Raymond: As I understand it, Mr. Rees, his intention was not to make this voucher a permanent one, but to take it out of the month succeeding and put it back where it did not belong, in the preceding month?

A Yes sir, that was the change.

Captain Carter: So as to keep his mistake from my knowledge?

A Yes sir.

Captain Gillette: One or two little points: you testified a moment ago that you thought lighter stone was better for work of that kind, what do you mean by that kind. That is, are you limiting this to the Savannah River, or would you use the lighter stone for a breakwater say at the mouth of the Savannah Harbor?

A I would use it in a breakwater at the mouth of the Harbor, if I used brush in the mattresses.

Q Do you think lightness is a good thing to resist wave action?

A If it will stay until it is bound together by shell growth it is good for that purpose, not on account of its lightness, but on account of the other fact.

Q Do you think from your knowledge of the conditions, do you think it would be safe to use it in an exposed place, like a breakwater at the mouth of the Savannah River?

A I do. I know it has been used in Fernandina in exposed places.

644 Q That is a different place.

A The exposure is just as great.

Captain Gillette: Lieutenant Rees has submitted an offhand estimate of the cost of this mattress work. We have several estimates that are submitted by the subordinates and employes that I found in the office, which seem to be radically different from Lieutenant Rees's estimate. I would like to ask if the Board could not request Lieutenant Rees to make out his estimate in detail, the others have done so. Lieutenant Rees should be asked to take an eight course mattress and detail an estimate of all the elements of cost that enter into its construction. Their estimate, as submitted, was 47 cents per cubic yard (square yard) for brush work, mattress work built like that photograph that I submitted of the one that was built under my charge. They made 47 cents per square yard for that.

Major Raymond: Lieutenant Rees only estimated on the design actually built previous to 1893. Your figures were for 1896.

Captain Gillette: Their estimate of 47 cents was for an eight course mattress, trimmed, perhaps untrimmed, tightly choked brush, choked until the sticks were solid. Lieutenant Rees submits an offhand estimate of 70 to 80 cents per square

yard for very loosely packed brush, as I understand from my subordinates. Now I would like to ask Lieutenant Rees to simply state the elements, the cost of everything upon which he bases that estimate, so that the Board can conclude what was a fair cost, so that they can go into details and see where the cost comes from.

Colonel Gillespie: Is it the wish of the Board that the estimate be made?

One Of The Members: It is.

Colonel Gillespie: Will Lieutenant Rees make it if it is convenient to do so?

Lieutenant Rees. I will. May I ask when it is desired by the Board?

Colonel Gillespie: Just as soon as you can prepare it.

A I intended to go back to West Point when I got through here.

Captain Carter: Do you know Mr. Giesler?

A I do.

Q What opinion have you as to any estimate of cost of any construction made by Mr. Giesler?

A I think Mr. Giesler was a very unpractical man, if I may use that term. He was no good at all in the field with men. He was always getting into difficulty with them, starving them and having rows with his assistants, and I don't think that he has sufficient judgment and common sense in the practical details of construction to make a very close estimate of the cost.

Colonel Gillespie: What was he good for?

A He was excellent as an investigator working up the results of notes of surveys or of tidal observations, and in studying up subjects which were of a more scientific nature, he was very valuable at that.

Major Raymond: Do you think he was theoretical, not practical?

A I think he was, that was my opinion at the time I knew him.

Captain Carter: Do you remember Mr. Hale, an Inspector by the name of Hale?

A No.

Q Do you remember a Mr. Cooper?

A I do.

Q Could you form an opinion as to what any estimate of cost of Mr. Cooper's would be worth?

A Well, I dont think I would have taken his opinion if it had differed from my own.

Captain Gillette: Was he a practical man?

A I remember him as a good man to handle boats, ropes and tackles and things of that kind, handling lighters on the River, and I think he was a good man for that kind of work. He had been engaged in that kind of work a good deal and that was the capacity in which I saw him. From his reports that were submitted of work that he had done, I did not form a very high idea of his intelligence. His reports, I think, were not submitted by Captain Carter, nor included in his own reports, but were re-written either by himself or by me.

Captain Gillette: Do you think he earned his salary?

647 A I think he did.

Q Doing what?

A As in the line in which I have stated, in handling large forces of men, large gangs, and in directing the construction of the work.

Colonel Gillespie: Was he a reliable man?

A I always thought he was.

Q Upright and fair?

A So far as I knew.

Captain Gillette: Was he a practical man?

A Yes.

Q Now, your objection to Mr. Giesler as an estimator of the cost of mattress, is that he was unpractical. What is your objection to Mr. Cooper as an estimator of the cost of brush mattress?

A Simply that I dont think that he is a very intelligent man, except in just the lines of work he has had in his charge.

Captain Gillette: What opinion did you form of Mr. Sterly's character? Was he honest?

A I always supposed that he was honest except as evidenced by the case which I have cited. I was disappointed when I found out that about him.

Q Did he appear to be fond of Captain Carter?

A He did.

Q Did he seem to have great confidence in Capt. Carter?

A He did.

Q After the event that you spoke of, do you think he
648 would have dared to put anything on his record that he submitted to Captain Carter that was not true in accordance with its appearance?

A Well, that all depends on what he thought the chances of detection were. I dont suppose he thought that there was any chance of detection in that case.

Q Having been detected in that case, do you think he would dare to repeat it?

A I dont know how that would affect him.

Major Adams: Do you know of his having made up any false vouchers or fictitious payrolls?

A No sir, I do not.

Q Did you ever have the opportunity to examine his payrolls and vouchers in order to find out just that?

A No sir, I have seen them and looked over them, but never with that object specially in view.

Captain Carter: Could you have done that if you desired?

A Yes.

Q Did you or did you not have ever facility to examine everything in the office?

A I did. In fact I did at one time, when I first went down there, go to the Chief Clerk and ask him to show me how the papers were kept and go through them with me.

Major Adams: What methods did you have in the office at that time to verify the accuracy of the pay rolls?

A I dont know that there was any check except the 649 reliance upon the Assistant Engineers and the clerks.

Q Was it possible for Mr. Sterly to make up a fictitious payroll himself?

A I think it was possible, yes sir.

Q Did you have time rolls certified to accompany every pay roll?

A Yes sir.

Major Adams: Certified by him?

A By the Assistant Engineer or the foreman on the work.

Q How about the people employed in Savannah?

A I dont remember who certified to the rolls of the employes right there in the office.

Q Did you ever know or hear of articles being purchased for the office or for the United States and payment made by use of the payrolls?

A No sir, it never came to my knowledge. If that was done I never knew anything about it.

Captain Carter: You were there four years?

A Nearly four years, yes sir.

Q In that time would you be able to form an opinion as to

what would have been countenanced by me in the office? Would you or would you not?

A I did. I had a very decided opinion as to that.

Q Do you or do you not know whether or not, if I had known it, any irregularities whatever on the part of my employes, would have been permitted?

A I am perfectly certain, so far as my own impressions and my knowledge of Captain Carter are concerned, that no irregularities of that kind would have been permitted.

Major Adams: What is your impression as to Mr. Sterly, the clerk?

A I thought him to be a good clerk and to have a good knowledge of papers, I never had a high opinion of his character.

Q Was he a man to be trusted?

A I never saw anything except that case I have mentioned, to cause me to doubt or to suspect that he could not be trusted.

Q Did you know Mr. Connolly, also employed in the office?

A Yes sir.

Q What is your opinion about him? I believe there were three of them. Do you know all of them?

A I remember two of the Connollys. I remember M. A. Connolly and J. B. Connolly.

Q What was the other Connolly's name?

Captain Carter: M. N. Connolly.

Q What was your opinion about him, M. A. Connolly?

A I think he was a very good clerk, a very efficient man. I was never thrown with him so as to have any knowledge personally of his character. I have always thought him to be a good honest man.

The Board adjourned until 2:30 P. M.

651 The Board met pursuant to adjournment, present the same as before.

MR. WILLIAM W. HEGEMAN was called to the stand and examined in behalf of Captain Carter, as follows:

By Captain Carter: I stated in here (referring to the stenographer's minutes) on page 254 of my book, in answer to a question as to whether I had ever received a letter or

telegram from Mr. Hegeman, I said that I did not remember, but that I had met him and knew him some years ago, in 1891 or 1892 when you were connected with the East River Tunnel Company—I don't know whether you were connected with the East River Tunnel Company—is that correct?

A Well, I had something to do with the Company, merely as a consulting engineer.

Q I was asked if you were associated in any way with the Atlantic Contracting Company or with the individual members of that Company, and I said I thought they contemplated hiring you for some work they were doing?

A That is a mistake, I never had any connection with them whatever.

Q Then I was asked if I had any business relations with you and I said that I may have had some correspondence with Mr. Hegeman because he wrote to me, or I saw him, I feel absolutely sure, and I was asked (reading from page 259, 652 stenographer's minutes):

“Q You have had no business relations with any one of them?”
and I said:

“A No I contemplated at one time having some business relations with Mr. Hegeman; I also contemplated having some business relations with A. M. Newton, but no money that I remember has ever passed between Mr. Hegeman or Mr. Newton or between any member of the Atlantic Contracting Company, Hughes, Bangs, Gaynor, Greene and myself.”

I said in here that I contemplated having some business relations with you, do you remember anything about that?

A Why, there was some talk one time several years ago in relation to some railroad which never got further than a sort of a general chat about the proposed works and the works themselves never materialized.

Q At what stage did the talk occur?

A Why, at one time we had a matter up in southern Ohio, a partially completed road which I endeavored to finance and complete, and the matter came up something like this:

It was proposed to have another railroad guarantee the bonds, if possible, and I saw some of the officers in relation to that and I think, at my request, Captain Carter saw one, or two officers possibly, or another corporation in relation to guaranteeing these bonds; but it was never consummated, never carried out.

653 Q Was Mr. Gaynor, Mr. Hughes, Captain Greene or Mr. Bangs associated in any manner in this matter?

A No, not at all.

Q I was asked if I had ever received a letter from yourself calling for checks or for payment, and I said:

"For the Atlantic Contracting Company? Not that I remember of. I remember Mr. Hegeman but I don't remember his having any connection with the Atlantic Contracting Company."

Do you remember anything about that matter?

A About the check? I don't remember writing you. Possibly I might have telegraphed you in relation to a check.

Q What check?

A As I understood it at the time, it was a check in payment for some contract work at Fernandina of Gaynor, of one of the Gaynors, which was desired here in New York. I think Captain Greene spoke to me about it. He was going away, he asked me to telegraph you or write you, and I forget which it was, but my impression is that I telegraphed you in relation to sending on the check here for the Fernandina work. As I understood it it was a check for the current work, the monthly estimate check.

Colonel Gillespie: Why should Captain Greene ask you to attend to it?

A I had a desk in one of the offices of the Captain and he spoke to me when he was going away and he asked me to attend to it for him.

654 Colonel Gillespie: Were you partners in any enterprise that would justify him in asking you to do that office, that favor for him?

A Not at that time, but I think in less than a year we were interested together in a contract, that is, Captain Greene and myself.

Colonel Gillespie: A Government contract?

A No sir.

Captain Carter: I was asked concerning a company called the Empire Construction Company a question in which it was stated that a certificate, number 10, five shares I think it is, W. W. Hegeman: I was asked: "Is this the same Hegeman that I was asking information of yesterday?" Do you remember anything about that?

A Why, I believe I did have five shares of stock, or some shares of stock in the Empire Construction Company when the Company was organized, some stock in the regular shares of the Company—enough for the purpose of organization, merely nominal stock.

Q Have you that stock?

A No, I have not.

Q Have you ever had it?

A No.

Q I was asked about what the Company was organized for and I said what I thought. I was asked on page 260:

“Do you know anything about the organization of the 655 Empire Construction Company?” I said, as I understood it, the Empire Construction Company as an organization is not in existence. I don't know anything about the details of the business. I only know that they talked of organizing it for the purpose of building the Adirondack Railroad.

A No, the Adirondack road was not built under the auspices of the Empire Construction Company at all. My impression is that it was organized for the purpose of building a sewer somewhere, either here or in New Jersey.

Q Do you know who the stockholders in that Company are?

A I only know Greene is interested. He was President, I think. I never had anything to do with the Empire Construction Company, so I don't know much about their affairs.

Q Have we ever had any business relations?

A You and I?

Q Yes.

A None whatever, none at all, so far as I remember. I remember asking you to see a manager of a railroad corporation once in behalf of a matter in Ohio, and further than that—that in fact is as far as it ever went. That is the only relations that have ever been between us.

Q Have I ever had any interest in anything that you ever have been interested in?

A Not a thing in the world.

A I think that covers all the case, as far as I know.

Colonel Gillespie: You spoke about that Adirondack 656 Railway, did you build any of that road?

A Yes, sir, we ballasted some of the road.

Q You say “we”. What Company was that?

A Captain Greene and myself originally; afterwards a third man came in.

Captain Carter: Would you mind saying who the third man was?

A No, certainly not. It was John F. Gaynor.

Colonel Gillespie: How were you brought in contact with the owners of that Railroad?

A Me personally?

A Yes, or as a company or as a partnership.

A Well, one of my old men, an old foreman, a superintendent of mine, was employed on the construction of the road, the grading, and through him I learned of certain work that was to be done, namely, the ballasting, and in the ordinary course of business I began working it up to a point where a proposition could be made.

Q What year was that in?

A In the spring of 1892. I secured a contract.

Q Do you know whether Captain Carter at you request wrote any communication which brought you in contact with the President of this Road?

A No. I am quite sure he did not.

Q Did he write you any letters of introduction to the President of the Road or any of the Directors?

657 A No, not at that time. Later on I think I had a personal letter to a Mr. Rossiter which I never used.

Q What was that for?

A That was for the old Ohio matter which came up again. Originally, I failed to get the bonds endorsed and after a lapse of two years, perhaps more, I undertook to have a traffic contract made in such a way as to strengthen the securities as much as possible. It was in relation to leading up to a possible contract that I asked for a letter to Mr. Rossiter.

Q Will you explain who he is?

A He is one of the financial officers of the New York Central Road. The point I wished to gain was a traffic arrangement between what was known as the Big Four Road and this little road in Ohio, but I succeeding in gaining what I wanted without having to use Mr. Rossiter's letter, or rather Captain Carter's letter to Mr. Rossiter.

Q Don't you consider that a business relation?

A No sir, I should hardly consider it more than a personal matter.

Q Was Captain Carter associated with you in any way in that matter of which he wrote?

A Not at all, sir, so far as money was concerned.

Captain Carter: Did I write to you or speak to you at any time in behalf of another gentleman who was closely connected with some of the Vanderbilt enterprises, suggest-

658 ing that it might be possible that we could form a business association, or do you remember?

A Yes, there was some talk, but it never came to anything.

Q Do you know who I mean?

A Yes, I know what you mean without stating who that gentleman was. I would like to say this—

Captain Carter: You spoke to me as to having seen General Husted. Is that the gentleman referred to?

A Yes.

Colonel Gillespie: Who is he?

A I think he was an attorney, or directly connected with the Hudson River Road in some way or other. It was in relation to possible work if it came up.

Captain Carter: Did anything ever come out of it?

A Not a thing.

Colonel Gillespie: Was it a work in which Captain Carter was expected to be associated with you?

A Possibly.

Captain Carter: Was it contemplated that there should be anyone else besides ourselves in that enterprise, in case I became associated with the work?

A Well, now I don't recollect as to that, it is so long ago.

Colonel Gillespie: Was Captain Greene expected to be associated in it?

A No. No reference was ever made to Captain Greene with reference to this at all.

Q You have stated that the certificate of the Empire Construction Company for stock was not in your hands? It never came into your hands?

A No, never.

Q Did you pay any money on it?

A No sir.

Q Was there any money put into this company? Were not certificates issued?

A I believe there were certificates issued.

Q Without consideration?

A I don't know, they were not delivered to me. My connection with the Company arose something like this: Captain Greene said to me one day, I will put some stock in your name for the purpose of carrying on the organization, and that is all I know about the Company.

Q Did he ever call upon you for any money?

A Oh no, never. I never had one penny's worth of relation with the Empire Construction Company.

Q Did you have any business associations with any enterprise in which Captain Carter was associated later?

A Never.

Q Or Captain Greene?

A Captain Greene and myself were partners in a piece of railroad work.

Q Are you partners now?

A No sir, never were except in carrying on this one piece of work.

660 Q Captain Carter: How many years ago was that?

A That was the summer of 1892; say the working season of 1892.

Q Have you had any relations with him since?

A Not any at all.

CAPTAIN WILLIAM M. BLACK and CAPTAIN DAVID DuB GAILLARD, were re-called and examined as follows:

Colonel Gillespie: Captain Black, you were requested yesterday to kindly prepare certain estimates for the use of the Board. Have you got the results of your work?

Captain Black: Yes. They furnished me certain reports and a drawing, a tracing. Those were taken as the basis or as a description of a mat called in the reports, mat number 3-old style.

(Captain Black read in evidence a detailed estimate prepared by him, which is marked file No. 99.)

Captain Black: (Reading the last few words of his estimate) "3,332 square yards or 33.8 cents per square yard."

Major Raymond: That is the number 3 design?

Captain Black: Number 3, old style, as it was called in Mr. Twigg's report.

BOARD FILE 99.

Capt. Wm. M. Black's estimate of cost of mattress referred to Board Record p. 660.

Note.....1.

In Mr. Twigg's report of Aug. 5th, it is shown that the total height of 8 course mattresses varied from 7.9' to 11'.

In this total height there were 18 layers of poles, of an average diameter of, say 3', or 4.5', of solid poles.

In making the following estimate the fascines were taken as 12" in diameter and the number calculated for in each layer was assumed to equal the number of linear feet in the mattress dimen. (?) perpendicular to the fascines. The number thus assumed is probably greater than the number actually used in construction, and this would make the estimated cost too great.

Mat. No. 3-8 course mat.
(old style)

4 courses 83'x49'

4 " 70'x49'.

Grillage poles—8' intervals.

4 lines for 49'

gencies 125.

\$1,127.82

3,332 sq. yds. or 33.8 cents per sq. yd.

661 Captain Carter: The kind it is claimed that I built!

A It is claimed to be that. Now, Captain Gaillard has worked out entirely independently from me some figures on this same mattress and I would be glad to have you hear him before you go on, if you will.

Colonel Gillespie: You thoroughly understand what you mean when you say, in general terms, mattress number 2 and number 3 cost 60 cents?

A Yes sir.

Captain Gaillard here read in evidence his detailed estimate, which is marked file No. 100.)

BOARD FILE 100.

Captain David DuB. Gaillard's estimate of cost of mattresses, referred to Board Record p. 661.

Cost of mats as reputed to have been built at Fernandina, Fla., according to data furnished by Mr. Marion Twiggs, Ass't. Engr., Aug. 12, 1897, i. e., that the ratio of the weights of the old and new style mats per square yard was 2.27 and that this ratio represents the relative amounts of brush used in the two styles of fascines, other quantities being practically unchanged, and the further assumption that the cost of the two styles of fascines varies as the quantity of brush contained in each.

Labor and materials assumed at prices paid at St. Augustine, Fla.

Cost of fascine mat number 3, Aug. 1897.

	sq. yds.
4 courses 83' x 49'	=1807.6
4 " 70 x 49'	=1524.4

3332.

Assuming that fascines lie one ft. apart from centre to centre and average one ft. in diam.

29988 lin ft fascines at \$1.40 per 100 ft.	\$420.
Grillage poles, unpeeled	60.
1250 lbs. spun yarn at 11 cts	138.
1000 lbs. wire at 4 cts	40.
Labor of assembling mattress	265.
Cost of towing, launching, sinking and contingencies	125.
Supervision	75.

3332 sq. yds=

Cost per sq. yd=0.337

=34 cts.

\$1123.

Labor 15 cts. per hour.

Cost of same mat as before assuming that the fascines as said to have been put in the mat are to tightly bound fascines, as regards density of contents, as (6.56) : (11.96) or

allowing for diam. of fascines, the cost compared with those made at St. Augustine is as 41:107 or as 1:2.61.

Above data is from amount of compression stated by John M. Hall, Inspector, Aug. 17, 1897.

29988 lin. ft. fascines at \$1.21 per 100	\$363.
Grillage poles, unpeeled	60.
Spun yard as before	138.

Labor assembling mattress, 15 cts per hr	265.
Towing, launching, sinking and contingencies	125.
Supervision	75.
3332 sq. yds.=	

\$1066.

Cost per sq. yd.=32 cts.
Oct. 13, 1897.

D. D. GAILLARD.

Colonel Gillespie: Taking all the possible variations of change, you don't think you have varied more than ten per cent from the actual cost?

A No sir, I don't think so. I think that cannot be very much out of the way.

Captain Carter: You figured out in one way that the cost would be proportionate to the displacement, or in other words, to the weight. Suppose you were building those fascines; in one case you built it, say of myrtle, and in another case you built it of black jack, the weight being as 1 to 3, would that be a true guide?

A That would make a very great difference.

Q You stated another thing. You assumed those fascines uncompressed to be one foot in diameter and stated that when built into the mattress they would still occupy one foot in horizontal space, each one?

A I made that assumption.

Q Do you think an uncompressed bundle of fascines crowded into a mattress would occupy as much space?

A I did not assume it to be an uncompressed bundle. I used the loosely pressed fascine and I did not know exactly what space it would occupy and I took a foot as probably the fairest.

Q You said about the cost of making a fascine—how will the cost compare in making the same size fascine with two

different qualities of brush, one brush not carefully trimmed, similar to the brush, to the twigs used in making military fascines, and the other brush lying out there loose of the character used on the South Atlantic coast?

A The more regular and straight the brush is, the easier it is to choke it.

Q In other words, the labor is less on that than it would be on the other brush?

A Yes.

Q Do you know what the actual cost of making fascines is?

663 A For the same diameter?

Q Do you know what the actual cost of making fascines out of perfectly smooth poles is?

A No, I never made any except out of the brush that we find on the Florida coast.

Q It is a fact that it takes about five men an hour and a half at 15 cents an hour to make one of those fascines?

A I don't think so. I base that on the reports from West Point of the military engineer and it says that five men in an hour can make a fascine. My recollection from experiments at West Point is just about an hour. That is for the labor alone. Then reducing it as he says, makes it 75 cents for a fascine for the labor in the easier constructed fascine. I made about 100,000 lineal feet of the other, and the greatest number of them I actually saw made, as I was a young assistant.

Captain Gillette: Did I understand Captain Gaillard to say that the labor in making fascines out of trimmed poles would be greater than the labor of making a fascine out of a bundle of brush, or less?

A I said a fascine of straight brush. The more regular and straight the brush, the easier it is to lay it in the rack.

Q Captain Carter: May I ask Captain Black which he considered the most reliable guide in getting the cost of a fascine mattress; to do a certain amount of that work and

664 take the actual money paid out for that work and then take the number of cubic yards and find out from the total number of cubic yards, dividing the total amount of money by it, find the amount per cubic yard, or his estimate?

A Make it clearer.

Q Which is the most reliable guide, your estimate of cost,

or the actual cost based upon the actual amount paid out for such work?

A I would say neither. You are resting on too many assumptions. I have found that there is the greatest possible difference in fascines. I would have to know what the fascines were.

Captain Carter: I say the same fascines. Which would you consider the most reliable, an estimate of cost on a mattress made as you have made it, or what you found out to be the actual cost after you had made a certain number of them from the money you had paid for them?

Captain Black: I made out the estimate for them from what I found them to cost.

Q Suppose you go out and built it and put out a certain amount of money for it. Which is the most reliable?

Colonel Gillespie: Would you prefer your estimate of the actual cost to the actual cost of the work by somebody else?

A I would prefer my estimate unless I had the making of it. I would not take anybody else's sayso about the making.

Colonel Gillespie: Captain Black, I would like to ask you a question again about what the Board of 1895 really 665 meant to recommend for construction as a foundation for this improvement proposed for Cumberland Sound, what the Board designed to recommend in their report as a proper foundation for the improvement for Cumberland Sound?

A They simply meant a thin mattress of wood and on top of that the jetty was to be built. The wood did not figure in the jetty at all. Do I make myself clear there?

Major Raymond: Yes.

Colonel Gillespie: Then it was chiefly a stone jetty?

A It was entirely and the wood was simply to prevent its going down and prevent scour immediately alongside.

Q Then, a jetty built essentially of mattresses and weighted with a light order of stone, would not be in accordance with the project of the Board?

A No sir, it would not be in accordance with the project of the Board.

Captain Gillette: I would like to ask Captain Black which he considers best for the use on an ocean bar, like any of those southern bars, loose brush work or closely choked fascines?

A In waters in the South it has been my experience that to keep any brush over a year and a half it had to be so

close to the bottom that it would certainly sand up within six months. For that reason I would use no brush beyond the limit of that sanding up, and that limit, so far as I could find out, was within 18 inches of the bottom of the water, the ocean bottom.

666 Q That is not quite the question I asked. It has been asserted here that loose brush, loose bundles, was better for this work than tight bundles.

Captain Carter: I think that Captain Gillette is in error in stating that very loose bundles were used. I think the statement is this; that what was desired was bulk, not weight, but that it was necessary that the fascines should be choked; otherwise the compression in holding them down until they could sand up would be too great, so that I think his statement that loose brush is the best, is an error and not borne out by the testimony.

CAPTAIN FREDERIC V. ABBOT, was called to the stand at the request of Captain Carter and examined as follows:

Colonel Gillespie: Captain Abbot, how long were you stationed on the South Atlantic coast?

A About 13 years.

Q Have you been in charge during that time of the construction of any improvement which called for the application of what is known as mattresses?

A Yes sir.

Q Captain Carter, you can take him in hand.

Captain Carter: Are you familiar with the specifications that I put out for the works in my District?

667 A I have read them over carefully.

Q The last ones of 1896?

A Yes.

Q Those in 1892 also?

A I don't remember having read those carefully.

Q In my specifications for 1896 I asked for three designs of mattresses, the first type being the ordinary log mattress we used to use, the second being the type I believe you used at Charleston?

A I actually used none at Charleston. At Winyaw Bay, I called for three designs, the third being a layer of fascines.

Captain Carter: The designs are mentioned in the specifications. Will you kindly tell me whether or not that you consider that these mattresses cost approximately the same, or whether they vary materially in cost?

A I was uncertain, when I advertised for the Winyaw Bay work; hence, called for the price of each design. The bids as actually received for the three designs showed that the Alabama Dredging and Jetty Company bid the same price for all three designs, which were practically identical with Captain Carter's. That was 65 cents for all three. The Stewart Construction Company of Columbia, South Carolina, bid 60 cents for the first and third designs and 62 cents for the second. McArthur Bros., of Chicago, bid 90 cents for the first, 94 cents for the second and 92 cents for the third. Mr. George W. Eagan of Charleston bid 62, 68 and 67 cents.

Colonel Gillespie: What date?

A That was on March 12, I think, 1897. (Continuing). Mr. John L. Grim bid 95 cents for all three patterns. Mr. Friday bid 90 cents for the first two and 85 cents for the third design. Mr. Roderick G. Ross bid 57 cents for all three designs.

Q May I ask what was the amount of money involved in this contract?

A The contract was one of the continuing contracts and involved an expenditure of something like two millions of dollars, but the Ross prices were so low as not to absorb the whole amount by a considerable sum.

Q Can you give the amount of the bid?

A That I cannot answer without access to the records?

Q Was his price lower than your estimate, do you remember?

A I cannot answer that, it is a matter of some 9 months ago.

Colonel Gillespie: What was his price?

A Fifty seven cents.

Q Has he done any work under the contract?

A The contractor had not begun at the time when I left the District. The location is very unhealthy and I preferred to have him begin later, and as I was going to be relieved, I thought my successor should have the right to start the south jetty at the point he should select, as he would have 669 the carrying out of the work.

Captain Carter: Which do you consider easier to do, work at Winyaw Bay or Wappoo Cut—mattress work?

A It is so entirely different it is hard to say. At Winyaw Bay you have to contend with rough water, and the dam in Wappoo Cut was across such an exceedingly shallow creek that it was very difficult to get any material to the site of the dam.

Captain Carter: May, therefore, local conditions within a very restricted area vary materially the cost of construction of similar work?

A Absolutely.

Q May this vary within wide limits?

A Unquestionably.

Q So that the price of \$1.10 per square yard for mattresses, which I believe was paid at Wappoo Cut, might be as reasonable as a price of 57 cents paid somewhere else for similar work?

Colonel Gillespie: Well, Captain, is it as easy to build at Cumberland Sound as it is at Winyaw Bay? Are the two Harbors any different in point of exposure?

A It is a question of where the brush is to come from. When I was at Cumberland Sound we were using log mattress and they were accessible within a distance of 6 or 7 miles, as I remember it. Where the brush would have to come from I don't know.

670 Q I meant really to say the exposure of the place?

A I should say Winyaw Bay is fully as hard as Fernandina. The bar is very shoal.

Q Is it as hard as the north jetty of Fernandina?

A Quite similar I think.

Q Do you know anything about the value of labor, the relative value of labor at the present time at the two places?

A No, labor is very cheap at Georgetown and I presume at Fernandina, but I do not know.

Q What is generally the character of the labor in all that section of the country?

A It is negro labor with generally white supervision.

Captain Carter: Are you familiar with the work which was done by me in Savannah Harbor between 1892 and 1895 under the project which called for 26 feet of water?

A I have been through it with you on the boat once and I have looked over the repairs, but that is about all.

Q Do you remember the details of construction of the work?

A No, just what I could see as I went down. The most of the work was concealed below water.

Q Do you think it probable that an intelligent contractor could submit a bid for work similar to that at Winyaw Bay or Cumberland Sound without having visited the locality in person, or having it visited in person by somebody connected with him?

671 A He would be bidding in the dark if he did not examine the place.

Q This is irrespective of the specifications or not?

A It would not be wise to bid under any specifications without seeing the exposure to the ocean.

Q Have you seen the mattresses constructed by me, or do you remember whether instead of sinking a mattress singly I built mattresses on top of one another and sank them in that way, several mattresses at a time?

A I never saw it. The attempt was made to do the same thing at Charleston once but it failed.

Q And in Savannah Harbor the bottom was very soft and I started in with a estimate of 350,000 square yards of brush mattresses. In executing that work, I found that, putting a mattress down, loading it with stone, then putting another mattress on top of that, loading it with stone, and so on, several courses of those mattresses disappeared and it became a question then of how to get that training wall up to the height required without it sinking down into the bottom. I then devised a method of sinking of the mattresses, the free floatation being very little, by putting them on top of one another, as many as I could, and only putting a load of stone on all those mattresses about equal to what would have been placed on a single mattress. By that method I got the height I wanted. The dam silted up and the work was successful, but it diminished the amount of stone required
672 and increased the amount of mattress work required. I went ahead with that sort of work—

Colonel Gillespie: Is that an essay or question?

(Side talk between the members of the Board in relation to the above question.

Captain Carter: I will withdraw it, then.

Major Adams: Captain Carter, you called the witness and you ought to bring out that point.

Major Raymond: I think it would be just as well to let Captain Carter bring it out in his own way, even if it takes all night.

Colonel Gillespie: Very well, let him go ahead.

Major Adams: I think he can bring it out by questions.

Major Raymond: I think very likely.

(Captain Carter preferred not to continue).

Colonel Gillespie: The specifications to which he refers say that the quantity of mattress work required for canvassing bids for Savannah Harbor would be 350,000 square yards. Do you think it right and proper for Captain Carter to increase this quantity to 1,360,000 square yards, as he actually did, the quantities of other required materials being correspondingly reduced?

673 A I think it should have been reported, a change as great as that.

Colonel Gillespie: At what time do you think that change should have been reported to the Chief of Engineers?

A When it developed that it is really going to amount to anything considerable.

Q He actually increased it, as he says here, by fourfold. Do you think it lies within the power of any District officer to make such an enormous change without the knowledge and the authority of the Chief of Engineers?

A I don't know as technical request for authority from the Chief of Engineers would be required. As the facts were to definitely reported, it becomes simply the use of more of one kind of material and less of another. The fact that the Chief of Engineers knew of the large change intended by you would carry with it the certainty that he would disapprove and stop the carrying out of the change unless it was accepted by him.

Q This mattress work has a definite price in the contract?

A Yes.

Q Would you increase it fourfold, it makes a difference in the eventual payment expected to be made to the contractor at the time the contract was actually entered into for this work?

A Yes sir, unquestionably, but his bid is supposed to be a balanced bid, and he is supposed to make the same per-
674 centage of profit on the different items of his bid. In awarding bids I have always tried to see that the prices in the accepted bids were made so as to make an equal profit on the different classes of material, and thus make no difference to the contractor or to the Government if more of one material and less of another were used. I should recommend the rejection of an unbalanced bid.

Q Would not the use of different quantities of material in this way practically change the plans of construction?

A Yes, and in entering into a contract a man might bind himself to do the impossible, so that in reporting to the Chief of Engineers that it was impossible, I should consider that I was justified in increasing or diminishing quantities, as it was done with the knowledge of my Chief.

Q But, would you consider it right and proper to go blindly on executing a plan and eating up enormous quantities of materials beyond those provided by the contract, without the knowledge of the Chief of Engineers?

A No sir.

Major Raymond. But, would you consider that you could do it without the authority of the Chief of Engineers if he knew it?

A I should not consider it necessary to secure a technical authority required, for instance, for employes.

Colonel Gillespie: We are talking about mattress work.

A What I meant by technical authority was to submit 675 the question to the Chief of Engineers and receive his approval of your continuing with it. Well, I should consider that not receiving orders from the Chief of Engineers was equivalent to an approval.

Q And do you understand that a constructing officer being entrusted with the charge of a work of improvement where plans are definitely given him, and specific quantities of material are mentioned, that he can depart from that plan and adopt another plan, demanding the use of larger quantities of material without the approval of the Chief of Engineers?

A Not without reporting the facts fully and then if he gets no orders, I should think he had a right to carry out the design he wishes to carry out.

Q You were a member of that Board of Officers on Cumberland Sound in 1895?

A Yes.

Q What was your belief as to the concensus of opinion of that Board upon the nature of the jetty proposed to be built and the nature of the foundation upon which that jetty rested?

A I fully understood that the Board intended a stone jetty, built on a single foundation mattress, extending the full length of the work.

Q Was that matter discussed fully before the Board?

A I had no doubt of the meaning of our report, but
676 we had so much discussion I dont remember what we did
not discuss. I think it was.

Q Now, I will say that coming back to the Chief of Engi-
neers again, the specifications say in one of those contracts
that the stone to be used for sinking a mattress shall have
a specific gravity of 2.4. Captain Carter accepted, used and
paid for stone having a specific gravity, only a little greater
than 2 if any; do you think it right and proper for Captain
Carter to have done so without the knowledge of the Chief
of Engineers?

A It should have been reported, but I do not know that
many officers measure the specific gravity of stone they
buy by the cubic yard, so long as it is heavy enough to hold
the work in place.

Q Would it be equitable to other possible bidders who had
no means of knowing that such a concession would be made,
for Captain Carter to specify stone of one specific gravity
and then accept stone of another, of a less grade than was
called for? My question is, do you think that calling for
one grade of stone and accepting another, is an equitable
thing for possible bidders?

A I believe that the specifications ought to be enforced.
That is my belief. That is, when you state a specific gravity,
it ought to be enforced; but if you dont, you can use your
judgment.

Colonel Gillespie: The price actually paid by Captain
677 Carter for the type of mattress adopted by him was \$1.10
per square yard. Are you familiar with the mattress
that he proposed to use or did use?

A I have used similar specifications for Winyaw Bay and
I got bids on those designs, but that is the only experience I
have had actually with that class of mattress.

Q It is in evidence that Captain Carter proposed to use
the third type?

A Well, that I do not know.

Q Suppose he did use the third type, or some modification
of it. Do you think that \$1.10 is a reasonable price for such a
mattress at Cumberland Sound?

A I paid \$1.25 per square yard for a log mattress at
Charleston under a continuing contract. The total amount
of the mattress aggregated only \$50,000 in a contract ag-
gregating about a million and a half dollars. The prices for
stone were so low that I feared to re-advertise, as the aggre-

gate cost of the work might thereby be increased. I knew that \$1.25 was altogether too high and so reported to the Chief of Engineers when I recommended the acceptance of the price. The log mattress had been put in at Charleston under one of the contracts for 49 cents a square yard, but this was much nearer shore and the mattresses were much smaller and more easily handled. As the work advances seaward the more mattresses are broken up and lost in setting. As a result the fair price to pay for them increases.

I should say a \$1.10 was high for log mattress is used in large quantity. My only data for brush mattress are derived from Winyaw Bay bids, which indicate about the same value of log and brush mattress, namely, 57 cents.

Captain Carter: Do you know anything about the use of Florida stone, I mean the relative value of Florida stone compared with other stone?

A I have never seen it used anywhere, but I have talked with those who have used it and it has the value, I am told, or characteristic, of being readily covered with a marine growth. I have never seen it used.

Q Suppose you were buying stone by the cubic yard, and you sent an average sample of that stone to have its specific gravity determined, adopted that in your specifications, knew that all bidders understood the kind of stone you wanted, would you have considered it necessary to have determined the specific gravity of the stone afterwards to find out whether or not it was in accordance with the specifications?

A Under such circumstances I have given my inspectors a sample to go by always of the granite we used there at Charleston.

Q You were asked, some time ago, if it was proper to increase the quantities without the knowledge of the Chief of Engineers. As a matter of fact the increase in quantities was reported in writing to the Chief of Engineers and to the Division Engineer each month, and the Division Engineer and the Chief of Engineers were made further orally acquainted with this change. Knowing this, do you think then it would be necessary further to get any specific authority from the Chief of Engineers for such change?

A I should have made a special report myself of any considerable change in relation to it. At Charleston the stone fell short about 25,000 tons on a 525,000 ton contract. I did not think it was necessary to report that.

Captain Gillette: If you put into your specifications that

the stone should have a specific gravity of 2.4—Florida rock has a specific gravity running from 2.4 down to 1.5—and you informed all the bidders that Florida rock would be accepted, would you think that they would be justified in assuming that any rock from Florida would be accepted, irrespective of its specific gravity?

A Not if the required specific gravity was printed in the specifications, no.

Q Then if you chose to force the contractor who got the contract to use Florida rock of a specific gravity of 2.4 after telling him Florida rock would be accepted, would you feel justified in doing so, would you not?

A Yes.

The Board adjourned until 10:30 A. M. Oct. 14.

680 October 14, 1897, the Board met pursuant to adjournment.

Present the same as before.

The examination of CAPTIAN FREDERIC V. ABBOT was continued.

The stenographer read the last few questions and answers given by Captain Abbot yesterday as reported on pages 678 and 679 preceding.

Captain Carter: Would you feel justified in forcing a contractor to use that when you had explained to him that other rock would be permitted and he understood and made his bid on such basis, on that rock?

A I should not have made any such statement to a prospective bidder, as I had defined in the specifications what I wanted.

Q Suppose you had made such statement, would you feel authorized then in compelling him to supply a higher grade of stone than was explained to him would be required and for which he made his bid?

A It is an unopposable case. I should not have agreed verbally with a man for a different class of stone than for what I called in print.

Q Suppose you called for a certain, well understood
681 grade of stone, had its specific gravity determined, inserted that in your specifications, such determination having been discovered afterwards to be an error but it having

been thoroughly understood by both you and the bidder, what kind of stone would be required, would you feel justified in forcing a compliance with that error?

A I should say it would be a case for a supplementary agreement to the contract.

Q But, will you answer the question first before you make that qualification, if you don't mind?

A What is the question?

The stenographer repeated the question.

A I should say nothing could be done without a supplemental agreement.

Q Suppose your inspector were furnished with a sample of the stone desired, as you said you did in Charleston, and the stone furnished agreed with that sample, and the fact that the figure put in for specific gravity was not known by you to have been an error, would you consider that you had done wrong in allowing stone to go in, it having agreed with the quality desired by you and the quality bid for by the contractor?

A If the sample was understood by all bidders to be what was intended, the sample of stone itself should govern, instead of the printed specifications.

Q That is what I wanted to find out.

682 A If you had a sample that was showed to the bidders, that would be the guide; but, it would be well to have had the sample referred to in the specifications.

Colonel Gillespie: How would that affect bidders who did not have the privilege of seeing the samples and were guided solely by specific gravity?

A I think, Colonel, for a contract as large as this every bona fide bidder ought to be required to visit the locality and see what is wanted.

Q Captain Carter: They were required to submit a sample of stone and they all submitted samples.

Colonel Gillespie: But, as a fact, you know that a great many bidders do not attend to that, nor visit the locality, but trust to the specifications. Here you are providing for the delivery of a material whose specific gravity differs from the stone whose specific gravity is mentioned in the specifications.

A On the basis of an error in the determination of the specific gravity originally. At Winyaw Bay all seven bidders actually went over the ground and my usual experience with contractors has been that they come and go over the ground,

and I think these men are the men who ought to have the preference rather than those who bid blindly from a distance.

Colonel Gillespie: You would not compel a bidder to be present?

683 A I could not compel him. You could invite him to be present. He has the privilege of bidding from any point; but he should not be deceived by the specifications themselves.

Colonel Gillespie: The only point was, whether this was in conformity with the specifications?

A The question is, whether all bidders were shown the stone, of which a wrong description had been given.

Colonel Gillespie: I will ask Captain Carter if all the bidders saw this stone.

Captain Carter: All the bidders not only saw this stone, but furnished a sample corresponding with it.

Colonel Gillespie: Were all the samples of stone examined by you—by the chemist under your directions?

A None of those received were examined by the chemist. They were only compared in appearance.

Q Which was the stone which you did subject to a chemical test?

A It was a sample that was subjected some time ago. I sent it from Savannah.

Q I thought that was the standard and none of the stone ran below that standard.

Q Oh yes, it may have been that; that whole determination was an error.

Q Then your whole specifications were in error in that respect?

684 A It may have been that the 2.4 was a mistake by the chemist. I did not check it. I suppose him intelligent enough to determine the specific gravity of the stone and I assumed his determination to be correct. The fact is that the stone furnished corresponded with the sample whose specific gravity was determined. Stone falling below that was rejected or ordered rejected, and the question that I wanted to ask was whether the stone itself should govern or whether a determination of specific gravity, which was in error, should govern. Referring to my statement that all of the bidders not only saw this stone, but furnished a sample, I desire to state that may be an error, but that the bidders saw this stone and understood that stone equal to it would be accepted, is true. Whether all of the bidders submitted a

sample of such stone, I am not sure, but believe they did not.

(Addressing Captain Abbot.

You were asked, Captain Abbot, whether a bidder from a distance could have known that Florida stone was required. Do you think that any intelligent contractor would bid on a work like Cumberland Sound without having personal knowledge of the locality and the materials to be used?

Captain Abbot. I dont think the bid should be accepted if it were permissible under the form of specifications unless the locality had been personally inspected. The result is liable to be a bidder either too high or too low and subsequent failure in the middle of the contract.

(At this point the stenographer, Mr. Stevens, was relieved and the future proceedings were reported by Mr. McCarthy and Mr. Dawson.

INDEX.

Captain Frederic V. Abbot (continued)	686
Captain Gillette	692
Captain Carter (explanation)	707
P. Sanford Ross	720
George W. Brown	724
George W. Brown (recalled)	741
M. A. Connolly	740
H. R. Duval	748
Captain Carter	780
Benjamin D. Greene	785
Josiah Reed	796
Mr. Townsend	816
Gen. Wm. P. Craighill	818
Robert Maclay	836
Captain Carter	848
John F. Gaynor	863
Captain Carter (explanation)	882

686 Examination of CAPTAIN ABBOTT continued (Taken by Mr. McCarthy, Stenographer, Oct. 14, 1897)

By Captain Carter: Q Do you think it inequitable to call for one kind of stone and accept that same kind of stone?

A Certainly not.

Q Do you think it right and fair for Captain Carter to have adopted a type of mattress differing slightly from the rigid design, no diminished cost of construction resulting, with the knowledge of the Chief of Engineers?

A With the knowledge of the Chief of Engineers, no sir.

Q Do you think it right and proper to increase one quantity of material, the other quantity being diminished, said change being for the interest of the United States, without resulting gain to the contractor, with the knowledge of the Chief of Engineers?

A With the knowledge of the Chief of Engineers, yes sir, within limits. In case large quantities are concerned, a supplemental agreement in writing specifying the same price, or the changed price, should, for the safety of the officer's record, be made.

Q Suppose it were impossible to get a supplemental contract for a large quantity except at an increased price; would it be more desirable to make a supplementary contract at this increased price or to continue little by little under the old contract, the quantities put in being with a knowledge of the Chief of Engineers?

A For the safety of my record, I should want to have 687 a supplemental agreement, even at an increased cost. If possibly a modification, which could be had for the same price, would be attempted, if the contractor would not agree for the same price on a construction exactly as desired.

By Col. Gillespie: Q Suppose the contractor should make an unreasonable demand for increased price, would you consider the question of advertising?

A That depends so much on the wording of the contract that I should doubt the possibility in some cases. The fact that I had drawn specifications which could not be carried out to the advantage of the United States would not justify the United States in annulling a man's contract when he was willing to carry out the specifications as I had drawn them.

Q My statement was an unreasonable increase?

A Yes.

By Capt. Carter: Q You were asked if you had experience in building brush mattresses, I believe?

A Yes sir, the question was asked.

Q Did you give your knowledge of the cost of these from actual construction of them, or from the prices received from bidders—You gave a cost?

A They were the figures actually bid by the different bidders at the formal opening.

Q You have been in my district at various times, have you not?

A I have.

Q Will you state what you know or what your impressions were concerning the manner in which the work under my charge was carried out?

A I have always believed the work was well done.

Q Is there anything else concerning the conduct of my office or the works under my charge, either from personal knowledge or from impressions formed, which you desire to state without a specific question?

A No; there was nothing to attract attention one way or the other when I was in your office or at your house, except that you appeared much interested in your work. I have had no personal relations with any of your clerks or other employes except two who visited the ten-inch battery and mortar battery on Sullivan's Island, at your request.

By Maj. Raymond: Q You gave some testimony yesterday, Captain, with reference to the cost of mattresses at Winyah Bay. They were the prices bid upon the work?

A Yes sir.

Q Do you remember the prices bid for the stone?

A \$1.57 a ton of 2,000 pounds, irrespective of size. Three sizes of stone were called for and the same price was bid for all three.

Q By all the bidders?

A By the lowest bidder; I haven't got the stone prices here, but Ross's figures were \$1.57 a ton of 2000 pounds on all grades.

689 Q What kind of stone do the specifications call for?

A Granite.

Q The specific gravity was not mentioned?

A No sir.

Q Durable and hard granite?

A Yes sir. In the ballast for mattresses my impression is that I permitted the use of any heavy stone not injured in

salt water, and that I put in for the large stone that where the stone is to be subjected to the action of heavy waves, nothing but hard and heavy granite would be accepted. The specifications are not in record, but that is my recollection of how I drew them.

By Col. Gillespie:

Q The stone that has been described by Capt. Carter as acceptable stone and which is received under the bid of June 6, 1896, at \$3.50 a yard?

A A cubic yard.

Q Do you consider that bid a reasonable or an unreasonable bid?

A I don't know about the transportation cost in Florida. In South Carolina we got a freight rate of half a cent a ton a mile and at that price the freight cost was about one-half the total cost to the contractor, of the stone finally in the work, judging from my own experience. The cost at Charleston of granite in the jetty being by hired labor, \$1.70 a ton of 2000 lbs., and the freight being between seventy and eighty cents, depending on the rail route. I can therefore tell but

little of the cost of Florida stone unless I have the rail-690 road freight rates. It is about half the cost of the stone, but it looks as though the price was very high.

Q There is a statement in evidence that railroad rates varied from \$1.00 to \$1.50 a ton,—supposing it was \$1.50?

A Was there any certainty that the bidder could be assured of a permanent rate during his contract,—the bidder would have to discount in his bid the highest railroad freight he might be squeezed to pay.

Q It is to be supposed that when a man makes a contract with us, he has already made all of the arrangements for the delivery of his material?

A Then he must have counted on \$1.50, if it was raised to \$1.50.

By Capt. Gillette:

Q The gentleman who testified said \$1.25 and then raised to \$1.50?

A Oh, I thought you said the price had fluctuated. I see that in my answer to Col. Gillespie's question about cost of stone I did not finish what I intended to say. The freight is only one element. I understand the Florida stone is picked up from the ground by hand, loaded into carts and hauled to the railroad. What the cost is I do not know; although I know a gentleman near Ocala who has done some of this

work for contractors, either at Tampa or Fernandina, I do not know which. The stone is loosely distributed over a considerable area of ground as I have seen it. The cost of granite quarrying I know closely; it is between fifty and sixty cents a ton loaded on cars at the United States quarry at Edgefield, South Carolina, when the work is done by hired labor. The freight to Charleston varied between seventy and eighty cents a ton of 2000 pounds. Unloading from the cars to lighters costs approximately fifty cents. Unloading from the lighters onto the jetties, including towage and watching, varies from thirty cents a ton to eighty cents a ton, depending on weather and not including extraordinary repairs to plant or any depreciation. The actual cost of a year's work in the Charleston jetties by hired labor was \$1.70 a ton of 2000 lbs.

By Col. Gillespie:

Q Would \$3.50 a ton delivered in the works at Cumberland Sound be regarded by you as an extravagant price to pay for that same granite delivered by way of Charleston?

A The distance from Charleston to Fernandino is, I believe, about 240 miles. This, if on a single railroad, would call for about \$1.20 freight rate. Switching and wharfage charges in connection with the two roads covering these 240 miles would probably cost thirty cents a ton, making the additional freight charge per ton at least \$1.50. The cost for putting into the work at Fernandina should be approximately equal to that at Charleston, which is \$1.70 a ton by hired labor. The aggregate of the cost at Fernandino, carrying the stone by rail from Charleston, would therefore be about \$3.20; but the whole question of freight rates is so uncertain that this must be regarded as a simple guess.

CAPT. GILLETTE further testifies:

By Capt. Carter:

Q You stated yesterday that it was common rumor that I had changed the harbor lines for the purpose of favoring the Atlantic Contracting Company and gave the names of Mr. Cooper and Mr. Twiggs as two of the men, also stating that there was one of the Aldermen of the City of Savannah—Have you thought of that name yet?

A No sir.

Q I have here a list of the Aldermen—Was it S. P. Hamilton?

A I don't know which it was. I didn't say it was the present alderman.

Q Could you give me some definite statement as to these rumors floating around, so that I could pin it down and get the authority for these rumors?

A This gentleman was in my office on other business 693 and said that he had been an alderman or member of the council or something of that kind,—I am not sure which, familiar with Savannah City government, and went away. It was one of two men; I had a dozen men come into my office, sent for from a list, but which was which I can't remember.

Q Can you give me those two names?

A I don't know the names,—there were two gentlemen.

Q In as serious a thing as this, a member of the City Council, you didn't take interest enough in it to remember his name?

A I heard it a dozen different times.

Q From whom?

A Mr. Cooper, Mr. Twiggs and some other gentleman.

Q Who is this other gentleman?

A He said he was at one time a member of the City Council. He was one of a dozen that came to my office. I didn't know the names of more than three or four of them, and I don't remember his name.

Q You stated before the Board, that people occupying public positions had come to you?

A I can by a little investigation definitely tell this gentleman's name. I don't care to do it unless the Board requires it, as I will be responsible for the assertion that you made these changes in the harbor lines to get that stone. Rumors coming in—not the citizens of Savannah—

Q That you are not responsible for—You make this 694 statement as coming from the citizens of Savannah; I would like to know whether your statement is true?

A I have given you two names of citizens of Savannah.

Q I would like to have, if possible,—it seems to me a serious charge for Capt. Gillette to make—the name of this man,—he says he can give it,—in other words, I would like to have every opportunity to find out how these rumors, which he says are current and which have never come to my ears, have come to his, and what degree of credence is to be at-

tached to the statements which Capt. Gillette says were made to him?

A If the Board desires, I can make a list of gentlemen in Savannah that have talked about this, but it seems to me that it drags in outside people who are not concerned and who do not care to have their names mentioned. I am willing to be responsible for the assertion that the motive in fixing the harbor lines was not good. Let it go at that. If the Board desires, I can make a list of them. I can find that gentleman's name; I am quite positive I can do so.

Q Capt. Gillette stated that people occupying public positions had come to him, stating that my administration was wrong, and that he had agreed with them. I went to him in Savannah—correct me if I make a mistake—and he stated that he did not mean to state that, but that a prominent citizen had come to him—I asked him the name of that citizen, and then he said that he did not think I had a right to ask that name, or words to that effect. I stated to him that, inasmuch as he had taken the matter to the Chief of Engineers, I thought I was entitled to it. He said that he had told the Chief of Engineers that this man had said that he had not reported this matter because he had understood that the Chief of Engineers was in difficulty—

Capt. Gillette: The words he used were, that things were wrong in Washington—

Capt. Carter: I then demanded the name of this man. Capt. Gillette said he would give it if the man consented or the Board instructed him. I wired the senior officer of the Board to instruct him to give this. He said he had received this permission from the senior officer of the Board, but had changed his mind about giving this.

Capt. Gillette: I received permission from the Board; I said nothing about changing my mind. I said that I had received permission from the Board, but no instructions.

Q Didn't you say "I have changed my mind and will not drag this man in?"

A That I would not drag the man in unless the Board had ordered it.

Q I lived in Savannah a long time and I know most of the people in Savannah, and I think it is only fair for a man making this statement that Capt. Gillette makes, that he should not attempt to shield himself behind the Chief of Engineers or the Board, but should be manly enough to give me the name of the man who he says was a prominent

citizen, intimating to me that the man voiced the sentiments of the people of Savannah and reflecting upon me in this serious way.

Capt. Gillette: I did not state that he voiced the sentiments of the people of Savannah.

Capt. Carter: You gave me the impression that the man was an Alderman and a prominent man.

Capt. Gillette: He was a man of great prominence. I asked him the question, if the people of Savannah thought that way, and he says, "There is an under current of such belief, with few exceptions." Another gentleman of equal prominence talked materially the same.

Capt. Carter: I submit, gentlemen, that this is a cowardly, unfair attack, to bring up these statements when I have no means of ascertaining whether these men are such citizens of Savannah as Capt. Gillette states. I think the only way that I can have any fairness or justice in this matter,—I submit, that Capt. Gillette should be compelled to give me the authorities for the statements he is making.

697 Capt. Gillette: I trust that Capt. Carter will confine his vituperations and calling of vile adjectives to outside the Board room, where the matter can be attended to promptly without discourtesy to the Board.

Capt. Carter: If I have said anything discourteous to the Board, I apologize.

Capt. Gillette: I take no discourtesy to me. The matter Capt. Carter spoke of was brought up by himself; he asked me that question before the Board; I did not bring it up. I have made no charges against him as to what people in Savannah were talking. He brought it up. I don't care to bring the people of Savannah into this unless there is good reason for it; while I believe both gentlemen who talked this to me would be willing to have their names mentioned, I should decline to mention them without good reason for it. I submit that it has nothing to do with the case except as Capt. Carter has dragged it into the case. If it influenced the Chief of Engineers in his action, it is a matter not for this Board.

Capt. Carter: My object, gentlemen, is this: I think I know rather intimately the people who are of Savannah, and I do not believe it possible that any of the sentiments voiced by Capt. Gillette should have been expressed by any one
698 man who forms an integral part of what is Savannah, in the sense of the best men, the representative men of that place.

Col. Gillespie: How did this matter first come up?

Capt. Gillette: Capt. Carter brought the matter into the case by asking me if I had said such things to prominent citizens in Savannah; I did not bring it up. I answered his question. It has nothing to do with the case I have presented to the Board at all. If the Board desires, I can go into it and study the past conversations up and give the Board a pretty good list of prominent people and what they have said, but it seems to me it has nothing to do with the case.

Col. Gillespie: The Board has examined the question propounded to it, and decided in the case of the name of the person or persons of prominence in Savannah who are said to have made certain allegations derogatory to Capt. Carter, that as that was brought up solely by the question that was put by Capt. Carter and answered directly by Captain Gillette, it therefore does not deem it necessary to require that the name should be divulged; but, in the case of the harbor line matter, as the charge has been made directly by Capt. Gillette, the Board deems it necessary that the name should be supplied.

Capt. Gillette: All the names of the people who have talked with me on the subject?

699 Q The name that you speak of?

A I can give Capt. Carter information by which I think he can find it. It was one of the jurors in the Brown Atlantic Contracting Company case brought up yesterday, who at the time of the contract was an Alderman. My impression is, that his name is Logan, but I am not sure. I sent for these jurors by a list. One of them told me that he was there at that time and said it was the worst bluff he had ever seen. Now, it is barely possible that I may be mistaken. There was another gentleman who looked like him who I talked to that day, and it may have been the other one, but my impression is that his name was Logan.

Capt. Carter: Is that an answer to the instructions of the Board?

Capt. Gillette: That is the best answer I can give.

By Col. Gillespie: Q The Board desires that you should make every honest effort to give the name of the man.

A Yes sir; I will talk with the man and be sure. I think his name was Logan.

By Capt. Gillette: (To Capt. Carter) Q You said that the specific gravity of 2.4 was probably an error. Do you

mean that Mr. Rolensky did not test correctly the piece you sent him?

A I did not mean to convey that impression. I said he may not have tested it correctly, but I presume that the 700 piece I sent him was denser than the average of the Florida rock and that the error was mine. I would qualify that: I presume, in view of weights given by Capt. Gillette, assuming that that rock is an average of what was received, to the best of my belief, being familiar with the rock that was received, the weights given by him did not represent fairly the average of the rock used at Fernandino, and while I do not know what the specific gravity was, I assumed it to have been 2.4 and which corresponds to that piece of stone; the general average of stone put into the work did correspond in appearance, in weight, so far as could be told by the rough way of looking at it on the barge.

Q You stated some time ago that stone falling below your standard, whatever it may have been, was ordered rejected. Were these orders written orders?

A I don't remember at this date. I think my printed book of instructions contained that,—a provision covering that, but at this date I don't remember.

Q You stated that contractors, all or some of them, furnished samples of stone that they proposed to submit; do you know what was done with those samples?

A Some of them were carried off and some were left in the Engineer's office at Savannah.

701 Q Did you label the sample of the successful bidder and preserve it for future reference?

A I won't be sure about that; I don't remember.

Q Do you remember of any rejections made under this written or other instruction as to rejecting rock not up to Standard—Were such rejections made?

A Yes sir; quite a number of rejections were made.

Q Was it a small percentage or a large percentage?

A Well, it depended; in the case of granite—

Q I am speaking of Florida rock only?

A I think there was quite a large percentage of rejections. By that, I don't mean necessarily that the percentage rejected after it got on the barge was large, but the percentage first coming up in the cars. I frequently inspected the rock at the request of the men delivering the stone, inspected the rock on the cars. and then told him what would be accepted and what would not, and the contractor then loaded the material

that would be accepted and was given permission to dispose of the other material as he saw fit.

Q Then, a part of the system of inspecting stone was for you personally to go at irregular intervals and inspect stone on the cars?

A And on the barges, both. I used to go all over my work at unexpected times, so as to keep thoroughly in touch with it.

702 Q Then, a portion of the stone that was on the cars would not be loaded on the barges?

A Oh yes, quite a large percentage.

Q In accordance with your inspection. I understood you to say that you would go over the cars, inspect the stone and reject a percentage of it, which would not go on the barges?

A Well, they were permitted to put on the barges if they saw fit, but were instructed if they did it would not be paid for.

Q Did it go with the good stone?

A Very seldom; sometimes it did. In these cases it was not put out, that is, the Assistant Engineer rejected it when it fell below the specifications.

Q Then, he rejected it after your inspection—after you inspected it on the cars—

A It was not all loaded on the barges. It would be a very foolish thing for a contractor to tow down stone that would not be accepted, if it could be disposed of in the vicinity.

Q You would reject a certain part of a certain car?

A I would state to the contractor or the man there, what stone was below the specifications.

Q You would point out individual stones?

A In a number of instances, but the men down there
703 are of sufficient intelligence, after having these things explained to them, not to make any mistakes afterwards.

Q I am trying to trace the rejected stone after you rejected in on the cars, as you have just recited?

A Well, I think it would be a very simple matter to trace it in Savannah. I didn't keep track of the rejected stone; the contractor can do with it as he pleases. I only kept track of the accepted stone.

Q When you rejected stone on the cars, what method of government supervision was there to see that the particular

stones you had rejected were not subsequently measured and put into the work?

A Reliance upon my Assistant Engineers; the same standard to go by as I had. If I did not see the stone on the barge, I would not be absolutely positive, except upon relying upon his honesty, that some of that stone might not have gone in. You have got to rely upon somebody in this world.

By Col. Gillespie: Q I infer that you inspected the stone?

A Yes sir; both on the barges and on the cars, and the mattresses also.

Capt. Gillette: Q Did you not have present at the time of the delivery of the stone some one person whose duty it was to inspect and accept every delivery of stone?

A Certainly; not some one person, but it would be either one inspector or another.

704 Q Some person on hand always to pass judgment—

A Certainly; no stone went into the work that was not reported to me as acceptable by—

Q Then, the statement that you accepted the stone was supplementary to the other?

A Yes sir. This was a check on my inspection; and then it was also done once in the case of this other man Brown, at his request, he claiming that the Atlantic Contracting Company were rejecting more stone than they had, so at his request I went down with him, went over one or more cars of stone to show him, and weighed the stone. It was on a Sunday, I think it was. So that my knowledge of the stone that went into the work was very intimate.

Q What was done with the particular stone which you rejected, the particular individual stones or cubic yards of stone, which you rejected on the cars?

A This Sunday morning?

Q Any time?

A I do not know what was done with it. It was piled off to one side. Whether it was used for ballast or roadway, I do not know.

Q Did you stay there while it was piled off to one side?

A I had it thrown off and put on the platform of the scales and weighed.

Q All the stone that you were going to reject?

705 A No, not all of the stone; it was put in this way— if you knew a little more about Florida stone, you could understand this thing. The stone which was smaller,—

there was a great deal of it; there was no necessity of putting it on the scales at all. You could tell in a minute that it would not come up to the specifications. Others would come reasonably near. If they were put on the scales and found short, they were put to one side. Then Mr. Brown would say, "Captain, I think that stone should go in." Then I said, "Suppose we weigh it." Instead of weighing twenty-five pounds or so, it would only weigh half that. It was not necessary to weigh every piece.

Q Then, you stayed there during the unloading of a car?

A I don't remember whether the car was entirely unloaded or whether only a portion of it, in order to get the approximate quantity, or whether there were several cars; I don't remember at this moment; it has been some years ago.

Q Was the object of your inspection to determine the character of stone to be rejected or to make rejections for that particular shipment—your inspection of the cars?

A It was made at the request—one inspection,—I made a number of inspections—

Q The general question—What were these inspections for?

A To ascertain the kind of rock that was coming.

Q You stayed there during the unloading of a part 706 of a car?

A Oh, I have been there during the unloading of a number of cars.

Q And you would determine which was good stone and which was bad stone?

A Not necessarily; the men had intelligence enough to do that themselves, ordinarily.

Q Where was the stone measured that was received?

A It was measured usually at the site of the work.

Q Then, in general, the stone received on the cars was not sorted under governmental inspection until it got to the works, was it?

A In general, it was not.

Q Did you have any one else besides yourself at the cars to see to it, sorting—any regular inspector stationed there for that purpose?

A I don't remember.

Adjourned to Monday, October 18, 1897, at 11:00 o'clock A. M.

707

New York, October 18th, 1897.

Pursuant to adjournment parties met.

Present:

Colonel Gillespie,
Major Raymond,
Major Adams,
Captain Gillette,
Captain Carter.

The Court was called to order, when the following proceedings were had

Captain Carter: Before proceeding with my defense it is proper that I should make this explanation. It may be that the members of the Board feel almost as restive as I do at the apparent delay in bringing this investigation to a close. If this be so, I would remind them that in addition to the difficulties of a personal nature under which I have been laboring incident to an examination covering a long series of years where the witnesses are scattered all over the Country I have been embarrassed by the unprecedented methods of my prosecutor, Captain Gillette, who grinds out his charges or insinuations day by day, so that I have no assurance when his inquisition has reached the limit. In the main charges I could have been ready long ago, but the cloud of more insinuations has caused more delay. To avoid this diffi-

708 culty and to save time I took the precaution before leaving Savannah on my last visit to make special inquiry of him if all his charges were in and he solemnly assured me that there was nothing else. To my surprise, however, when the Board reconvened in New York on last Tuesday, I was confronted with additional insinuations of improper conduct substantially as follows: 1. That in my testimony in a certain cause entitled Brown vs. The Atlantic Contracting Company, I had given false evidence to favor the contractor. 2. That I had established a Harbor Line at Savannah for the purpose of compelling the City to sell rock to the contractor at cheap prices. 3. That I recommended the removal of stone from certain works at Savannah Harbor for the purpose of enabling the contractors to obtain said stone.

Captain Gillette: Can I make a statement right here that should go on record in connection with that?

Major Raymond: I think you had better wait until later. We don't know what Capt. Carter has further to say.

Colonel Gillespie: I think we had better let Capt. Carter go right straight through.

Captain Carter: There is a statement which I might make right here in reference to the Cumberland Sound. It was stated by Colonel Haines, Captain Black and Captain Abbott that they understood that only one course of mattress was to be used at the sound and only one kind and no other.

709 I state that my understanding was it was to be as many courses of mattresses as the Sound would follow. As a matter of fact, I have figured up what the number of courses would have been. The actual length proposed by the Board of Officers was 6500 feet; that, with the 100 feet width, would give 72,222 square yards if one course only was used. The Board's estimate calls for 425,000 square yards, thus showing that more than one course must have been contemplated. I know that I intended it and I thought that the members of the Board understood it. More than that in June 1895 the Division Engineer inspected the work going on and these mattresses were being constructed then, one on top of the other.

Major Raymond: Who was he?

Captain Carter: Colonel Hains. And I remember meeting him a few months later, and while I do not remember at this date whether I explained to Colonel Hains and the other members of the Board the exact kind of mattresses I intended to use, I certainly supposed he understood it and I do not believe that any member of the Board would suppose that I would have abandoned the kind I had been using and which was satisfactory to adopt a type which was used at another place which did not appear to me to be so satisfactory. Further than that, I began as I remember with the six courses of mattresses as contemplated. That I may say was a theoretical contemplation depending of course, on how high the sand

710 would fill. I did not contemplate as many as sixteen courses of mattresses. That came about in this way. After the sand had filled up to the top of the eight courses of mattresses a new channel got ready to break through between the jetties and was almost through, and to save the discredit attaching to the fact that the old Channel was crossing the top of the south jetty, I went and raised this north jetty still further and the course was choked down there with brush mattresses. I don't believe I was at Fernandina after I started in on that because I did not start in on that until the latter part of June or the first of July. Of course if the sand did not fill, it certainly was not my intention to continue that work, and further than that, my action was dependent upon the report given by the Assistant Engineer,

and no unfavorable report was received from him until I left Savannah—in fact, no report was received at all by me unfavorable. I thought it best, and besides this as showing I could not have been mistaken as to the meaning of the language in the report of the Board of Commissioners in December, 1895, the language shows that it did not contemplate a single course of mattresses and could not have contemplated a single course. Now, I may say that there was a great deal of discretion given as to the details, which I do not at this date remember, but I know that it was a clear intimation in my mind, and I supposed it was equally clear in the 711 minds of every member of the Board. One other statement which I might make right here before I call in Mr. Brown. It will be admitted, I believe that the actual expense as to questions of cost of mattress work is safer than theoretical reasoning. In 1891 I asked for bids for two kinds of mattresses, one a log mattress and the other a brush mattress requesting at that time separate bids for each class of mat. In reply to that advertisement I received the following bids: Log mats \$1.20 per square yard. Brush mats \$1.16 per square yards. That was from the same bidder.

The second bid was \$.99 per square yard for log mats and \$.97 for brush mats.

The third bid was \$1.22 for log mats and \$1.22 for brush mats.

It will be seen that the prices bid are almost identical, the mattress which Captains Black and Guillard testify to be much cheaper being bid at a very slightly increased price in two cases. In Winyaw Bay the statement of Captain Abbot was that he received the same prices as I remember for the log mat and brush mat, but his records will show, In 1892 and afterwards, therefore, only one price for the three designs was asked for, experience having shown that bidders do not consider the prices of the designs to vary. This was done at Cumberland Sound in 1892, 1894 and 1896, and in Savannah in 1892 and 1896. There is therefore not the

712 slightest basis for the assumption that a bidder could not have bid intelligently on my specifications or that bids would have been received for a higher price than would have been bid had prices for each design been asked for separately. Moreover had bidders not known this and had they felt any uncertainty about it or felt that it was unfair in any way surely five lettings with keen competition would have developed this. As matter of fact nothing of that kind ever

came to my knowledge until it was brought up by Captain Gillette. However that there should be no possibility of misunderstanding in the specifications of 1896, it is distinctly stated that the work of construction would be brush mattresses, thus eliminating the first design. I think that covers the question of the price for the three. Now, about this statement of Captain Gillette's as to the Brown case. I have received a copy of my testimony in the Brown case, but I forgot to bring it down this morning.

Colonel Gillespie: Is this your explanation to the Board?

Captain Carter: My explanation of what?

Colonel Gillespie: Of the whole case.

Captain Carter: No sir, it is not all. I only want to get it out in a clear shape as to the explanation of the minor points.

Colonel Gillespie: Are you going to put in this oral statement and then supplement it with a written statement?

713 Captain Carter: This only covers a part of what I am going to say. I think, perhaps, I can facilitate matters by bringing up the witnesses I desire to produce now.

Captain Gillette: With reference to Captain Carter's statement that he came to my office and asked me if there was anything more, when he asked that question I understood—and certainly it could not possibly have referred to anything else—that he referred to the duplicate papers I was preparing to send to him which had been brought in by the previous testimony. As to the Brown case, I am morally positive that I knew nothing of this thing until after he left Savannah, and that my statement is strictly correct. It may be though that Mr. Cooper had told me there was something wrong in the case before he went away, but even if he had and had I known of it at that time I would have no business to have stated anything to Captain Carter before I communicated with the Board, so that if I misstated in that respect, he has suffered no wrong, as any new case that comes to my knowledge I should bring to the Board, and had I known of the case and known he was asking me about it I should have declined to have answered.

Captain Carter: I should not have objected to his declining anything like that, but when I asked him if there was anything else and he replied that there was not, I
714 thought it my duty to state it here so that the Board might know why I had been delayed in Savannah.

Captain Gillette: When Captain Carter came into my of-

five no less than two or three times while I was trying to get the papers ready for him, he asked if there was anything more than what I had given him. I naturally felt that he referred to the same thing that I did, and had I known anything else I would not have told him. Can I ask him a question with reference to the use of the sixteen courses of mattresses?

Colonel Gillespie: You may.

Captain Gillette: Marion Twiggs was the Assistant Engineer. Did you explain to him that the top eight courses were to be used to get quick results and that he was to report directly in case they did not sand up?

Captain Carter: I don't know whether I told him it was to be used to get quick results. I do not take any assistant engineers' opinion as a rule and ask them what I should do for engineering results. I said to him as I have stated all along that he should carry on the work, and in case it was not working properly to let me know.

Captain Gillette: Did you put that in writing?

Captain Carter: I did not; at least I don't think I did.

Captain Gillette: Will you explain just how you expected to get quick results on this Channel parallel with the 715 north jetty without using the second row of eight mattresses or eight courses?

Captain Carter: This was simply an engineering problem, but to explain it to a man of your intelligence would be quite a difficult thing.

Captain Gillette: Just give me a brief statement of it.

Captain Carter: I was trying to raise that north jetty quickly.

Captain Gillette: What part of that jetty; you didn't raise it all?

Captain Carter: The outer end of the north jetty.

Captain Gillette: The extreme outer end?

Captain Carter: No, to illustrate the profiles show something like this.

(Here Captain Carter makes a drawing on a piece of paper and explain it to the Commissioners.)

Captain Gillette: In about what depth of water were these mattresses to be used to accomplish this result?

Captain Carter: I don't remember now what depth of water but the profiles will show.

Captain Gillette: About what depth?

Captain Carter: I don't remember what depth it was.

Captain Gillette: In about what depth would it be effective to get quick results?

716 Captain Carter: My impression is that where I started in on that second course it was about twelve feet below low water, although I can't tell. It is a great deal better to go to the profile for that.

Captain Gillette: The records of the office show you that the water was about twenty-five or thirty feet doesn't it?

Captain Carter: That I began in 25 or 30 feet of water.

Captain Gillette: There were enough of these mattresses ordered (were there not) to run away out in 20 or 30 feet of water?

Captain Carter: That is true.

Captain Gillette: Did you expect to accomplish quick results away out there with them?

Captain Carter: The quick results was to be accomplished by them before that.

Captain Gillette: Granted that that was justified; Does that justify you in using so many brush mattresses away out in deep water?

Captain Carter: You don't understand me. The object of that brush out there was to keep the sand from drifting into this Channel which would not have held its own without the increased weight out there, and to get this quick result would have necessitated the arising of the inner end. I may state what I did not suppose was necessary to explain 717 before, that a course of mattresses ordered for a certain length is subject always to revision, and upon the slightest indication, upon report to me of this work having been unsuccessful the order for the mattresses would have been immediately countermanded. I order what I think is necessary, but that order is not absolute by any means.

Captain Gillette: How many feet of water were you trying to get?

Captain Carter: If you will read the project you will find.

Captain Gillette: I would like to have it on record.

Captain Carter: The project calls for 26 feet mean high water.

Captain Gillette: At Cumberland Sound?

Captain Carter: At Cumberland Sound.

Captain Gillette: What range in tide?

Captain Carter: About six feet.

Captain Gillette: 19 feet is what I read the project at low water.

Captain Carter: Did I not say 26 feet at mean high water? I may be mistaken, it may be 25 feet at mean high water.

Captain Gillette: Did you expect to find out whether the mattresses in 25 or 30 feet of water would be useful or not before you put them in? You gave orders for the contract-718 ors to sink this second tier clear to the end of the jetty out I think in 30 feet of water, I won't be positive, but in very deep water. Now, you say you expected to modify that in case the results were not as you contemplated.

Captain Carter: Certainly.

Captain Gillette: And the contractor was putting in a mattress or two every day and he would have had them in in 28 days; there were 28 mattresses ordered. Did you expect to accomplish these quick results before you got this outer mattress in?

Captain Carter: No, but my intimate knowledge of the bar is such that I knew about what would be required, and I knew further than that that if these mattresses sanded very quickly there, it would be a great deal better to do it in this way than in any other way, and I could stop the sand drifting in under the influence of the northeast gales, and I hoped that it would be as satisfactory as the former had been reported to me as satisfactory. Certainly no engineer continues a method of construction after he finds it is unsatisfactory.

Captain Gillette: But you could not possibly have found out whether it was unsatisfactory before they were put in?

Captain Carter: There is where I think you are in error because my assistant engineer reports to me immediately as soon as a mattress begins to fill. How high that sand will fill of course you can't tell until some time afterwards.

719 Captain Gillette: Your explanation now is different from what it was a few moments ago, your former explanation was that you wanted to use mattresses because you got quick results.

Captain Carter: That is true.

Captain Gillette: On which of these bases do you justify the mattresses out in the very deep water where there was already deeper water than you hoped to get by the project, was it quick results or because they would be sanded up?

Captain Carter: You can't get one without the other. It

is very difficult to explain to a man of your engineering ability these engineering problems.

Captain Gillette: I don't care for enlightenment as to my engineering ability. I want to find out what your explanation is. You explain this in a way which I think is no explanation.

Captain Carter: It is difficult to explain these things to certain people. This Channel was working in here (illustrating). Here is the north jetty and here the south jetty. The present Channel runs across the top of the south jetty and then proceeds out to sea. As this north jetty was raised this jetty pushed rapidly seaward. The idea was that if I could raise this portion here where the water was escaping over the jetty, I would keep this intact. To guard against the deterioration of this outer channel it became necessary to raise this also so that if the sand would fill in, this other part was still protected and I wanted to raise this portion out here (illustrating) above that bottom to keep the sand from coming in and breaking down this channel. I think I can make that clear to the members of the Board if I don't make it clear to Captain Gillette.

Major Raymond: It really don't occur to me to be very material anyhow.

P. SANFORD ROSS called.

By Captain Carter: Q Are you familiar with the work in what is known as the South Savannah District?

A Yes sir.

Q Have you ever bid for the doing of jetty or other work in that District?

A I have bid on all the dredging work advertised and a good deal of the jetty work.

Q Did you examine into the specifications before submitting your bid with reference to the Savannah River work?

A Yes sir.

Q Are you familiar with the method which has been adopted of building mattresses one on top of the other?

A What you might call multiple matting?

Q Yes?

A Yes sir.

Q Did you understand anything about that in the work

721 which was done under the existing contracts?

A For Fernandina I understood that would be allowed.

Q So that if it had been written out in the specifications would it have made any difference to you in your bid?

A No sir; because at the time the Fernandina contract was ready we knew that that method had been used on the Savannah work, a contractor of course could use it; that is, we understood we could make use of it.

Q Are you familiar with the contingencies that may arise in doing contract work in the Savannah District?

A Yes, quite so.

Q May or may not bids for the same class of work vary greatly?

A They are very likely to vary.

Q Will you give me some reason why those contingencies have to be taken into consideration?

A Take our experience in 1893 on the Savannah River. We got into a cyclone there that cost me over \$30,000, and we have got to anticipate those things, and of course there are other contingencies which are not only uncertain but the situation as to exposure.

Q Take the character of stone that was contemplated by the low grade stone in the last contract?

A We were told we could use Florida stone.

Q Have you been present at Savannah at the time bids for doing work were opened?

722 A Not always. I haven't always been present when I bid.

Q Have you ever had any difficulty whatever in obtaining all the information regarding the work?

A None whatever.

Q Have you ever heard of any one who ever had any difficulty?

A No sir.

Q Have you ever heard of any one being improperly or unfairly treated with reference to that?

A No sir.

By Colonel Gillespie: Q You say you saw the specifications for Savannah Harbor made in 1896?

A Yes sir.

Q When did you first see them?

A I am not sure whether I was at Savannah at the time

or they were sent to me. I saw them shortly before the opening.

Q They are dated June 6th. Did you see them in June?

A I can't say. My superintendent would probably have seen them as soon as they were issued, then I would see them as soon as he could get a copy and send them to me.

Q You say that from the information you had you knew that mattress work was to be done?

A We knew these multiple mattresses would be used although they claimed that Gaynor had a patent on the method of arranging etc., but I didn't consider that as being an obstacle in the way.

Q Without the information that you had relative to the work would you have been able to bid intelligently on 723 those specifications?

A Except Captain Carter told me that I could use that method?

Q Without that information and without these contractors explaining to you would you have been able to bid intelligently?

A No. I was familiar with the work as carried on at Savannah river and naturally made inquiry and Captain Carter took pains to say who could use that method.

Q You bid \$2.60 on fourth class stone. Where did you expect to get that stone?

A That was the poor class that we expected to get at Florida.

Q Who told you you could use Florida stone?

A Captain Carter.

Q It wasn't mentioned in the specifications?

A It had been used.

Q Simply from information you had with reference to work done under previous contracts?

A Yes, and his stating we could use that stone.

Q You didn't find it in the specifications?

A No, I think not.

By Captain Carter: Q Did that make any difference in your bid at all?

A No. I took advantage of that in my bid by reason of your telling me we could use it.

Q So that if I had not given you that information it would not have made any difference whatever in your bid?

A No.

By Colonel Gillespie: Q You did not bid on the Cumberland Sound work on the same day?

A I think not.

Q Why didn't you bid on that?

A I didn't want to load up with too much.

Q Did you supply any material for the contractor to whom that work was awarded in 1896?

A No sir.

By Captain Gillette: Q Have you ever done mattress work on a contract of that kind?

A No large business.

Q What is your main business?

A Bridging, docks, etc. We do a great deal of dock work.

GEORGE W. BROWN called.

Direct Examination by Captain Carter.

Q Will you state your service in the Savannah District, I mean approximately?

A I came to Savannah first in November 1886, was there practically continuously until the end of January 1892 except for about a year between 1887 and 1888. I was away from there three years and returned January 1894, and was there eight months. I was then employed in Savannah to represent the engineering office in November 1896 and was 725 there from that time until August 1897.

Q Are you familiar with the construction of fascines used in the Savannah District?

A Yes sir.

Q Have you had charge of the construction of such work?

A In one case I had charge of the construction of them, and in two or three cases have used them.

Q Are you familiar with the specifications under which the fascines were constructed?

A Yes sir.

Q Were the fascines constructed according to those specifications?

A Yes sir; you mean the ones I had charge of myself?

Q Yes, and I want to ask you whether those which you did not have charge of and which you saw were constructed in such manner?

A Yes sir, all fascines I have seen there have been constructed according to specifications.

Q Where have you seen the fascines?

A On the lower Savannah River in 1886 and 1887 fascines were used on the repairs to dams, and then in 1889 I think it was at upper Savannah River, at the Augusta work. I had charge of the work and we put fascines in there entirely—fascines and stone, and then later I have seen fascines on one or two points on the Savannah River and at Fernandina.

Q When was the latest time you have seen fascines at Savannah or Fernandina?

A In May or June of last year.

726 Q Were all these fascines constructed in accordance with the specifications?

A Yes sir.

Q Has there been any deterioration in the fascines extending over these years?

A I should say not. I should say fascines made at a later date were fully up to those made in former years.

By Major Raymond: Q What later date?

A In June.

Q What year?

A This year. Captain Carter asked me for the last ones I had seen and that was in June in this year.

Q Where?

A At Fernandina in May or June; it was about that period.

By Captain Carter: Q Were the fascines properly choked?

A Yes sir.

Q Will you describe the form of choking which you have seen used?

A The method which was used at Augusta was with two levers possibly four feet long which were connected with a chain about one-third of the way through the larger end, and these levers were placed on opposite sides of the fascines with a chain across the top and by bringing the levers around the fascines were compressed by the chain.

Q Were they properly compressed?

A Yes sir.

Q Do you consider the specifications contemplated the construction of the military fascine?

A No sir.

727 Q Would such a fascine be contemplated for that class of work?

A No, I don't think that it would.

Q What is the principal object in a fascine, weight or bulk?

A For Harbor work I should say bulk.

Q Is the element of weight an advantage or disadvantage?

A In most cases it would be an advantage.

Q Is it an intelligent method to consider the value or cost of a fascine built according to specifications in the Savannah District as dependent upon the weight?

A No sir.

Q What would that depend upon very largely, the weight?

A The amount of wood and the closeness with which the wood was framed.

Q What would it depend upon still more than that?

A The comparative weight of the wood.

Q That may vary then?

A Yes, some woods are very much heavier than others, some will sink while others will float.

Q Have you seen the mattresses constructed at Savannah?

A Yes, I have seen them but not to examine them critically.

Q Have you had any conversation with Assistant Engineer Twiggs with regard to the construction of these mattresses?

A Yes sir.

Q Were those mattresses inspected by Mr. Twiggs or by his assistant or were they inspected by the mattress camp?

728 A They were inspected usually on the work. The mattresses were being built on Amelia Island which was in sight of the engineer, and no doubt they were built and inspected more or less as they were being built but later on they were only inspected as I remember from conversations with Mr. Twiggs by an occasional visit to the mat camp. However, they were usually inspected as they appeared on the work when it came to measure them.

Q Did you have any conversation with Mr. Twiggs concerning the character of the mattresses?

A Yes sir.

Q Will you state what that was?

A In conversation with Mr. Twiggs I asked if he had to

inspect at the camp and he said no it was not considered necessary to have an inspector there; that as far as the mattresses were concerned the contractors were obliged to build the mattresses better than the specifications demanded in order that the mattresses would hold together and sink. The place being very exposed there the mattresses had to be built very solidly in order to hold together until they could be sunk; and as to the fascines themselves he said that the fascines in the mats would show what they were, and he did not consider any inspection was necessary of the fascines themselves.

Q Could an intelligent inspection of those mattresses from your knowledge of the work determine whether or 729 not the fascines and mattresses were properly constructed?

A Yes, sir, I should think so.

Q Suppose it was the contractor's desire to slight the work and he had some fascines that were good and some that were not good would it be to his advantage to assort them out and put the bad fascines where he thought they would escape detection from your knowledge of the construction of mattresses?

A No sir, I don't think in doing work on a large scale they could assort them that way. It would be no advantage to them. One of those mattresses contains a large number of bundles and it would be very difficult to pile good mattresses in any one place to be used, and bad mattresses in another place, or to assort them as they were being piled.

Q Have you had any conversation with Mr. Twiggs at any time which would leave you to believe that he had the remotest idea that the mattresses and fascines were not being constructed according to specifications?

A No sir.

Q Do you remember at what date it was you had the last conversation with Mr. Twiggs and he said the fascines and mattresses were being constructed better than the specifications required?

A It was when I was there in May and June as I stated before.

Q Of what year?

A Of last year.

Q When you were there in May and June what im-
730 pression did you gather from Mr. Twiggs either by direct understanding or by conversation concerning the mattresses used in the jetties?

A Mr. Twiggs told me that the mattresses after being put in place were being rapidly filled with sand, both as to the mattresses themselves and as to their location, that is they were being filled with sand; the sand was filling the mattresses solidly and was filling up to the side of the mattresses then as I remember it at the time I was there I made surveys of the center lines of both jetties, and in my survey we run across both jetties in many places; on the outer end of the jetties and in fact on the inside of the old inner work the sand seemed to be piling up to the top of the jetties the only way we could find the position of the jetties was by striking the rock. The jetties didn't seem to be above the surface of the local sand. The bottom would seem to raise at the point where you struck the rock and then drop off again gradually.

Q Did you gather in any way whatever from Mr. Twiggs that these mattresses as placed in the work were not performing the work intended or were in any way unsatisfactory?

Q No sir, I did not; they were considered to be satisfactory.

Q Do you know the type of mattresses actually constructed?

A Yes sir.

Q So far as the building is concerned is it more or less expensive to a contractor to construct them in that manner than to leave them as the rigid type called for?

Colonel Gillespie: What do you mean by rigid type?

Captain Carter: Type 3 of the specifications.

Colonel Gillespie: The question then is type three of the specifications?

Captain Carter: A. Yes sir.

Brown: A. As I remember from Mr. Twiggs statement a certain amount of grillage was left out; instead of taking two double grillages to each layer of brush there was only one grillage, and certain other bundles were put in in lieu of the grillage poles left out. I would say those would cost more to make them in several courses than in one. In most cases the brush is piled up when it has to be carried on the gin poles and the higher those poles are the more difficult it is to get the brush in.

Capt. Carter: Q Are you sufficiently familiar with the exposure at Cumberland Sound and the cost of mattress

work in the Savannah District to express an opinion as to whether the price of \$1.10 per square yard is excessive?

A I don't think it ought to be considered excessive.

Q Have you made an estimate of the cost of the brush mattresses made of fascines as actually constructed?

A Yes I have made such an estimate in a general way.

732 Q What is your estimate of cost per square yard?

A I made an estimate as to the cost of the work, and as I remember now it was eighty to eighty-five cents per square yard.

Q As actually constructed?

A As constructed and put in the work.

Q Suppose you were a contractor knowing the exposure and conditions at Cumberland Sound, what do you think would be a fair increase over that actual cost to include in the contractor's profits?

A In my opinion at least 25% on all contract work should be allowed for over the greatest probable cost; this place being exposed I would say the cost was liable to be more.

Q Do you know what the actual percentage of loss of mattresses was at Cumberland Sound?

A Two or three mattresses were lost about the time I was there, but I should say as a rule five to ten per cent. I was there before this in March and the weather was very much worse and they were having more trouble they were losing more then than later in the summer.

Q Are you familiar with the stone known as Florida rock?

A Yes sir.

Q Can you tell me whether it was more or less advantageous than the granite for covering the foundation?

733 A I should consider it more advantageous than granite.

Q Why?

A For sinking mattresses because it occupies a greater space for the amount of weight. I mean to say by that that if the mattress will fill up with sand that the higher it lays in the work before the sand begins to fill on then the better the result will be and the Florida stone will occupy more space than the heavier stone.

Q Do you know of any other reason why, for instance at Fernandina, Florida stone is desirable?

A I have an idea that deep sea shells will stick to the stone better than it will to granite. I know that Jekyl Creek jetty

was covered with Florida stone and within a very short time it was thickly covered with sea shells—I have no doubt with sea barnacles.

Q I don't know whether you have made an examination of that portion of the jetty that is there?

A There is a portion of the jetty filled on the inside that is very thickly covered with sea barnacles and sea shells; it is a very tight mass I remember.

734 Q Are you sufficiently familiar with the cost of mattress work to know the difference in the prices of the three designs described in the specifications and to know that they cost approximately the same?

A I should say they would cost approximately the same. If there was any difference in the two mattresses of brush, the second design would be the cheaper, from the fact that smaller binders are allowed, and another reason, the number of binders allowed are not specified; they could be made cheaper than it would be possible to make the others, I think.

Q Referring to the Florida rock; do you know whether or not it was generally understood that low grade rock was to be Florida rock?

A Yes; I understood from conversation with Mr. Twiggs, and my impression was at the time, that that was included in the specifications, or the specifications were written so as to include that.

By Col. Gillespie: Q You had the same access to the specifications that Mr. Twiggs had?

A Yes. I was not on contract work.

Q Were you not assistant engineer?

A Yes sir, but I was on survey work. I have been on surveys nearly all the time.

By Capt. Carter: Q Have you had any conversation with Mr. Cooper concerning the work in the Savannah harbor?

735 A Yes, though not recently.

Q How recently, if you remember?

A It was immediately on my return from the Tennessee river, in January, 1894, or December, 1893.

Q Was there anything said at all concerning how the work was being done, whether it was being done well or not, or anything which gave you an idea as to what Mr. Cooper thought of the work?

A Yes sir. It was, as I said before, on my return, and having been interested in the work, I asked Mr. Cooper how

the work was progressing and what was being done, and I remember that Mr. Cooper stated that the work was being well done and was progressing satisfactorily.

Q Have you had any conversation with him since then, that you remember, concerning the character of the work in Savannah Harbor?

A I can't remember any particular time.

Q Have you known Mr. Cooper well enough to know that if there had been any change in his opinion, he would have stated anything to you concerning it?

A Yes, I think he would.

Q Have you ever heard from him in any way that he considered the work done improperly?

A No sir; on the contrary, my recollection is that the 736 impression I got was, that the work was being done properly. It came about in connection with the work of the contractors. He said the contractors had a good contract and were making money; still, they were being held strictly to the specifications; that he was inclined to compliment himself at the same time, from the fact that the contractors were using a device which he claimed to have invented, and said that by that they were able to save a great deal of money—that is, they were able to make a great deal of money. I think the device of building the fascines on lighters.

Q Did he claim credit for that?

A Yes; he claimed credit for that.

Q Have you heard anything at all from Mr. Cooper, wherein he thought the work was departing from the specifications in any way?

A No sir.

By Col. Gillespie: Q You have testified that the work done at Cumberland Sound was according to the specifications?

A Yes sir; as far as I was able to see.

Q To what part of the specifications does this statement apply.

A As to the mattress work.

Q Have you also testified that the work done was not of the rigid type or type 3; how do you reconcile these two statements?

A As I said, it cost more to handle the brush. I don't understand that the specifications say absolutely that 737 the mattresses shall be made in a certain way. It is true, that the specifications say that this style of mattress shall be used.

Q Do the specifications say that?

A Yes sir, and they also say that certain modifications may be made; they may be increased or diminished, but a proportionate allowance shall be made to the contractors according to what portion of the work is to be done, as I understand it.

Q You have testified also that in a conversation with Mr. Twiggs, that Mr. Twiggs gave as a reason for modifying the mattresses, that he wanted them to hold together when they sunk. Do the specifications provide that the mattresses shall hold together in sinking?

A A single course of mattresses—

Q (Interrupting) Answer my question.

A No sir.

Q They do not?

A No sir.

Q Then, what could your reply as an intelligent man have been to Mr. Twiggs when he made such a statement to you as that?

A The mattresses were being made eight courses deep and they were very heavy, and would have to be thoroughly wired, in order to hold together. The specifications called for binders eight feet apart or not more than eight feet apart, and I don't think the mattresses would hold together and sink, eight courses deep, with binders eight feet apart

738 Q Did the specifications call for mattresses to be piled eight courses? Where did you get any construction of that kind from?

A In the clause which allowed a change to be made in the specifications.

Q Then, there was a change made in the specifications?

A Yes sir. I would modify that last remark by saying that I did not mean to say there was a change made in the specifications. I meant to say that the specifications allowed a change to be made in the manner of making mats.

By Capt. Gillette Q You testified that the specifications for fascines do not contemplate a military fascine. Will you give an outline of a specification calling for a military fascine; give the outline of the specifications as you would write them?

A I am not used to writing specifications, but I can name over some of the requirements, I think.

Q Give me what you would put in?

A That the fascines should be made of brush perfectly

straight, without any limbs or leaves, and tightly choked. Of course, the size would have to be specified, and all that.

Q Is that all you would put in?

A It would depend upon the purpose for which they were to be used. The size and length. I think that with the requirements that the bundle of brush should be choked as tightly as possible, would cover it.

739 By Capt. Carter:

Q In sinking eight mattresses placed on top of one another, would it or would it not be necessary to have that combination of mattresses held more tightly together than would be required if each mattress was sunk separately? In other words, would the effect of the sea on courses of mattresses be greater or less than on a single mattress?

A It would be very much greater.

Q So that, if a statement were made to you that a mattress was better than the specifications called for in order that the contractor might not lose them, does that necessarily mean that a mattress made according to the specifications would not go into the work?

A No sir.

Q It means the factor of safety is increased?

A Yes sir.

Q Then, the factor of safety as covered by the specifications is simply for the contractor to protect himself?

A Necessarily, for the contractor.

Q To reduce his percentage of loss?

A Yes. As I understand it, Mr. Twiggs said, in a general way, that it takes something near a ton of wire to hold one of these mattresses together.

By Capt. Gillette:

Q You have testified that ten percent of the mattresses in Cumberland Sound were lost?

740 A In my opinion, five to ten per cent.

Q What is your opinion based upon?

A On conversation with Mr. Twiggs and seeing the work which was being done there.

Q Did you ever know of more than one or two mattresses being lost?

A When I was there only one was lost.

Q As far as you know personally, only one mattress was lost?

A Yes sir.

Q How do you arrive at eighty to eighty-five cents per

square yard for mattresses built at Cumberland Sound, eight courses thick?

A That is based mainly upon Capt. Black's figures as the cost of the work at St. Augustine.

Capt. Carter: I Produce now Mr. Twiggs' blue print of a report, showing the condition of the mattress work at Cumberland Sound, and showing the manner in which the sand was deposited, and that none of the work was destroyed. It is dated June 15, 1897.

Marked "Exhibit No. 1, October 18, 1897."

(Memorandum, See Court Martial Record vol 18 p 3969)

M. A. CONNOLLY, called:

Examined by Capt. Carter.

Q State what position you occupied in Savannah?

741 A I was clerk in the United States Engineering office from September 1, 1888, until August 2, 1897. j

Q Will you state the general character of the instructions given to the employes?

A That every thing that was to be done should be perfectly right, and nothing should be done that was not according to the regulations or rules of the office.

Q Tell me whether you recognize this book (Showing book to witness)?

A Yes sir; that is the book of rules governing the employes in the Savannah District.

Q Can you tell to whom this book was issued?

A It was issued to everybody in the employ of the office; clerks, inspectors, recorders and draftsmen, and everybody else in Savannah and out of Savannah, Fernandina, Brunswick, etc., I issued some of these books and I know. Those not issued by me were sent to the other employes.

GEORGE W. BROWN, recalled:

By Capt. Carter:

Q I want to ask you if you are familiar with this book (Showing same book to witness)?

A Yes sir.

Q State for what purpose those books were issued?

A They were issued for the guidance and instruction of all employes of the United States Engineering Department 742 ment in the Savannah District.

Q Were any departures from the instructions contained therein authorized?

A No sir.

By Capt. Gillette:

Q Is there anything in this book anywhere that requires that work shall be done according to the specifications, or that a certificate to that effect shall be signed by the employes?

A My impress is that there is such a requirement in that book.

Capt. Carter: That is all provided for in the book, whether he remembers it or not; it is in the book.

The Witness: The reports are all sent in every ten days and certified to.

Q That the work was done according to the specification?

A Yes sir. I don't remember if it is in those words, but the certificate says which is appended to the work, "I hereby certify, on honor, that the above is correct," or something of that sort.

By Capt. Carter:

Q Suppose you had received instructions that no work should be measured unless it complied with the requirements of the contract; would you consider that you could make a certificate and report it as correct if it did depart from it?

A No sir.

743 By Capt. Gillette:

Q I don't know that I got your earlier testimony. Where were you in 1889?

A I was at various points in the Savannah District.

Q Did you leave there during that year?

A No sir, I think not; still, I don't remember.

Q Were you in the Savannah District at the time Col. Hughes came there?

A Yes sir, the Inspector General.

Q You appeared there before him?

A Yes sir. I was then upon a survey of the Savannah River.

Capt. Carter: I would like to place on record an extract from this book, which can be certified to or examined by the Board:

"93. The general duties of an inspector are to inspect and "examine material and report whether the material and work "are in accordance with the contract or not.

"96. He must thoroughly comprehend the specifications "and his general instructions.

"102. Mattresses will first be carefully examined and the "inspector must satisfy himself they are constructed in ac- "cordance with contract before he accepts them for measure- "ment."

With regard to the estimate of the cost of brush mattresses made by Capt. Black, I desire to invite attention to the fact that he states his ideas as to the costs which were obtained from work done under his supervision at Mayport 744 by Mr. R. G. Ross, whom he states he considers an experienced contractor and in whose opinion he has confidence. In addition to this where Capt. Black has testified that Mr. Ross has done work at Cumberland Sound and hence is thoroughly familiar with the conditions existing there and knows the relative value of the cost of similar work at these two points from actual experience. Mr. Ross has also examined carefully the fascines and mattresses built at Cumberland Sound under the contract of 1894, which mattresses were built and sunk exactly like those under present contract. He also testifies that he has been a contractor for over twenty years and that during that period he has been extensively engaged in constructing and superintending the construction of brush fascines and mattresses at various places on the South Atlantic coast, under contract with the United States government; that from personal inspection and examination he is thoroughly familiar with the locality and all the conditions existing in relation to the government work at Cumberland Sound; that he examined the specifications for the work at Cumberland Sound, which was to be laid in 1894, and made a bid for the doing of the same; that at that time his bid was for certain reasons made very low—I have not the figures—he did bid, but that is in this list; that in the year 1896, he examined the specifications for the work at Cum-

berland Sound and prepared a bid for the work, but that 745 on account of the financial condition of the country, he did not submit it; that he knows how the brush fascines and mattress work were to be built at Cumberland Sound under the contract of 1894, and they are alike in all respects to those built under the contract in 1896; that he knows that the construction of the fascines at Cumberland Sound under the contract of 1894 were properly built and like those built by him under his contract at Mayport; that the mats at Cumberland Sound were built as well as those built by him at Mayport; but in his judgment each mat cost a little more per yard to the contractors to build in that way than singly as at Mayport, but the sinking was a little cheaper, if the contractor had good luck, so on the whole the cost was about the same; in his judgment, it would cost the contractor ten to twenty per cent. more for mattresses at Cumberland Sound than at Mayport, on account of the exposure and strong currents and other difficulties; that he fully understood how the mats were to be built and sunk, and he knew also that the fourth class rock was to be Florida rock; that in his judgment, the three designs of mats cost about the same; the brush ones, how, ever, cost something more than the log ones, but he was of opinion that the third class mats were the ones which were intended to be used in the work, and he says that the prices for the work as finally let at Cumberland Sound 746 were, in his judgment, reasonable and fair.

Mr. Hathaway, who also did the work at Mayport, and who, it is said, lost money at seventy-five cents per square yard for mattresses, testifies that the mattresses and fascines at Fernandina are like those at Mayport. Mr. Hathaway's statement will be submitted a little later. I have that information from him. I wanted it in the form of an affidavit instead of the way in which I got it, and I will submit that a little later.

With regard to the statement of Mr. Twiggs' that the mattresses were not constructed according to specifications, I state that Mr. Twiggs had informed me on the occasion of my personal inspection at Fernandina that the work was being properly done. This conversation took place usually on my boat, and I have here an affidavit of the Master of the boat to the following effect—

Col. Gillespie: If you have the affidavits of these gentlemen, Capt. Carter, I don't think it is worth while to read them because they will all be submitted with your statement.

Capt. Carter: Perhaps that is so, but I will submit the affidavit of George L. Gamont, Master of the United States steam launch; also the affidavit of Thomas H. Laird; also the affidavit of Mr. Daniels. Referring to these various estimates of Mr. Geisler I have gone into and analyzed them, and with reference to the mattresses seventy-five feet by fifty, he estimates it will take one hundred logs and states that they must be constructed of average timber of twelve inches. That simply shows the system under which he is working and shows that the whole thing has been worked out with a view to increasing the cost of the first design and minimizing the cost of the design of the mattresses laid in courses.

Concerning the financial responsibility or reliability of Mr. Hancock and Mr. Foley, who claim they were not treated properly, I have said it would be right for me to go no further with reference to that subject than to obtain a certificate of Mr. Osborn, which I read; I also read the affidavit of James B. Connolly, Parker F. Harrington, Martin McGuffog, Hamilton E. Garmany, H. M. Garmany, W. T. Toschack, James C. Rossiter, J. C. Heyward, J. F. Kelly, Thomas H. Laird, George H. Palin, J. E. Nicholas. I have also sent to have these men make a sworn statement as to how these mattresses were actually built; I mean, in detail. I also submit the affidavit of J. F. Sanford, Samuel W. Skinner, Thomas F. Wallace, William F. McCauley.

Col. Gillespie: Where were these prepared, these two affidavits of Wallace and McCauley?

Capt. Carter: I don't know whether these were prepared at Wilmington or in Savannah. I was sending up to Skinner and Wallace for a memorandum of the work that was done, and asked them if they would send me several papers.

748 Major Adams: Who drew up McCauley's affidavit?

Capt. Carter: The language was written out by me after McCauley stated to me his recollection of the matter. In other words, I sent for him and asked him to state to me what he remembered of this matter, and McCauley stated it; I have put in that language; and that was done with the others, for instance, Ritterhouse, Moore, Friday, Hathaway and Grimm. R. G. Ross I had nothing to do with. They fixed up all this by themselves. I also read the affidavit of R. Moore—

Col. Gillespie: Where was that prepared?

Capt. Carter: He prepared that paper here. I also read the letter from Mr. Friday.

H. R. DUVAL, called:

By Col. Gillespie:

Q Have you ever had any business relations with Capt. Carter in any way, shape or manner?

A Yes; I have had on a number of occasions business relations with him during the past eight or ten years.

749 Q Will you please state what those relations were?

A They have been many. In the first place I was connected with the River & Harbor matters at Cumberland Sound, more in the way of observation duties than officially, and he seized a lot of my property and I had relations with him about that. Then we got into court and I had relations with him about the bridges over the St. Mary's, Santilla and Altamahah Rivers, and then I had some relations with him regarding the contract for doing the work on Cumberland Sound. I fought the bid on that work myself for the railroad—that is, this last time, when it was laid a year or two ago.

Q I would like to know what your relations with Capt. Carter were?

A We owned a lot of property known as the Reed Mill Site at Fernandina, and Capt. Carter claimed that it belonged to the Government, and I endeavored to show him it did not. I could never satisfy him, and finally I instituted suit against a man named Bigalski, the man that was in charge. I never questioned Capt. Carter's motives for doing this, as I believed he thought it belonged to the government. I tried, however, to convince him that it did not belong to the government, but Capt. Carter maintained his position and finally I commenced suit in the District Court down there, and I am sorry to say that the suit went against us, but we have
750 appealed it and don't doubt, by the advice of our counsel, but what the outcome will be all right. In fact, I offered to Capt. Carter that I would give him what he wanted for river front, but he refused to take it. Then, in our purchases at Santilla, St. Mary's and Altamahah, and also St Augustine, after we supposed we had complied with his specifications, he made us make extensive alterations. Then I had some business with him about the snag boat which I thought he ought not to have charged me with. He assessed us on that pretty heavy for the snag boat at Altamahah river while we were making alterations which he himself proposed should be made, and I paid that. Then, in the matter of the Cumber-

land Sound improvements—I had been before the River and Harbor Committee several times, and Capt. Carter was explaining the method and plan of that work, and I had him called there several times in several capacities before the members of the House Committee on River and Harbors. I had, of course, nothing to do with it than sit there and listen to what was said, yet I never consulted with him upon a commercial requirement of the port at all, but simply sat there and heard him as the various committees would call him to make his statements on the subjects. In the matter of the contract for doing this work at Cumberland Sound I have never done any of it, but I took it into my head that it would be a good thing for our railroad to do, as we had the 751 terminal there and plant and the character of stone, and all that, and all that he told me they would want was a soft stone for the lower grades and heavy stone for the upper grades. I had all the soft stone in Florida and the heavy stone at Columbia, and I thought I would undertake to do that work. I had nothing more to do with that than he gave me a plan and specification and I had some correspondence with him,—or rather interviews with him about the cost of the necessary plant and the capital I would require. The plant, I think he told me, would cost depending very much on what the railroad had, and he thought I could supply the plant cheaper than an ordinary contractor by reason of having the railroad cars, rails, and everything that was there necessary; that I would require some barges and tugs, but the tugs I controlled anyhow, and I think he told me what they would cost.

Q How much did he say they would cost?

A I think he told me fifty to seventy-five thousand dollars. Then, I had some talk with him about how much capital it would require, and he was under the impression that with the road doing the work, it would not require any capital, because I could carry it all on my pay-rolls, the freight, and that I could no doubt, with the credit of the railroad and the people who were behind us, manage to get the government vouchers discounted. Well, I abandoned that work 752 because a number of contractors in Florida, such as Rutherford and the Atlantic Contracting Company and another man by the name of Grimm, were all patrons of ours, and they all said they would haul the stone over our road, and our officers advised me to give that up and not come in competition with them. It was away out of my line, also; and then these men said they would all give me transportation,

and I thought if I could do that, it would be better, and I knew well that if I lost it I would make enemies of the men who would be very good patrons of the road; so I abandoned it. Then, I don't think I ever had any further conversation with Capt. Carter except as to the matter of freight rates. I have always been very careful never to presume upon my personal relations with Capt. Carter on account of my business, but the rates we established were \$1.50 from Columbia, South Carolina, and \$1.00 a ton on Florida stone. On account of the contractors informing me they would have to have 500,000 tons of stone. That seemed to be satisfactory to everybody who was going to bid there, as I was informed by the officers who were watching it, and satisfactory to Rutherford and the Atlantic Contracting Company, and I took it for granted that it was settled they were going to pay my rates on the stone.

Very much to my surprise, Capt. Green of the Atlantic Contracting Company, came to my office and showed me a letter 753 from a barge company offering him the contract to carry stone at fifty cents a ton delivered; they would put on enough barges to take this soft stone down and hard stone, both delivered at the works at fifty cents per ton, and they endeavored to have me reduce my rates. They finally agreed to contract for a lot of that stone at seventy cents a ton from Florida and \$1.25 from Georgia, if I would reduce my rates from \$1.50 to \$1.00; otherwise, they said they would take it at fifty cents and take the barges. I didn't believe the barges were practicable, and I believe that is the only time I took advantage of my personal relations with Capt. Carter when I asked him about the barges. These men said that they would save \$150,000 to \$200,000 if we accepted these barges. I did not believe the barges were practicable, and Capt. Carter concurred in my suggestion. I didn't ask him to but he did,—that it was not possible to use the barges on account of the storms and tides on the Atlantic Coast. In fact, it had the effect of setting me up very much. Capt. Green said, "We will give you some of the stone." And in reply, I said, "You will give me all; otherwise, your rates will be higher." The Traffic Manager of our road happened to be present at the time, and he said that was a special rate we were making provided we had all the stone, and that if they did not give us

all the stone we would charge the regular tariff rate. 754 Capt. Green asked what that was. I said I didn't know.

Turning to Mr. Pennington, he said it would be two dollars. I don't think I ever saw Mr. Green after that, but I

talked several times with Mr. Gaynor after that, and he agreed to give me their stone for one dollar at Florida and \$1.50 at Columbia.

Maj. Adams: Which Gaynor was that?

The Witness: There are two of them—John, and then there is the other brother.

Q Where did this conversation take place, and when?

A This conversation with Capt. Green took place in my office in New York, I think, some time in October, a year ago. I had just returned from Washington, where I had been over to see Secretary Lamont, I think, about this work.

Q In October, 1896?

A Shortly before that time; perhaps it was earlier, but I could not tell you definitely, but I could tell by referring to memorandums in my office.

Q You have used the word "we;" to whom do you refer?

A I mean the Florida Central & Pensacola Railroad Company.

Q What relation do you bear to that company?

A I am the president.

Q Is Capt Carter a stockholder in the road?

A No sir.

Q Has he ever been?

A No sir.

Q Have the Gaynors been?

A No sir.

755 Q Has Green been?

A Never. The stockholders in our road who control it are Messrs. W. Bayard Cutting, R. Cutting and myself, Mr. Thomas E. Platt of New York, the Senator, and the balance, with the exception of men with whom I am very familiar, is held in Amsterdam.

Q Now, you may continue as to the result of this conversation with Capt. Green?

A Capt. Green backed out and said, "We will see about it." Afterwards, in my conversation with the Gaynors, they assured me it was all right. I told Mr. Pennington when he returned to Florida to come to an understanding with the Gaynors and let them understand they would pay two dollars a ton or they would agree to haul the stone over our road. The Gaynors had always assured us that for the third and fourth classes they had paid for soft stone, Florida stone; that was understood everywhere. Rutherford talked with me about it. I don't remember the classes, but I know it was under-

stood from these contractors—and I never talked to anybody but Rutherford and Ross and Gaynor—that the bottom stone was to be a soft Florida stone, and the hard stone was to be sac granite as we had in our quarries at Columbia. Then afterwards Gaynor assured Pennington that all the stone would be hauled over our road; that he had a contract 756 with the Company in Georgia that proposed to give him 100,000 to 150,000 tons of hard stone, but he would get out of that contract and give it up. Afterwards I saw Gaynor myself in Washington. I have seen Capt. Green since. Mr. Bayard Cutting and myself went to Washington and stopped there to see Secretary Lamont about this matter, and we met Gaynor and Green at the Potomac station, and I was assured it was all right and that all the stone should go by our road.

Q Do you know whether any of this stone that was delivered over your road was condemned at any time?

A That I do not.

Q You were never compelled to haul any back?

A That might have been, but I have no knowledge of it.

Q These are what you might call official relations with reference to government work of which Capt Carter was in charge?

A Yes sir.

Q Did you ever at any time have any private relations with Capt. Carter?

A None, except a very pleasant friendship.

Q I mean, in any operations in which money was involved?

A None whatever.

Q Any investments?

A None whatever.

By Capt. Carter:

What would have been the effect on you and also on the Atlantic Contracting Company if I had not assured you that in my opinion the method of bringing stone by barges was impracticable at Fernandina?

A I think I would have reduced my rate to seventy cents, probably to eighty-five cents, anyhow to seventy cents, from Florida, and to a dollar, anyhow, from Columbia, and you can calculate what that would have been. After I had this talk with you, I went and talked with our General Manager and Traffic Manager, and after getting all the information we could get about it, we felt just this way: there were 500,000 tons; a reduction of thirty cents a ton was \$150,000 to us and \$150,000 to the contractors; in fact, Capt. Green said that I

should not take exceptions to his attempt to do that; that I must remember it was a very large work and that fifty cents a ton would probably be \$250,000 to him, and of course, I did not tell Capt. Green that I had consulted Capt. Carter about it.

Q In other words, if I had wanted to do so, I could have gotten you to reduce the rates?

A If you had advised me so to do, I would have made my rate fifty cents. I would have done anything to have kept anybody else from hauling that stone.

By Col. Gillespie:

Q Were you a member of the Atlantic Contracting Company?

A No sir; I would not have had any relations with them as president of my road if I were.

758 Q Or was any member of your company, that you know of?

A No. I would like to explain that matter. We believed of course, that it was for the best interest of the road to have that work done properly, because it is a port for the railroad, and I own a great deal of property at Fernandina and so does the railroad, and from our own experience we know that where it is to go under salt water it very soon is covered with barnacles and gets solid, whereas, granite and hard stone don't. We, for instance, put up a dock at Cedar Keys in 1873 and made a crib of palmetto and just threw the Florida stone in there. Now the palmetto has rotted away and the Florida stone is a solid mass. At Fernandina, where we have rip-rapped our dock, there are places where the stone is such a solid mass that the General Manager of the road told me that he believed it became such a solid mass that even water didn't go through it, whereas, right adjoining this it is as loose to-day as it was when first put down; and I believe in trying to keep this Florida stone in use, because you get the best results for the work done. It was more important to me because it was a matter for all time, and of course, it was natural that I should work it in my own interests.

759 By Capt. Carter:

Q You have large interests in Fernandina and therefore were interested in the success of the work that was there?

A Yes sir.

Q Did you at any time hear any criticism of my conduct of that work?

A None whatever; nothing to affect you at all; nothing to injure you at all; I have heard complaints that you were unjust to your inspectors in being particular with them.

Q In what way?

A In the way of taking exceptions to work, for instance, which delayed the work and at the same time was not necessary.

Q But never that I was unfair to them?

A Never that you were unfair to the contractors at all; no.

Q Or to the inspectors?

A No. They said you were very critical and that you made changes and even condemned work which they thought was all right.

Q If there had been any well-founded criticism, or criticism of any one man whose opinion was worth having, of the work, would you probably not have heard it?

A Yes, because I was regarded as responsible for the work; it was I who took that work up through all the various committees in Congress.

Q I mean the actual execution of it, down in Fernandina; in other words, if work had been done there which was not the right sort of work, or the contractors had not performed their work according to their contract and had not done good work, don't you think you would have heard something about that, either yourself or through some of your agents down there?

A I would have heard it through some of our people. I don't think that anything could go on there very well without my knowledge when I was on the spot, but it might be that I would not have heard of it.

By Col. Gillespie:

Q Did the Atlantic Contracting Company ever pay your expenses in Washington?

A No; I never had any. I never spent a dollar in Washington more than to keep a man there occasionally to just call the attention of his friends who were on the Harbor Committee to a certain thing, and \$1200 would pay every cent I ever spent there. I never used any lobbyist at all. I have gone myself direct to those people:

Q I did not clearly understand what you said was the contract rate on Florida rock?

A One dollar.

Q What was it in previous contracts?

A I think, seventy-five cents.

Q Has it ever been higher than a dollar?

A I don't think so. I don't know. I think not.

761 Capt. Carter: I read also the affidavits of J. L. Grimm and E. L. Friday. I have sent to get a statement from the men who actually built the mattresses both at Savannah and Fernandina and as to how they did build them exactly. There is another thing which I wish to state, and that is, that I have received a telegram from Savannah stating that the statements of the jurors had been sent on in the Brown case, and I might invite the attention of the Board to the fact that I have not been furnished by Capt. Gillette with the name of that person he mentions.

Capt. Gillette: The nearest I can come to it is that he was a man by the name of Logan. I don't know that he was the man who made that statement.

Capt. Carter: He not giving me that, the only way I could do was to get the statement of every juror in the Brown case, which I have obtained, or at least, I have a telegram that they have been sent. I also asked to be down here these men, Edward Gaynor and William Gaynor, who were formerly in charge at Savannah and at Fernandina. I have not seen William Gaynor, but Edward Gaynor told me that his brother would be here this morning and that they both would be down here. I have brought in all these affidavits because these men are the competitors of the Atlantic Contracting Company and they, in connection with that Company,
762 have done about all the work of this character that has been done on the Atlantic coast and know what that work actually costs.

I asked Mr. Brown to make out his estimate of eighty-five cents a square yard in detail. The detailed estimates that have been submitted before I have analyzed, and the first criticism I have to make is, that the estimate of Mr. Giesler is false throughout the whole thing and is of no value. The statements of Captain Black and Guillard are very nearly right, but their premises are wrong, they having worked out the cost of mattresses which were not built and nothing like anything which I ordered built or which I was building. Of course, I was not on the Fernandina work all the time and I do not know of my own knowledge that there was always the same kind of work put in that I saw, but I believed it to be the same, and at the time I saw the work it was satisfactory and being done properly, and that was the only guide I had

to rely upon, the honesty of my assistant engineer, and I know that not only through him, but through men with whom he talked, I received the impression that the instructions were being carried out and the work done according to contract.

I have also sent for the sworn testimony of the men who actually built the mattresses, as to how these mattresses were built, the character of the fascines, how they were made, and the character of the brush, and when that is obtained it will be very easy to determine by an estimate what it 763 would cost, approximately to build these mattresses. I

think about seven per cent of the mattresses built broke to pieces, and the contractor lost them; in other words, that is a loss which of course can only be determined by years of experience, and in some other cases, the actual risk might be ten per cent. It is caused by the exposure of the work, and not only that, the experience of the contractors and the character of the men who handle that class of work should have great weight, so that those things will have to be taken into consideration in any fair estimate of cost of any work, and I thought of no better method of determining that than to get the statements of men who know exactly what this work has cost, because they have done the work and have received and disbursed the money for doing it, and they know by what is left over just how much they made or how much they lost.

I have also asked Mr. Bangs to send to me a statement. I have been informed and I believe it is true, that he lost on the Fernandina work between forty and fifty thousand dollars under his contract of 1894, and I asked him if he would not give me a sworn statement as to the actual facts in that case, and I don't believe he will. I have not seen him.

But I want to say this, and that is, that I have always 764 wanted a contractor to get a fair price for his work.

I have never believed it to the interest of the government to have the work done below cost. When I got that work I wanted it done well and in the best manner possible, and that was always my instructions which I gave every single assistant on the work, because my reputation was at stake and the reputation of the corps of engineers, and I wanted to make a success of every piece of work I started in to do. Now, when I awarded the contract of 1894 to Mr. Bangs, I recommended it to Mr. Bangs at what I believed to be largely below its cost, because I knew him to be a man

of standing and he would carry through the contract even at a loss. They had had that work for some time and I knew there was some feeling between the contractors, and I know that whether it was to be carried out by him at a loss or at a profit, he would carry it through. If it had been a contractor whom I knew was simply bluffing, I would not have recommended it, knowing it to be below cost, but when the contract came in at \$1.10 a yard and it cost him eighty-five cents a yard, I deemed the price reasonable, because I believed it cost the contractor to do the work about eighty-five cents per square yard, and that being the case, it would leave him only a reasonable profit, as I considered. I was fortified in that by the discussion before the Board in December, 1895; the details of the discussion I don't remember. I only re-
765 member that we agreed that the price of a dollar per square yard was a reasonable price. This differed from that by ten per cent, but I do not believe and I did not then believe that if I had recommended the rejection of these bids that I would have received one cent lower bid for the work. It may be possible now, that I might have, in view of the changed financial conditions of the country, but I don't feel that I would; still, it may be so, but feeling that it was a fair and reasonable bid, I recommended it for acceptance; and in that opinion the Chief of Engineers must have concurred with me, as he knew the work thoroughly, as my recommendation was approved, and then the contract was entered into.

Regarding the manner of departure in the custom of reports; my methods may be different from those of other engineer officers, but surely, I knew the division engineers and the Chief of Engineers were very familiar with what I was doing and approved of it. If I had any idea that it would have been necessary to have done more than report in writing as I did, surely I would have done it, because there was no object in the world in my not doing it, except the fact that it never occurred to me that anything further was necessary.

With regard to the actual construction of these mat-
766 tresses; I know that that was understood, and I am

fortified in that belief by this circumstance; I believe it was in the spring of 1894, that a letter was given by the Chief of Engineers to French Engineers who came to Savannah. At that time we were working—sinking several courses of mattresses at a time, and the method of launching them had been a matter of considerable discussion, although we got them off without difficulty; and when I took them down the

river, in this instance, as there always is, there was feeling that something was going wrong; but happily it did not, and I remember when in Washington speaking to the Chief of Engineers and telling him what I had done and how much pleased I was with the success I had met with. The method of building these mattresses and sinking them must have been understood, as I talked with everybody about it and I was very glad to be able to do it. I believed then and I believe now that that was the only method by which I could have done that work within the estimated cost, and I do not believe today that if I carried on the work the other way I would have been down as far as Pulaski and the river would never have been improved.

Now, regarding the cost: I can form a pretty close estimate, because I think I have been in every mattress camp and every brush camp and have gone all over the work 767 and made notes of this, and I believe I know approximately what the thing costs to the contractors. Of course, it varies and I think I know the average, and in that I have been fortified by the average of prices down there. It goes without saying that in a place like that it is not possible all these years to have no competition. Of course, these men who go down there are men of individuality and men of character and who desire to do the work. Moreover, in addition to that, I know approximately what these cost.

Now, regarding these changes which were so minor that I considered then and consider now that they were in strict accordance with the contract, because it only changed slightly the method of construction as provided for in the contract. I have asked the foreman—the controlling man in the company, as I remember it, not being there—and remember, however, I got scared at this—he said, that the only way he could get them off was to get a tow boat and knock them off. He put in longitudinal compartments that would give a tip to them, but it was found that you had to have a sudden jerk; you can't do it by inclination, and if he built them too steep they were liable to jump off in towing; it has to be some sudden move; but before that time the contractors would have made more money on the Savannah contract in 1892, by continuing exactly as he was doing. Now, on the Fernandina contract in 1896 and the Savannah contract of 1896, I believe all the contractors stated this, that it was 768 more expensive to build the mattresses as they are building them, but it is cheaper to sink them. That I believe

to be true. Undoubtedly, it is common sense. It must cost more to build the mattresses. The sinking after they have been launched is cheaper. Of course it costs more to handle a big mattress possibly of several layers of mattresses on top of one another, but it don't cost the exact number of times more that the big mattress is over the little. But taking everything into consideration, I don't believe there is any material change—and these contractors also stated that they did not believe there was any material change—but even if there were, they all bid, knowing that they could do that work in that way if they so desired, and that was the method of sinking, the detail of which I did not put in the specifications because it was patented, as I said. At that time I did not know what the patent covered.

Regarding the supplemental contract: the foreman when he started in on that work, of course, had no experience in building these things one on top of the other, and he didn't want to do it, as they were getting along all right. For one mattress they didn't need a big plant, but of course, it was 769 left, as it would be, to me. I have always found the contractor willing to please the engineer officer and to make a number of experiments and do things sometimes may be which bothered him a little, because he might do something or other whereby he can make it up somewhere else, and I have always found my contractors willing to do anything within reason that came under the terms of the contract. So I asked him to make these changes; but he never knew whether or not he would strike any snags which would knock out his method. As it was, if he could not do that thing under his contract, of course, he had the right to go back and not bind himself to go ahead and do something which might increase the cost. I do not believe it would have been possible and I don't think it would have been for the interest of the United States at all, but that method of doing it did not change the cost at all to the contractor. And even though it did increase it slightly, I have thought it didn't make any difference to him, because if it had, in the long run, he would have kicked against it, and I thought it may be about the same thing; but it did make an enormous difference to the United States, that I know; and as I said before, knowing this thing was known and knowing that it was for the interest of the United States, and being absolutely satisfied that it was not of any benefit to the contractor, I did not consider it necessary to make any special

supplemental report to the Chief of Engineers. I put it 770 in my annual and monthly reports and it never occurred to me that the Chief of Engineers was never satisfied.

Col. Gillespie: It does seem to me that these matters of necessity must go into a written statement, and I think it swells up the record.

Capt. Carter: If, in the judgment of the Board, I did make a mistake, I merely want to show how it was. There was no reason in the world if had thought or dreamed it was considered necessary that I should not have done it.

Col. Gillespie: Were the specifications in 1896 widely distributed?

Capt. Carter: They were so widely distributed that I had to request at the time that if they did not bid to return me their copies, because I was afraid I was going to run out of them.

Col. Gillespie: When was the first copy issued?

Capt. Carter: I don't know. I know it was sent just as soon as we got them from the printers.

Col. Gillespie: They were all dated June 6th; that is the date of the advertising?

Capt. Carter: Yes sir.

Col. Gillespie: When was the first specification issued?

Capt. Carter: That I don't know. It was issued 771 very soon after.

Capt. Gillette: That telegram says August 24th.

Col. Gillespie: Suppose that to be true and the bids were opened on September 8th; isn't that rather a short notice?

Capt. Carter: From August 24th to September 8th, Yes that was short.

Maj. Raymond: How many bidders were there?

Capt. Carter: I think there were three or four; we never had many bidders down there, as Capt. Black explains; it is very risky sort of work and there are very few bidders who care to undertake it.

Col. Gillespie: Was Mr. Bangs a member of the Atlantic Contracting Company?

Capt. Carter: I think he was—I don't know whether he was a member of the Atlantic Contracting Company all the time. I thought probably he had stock. It is an incorporated company and not a firm, and I supposed that these men probably all had some stock, but as a matter of fact, I learn that he has none.

Col. Gillespie: You thought then that he was a member?

Capt. Carter: Do you mean that he had stock

Col. Gillespie: Yes, was interested in the company?

772 Capt. Carter: I thought perhaps he had stock in the company.

Col. Gillespie: Why did you accept him as a bondsman?

Capt. Carter: Because he was not an officer of the company. You can accept any man who is a stockholder in a company on a bond so long as he is not an officer of the company. That wouldn't make any difference to me, if I knew the man was responsible.

Col. Gillespie: He was on both bonds?

Capt. Carter: Yes; he is a thoroughly responsible man and I knew enough of his financial standing to satisfy me that he was perfectly satisfactory. I think it distinctly states that no officer of a corporation. If it was a firm, that would be a different thing. If a man was a member of a firm, then I would not do that. I have the certificate of incorporation. When they first bid I took the precaution to have them send me a certificate of incorporation, and as I remember it, it was incorporated under the laws of the State of West Virginia.

Col. Gillespie: Was Mr. Hughes a member of the company also?

Capt. Carter: I don't know; if he had been a stockholders, that wouldn't have made any difference if he was
773 a responsible man, unless he was an officer of the company.

Col. Gillespie: How did you come to accept W. T. Gaynor as a bondsman?

Capt. Carter: He was not an officer of the company.

Col. Gillespie: He was the president of the company.

Capt. Carter: Oh no; that was John F. Gaynor.

Col. Gillespie: E. D. Green?

Capt. Carter: He is not an officer of the company.

Col. Gillespie: He is a member of the company.

Capt. Carter: He may be a stockholder, but not an officer.

Col. Gillespie: How many stockholders are there?

Capt. Carter: I don't know. I may be wrong in all this thing. I just knew these men had been working together, and I naturally assumed that may be they all did hold certain stock in this company, but I didn't know it.

Col. Gillespie: That is to say, you made a contract with

the company and then took the members of the company as sureties?

Capt. Carter: As matter of fact, I learned afterwards I did not.

Maj. Raymond: There is no objection to that, is 774 there?

Capt. Gillette: Capt. Carter said a moment ago that he asked for the return of copies of the specifications for fear he would run short. Did you begin that with the first ones you sent out, or afterwards?

Capt. Carter: I don't remember in this case whether I did that in the beginning or at the end. I remember at one time I had to send and have people return all they had, so that at this time I might have taken the precaution to ask them in the beginning if they did not intend to bid, to return them. I don't remember; the record will show.

Capt. Gillette: Why didn't you order enough specifications printed so that you could distribute them liberally and lavishly anywhere?

Capt. Carter: Because I was not running an eleemosynary tract society. I wanted to send specifications everywhere, but it was not necessary for the interests of the United States to print enough to scatter them broadcast all over the land.

Capt. Gillette: What would be the objection to that?

Capt. Carter: None, except the absolute waste of money to print the specifications; that is all.

Capt. Gillette: What was the size of that contract; 775 how much was to be expended at Cumberland Sound altogether?

Capt. Carter: The proportion of course, is small—exceedingly small, but that does not justify an unnecessary expenditure simply because the proportion is slight; that has nothing to do with the case.

Capt. Gillette: You don't answer the question; I asked, how much was to be expended in this?

Capt. Carter: About two millions of dollars.

Capt. Gillette: Do you remember approximately what a thousand extra copies of the specifications would have cost?

Capt. Carter: Very little. I submit, however, that an unnecessary expenditure of only a few cents is no more justified when there is a big contract than when there is a small contract. It depends entirely upon the necessity.

Capt. Gillette: Supposing, that by such lavish distribution you could have gotten one more bidder, who would have

bid one cent less per ton on rock; wouldn't it have justified the expense?

Capt. Carter: I should have been exceedingly pleased to have had more bidders, and if that would have contributed in the slightest degree towards obtaining them, certainly I would have felt justified, but as a matter of fact, it did not

Capt. Gillette: It might, however, might it not?

776 Capt. Carter: I doubt that, because when you are a little older you will know that work like that is talked about by contractors for months in advance. Every man who has money enough and experience enough to bid on that sort of work knows in advance of the passage of the River and Harbor bill all about the work and is preparing to make his bid and plans, and there is no piece of work of anything like that magnitude that is not known thoroughly by every man who could bid on that sort of work, so that the lavish distribution of extra copies of the specifications which you speak of would simply be the means of getting them into the hands of people who might come down as blackmailers on legitimate contractors, which could not help the United States in any manner whatever.

Col. Gillespie: If that be true, then advertising is unnecessary?

Capt. Carter: That is to give notice of the exact time when the bids are open and to give a man an opportunity to bid on the specifications, but there is no question but that any man who is able to bid on a big piece of work like that knows all about that work.

Capt. Gillette: I notice that you sent a letter with each of these first copies requesting its return. How do you estimate the cost of the clerical work used in writing one of those letters compared with the expense of a printed copy of the specifications?

777 Capt. Carter: I have not figured that out.

Capt. Gillette: I would like to invite the attention of the Board to this blue print submitted by Capt. Carter. That the sanding up shown by Mr. Twiggs doubtless existed as he shows it there—in fact, he told me so; but you will notice there is no vertical scale on that. He indicates the mattress as sanded up to its full height, but he does not show that the height had shrunk to almost nothing as his reports to me indicate.

Capt. Carter: His reports indicate to me there was no compression of the mattresses and this report showing as he does

here the bottom and top layer of 100 feet and 80 feet, indicates conclusively that he did not consider that such shrinking as Capt. Gillette speaks of had taken place, otherwise he would have represented it in a different manner. I know in all his statements to me he distinctly stated what I have stated to the Board before.

Col. Gillespie: Can you show any official statement of that kind?

Capt. Carter: I have explained that in Savannah it was my custom to visit my works very often to give instructions and receive reports from the assistants by oral questioning, and I don't know whether I have any statement of that kind in writing. At that time I supposed Mr. Twiggs to be a man of integrity and to be a man who would state afterwards what he had stated to me and if I had expected that my assistants were men who would have made a series of statements in writing and similar statements to me orally, and then afterwards try to get out of them by a flimsy and scandalous excuse, I think I would have taken upon myself the opportunity to protect myself; but I am not built that way and it didn't occur to me that every man I met was a scoundrel.

Col. Gillespie: Did you consult these gentlemen yourself?

Capt. Carter: I did; but I did not believe they were scoundrels until after they had come under Capt. Gillette's influence, and I believed that what they said was true, and that they never meant then what they state now they did, because somewhere, with somebody in conversation they would have said something which would have leaked out and it would have come to somebody's knowledge.

Capt. Gillette: Is it possible to account for the peculiarity of Twiggs' report on the supposition that he reported what he thought you wanted reported?

779 Capt. Carter: I think that any man who states that he would report what another man wanted reported, is a man unworthy of any belief whatever. I had asked him so often about that matter and I had gone over it so thoroughly, that I wanted further confirmation as to how these were standing, and if there had been any departure it was his duty to have reported it to me, and I expected that he would. He does not report anything to me at all about shrinking or any change from the satisfactory condition in

which the mattresses were when I saw them, and it was reported to me.

Adjourned to October 19, 1897, at 10:00 A. M.

Adjourned to October 20, 1897, at 10:30 A. M.

780

New York, October 20, 1897.

Pursuant to adjournment parties met.

Present same as before.

The Board was called to order when the following proceedings were had.

Captain Carter: I have a letter from Mr. Westcott which I submit, and also a letter from Messrs. Reed & Flagg.

Colonel Gillespie: There is evidence, Captain Carter, that you have had several powers of attorney from Mr. Westcott authorizing you to represent him in business matters involving the use of large sums of money. As you have been charged with being engaged in certain irregularities by which it is alleged the Government has suffered enormous losses of money, the Board has deemed it proper to investigate these transactions. Now if Mr. Westcott thinks you faultless in this matter, it is not only his right, but it is his bounden duty to appear before the Board and exonerate you. His failure to appear under the circumstances gives color to the charge under which you suffer.

Captain Carter: I have asked Mr. Westcott again and again and his statement to me is that that account which you have asked for relates to other people, and I infer from that that did it not relate to other people he would have no objection whatever to furnishing it; surely I have none.

781 He states that what I did as to that account I did for him and under his power of attorney, and I presume that Mr. Westcott feels that as it was for him only and under those powers of attorney I acted, it could not possibly have anything to do with my official actions.

Colonel Gillespie: He doesn't properly state the case when he says that there accounts have been presented before for the reason that that portion of your account which we think is pertinent to the case we have not got.

Captain Carter: I am powerless in this matter. I don't know what to do. I should like to do it and I have exhausted every effort but the trouble appears to be that this account contains in it things which I know nothing of and which concern other people, and that is the reason I suppose why Mr. Westcott doesn't feel like giving that account.

Major Raymond: Will you state what other people?

Captain Carter: That I don't know. He is a man of large business connections and I don't know what other people, but he says as to that account what I have done in it was for him and under his power of attorney—in other words, none of that account was mine and I only acted for him as attorney.

Colonel Gillespie: Then Mr. Westcott in justice to you and in justice to himself should come here to exonerate you and explain that account.

Captain Carter: He says he has relations with his 782 other children and with other people, and that he owes a duty to them, and I don't know what to do.

Colonel Gillespie: All right.

Captain Carter: Of course you understand this that he is an old man and he has other people with whom he has dealings as well as myself. I can't conceive how there can be any reason, because so far as I am concerned there is nothing in the world I would not like to have done. I have done everything I could do, and I of course know nothing about these private affairs of Mr. Westcott. I only knew what I had to do.

Colonel Gillespie: Have you your written statement here today?

Captain Carter: I have it almost finished. It is type-written, and there is a small portion yet that I have not finished, but I was so tired last night that I had to go to bed, knowing that I would have to be here today, but it will take me not more than two or three hours to finish it.

Colonel Gillespie: The Board has now patiently heard you for a month and it is proposed to close this case today. We will hear Captain Greene.

Captain Carter: Can I submit a few other things?

Colonel Gillespie: Yes, but I hope before the day closes you will present the case again to Mr. Westcott: There is no disposition on the part of any of the members of the 783 Board or any person outside of the Board to get at the private matters of Mr. Westcott. What we want to get at and what the Board will insist upon getting at is Mr. Westcott's account relating to your account, which can only be done by an inspection of Mr. Westcott's account. As we have asked for it repeatedly from Messrs. Reed & Flag and have asked for it several times before I ask it again more especially in your behalf.

Captain Carter: I have asked for it in my behalf and have pressed it earnestly upon Mr. Westcott, but he says to me that these are mine and I acted solely and only for him.

Colonel Gillespie: What year does that relate to?

Captain Carter: To all the time I have been acting for him since 1891.

Colonel Gillespie: I should suggest that you make another attempt to have this authority granted.

Captain Carter: I have explained to him the feeling of the Board, but Mr. Westcott feels, as I stated, that these were his personal matters and not mine.

Colonel Gillespie: The answer to it all is that the Board does not deem that satisfactory. We have duties to perform and they must be performed and we cannot slight them.

Major Adams: Has his attention been called to the fact that checks drawn by Captain Carter as attorney for Mr.

Westcott are not included in the statement furnished?

784 Captain Carter: I know that, and I went to Reed &

Flagg to get those accounts, and they told me that they could not separate them from Mr. Westcott's account because the books did not afford any means of telling which were his, which were done by him individually or through attorneys, or which were done by me, and they stated to me that it was only fair to me to give me what I did, and that if I could tell them what those were they would do it, but they did not feel at liberty to exhibit Mr. Westcott's private transactions that I had nothing to do with as they would not be able to pick them out. If I had kept a list of what work I did for him then I could go to them and explain it to them before hand, but I did not keep such a list. I just put them into Mr. Westcott's books and there was no record kept further than that.

Major Adams: Your own check book shows that.

Captain Carter: Could I have a statement from them I could prove to you conclusively and I think they would give me everything that I could show to them because that would be conclusive to them that I was acting as Mr. Westcott's attorney instead of for somebody else.

Major Adams: It is not complete at all for this reason that you have cancelled checks drawn in favor of Reed & Flagg and indorsed by Reed & Flagg.

Captain Carter: I know that, but they said these 785 things being done for Mr. Westcott they had no means of telling, so if I could get those checks I could say on

such and such a day I gave you this, then they ought to be able to tell the transactions which I had with him.

Major Adams: These are drawn exactly in the same way as the others are drawn.

Captain Carter: As they said the others were no more mine than these; it was simply put in there for transfer.

The Board here went into executive session, after which the following took place.

BENJAMIN D. GREENE called:

By Colonel Gillespie:

Q During the course of the investigation of the offense with which Captain Carter is charged your name has come up occasionally and the Board would like to ask you a few questions. Have you ever rendered any business service for Captain Carter for which you have received money as compensation?

A I have not. I don't understand the question exactly, have I rendered a service for Captain Carter?

Q Any business service for Captain Carter for which you have received monied compensation?

A I have not; certainly not.

Q Has he ever rendered you any business service for 786 which he has received monied compensation?

A He has not.

Q Have you ever been engaged with Captain Carter in any enterprise from which you have mutually profited?

A Never.

Q Have you ever been interested in any of the Government contracts for the improvement of Savannah River, Cumberland Sound or any other river or harbor under Captain Carter?

A I have.

Q Have you ever shared with Captain Carter any of the profits arising from those contracts?

A I have not.

Q Have you ever placed in the hands of any person or in any bank, moneys designed for the use or benefit of Captain Carter?

A I have not.

Q Have you ever made any investments for the benefit of Captain Carter?

A I have not.

Q Have you ever bought any stocks, bonds or made any loans to Captain Carter?

A Made loans for him or to him?

Q For him.

A I have not.

Q Have you ever made any loans to him?

A I think I loaned him some money a number of years ago, or to his brother at his request. At the time, however, I had no contracts with the Government. The loan was paid not long after. I don't remember much about it.

Q Have you ever had any business relations with Captain Carter which placed you under any obligation to him or placed him under any obligation to you?

A None whatever.

Q Do you know of any person having an interest in these contracts who has ever given to Captain Carter for his use or benefit any money derived from these contracts?

A I do not.

Q Do you know of any person having any interest in these contracts who has placed in a bank or in the hands of a third person for the use or benefit of Captain Carter any funds or investments?

A I do not.

Q Do you believe that Captain Carter has ever derived any personal profit from any of these contracts?

A I do not.

Q Has R. F. Westcott, within your knowledge, ever derived any profit from any Government contract in which you were interested?

A He has not nor from any other contract in which I have been interested and there were a good many besides Government contracts. There are other contracts which I have executed, but neither Captain Carter or Mr. Westcott ever derived any benefit from those.

Q Do you know whether Mr. Westcott has ever invested any money in the execution of Government contracts in which you have been interested?

A He has not.

Q Has Mr. Westcott, within your knowledge, ever made any investment for the interest or profit of Captain Carter?

788 A I don't know anything about it.

By Captain Carter: Q I would like to ask you, Mr.

Greene, whether there has been anything in our lives that you know of except such relations as could properly exist between honorable gentlemen?

A In my opinion, no.

Q Have you ever known me in any way to do anything which you did not consider an honorable gentleman should do?

A I have not. May I be permitted to say something?

Colonel Gillespie: I don't think the Board cares to hear anything except what they have inquired about.

Major Raymond: Do you think it pertinent to the case?

Mr. Greene: I think it is decidedly so.

Major Raymond: I would like to hear it if Colonel Gillespie has no objection?

Colonel Gillespie: All right, make any statement you think is pertinent.

Mr. Greene: I want to say that I felt very much hurt that any one either with or without the authority of the Board—I don't know how it was done—should attempt secretly to obtain any information about my bank account when I had not declined to come before the Board and had not declined to produce the bank account. I feel hurt at that.

Colonel Gillespie: Will you give a statement of your bank account; will you permit the bank in which your 789 account is to give to the Board a statement of your account in relation to these transactions?

Mr. Greene: I will not say whether I will do that or not. I may say this, however, that my bank account contains a good many private matters, but I will demonstrate to the satisfaction of the Board if Captain Carter's defense depends upon it, that neither he nor Mr. Westcott ever received a dollar of this money.

Colonel Gillespie: I now make an application for a statement of your account so far as it relates to these contracts in the American Exchange National Bank.

Mr. Greene: Your application I shall have to consider.

Col. Gillespie: I thought you felt aggrieved.

Mr. Greene: In the American Exchange National Bank; this was an attempt to get the account at the Knickerbocker Trust Company.

Col. Gillespie: I include that then. The Board makes personal application upon you now for a statement of your account with the American Exchange National Bank, the Knickerbocker Trust Company, the Manhattan Company or

any other Company in this City so far as your relation to government contracts are concerned.

Mr. Green: I alluded to an inquiry that was made.

Col. Gillespie: How soon will you let us know whether these statements will be furnished?

790 Mr. Green: I will consider it.

Col. Gillespie: You can determine pretty soon whether you propose to do it or not.

Mr. Green: It is quite an extensive matter covering 13 or 14 years.

Col. Gillespie: The Board has asked from 1891 to 1897 inclusive. We are prepared, Capt. Carter, for your written statement, and you can read so much of it as you have completed, or we will give you an hour or so more delay so that you can prepare it. The case is now closed.

Capt. Carter: May I put in any more papers?

Col. Gillespie: You can put in any papers you chose. I think, however, the matter has been canvassed very thoroughly, enough for our investigation. However, any papers you want to add to those already submitted will be considered by the Board.

Capt. Carter: There is one thing which Capt. Gillette said the other day that I wish to refer to and that is his statement with reference to that juror.

Col. Gillespie: We have given three or four hours to that juror already.

Capt. Carter: I want to state this that Capt. Gillette was instructed to use every honest effort to find out and give me the name, and I want to call upon the board and state that he has not done so.

791 Col. Gillespie: He has already made a statement to the Board officially.

Capt. Gillette: I stated that to the best of my memory he was a man who was the foreman of that jury, and my impression was that his name was Logan, although I could not tell.

Capt. Carter: I have sworn statements here from the jurors in the case charging that Capt. Gillette approached them to ascertain something about me.

Col. Gillespie: All right; put that on record.

Maj. Adams: Does that include all the jurors in the case?

Capt. Carter: Yes sir. I have also an estimate of the cost of brush mattresses made by Mr. George W. Brown and by Mr. R. S. Fennett, civil engineers; also a sworn statement

of Edward H. Gaynor, who was the manager at Savannah, and a sworn statement of William P. Gaynor, who was the manager of the Atlantic Contracting Company at Fernandina.

Col. Gillespie: Why did not those gentlemen appear personally; they were in the city of New York?

Capt. Carter: I don't know why; I asked them. I also have a statement from the President of the Atlantic Contracting Company, and a letter transmitting one other statement which I obtained in reply to the letter of the 11th, a statement of Flathek & Company. I also would like to produce certified copies from the annual reports of the Board of Trade and of the Cotton Exchange of the City of Savannah, showing the feeling of these people in Savannah concerning the work which has been done there; then there is an affidavit of Mr. Hathaway's which I have been told was sent to me but which I have not yet received. I would like to submit that when I get it.

Col. Gillespie: Any papers you have to submit will be received. The case is now closed.

Capt. Carter: Is there anything else which Capt. Gillette has to put in the case?

Capt. Gillette: Nothing more to go into the case.

Maj. Adams: As to that statement that there is nothing more to go into the case, of course, the Board is still in session and making an investigation. In my opinion, it is not barred from making any further investigation that we may desire.

Capt. Carter: What I had reference to was this, that Capt. Gillette said the other day he had some other things here and before making my final statement I would like to have everything appear in the case, so that I could the more intelligently answer any charges that might be made.

Col. Gillespie: What is it that you have reference to?

793 Capt. Carter: I don't know what it is. He stated the other day that there were a few papers which he had not put in, and what I thought was this that if I were to make a final statement, it was no more than fair that I should have everything, because I don't see how I can make a final statement which would be a final statement unless I can have everything.

Maj. Adams: Here is a check No. 27, to the order of Reed & Flagg, for \$666.50, R. F. Westcott, O. N. Carter, bearing date April 9, 1895. The check is endorsed Reed & Flagg, by

Franklin Ford; also a check No. 29, dated April 10, 1895, to the order of Reed & Flagg, for \$6,956.28, endorsed by Reed & Flagg, by Franklin Ford. Those checks are not accounted for in the statement, which was certified to be a complete statement of all transactions by you individually or otherwise, from 1891 down to 1897.

Capt. Carter: I suppose the reason of that is, that the checks are cashed on the book-keeper, and I suppose they have no record of the checks, but now that I have it, I can go there and get it from them, I feel sure, because I asked them and they told me there was no way of discriminating, because cash was cash, and it might be either in money or in checks.

794 Maj. Adams: In other words, their certificate is false?

Capt. Carter: I don't think that. It is everything, so far as they are able to determine by their checks; everything they have, because they told me so, that it was everything they had, and Mr. Ford made the statement—he says, "We know that is Mr. Westcott's, because he came in with these same things and sold them"—I mean that stock. Those were the only things I had put in my name. Is there anything else, because if there is, I would like to know. They can't tell what a thing is, but I believe if I could make the statement that that was not mine on that day, they would be willing to accept my statement even though the books didn't say anything about it.

Col. Gillespie: The Board is surprised that five checks all drawn and endorsed alike should not receive equal consideration—in other words, there is a statement with reference to three of them which has been received, and with reference to two of them which has been declined.

Capt. It is this: That when I bought stock I had it put in my name under this power of attorney for facility of transfer, so that, although it was Mr. Westcott's my name was on the back, and of course, going down to him and
795 going into his securities, it did not appear on their books in that way.

Col. Gillespie: You are now referring to April?

Capt. Carter: Yes, referring to the same thing.

Col. Gillespie: Now, the next thing in order is the presentation of your written statement, and with a view to enabling you to have time to prepare it, we will now adjourn until Saturday morning, at half past ten o'clock.

Adjourned accordingly.

October 25, 1897.

Present, all of the members of the Board.

MR. JOSIAH REED was examined as follows:

By Colonel Gillespie: Q We are endeavoring to get some enlightenment upon the matter of Captain Carter, which we have been directed to investigate. On the 16th of October I addressed you a letter in which I make the statement that the Carter account is received. In looking over it I find it is not a complete account, as the transactions for April, 1895, are not included in the statement furnished. I addressed you a second letter on the 19th of October as follows: "When may I expect the statement of Carter's account, for which an application was made yesterday?" You have since replied that you were unable to furnish any additional information on the ground that it was Mr. Westcott's account and not Captain Carter's. Now, Mr. Reed, if you will reflect a moment and take the correspondence in that case you will appreciate that that account is Captain Carter's. Mr. Westcott's name is not mentioned in it. The letter of May 29, 1895 is signed by Captain Carter in his individual capacity and your reply is addressed in the same capacity. What the

Board asks and what it has a right to demand is a statement of that account. You will understand that we are an investigating board appointed by the authority of the Secretary of War and you must understand that the revised statutes which refer to the improper use of public money by disbursing officers are very positive, and the Board hopes that you will recognize the fact that this account is essential to our investigation and will give it to us if you can. I would like to have you give me that account as asked for in my letter of October 16, 1897.

A In the first place let me explain. When your first letter reached my office it was after I had left for the day and I received it simultaneously with the second letter. I presume, Colonel Gillespie, you appreciate the position I am placed in by having been restricted formally by Mr. Westcott, or rather enjoined, not to furnish his private account to anybody. I wish that I might speak to you gentlemen informally a little while simply to have you informed of the circumstances which led up to this business. It seems to me that you would then understand me better. It is not testi-

mony or it is not in answer to your question, but as I say, what led up to the business. If you have no objection I should be glad to do that.

Q Has the Board any objection to it?

(There was no objection)

A I have been acquainted with Robert F. Westcott since 1860, 59 or 60; during the last 15 or 20 years very intimately.

There could be no greater intimacy between any two 798 families than existed between mine and his. I think I may say I was his confidential friend. When Captain Carter married Miss Westcott, my granddaughter, who has always lived with me, was bridesmaid. From that time onward Westcott always spoke to me of Captain Carter as his son for whom he had great admiration and in whom he had unlimited confidence. That confidence was expressed by some business which was done by Captain Carter acting merely as a messenger as it were or representative prior to 1895 when Mr. Westcott was abroad. To confirm what I say about intimacy, Mr. Westcott urged me to go with him abroad. I could not go. Mr. Westcott then informed me that he wished Captain Carter to represent him during his absence and expressed to me and to my firm unbounded confidence in Captain Carter's loyalty to him, his integrity, and stated that he would do everything for him as if he were here himself. Now those facts that I have just stated indicate to you how the relations existed between myself and Mr. Westcott and Captain Carter as his representative.

Now, then, the business of my firm that was transacted with Captain Carter was always considered by my firm as Mr. Westcott's business. He was always considered simply as Mr. Westcott's representative. I ask your indulgence because I want to give you thoughts that occur to myself. Suppose Captain Carter had been Mr. Westcott's own son, I could not have looked upon him more as a representative of Mr. Westcott than I did. Therefore, this is the explanation—it may not be an excuse—for addressing Captain Carter a letter without addressing him as the attorney for Mr.

Westcott. Whenever that was done, it was done simply 799 ly on the ground of confidence, and that it was perfectly understood between my firm and him that he was the representative of Mr. Westcott. I never did from the first to the last any business with Captain Carter that I did not understand to be as the representative of his father-in-law, Robert F. Westcott, from the beginning to the end. Now in

the first place when you ask, Colonel Gillespie, for a statement of the account which we did not furnish, I had not then any instructions from Mr. Westcott, but I immediately wrote to him asking consent from him to respond to your letter, and I received through his attorney positive instructions not to do it. You will please to consider then my very embarrassed position. Now I want to say further that it would give me the utmost pleasure to answer all your questions. There is nothing I desire so much as to be permitted to do just that, but I beg your consideration of my being restricted from doing that. Now I can explain, if you wish me to do so, some facts connected with this account of Captain Carters which you have already had which are not included in the restrictions of Mr. Westcott, as I appreciate them. I think my cashier, Mr. Ford, was asked by you whether Captain Carter ever paid for any securities in cash, or in part cash.

Major Adams: I asked that.

A I understand from Mr. Ford that he replied that 800 he thought he had; then he was asked whether Mr. Westcott ever did that; and that he replied he thought he had. Now, such is the fact, that Captain Carter did pay for those stocks in currency. I have no hesitation in stating that as a fact.

Colonel Gillespie: Q What stocks do you mean? The Delaware, Lackawanna & Western?

A 400 of the Delaware, Lackawanna & Western and 200 of the Delaware & Hudson. I have not gone into the files to see the deposit slips at the bank. I speak from recollection.

Q Is that an unusual transaction?

A Well, not in that connection. It is rather unusual as current business.

Q Where did Captain Carter get that currency?

A Oh, I do not know, sir.

Q Why should it not be an unusual transaction in that case?

A Well, in the course of years of business selling securities and receiving pay for them, it is not very common. It is only occasionally that they are paid for in that way.

Q Do you remember how much was paid in currency?

A That particular transaction?

Q Yes.

A Not definitely; I would not like to say positively; my recollection is something like \$30,000.

Q In currency?

A Yes.

Q Was that the largest amount of currency that Captain Carter ever paid in to you at any time?

A Well, I should think it was, as near as I can remember.

Q Will you give the Board a statement of the separate deposits received from Captain Carter and made by you, from the deposit slips, in the Bank of America during the months of April, May, June, July and August, 1895? deposits that Captain Carter made with you and which you afterwards made in the Bank of America?

A Those go into the Bank and we have not applied for them.

Q Would you apply for them for the Board?

A I will do so with pleasure.

Q I mean a detailed statement of the separate deposits received from Captain Carter and deposited by you. When may we expect it?

A I don't believe I could get it before tomorrow. These slips are filed away so that the banks may have a good deal of trouble in finding them.

Q I want to find out whether it was deposited by checks or by currency. The deposit slips will show.

Witness: My cashier was asked, as I understand it, by your Board a few days ago, whether Mr. Westcott ever had done that same thing in the payment for securities bought of Reed & Flagg. He said he had.

Q Was that frequently?

A Well, repeatedly; more than once.

Q More of late years than formerly?

802 A Oh, I don't remember of his ever having done it formerly. Right here you have asked, if you will allow me, for an account of Mr. Westcott beginning in 1891, 1892 and so on. We have no account with Mr. Westcott in either of 1891 or 1892.

Colonel Gillespie: Captain Carter's power of attorney ran back that far and that is why we asked for it, but we will be satisfied with the 1895 account. Where did Mr. Westcott get that currency?

A I don't know.

Q Was that an unusual transaction?

A Well, it is rather unusual, but not at all isolated.

Q He had a bank account, did he not?

A Well, I don't know, sir; I could not say.

Q Did you ever receive a check from Mr. Westcott?

A Oh, yes.

Q Do you know where those checks were drawn?

A Yes sir. I speak here from nothing more than impressions or recollection. I know that I have heard Mr. Westcott speak of having an account with the Union Trust Company.

Q Having an account with the Union Trust Company and plenty of money to draw on, would not the payment of these purchases in currency be an unusual transaction?

A Well, it is not very usual. I had a transaction lately of that very sort, not large, but small.

Q The Carter currency transactions you say were 803 pretty large, amounting to \$30,000.—rather a large sum, is it not?

A Yes. (After a pause) I don't know, Colonel Gillespie, as I have anything more to say.

Q The Board thinks it strange, Mr. Reed, that all these four checks of 1895 right here (showing checks) are all drawn in identically the same way. There is "Carter, Attorney." These are the two transactions I wished you to explain as indicated in the letters of October 16 and 19, 1897. (Handing witness checks) You see the indorsement on the back of them. You have given us the transaction for October, 1895; what we want now is an explanation of the transactions for April, 1895. (Handing two checks to witness). There is no intention of delving down into Mr. Westcott's private accounts. We have part of Captain Carter's account and we want the rest of it.

A Well, the mode of payment for those stocks will appear by the deposit tickets which I propose to get.

Q Very well, will you give them to us? I will give you the dates of the deposit slips I wish. In June, 1895, you sold a certain number of United States bonds for Captain Carter amounting to about \$30,000 approximately. How did you draw that check in payment to Captain Carter?

A My recollection is that it was drawn to the order of Robert F. Westcott.

Q Will you show us that check? You have it in your possession?

A I wish I was not restricted. The question now with 804 me, Colonel Gillespie, is how far I am restricted by Mr. Westcott.

Q This was a transaction between you and Captain Carter and I know the amount and I know that you drew the check to Captain Carter and I would like to see that check.

A I did not draw a check to him.

Q I would like to see that check for that \$30,000.

A I admit that we have it.

Q Can I see it by calling at your office?

A Oh, I would not trouble you to do that, sir, if I was not restricted. I would bring it here if I were free to do so.

Major Adams: (To Colonel Gillespie) I suggest that you explain to Mr. Reed how that account appears along there in the books (indicating on the check stubs). He was acting as attorney and it also carries Captain Carter's private funds. (Addressing witness) What we want to show you is that we do not care anything about Mr. Westcott's accounts in the least, but we do want to know about these transactions by Captain Carter. To show you (pointing to stubs), here is a check book, "R. F. Westcott," "O. M. Carter, Attorney." This is Union Trust Company. We have been all over these with Captain Carter and we find that he frequently makes deposits of his own money, what he admits is his own money, to the credit of Mr. Westcott, so that makes this a mixed business; part of it is Carter and part of it is Westcott. Now, for instance, right here (pointing to stubs) is money received from Carter. He says "From O. M. 805 Carter, \$144.84." Now that was a check drawn by Carter himself and deposited to the credit of Westcott. It was not Westcott's money; it was Carter's money and Carter admits it. And so on all the way through here, that much (indicating) belongs to Westcott, and that much belongs to Carter, and he admits it. Again, you see, these are Carter's figures (indicating), and again here; again there; and here there is one from "O. M. C."; and here Carter has more than half of it. Now, it is this Carter part that we are after. This (pointing) is R. F. Westcott. This "O. M. Carter, Attorney." We would like to get the Carter part separated from the Westcott part. Can you give us the part where he brings in bills for deposit?

A Well, so far as that account is concerned, we have rendered a copy of it to you.

Q If Carter brings you say \$10,000 in bills, can't you give us a record of that?

A Well, so far as the account goes, but you see, if I go over the line into Westcott's business, how I immediately violate instructions.

Q Well, here again—

A You want to get at the truth, and so do I.

Q You see this notation here? It is first "A" and then "B." That "A" is Carter and it is \$27,000, and "B" is Westcott, and it is only \$117. But still, that is R. F. Westcott too—"O. M. Carter, Attorney." This (indicating) we

806 have got separated. Can't we separate yours too? A thing you know is Westcott's we don't want. What we want is

Carters'. Where Carter brings in bills and deposits them, we would like to know about it. If Captain Carter brings in say \$30,000, in cash and makes a purchase and he has that purchase transferred to him, for instance of stock purchased in his own name, don't that look more like representing a transaction by Carter than one by Westcott?

A No, not if you take the preliminaries into consideration and also the after occurrences into consideration.

Q What are the after occurrences?

A That stock went to Mr. Westcott to my certain knowledge.

Q When?

A I don't know when. I can only tell you what I inferred. I cannot tell you when, because I did not see it. I have seen it since.

Colonel Gillespie: You have seen it since?

A I think I have. Either I have or some one of my employees has.

Q How did you happen to see it?

A Well, I don't know but that I will have to go a little further back on that score. Because my firm attended to the transfer.

Major Adams: Have you attended to the transfer of any stocks recently?

A Not very recently.

Q In 1897, this year?

A Oh yes.

Q The same stock that we refer to?

A Yes sir. Not more than three months ago; in 1897.

Colonel Gillespie: Do you remember what particular stock was transferred?

807 A Yes sir.

Q Was it Delaware & Lackawanna or Delaware & Hudson?

A It was Delaware, Lackawanna & Hudson, so far as I know.

Q Were those registered bonds that you bought in April, 1895?—Government bonds?

A No sir.

Q Delaware & Hudson?

A I think not.

Q Any registered bonds?

A I think not.

Q Delaware & Hudson, Pennsylvania Division? They were 7%?

A No sir.

Q You also had some Delaware & Lackawanna 6%. Those are coupon bonds?

A I think so.

Q To whom did you give those bonds?

A I cannot tell you here. I don't remember.

Q Well then, you will give us that transaction of April, 1895, to complete this Carter transaction, including those bonds which I asked for October 16, 1897?

A This is just what you already have.

Q That is only for one month. This is October, 1895.

A I would like to take into consideration your request, but I beg you all the time to consider my position.

Q I do that. You are in no way responsible for these transactions, Mr. Reed. You are in no way endangered
808 at all. I may say that there is no fear that you are going to be called into account for any money consideration at all. There is not at all a particle of danger that way. All we want to do is to clear up this Carter transaction and if he is innocent exonerate him.

A I am interested just as much as you are. I have never had from the first to this moment a doubt about the integrity of Captain Carter and I am therefore extremely desirous of having everything cleared up; that is, aside from the testimony. Please give me time to think about the other matter. I will send you the deposit ticket, or a copy of it, as soon as I can.

Major Raymond: Do you think that Mr. Westcott might be persuaded to let you give this information, considering it is so much to the interest of Captain Carter?

A No, I could not say. I wrote for his permission but he refused it.

Colonel Gillespie: I should think he would want to exonerate him.

Q You ask a question I cannot answer. I can't understand it. If I could see Mr. Westcott I should ask him as a personal favor to me to let me answer every question that you wanted to ask. He is not here. I have written him and I have told you his answer and can't tell you any further than that. I cannot imagine any reason for it.

Major Adams: Well, if all these transactions were made with Mr. Westcott's money, as he represents and as you represent, why not verify them?

A Well, it does seem to me that Mr. Westcott's men 809 could answer all these questions. We simply act as his bankers or brokers and he enjoins us emphatically and formally not to furnish the information.

Major Adams: Colonel, can't you further request of Mr. Reed that he give us the deposit slips for the cash received, I mean the bills received from Captain Carter?

Colonel Gillespie: This is what I intended to make a request for in that second letter. (Reading from letter of October 16, 1897, to Messrs. Reed & Flagg:

"May I ask you to revise the statement you have made and make it include the transactions to which I refer or any others previously omitted?"

What we want is this: The first thing is the debit and credit transactions of April, 1895, for Captain Carter to be taken from the books, because there is a transaction there that is not complete so far as the information is concerned that we have here, and in the interest of Captain Carter it should be made complete, just as you have made it complete for October. Then comes the detailed statement of separate deposits received from Captain Carter and made by you in the Bank of America during the months of April, May, June, July and August, 1895. And also the original check of June 7, 1895, for \$30,828.25 drawn by you in the name of O. M. Carter, O. M. Carter, Attorney, or R. F. Westcott.

A You see, Colonel Gillespie, that is Westcott business on our books.

Q We don't conceive it so because it is not separated 810 on that book (pointing to stubs of checks); and even if it were, it is necessary for us to have it in order to exonerate Captain Carter.

A Well, I appreciate that too.

Q If Mr. Westcott believes Captain Carter blameless and faultless in this matter, he ought to be only too happy to furnish this account.

A This is very unpleasant for me.

Q There is nothing in it that we like either, but we have a duty to perform and we must perform it.

A You know, Colonel Gillespie, there is a difference between being called upon as a witness in a court and being called upon without being a witness in a court. You see how I am tied up. I have to ask you continually to appreciate that position.

Q But we don't see the reason for your being tied up.

A But I have written Mr. Westcott for permission to testify.

Q But Mr. Westcott has no right to prevent your exhibiting to us, a duly authorized Board, the accounts of Captain Carter, and that is what we ask, and nothing more.

A Well, we have furnished the account of Captain Carter.

Q Not as the records show it ought to have stood on your books. How you put it on your books is another thing, but it is clearly shown here by the check book that it is in the name of Captain Carter. The check is drawn by Captain Carter, and on one of the checks you will find that he even does not go to the extent of signing it as attorney. It is simply endorsed "Carter"—one of these very checks I showed you.

811 (Checks again exhibited)

That is drawn there by "Attorney." He does not attach much importance to attorney ship, for he did not put that one (pointing) "attorney" and yet you accepted it.

Major Adams: In this account, where he is acting for Mr. Westcott, \$27,187 belonged to Captain Carter. That is, this "A" means Carter; and in it \$117.61 belonged to "B", and he says that that was Westcott.

A That is June 27.

Colonel Gillespie: Yes sir, 1895.

Major Adams: What we seek is to separate the Carter from the Westcott in the purchases made through your firm.

A Yes, Captain Carter as the representative of Robert F. Westcott comes in and buys for Robert F. Westcott certain securities. Now Reed & Flagg have no question about their being for Robert F. Westcott. Therefore we keep an account with him.

Q Did you have in your possession a power of attorney from Mr. Westcott?

A No.

Q Then you were unable to know, you had no personal knowledge that Captain Carter was trading for Mr. Westcott.

A Oh well, I think I had a knowledge. When a man introduces his son to me and says "He will do my business," there is no question about it at all. We had no reason to question it. There was no doubt about it in our minds. Captain Carter comes in and discusses various securities, 812 raised the question—asked me perhaps, whether I think those stocks are in accord with Mr. Westcott's views. I said I have no doubt, I have known them for years; they are all right.

Major Adams: Mr. Reed, did you recommend the purchase of the stock?

A No sir, I did not. I never recommend the purchase of stock. I never dealt in stock—did not make one cent on their whole transactions, not one farthing. We are not members of the Stock Exchange.

Q When the stock was purchased, was it transferred to Mr. Westcott or to Captain Carter?

A The stocks were I think transferred to Captain Carter. Now, if you want me to tell the reason why—

Q Yes sir, tell us about it.

A Well, I can give you the reason given us as a firm, when Mr. Westcott was abroad. Previous to the purchase of those stocks there had been an investment of a considerable sum of money which had been anticipated when Captain Carter was here and we conferred, that is myself or my partner, as to the investment in advance and he indicated certain securities he would like to get. In fact, he gave us a discretionary order to buy those, as we understood from Mr. Westcott. We could not find them within the limits. Now the reason given, as I understand it, for opening that account with O. M. Carter was that Mr. Westcott being abroad, it might be found desirable to sell those stocks, as I understood it from the correspondence with Mr. Westcott by Captain Carter. 813 I had this in mind: that he was going to report to Mr. Westcott what he had done and that Mr. Westcott might order them sold. Mr. Westcott was not here to sell them. We could not sell them if they had been turned over to him. This is the whole story.

Q If he, Captain Carter, had a power of attorney, which he stated he was acting under, he could do it?

A Well, I suppose so.

Major Adams: Did you understand that Mr. Westcott directed the purchase of stock?

A Oh no, he was not here to do it. He did not direct it so far as I know. I don't think he did.

Colonel Gillespie: You say that Captain Carter had under consideration the investment of a large sum of money?

A Well, a considerable sum of money.

Q How did that come?

A Oh, I don't know. I understood it to be Mr. Westcott's money. I never had any doubt about it.

Q Well then, if you will give us the debit and credit transactions of April, 1895, (by) Captain Carter, and a detailed statement of the separate deposits received from Captain Carter and made by you in the Bank of Commerce or any other bank during the months of April, May, June, July and August, 1895, and also show us the original check dated June 7, 1895, for \$30,828.25 drawn by you in the name of O. M. Carter, O. M. Carter, Attorney, or R. F. Westcott, that will be all we will ask.

814 A Now a further embarrassment comes in here; Mr. Westcott's attorney has gone out of town. I cannot see him.

Q How soon will he be back, Mr. Reed?

A I went to see him this morning and they said he had gone to Seattle, Washington.

Q Who is his attorney?

A Mr. Thatcher.

Q Has he no representative here?

A No, I believe not.

Q Can't he give the power of attorney to somebody?

A I think not.

Major Adams: We understand that this is not a case of any power of attorney being necessary. It is simply a transaction by Captain Carter, a transaction with which Mr. Westcott's attorney has nothing whatever to do. It is a perfectly plain case that it is Captain Carter and nobody else.

A Well, it is not so plain to us, because we have our account with Mr. Westcott.

Q Does not that book (pointing to check book) now change your opinion? Do not the separate divisions in that account

as shown in that book lead you to change your opinion now in regard to that?

A Well, I don't see how I can change my opinion. I don't know how that book comes between me and my books.

Q Mr. Reed, when Mr. Westcott was absent in Europe and Captain Carter brought in large sums in bills to make 815 purchases, did you suppose that money belonged to Mr. Westcott.

A I never had any doubt about it and I don't see why I should have doubted it, when Mr. Westcott had done the same thing before he went away. It is perfectly clear to me.

Colonel Gillespie: What is Mr. Westcott estimated to be worth?

A Oh, I don't know.

Q Have you ever heard any one say?

A No sir.

Q What do you suppose yourself?

A Mr. Westcott is a reticent man; he does not talk about his financial affairs.

Major Raymond: I would like to ask Mr. Reed this, speaking of Captain Carter's depositing this money in currency while Mr. Westcott was in Europe and he believed that it was Mr. Westcott's money. Are there ways in which money in that form could come into Captain Carter's hands, being Mr. Westcott's money, properly? I mean, could he have received it as rents or something of that sort as an agent? I am trying to clear up my mind as to how such sums of currency could come into Captain Carter's hands, he being the representative of Mr. Westcott and Mr. Westcott being abroad?

A I should say that might be easily accounted for, just as easily as accounting for it as when Mr. Westcott had it himself.

Major Adams: When did Mr. Westcott first begin making purchases in that way with you, by cash or in currency?

A Some time ago; I think it must have been in the panic of 1893.

816 Colonel Gillespie: What month was the panic?

A Oh, I will never forget that month. It was August, 1893. Colonel Gillespie, you will please to understand that I have the greatest respect for this commission and I will do all I can consistently with my sense of duty to others, weighing of course the duty to others, to assist it in its labors.

MR. TOWNSEND, representing Mr. Robert Maclay, President of the Knickerbocker Trust Company, appeared before the Board and was examined as follows:

Colonel Gillespie: When will Mr. Maclay be back?

A I think he will be back tomorrow. He had to go out of town this afternoon. He sent me to find out what you wanted to see him about.

Q We want Mr. Maclay to come down and give the Board some information in regard to certain Government checks that passed through his bank. That is all we want.

A Well, now, of course the relations of the Trust Company with its clients are confidential.

Q We understand that; but this is Government money and we are following it up and we have gotten it to your bank and now we believe that Mr. Maclay has it in his power to clear the way for the exoneration of the man who drew those checks and we would like to have him come here with that object in view, of giving us information about those 817 checks.

A Of course any request of yours will be considered, Colonel, and as I say, he will probably be here tomorrow. He is a man of very many engagements.

818

October 26, 1897.

The Board met pursuant to adjournment. All the members present, also Captain Gillette and Captain Carter.

BRIG. GENERAL WILLIAM P. CRAIGHILL, Retired Chief Corps of Engineers, U. S. Army, appeared before the Board and was examined as follows:

Colonel Gillespie: General, you have been called in the case of the investigation of Captain Carter's works and were called at the request of Captain Carter. Do you care to have the charges read to you?

A I don't think it is necessary.

Q General, during what years, were you Division Engineer of the Southeast Division?

A I recollect when I ceased to be Division Engineer; it

was the 10th of March, 1895; but when I began I don't recollect. The records of course would show.

Q Did it go back as far as 1890?

A I can't say without examining the records.

Q Was it the 10th of March or the 10th of May that you ceased to be Division Engineer?

A The 10th of May. I have no doubt I was Division Engineer during the whole of General Casey's administration.

I don't recollect the date I began. Major Adams ought 819 to know better about that. I think he signed the order by which I became Division Engineer.

Q Your district included the engineer district over which Captain Carter had charge?

A Yes sir.

By Captain Carter: General, I don't want to bother you and yet there are a few things that I do want to ask you. I don't know whether you remember the details of my work down there or not, but I want to ask you especially whether you remember seeing me build some mattresses one on top of another in order to save the compression that I got by putting the stone on each individual layer, and then sinking those mattresses off from a barge by putting stone on top of them?

A I don't remember that particular detail, Captain, and the only mattress I remember with definiteness is one that I saw at Fernandina. I recollect that mattress because I was there with Mr. Blanchard, who was Chairman of the River and Harbor Committee, and while I have no doubt of seeing a mattress being launched while I was down there, I don't recollect any one with definiteness except that particular one, and I remember that because Mr. Blanchard was with us. I remember he climbed on top of the mattress and you went through the explanation of the construction of the mattress with him.

Q Where was that?

A That was at Fernandina.

Q Do you remember the same thing at Savannah, or do you not?

A I do not. What I mean to say is this: I do not recollect my attention ever being directed to any of the mattresses. I cannot remember that I ever saw a mattress 820 put in position on the Savannah River nor on the Cumberland Sound work. I have a general remembrance that I have seen the mattresses on the Savannah River on the scows going to the work, but as to their being put in position or

not and as to their particular construction, I do not remember. But this mattress of which I speak at Fernandina I remember because Mr. Blanchard was with us and he climbed on top of it. We had some jokes about it and I remember them and about the snake stories that were told and all those things and that you and he got on top of the mattress and made a detailed examination of it.

Q It was 4 or 6 mattresses on top of one another and I explained to him why I built it that way. Now when I was at work in Savannah on account of the soft mud down there I found it necessary to build those mattresses in that way, and that increased the quantity of mattress and diminished the quantity of stone. I made no specific report of that to the Chief of Engineers, but stated it in my monthly report both to the Division Engineer and to the Chief of Engineers. I would like to know whether you remember anything came up concerning the necessity of my making more of a report than that?

A I don't recollect anything with reference to it. Do you mean to say whether you made any official communication to me?

Q Yes, official or otherwise.

A I don't recollect any official communications or any conversations on that subject.

Q I saw you in Washington, General, about the present Cumberland Sound work and had a talk with you about the matter.

821 A When was that?

Q I think in November. The question came up of the letting of that work and you told me of a conversation you had had with the Secretary of War concerning the prices.

A I recollect the conversation with the Secretary of War.

Q I mean so far as your recommendation of the acceptance of bids.

A I recollect the conversation I had with the Secretary of War with reference to those bids, etc., but I don't recollect the conversation which I had with you, although it very well may have taken place.

Q What I want to find out is whether you remember having stated whether those prices were in your opinion reasonable?

A What I said to the Secretary of War was this: The Secretary of War thought the prices were too high, and as I understand the matter, he had some private information

from Savannah that they might have been lower under certain circumstances which he stated and he hesitated for some days probably in reference to the matter, as he did at that time with reference to all the contracts under the continuing clause system. He hesitated too on all of them because, I am free to say, he was opposed to going on with work under those continuous contracts. At any rate, he hesitated over them all and he asked me the question what I thought about the bids, and I said, "Mr. Secretary, these are the lowest bids and they are all within the estimate, as I understand it, and my recommendation is that they be accepted because the work 822 is one that should be prosecuted without delay and it is an important work. Delay is injurious to it and in my judgment these bids should be accepted," and I think he did finally accept them and the work was prosecuted, but I don't recollect the conversation with Captain Carter on the subject to which he refers.

Q That was in your office, I think. General, you were Division Engineer for some time and I think you have had an opportunity of forming something of an estimate of my character and I would like to have you say to this Board, if you feel like it, what your observations led you to think?

A Well, if the Board wishes me to give my opinion of Captain Carter from the official relations that we had, I as his Division Engineer and he as District Officer, I have to say this; that I was with Captain Carter a good deal and had the most favorable opinion of him, not only as to his abilities, but as to his integrity, and my opinion of him was favorable in every particular except that I thought sometimes he was hasty in his temper and perhaps injured himself more than anybody else by the exhibition of it. You see I am perfectly frank. These are the general impressions that I had of Captain Carter.

Q I am much obliged, General.

A I will say this; perhaps, that I treated Captain Carter as I would every man in whom I have perfect confidence. If I have confidence in a man—I am referring now to my duty as an inspector—when I have perfect confidence in a man I give him my confidence and treat him so in every way and 823 I think the Captain will say that I always did so and and I did then, and I am free to say I have not lost that confidence in him yet.

Colonel Gillespie: Did you at any time while you were Di-

vision Engineer have any reason to suppose that Captain Carter exceeded the quantities specified in the specifications?

A I did not.

Q Your attention was never called to that at any time?

A If it was, I think I would have remembered it. Do you mean officially or unofficially?

Q While you were in the exercise of your functions as an inspector, did it ever come to your knowledge that he was exceeding the quantities specified?

A If it did, I don't remember it at this time. I may say to the Board that I have not examined any of the records in this case, since I ceased to be Chief of Engineers and I have tried to forget everything as much as I could with reference to the details in that office. I don't want to burden my mind with them.

Q It has been alleged in the charges that Captain Carter frequently left his station without authority, and in his evidence, page 398, given in Savannah in answer to a question whether, in reporting his departure from Savannah by a letter signed at his office there and transmitted from his office, dated August 16th, he being absent, whether it was meant to convey the idea that he departed from his office on that particular day. He says it was not. The question was then asked him if that was meant to convey the idea that he reported that he departed from Savannah on that day.
824 He says it was not so reported. He says:

"Sometimes I would leave to attend to some business for Mr. Westcott and I would be away four or five days, and I remember speaking to the Chief of Engineers about it and I said, 'Can't I go without reporting it?' and he said, 'I can't give you authority,' and I said 'I am going to do it until somebody objects' and he said nothing, and I have been away from time to time without authority from my station."

Do you remember any such occurrence at that time?

Captain Carter: I want to say that this was before General Craighill became Chief of Engineers. It was when General Casey was Chief of Engineers. In view of the fact that General Casey is dead I ought not to have referred to that, but it did not occur to me at the time I was making that answer.

Colonel Gillespie: In answer to the question (reading from page 399 of the Stenographer's Minutes)—

Q Did you report in your monthly report to the Chief of Engineers, the days that you were absent without leave?

A I don't know whether I did or not, I don't believe I did.

Q If you had reported that you were absent without leave, do you suppose that you would have been called upon to explain it?

A No sir, because I always told it at Washington in coming back. I remember once Captain Black came in and said, "Look Here, I am going to call you down. You and Bixby and a lot of others have been going around without leave and I am going to call you down."

825 Do you remember any such conversation?

A I don't remember any such conversation as that between Captain Black and Captain Carter. I do recollect this; that while I was Chief of Engineers, there was an order issued with reference to officers leaving their stations without reporting their absence and things of that sort, the particular tenor of which I do not remember at this time, but it was issued because I had information that some officers of the Engineer Corps—perhaps Captain Carter was one, but I don't know with certainty whether he was one or not—had been in the habit of leaving their stations without, as it seemed to me, sufficient authority, and after consultation with Colonel Mackenzie and with Captain Black, who had particular charge of the personal reports and things of that sort, this order was formulated, the terms of which I don't remember at this moment, but it was intended to prevent officers from leaving their districts—not their stations but their districts. My recollection is that it gave the officer the privilege of going over his district but not of absenting himself from the district.

Q You never intended to convey any idea whatever that an officer could exercise the right of leaving his district without authority from you?

A No sir, I do not recollect any such thing. I think that was an improper thing to do and I am not in the habit
826 of authorizing what is not right.

Q Again, in the statement of Captain Carter, he says: "During short intervals I have been absent from my post without leave, but never secretly and never, so far as I remember, without making it known either to the Chief of Engineers personally or to some one in his office at Washington,"

Do you recollect any such conversation?

A I do not. But I do recollect a conversation I had with

Captain Carter before I became Chief of Engineers, perhaps more than one, in which he told me of an understanding that existed between himself and General Casey, while he was Chief of Engineers, in reference to the Captain's absence from his station. I recollect those conversations, and I don't know as I made any comment upon them because I knew that every officer, like myself, made his personal reports to the Chief of Engineers, in which part of it is to state the time, the dates of his absences from his station. I think those are the words, "absence from station," and I know that I myself was always exceedingly careful in doing that and I took it for granted that everybody else was as careful as I was; and as to Captain Carter's absence from his station, I knew nothing about it.

Colonel Gillespie: (Reading from Captain Carter's statement).

"It has been alleged and charged that I have sometimes absented myself from my station without leave. I frankly admit that this charge is technically true. During short intervals I have been absent from my post without leave, but never secretly, and never, so far as I remember, without making it known either to the Chief of Engineers personally or to some one in his office at Washington, and I desire to state further to the Board that my absences were never clandestine, were never intended to deceive and never interfered with the proper conduct of my duties."

Are you aware of his ever having made to you personally any report of absence without leave?

A I don't recollect any such report.

Captain Carter: There was one time, General, I don't recollect whether you remember it or not, it was in 1895, when I went away. It was in connection with the project for work at Cumberland Sound, and as I say I don't know whether you remember it or not, because I stopped in Washington at the very time and saw you.

A I do not remember it. My not remembering it does not disprove the statement of Captain Carter by any means. It would be impossible for me to remember details of that sort. At the same time, I should suppose that a thing of that sort would be noted on the personal report of the officer who was passing through the city. And further than that, all officers passing through the city are required by regulations to make a registration of that fact at the office of the Adjutant General. I never took it upon myself to inquire who complied

with those things. Those things might readily happen and did happen, no doubt, without my remembering them, but I don't remember the case referred to by Capt. Carter.

828 Major Raymond: General, you have had a great deal of experience in connection with river and harbor improvements and you have also had extended opportunities to see the work executed by Captain Carter. Will you be kind enough to say what opinion you have formed in respect to the improvement of the Savannah River as a piece of engineering work and of Captain Carter's ability and the character of his services in connection with that work?

A I think the improvement of the Savannah River is one the most successful that has been accomplished on the Atlantic Coast, and I am pretty familiar with all of them, from the coast of Maine down to the coast of Florida; and the conception of the more recent improvement of the Savannah River is, I think, due entirely to Captain Carter, and he deserves the greatest credit for its success. That is my candid opinion. I think all the success of it is due to him, so far as I know.

Q From your observation of Captain Carter's services there, what can you say in respect to his attention to his duties as an engineer officer?

A I can say this: that I never saw a man more interested and enthusiastic about his work, who seemed to be more familiar with the details, and who seemed to exercise more care in the conduct of it than Captain Carter.

Major Adams: Are you familiar with the specifications formed by Captain Carter for the improvement of Savannah River?

A I cannot say that I am now. Of course I knew them as they passed through my office.

829 Q Did you ever make any examination to find out whether the mattresses constructed were constructed in accordance with the specifications or the contract?

A No, I cannot say that I did. I had so much confidence in Captain Carter and his assistants that I did not think it necessary to go into those details. As I said before, when I have confidence in a man I trust him and I had perfect confidence in Captain Carter.

Captain Gillette: General, referring to the question asked by Major Raymond, did you ever make any examination of the subject of that improvement at Savannah River to see

how much of it was probably caused by the training walls and how much of it was caused by dredging?

A I can't say that I did, Captain, but I had the same views with reference to the Savannah River as to the relations of training walls and the use of the dredge that I have with reference to the other improvements that came under my observation, and it may be expedient that I should state what those are as a result of my experience and observation. The object of training walls is sometimes, when the material is of such a character as to be movable by them, to expect the training walls, if time permits, to make the channel ultimately. That is a theoretical question. You never can tell what a training wall is going to do absolutely. Sometimes, under the pressure of the needs of commerce—I am speaking

of my own experience in general and will go back to the 830 Savannah River directly—the dredge is put in to make a

channel, with the expectation that the training walls will keep it when made; and the same use of the dredge is necessary if the material is so hard that a training wall would not accomplish its object, but after making the channel, would maintain it, and as I said before you never can tell what a training wall will do. At least I never could tell exactly what was going to be the effect of a training wall either as to depth or location of any channel which it was expected it would influence. And coming back to the Savannah River, I think it was impossible for any one to say what was going to be the full effect of the training walls or whether it would be necessary to put in the dredge or not or to what extent it would be necessary to dredge. We can make estimates, Captain, but we cannot always tell how they will turn out.

Captain Gillette: Did you ever make any investigations—in the first place—the appropriations for Savannah have apparently been very liberal—did you ever make any investigations to compare the money spent with the results accomplished, to ascertain whether they were accomplished economically or not?

A I have not. The work has been going on as I understand it since I was Chief of Engineers, and the Chief of Engineers has not time for things of that sort.

Q I want to ask these questions with a view to illustrating your view upon the excellence of the work.

831 Captain Carter: General, it is about 18 months, as well as I remember, since any dredging has been done in the navigable channel of the Savannah River, and only about

a month ago a ship drawing 24 feet went from the city to the sea and the pilot stated that they could probably have taken a foot more. Do you remember what used to be the condition before we had this work done and then after we would dredge, one year after, what condition we would find the river in when the next appropriation became available? In other words, was the effect of the dredging permanent?

A I remember the Savannah River perhaps farther back than anybody who is present because I went on the Savannah in 1853 and my connection with it was continued more or less up to the first of February, 1897, so that I can speak from experience, and I say that the plan of improving the Savannah River as I first knew it depended mainly upon the dredge and it was necessary to do the same work over and over again. This is the rule I may say almost everywhere where the conditions are of a similar character. This is the system that prevailed very extensively until the present method, the continuous contract system, was adopted, which enabled a plan to be formulated for the complete improvement of a river and to be carried out in a systematic way. Hitherto much money had been wasted because small appropriations were made from time to time, but the pressure of commercial interests was so great that something had to be done at once and the only thing as a rule that can be done to make a channel quickly is to dredge it; & perhaps over and over again and oftentimes I have dredged channels when
832 I was certain I would be obliged to do it the next year and I am quite sure that was the history of the Savannah River for a long time and probably until the present time. Whether it continues now or not I do not know.

Q General, there is another question about the economical side of the work. These is another stream where the results obtained are somewhat similar to those obtained in the Savannah River. That is the Clyde. Do you remember roughly the relative appropriations of money expended on the Clyde and the Savannah?

A I do not at this moment, but I know, for I have been over the Clyde and over the Savannah, that the improvement of the Clyde has been an enormously expensive one, although an exceedingly profitable one to the commercial interests involved; notwithstanding the contraction of the stream, to which they resorted there, they are constantly dredging it, and they cannot contract it any more without too much diminishing its width & thus its value as an avenue of commerce.

Q As a matter of fact, it cost about ten times as much as the Savannah River improvement and in the Savannah River the annual saving to commerce is greater than the total sum of money expended by the United States on the improvement.

A Those are figures which are matter of record. I don't remember them, and I don't carry them in my head.

Colonel Gillespie: Was the excavation wholly dredging in the Clyde River?

A Some of it I think was by scour.

Q Was there any rock removal?

A There was, I think but I don't remember certainly.

833 Q A large proportion?

A I don't remember the amount. Those things are all a matter of record. A Mr. Deas the Chief of Engineer wrote a book on the subject which I have in my library and which I have no doubt is in this library. I have not been on the Clyde for the last 10 or 15 years.

Captain Carter: I was there in 1895.

Colonel Gillespie: General, the question of rock has been put in evidence quite a good deal by witnesses. Do you know anything about the character of the rock that was used on these improvements?

A Well, I have seen it on the barges. I did not analyze it or weigh it. Those are things that were talked over with Captain Carter and it seemed to me sufficiently weighty and suitable for the purpose.

Q You don't know whether it complied with the specifications or not?

Q I did not have the specifications in my hand at the time. When I went to inspect a work as Division Engineer, my rule was, before I left my office to read over the specifications so as to refresh my memory with reference to them, but I don't recollect that I ever took out the specifications and examined the rock and those things at the moment, but I always had those things in my mind, and I never had occasion to observe in my inspection of Captain Carter's work, the mattresses or rock, so as to notice that they were not in accordance with the specifications. If I had, I certainly should have called his attention to it.

834 Q Were you ever at the point where the mattresses were constructed?

A The only mattress I ever saw in process of construction is the one to which I have referred at Fernandina. I never saw a mattress in course of construction on the Savan-

nah River, so far as I now remember, though I saw them on the scows in the river.

Q They were not built on the Savannah River.

A I mean the later ones.

Captain Carter: I don't know whether you remember about my speaking to you about the desirability of Florida rock in connection with the inner end of the south jetty at Fernandina or not, that it was light and did not settle so much as the other, but that it had the quality of being porous and it cemented together and was covered soon with a shell growth, and therefore I desired it.

A I don't recollect it. I recollect this; that the general character of the stone used in Florida, on the St. Johns and elsewhere is not as good as it is in some other places. We all know that we don't get as good stone in that part of the country as up here.

Q That is for building purposes?

A No, I am talking about this river and harbor work specifically. On the St. Johns River there were at one time 2 or 3 kinds of stone used. One was for the hearting and another, a better class of stone, was used for the covering of the jetty on its more exposed portions. It was of larger sizes and more compact in its structure. Whether those points

835 came up on the Savannah River I don't remember, but

I have a general impression that I did not see any reason why the stone I saw should not be used in weighting mattresses on any of the works that came under my observation.

Colonel Gillespie: Do you remember anything as to the character of the work that was designed by the Board of 1895 for Fernandina?

A At what time in 1895?

Q December, 1895.

A I recollect distinctly that the Board was organized by me, and because I thought the subject needed revision, and as to the details of the project which they submitted, it is like the details of many other projects; I would not like to undertake now to say about the details, but the record would show what they were and whether I approved them or not.

Q Do you remember what was the character of the work?

A No I don't at this time in detail.

836

October 26, 1897.

MR. ROBERT MACLAY, President of the Knickerbocker Trust Co., appeared before the Board and was examined as follows:

Colonel Gillespie: Mr. Maclay, you know that we are organized by the authority of the Secretary of War, this Board.

A No, I did not know that. Is this a Board of Investigation?

Q Yes sir; we are organized by the Secretary of War under authority of the President for the purpose of investigating certain charges that are made against Captain Carter, who was in charge of the Savannah District, and the Board in following out its instructions have found that certain checks that were drawn for work done under contracts for which he was responsible were paid by the company of which you are the President. I present these checks to you (handing two checks) to see if you recognize them. One is number 270536, dated Savannah, Georgia, July 6, 1897, drawn to the Atlantic Contracting Company for the sum of \$230,749.90, and the other is check number 270537, dated Savannah, Georgia, July 6, 1897, and is for the sum of \$345,000. Both checks are drawn in the name of the Atlantic Contracting Company and are indorsed by John F. Gaynor, President, placed for deposit by D. B. Greene in the Knickerbocker Trust Company. I ask you if you recognize them?

A Well, I never saw the checks before. You want me to verify the indorsements, I suppose. Yes, that is the stamp we use and that is the signature of our Secretary.

837 Q Now, Mr. Maclay, how was the money drawn on those checks, would you suppose, according to that indorsement?

A Now then, that is deposited to this man's credit.

Q Those checks are?

A Yes, that goes into his account, to Mr. Greene's for deposit. It says "For deposit to the account of Mr. Greene." Now Mr. Greene would draw his checks against it.

Q The Board would be pleased to have you furnish a detailed statement of the checks drawn upon the account, this account, which shows how this money was distributed.

A Well, that is the "milk in the cocoanut" of course. I

cannot see how it would be proper for me to do so. It seems to me that it would be a breach of trust on my part to do it. If this is a Court of Inquiry, if you will put me in legal shape where I am compelled to do so, if you will subpoena me, I will cheerfully furnish you with the information.

Q We have not the power to subpoena. We have the power to investigate. We know that that money went to your bank.

A I want to be called before you in a legal way. If you have not power to subpoena me, I don't wish to answer. You must have some power to take some act that would place me right where I would be compelled to answer. If Colonel Gillespie had had a transaction with Captain Carter and I was asked about it and knew of it, unless I was compelled by some legal process I think it would be a breach of faith on my part to divulge the transaction.

Q I want to say that the charge under which this man, 838 Captain Carter, labors, and which was made the basis of our organization, was a charge of conniving with a contractor in the expenditure of Government money. Now we are organized to investigate that and as an organization we find that money went to your bank.

A It did not go to our bank. It went to Mr. Greene. You are not investigating a charge against Captain Greene. Your charge is against Captain Carter.

Q Mr. Greene was one of the contractors.

A Exactly. I Understand your position and you must understand my position. Now we have got 4,000 depositors and we cannot open those accounts except by due process of law. Now there must be some way by which the United States Government can direct me to show that account. That is all I ask you to do.

Q Can you afford to be the recipient of money which we claim is drawn against the United States and not give us a statement of how the money was distributed?

A That is merely a statement. We have no evidence of that before us. Our depositor is not on trial.

Q No, but we have reason to suppose that that money was drawn improperly.

A Well, sir, I am very anxious to give you those checks and to exhibit that account, if that is a fact, because I do not want to defeat the ends of justice; but you must do it in a legal way

Q The object of this investigation is to prevent publicity.

A I cannot tell what your object is, but you must protect my position. If you don't how can I testify? None of our depositors would feel safe in doing business with us. Those charges against Captain Carter may fall to the ground, and then if I had testified I would have slurred my depositor. I have taken counsel on this. If the United States Government can place you in some way by which I am compelled to furnish the information, then I shall do so.

Q In a similar case, Mr. Maclay, I made a similar request of a company here and I was referred to the legal counsel of the company and he said, "I understand your application. It is thoroughly right and proper, but the only fault I find is that you have not asked the consent of the person whose bank account you wish to examine;" but in this case I have asked it and he declined after his attorney's counsel.

A I am perfectly willing to abide by the decision of our counsel in this matter. I can see no way in which I can give you this information.

Q We simply made an official application for a complete statement of all the checks drawn out in the disbursement of that money.

A You see the way it presents itself to me.

Q But if the man is not guilty no harm is done.

A Yes—I don't know about that.

Q What harm is done?

A The man has an imputation cast upon him, if he is not guilty.

Q We exonerate him if he is not guilty.

840 A At the same time, I don't feel that I have the right to do it. More so than ever when you say our depositor has declined to give the information. Now then, if I give this information when my client refuses, I must be compelled to do so by due process of law. That is the way it strikes me, but for some reason which is sufficient to you, you don't want to give me a subpoena. Is that so?

Q I don't have the power to subpoena.

A If you can satisfy our counsel that there is any other way to get this information, I shall be glad to give it.

Q It is very unfortunate that a man should have a charge of this kind over him and has not the power of exoneration.

A You know that the books that we have would merely give you figures. They would not give you names. We have no checks in our possession and have not had for a long time.

Q You mean to say that the checks were returned?

A Yes, the book was balanced and the checks returned and there has not been much money deposited since. All we could give would be simply a record of the figures, of the amounts drawn and no names.

Major Adams: Would you have any objection, Mr. Maclay, to giving the amounts drawn about this time?

A Well, that is what you want. I would give you the whole of the information if our lawyer says it is proper for us to give it. I would do it most cheerfully here if I was subpoenaed in a legal way without consulting anybody 841 because I know it is my duty to obey the law. But a trust company acts in a trust, a confidential capacity. These matters are deposited with us and we have no right to give any information with regard to any of our clients' accounts except by due process of law. That is the position I take. If I am wrong about it, I am ready to be straightened by our lawyer.

Colonel Gillespie:

Q Well, there is no necessity for my going to your lawyer if you have gone there already and gotten a decision.

A There is one point; I did not know that you were a legally constituted Court of Inquiry.

Q Yes sir, we are.

A I don't occupy the position of an obstructionist. What I do I do from a sense of duty. I feel that it is my duty as a citizen to help you in any way that I can outside of my duty as a president of a trust company to investigate a crime that has been committed against the Government, and I want to do it. I would suggest that I should see my counsel, Mr. Julian T. Davies of Davies, Stone & Auerbach. He is close by. Are you willing for me to see him?

Q Certainly.

A I will do whatever he says.

Major Adams: Colonel, why not take the copy of the order convening the Board and let Mr. Davies see just what it is?

A I think if the Colonel would see Mr. Davies himself, possibly something may be suggested.

(The original order was exhibited to witness.)

842 A I cannot understand—of course you do—I can't understand why, if you are a Court of Inquiry, if you are organized into a Court of Inquiry, why you have not a right to subpoena just the same as any other court has?

Major Adams: It is a military court and we cannot op-

press the citizens. We summon the Army officers and they come without any trouble.

Colonel Gillespie: They come in like heroes.

A I wish you would see Mr. Davies. You understand if I give you this information, all I could give you is simply amounts; no names.

Q How do you suppose that money was drawn?

A It was drawn by checks. There is no question about it.

Q Where were those checks cashed?

A Well, they were deposited in our company and these went through the Clearing House.

Q Is that true?

A Let me see it. (Reading from check) "The Atlantic Construction Company." Now this is indorsed by the Knickerbocker Trust Company and you see we are not members of the Clearing House; so these were deposited in the Manhattan Bank. It is one of our depositaries, and then they went through the Exchanges and were then returned to us.

Q How were those small checks paid which you say were drawn against the money? Did you have as much as \$500,000 in currency or bills to pay those?

843 A Oh no. You want to know if we paid out the currency. They were drawn direct to an individual. There is no question about that. Not drawn out in currency at all, because we do not have any such amount of money on hand as that. Yes, if you could get the names of the parties to whom those checks are drawn that would help you—help you wonderfully. We could only give amounts.

Q Is there any way in which you think we could get them?

A The man himself has them.

Q Is there any other record between your bank—between the Assistant Treasurer and the individual himself by which we could get the names on the checks?

A I don't believe there is. There are so many hundreds of thousands of checks banks don't usually keep names, just amounts. They don't bother about names. They couldn't stand it. They couldn't get through with their work if they did. I will make inquiries as to the *modus operandi* of the Clearing House whether there is any record kept of the checks and of the names on checks. They may there. They have more machinery than the banks. I will find that out.

Q That will materially assist us.

A They might possibly keep a record there, as they have machinery to do it, but no bank would.

Q That goes into the Clearing House (pointing to checks), which we understand is a general leveling up machine between the smaller banks and the Treasury. This went in there and they were credited with this amount of money and the
844 Treasurer of the United States was debited with that money. You had to settle with the Clearing House?

A We don't do anything at all with the Clearing House. We simply deposit in the Manhattan Company and that goes to our credit. We keep an account with the Manhattan Company, and the bank does the rest.

Q That money would be drawn out through you?

A Oh yes. The bank have nothing to do with it at all.

Q These checks would never come back to you, would they?

A No, they would not.

Q You deposit them in the Manhattan Company, and that is the last you know of them?

A Yes.

Q They go to the Clearing House, and then they are sent to each bank from the Clearing House, and in this case they would go to the Assistant Treasurer (of the United States) and the Assistant Treasurer would be debited with that sum and the Manhattan Company would be credited.

A Yes.

Q But a man could draw checks on you against his deposits?

A He could draw a check on us and go somewhere else and get the currency, but he could not get it from us. He might draw it to his own order, or he might draw it to bearer.

Q Is there no means by which you could get the currency out of the Treasury?

A Oh, we could get it, but I know we never did it.
845 It is not our policy to keep a large amount of currency on hand. A trust company doesn't do it.

Q You stated then that this money was deposited by checks and not by bills?

A It must have been deposited by checks in the first instance. For instance you might draw a check to your own order and go to some other bank and get the money but in the first instance you would not get it out of us, in money, but would take that check to some other bank.

Major Adams:

Will you be so good as to look and see if you find any-

thing on them to indicate that they went through the Clearing House at all?

A (Reading from checks) "Guaranteed. Knickerbocker Trust Company. E. B. Eldridge, Secretary." "Indorsement guaranteed. Manhattan Company of New York," No, I don't see anything to show they went through the Clearing House.

Q I understand they did not go through the Clearing House?

A I don't see anything on the checks to indicate that they went through the Clearing House at all. That is queer.

Q Well, is it not possible that the Manhattan Company may have wanted the currency and went to the Treasury and got it?

A That is it exactly, and they took the whole of it.

Q Is that the way it was?

A Generally the way, I believe so. Being a United States check it is just the thing to use if a bank of circulation needs money and they want to save drawing their own checks.

846 Q What is that Ward, H. E. on the corner?

A I suppose that is some sub-treasurer's mark.

Colonel Gillespie: The Manhattan Company drew it out in bills? What would be the case if they wanted the currency?

A They may have wanted the currency. Banks want currency all the time and go to the sub-treasury to get it.

Major Adams:

Q Would there be any record in the sub-treasury, if that was the case, as to whom currency was paid, on a check of that size?

Colonel Gillespie: I should think so.

Mr. Maclay: It seems to me so.

Major Adams: Colonel, I understand Mr. Maclay asked you to go and see his counsel with him?

Colonel Gillespie: Yes. When would it be convenient for you to go

A Now. Right now.

Major Adams: We found out from the Treasury Department the checks were cashed.

A They did not go through the Clearing House.

Major Raymond: On everything that goes through the Clearing House I suppose there is a clearing house mark?

A Oh yes; just as like as not the bank may have sent that

over to get the currency on it. Another thing about this: this was deposited uptown, these checks. You see, we have two places of deposit. We have one at Fifth Avenue and 27th Street and one at 66 Broadway. This was deposited at 847 the uptown office; endorsed by Eldridge.

Q You would not have any of the names on those checks then?

A No, we would not have any names. I cannot see where I could help you, just having a lot of amounts; but we can give you dates—dates and amounts—but we cannot give you names because we don't keep any records of names. The books have been balanced and the checks returned some time ago and the account has been rather light since.

848

New York, October 27, 1897.

The Board met this day, all being present.

Colonel Gillespie: (Turning to Major Adams) Do you wish to ask Captain Carter some questions?

Major Adams: Yes sir.

Captain Carter was thereupon examined by Major Adams as follows:

Q You have expressed a desire to me to explain all matters relating to your own bank account, to the bank account of R. F. Westcott in which you acted as attorney, and also the matter of your purchases with the different brokers. In accordance with that a letter was written to you October 20th 1897, asking for five different papers. You have furnished three of them; two you have not furnished. The ones you have not furnished are, first, your personal check book on the Union Trust Company from January 1, 1896, to date, and second, the pass book of R. F. Westcott showing a transfer of \$45,648.65, June 5th to statement account. Can you furnish those?

A I have not been able to find either one of them. As I said to you the other day I supposed my personal check book was in my possession. I have looked and found it is not. I then went to the Union Trust Company and asked to look at my cancelled checks to see whether or not any checks 849 from that book have been put in there since I was in the North, and I found that none had, that the few checks that I drew since then were drawn on loose sheets, so I infer that I must have left that book in Savannah with my other check books.

Q It is not with your check books?

A It is not. Now of course, I have about 100 boxes in the course of my professional career, and it may have been that they were packed in there by Mr. Brown by mistake, but it seems quite improbable because my private affairs were usually kept in a desk and were packed by him into one or two places.

Q Do you wish to say anything about the statement I made about the pass book?

A Yes sir. I don't remember having seen the pass book at all, although I may have used the pass book. This account of Mr. Westcott's I find has been running about twenty or thirty years, and when he went away he transferred his account to a statement account, and I find by looking at the report from the Union Trust Company a statement that the pass book was sent with the cancelled vouchers. Now, I don't remember that pass book; but I have seen Mr. Westcott's pass book when I have been with him at various times and remember it was a small book with flexible yellow covers, and the fact that it is not with these cancelled vouchers makes me think it must have been lost. I don't know where the book is.

850 Q Do you wish to say anything further about it?

A Only that I have tried in every way possible to see whether I could find these things and I have been unable to do so; but if there is anything required concerning them, why I think the cancelled checks which came from them would show the same thing the book itself would show. Of course in the absence of being able to find those that is all I can do.

Q I think not. The stubs of the check book ought to show what they were drawn for; the checks do not?

A In the absence of being able to find those I don't know what I am going to do, but if there is any check which you have which I might be able to remember what it was for, I will be glad to trace it up in every way possible. I want to do everything I can, but of course I don't know where that is and I have been unable to find it.

Q Will you consider the request for these two books renewed by the Board?

A Yes sir.

Q On October 11th Colonel Gillespie wrote you a letter in which he asked for a copy of the statement of your account with the following named brokers, Reed & Flagg, C. H. Vandeventer, Platscheck & Co., Austin R. Myers and Watson &

Gibson. You have not furnished the statements of Reed & Flagg, C. H. Vandeventer and Austin R. Myers?

A I think you are mistaken about that. I furnished the statement of Reed & Flagg, but Austin R. Myers—I tele-
851 graphed to Savannah and the telegram was returned to me saying he was out of town and was not in business. He used to be in the Morning News Office in Savannah, and I don't know where he is. I have written again and just as soon as I find out where he is I will try to get that from him.

Q How about the statement of C. H. Vandeventer?

A I made an application for that and received a reply from Judge Van Wyck, I think his name is, he is his attorney, saying that Mr. Vandeventer was out of business, but would make inquiry for him and if he could get hold of any of his books he would be glad to give the information to me, and just as soon as I get that I will produce it.

Q Will you just consider the request of the Board renewed now for the statement of your whole account with Reed & Flagg, C. H. Vandeventer and Austin R. Myers?

A Yes sir.

Q The Board is informed that on October 9th, 1895, you deposited with Reed & Flagg \$33,000 in currency. Will you explain to the Board how that money was obtained?

A I don't remember at this date my deposit of that amount with them but if that be true—I remember I did deposit with them currency at various times, and if it be true that I deposited with them currency at that date it was from the safe deposit box from Mr. Westcott where I obtained the only
currency to which I had access.

852 Q On October 10th, the next day, you deposited \$16,000. in currency with Reed & Flagg. Will you explain to the Board where you got that \$16,000?

A If the deposit was made it must have been in the same way because I had no other means of getting currency.

Q On July 5th, 1895, you deposited in the Union Trust Company \$14,500 in bills. Will you explain where you got that?

A If that be true that I deposited that amount I say it must have been the same way because that is the only place where I had access where I could have obtained those.

Q On June 7th, 1895, you deposited in the Union Trust Company \$30,828.12. Will you explain where you got that money from?

A You say that I deposited. I don't remember at this

date; was it a check or was it in cash? I mean was it gold, or currency, or check. I don't remember. Of course I know this without knowing what it was, that it was in connection with Mr. Westcott's account because I had no other means of getting such sums of money.

Q On March 7th, 1895, you deposited in the Union Trust Company \$36,025. Will you explain where you got that money?

A That was also Mr. Westcott's because I had no large sums except through his business.

Q Mr. Westcott was in Europe in 1895, was he not?

853 A Yes; he went to Europe, I think, in December, 1894 or January, 1895, I don't remember.

Q Will you explain to the Board from what source you derived these large sums?

A I either got them from his safety deposit box where he had been keeping, as I have stated likely continuously for some time previous to that—I don't know how long—or perhaps from the sale of securities of his or real estate. I don't remember the details; but they were either from the sale of securities or cash from his investments.

Q January 27th, 1897, you proposed to invest \$55,000. to \$60,000. in Orange, New Jersey. It appears from the correspondence that you were to loan that much, and on this loan you could not expect to receive more than 4%?

A It is an investment instead of a loan isn't it?

Q Will you explain where you expected to get that \$55,000 to \$60,000?

A Yes sir. I had from time to time securities placed in my possession which I had the use of, and which finally were to be mine, and in discussing these investments with my father-in-law he stated to me that he thought the safest plan for me would be real estate; and he has had for a long time large holdings of real estate in Orange, and he stated to me

854 "Now, if you convert these things into real estate in Orange you won't get so much interest perhaps as you would on the other things I will let you have, but it will be safer for you," and then he said to me "Don't you do it unless you are going to be satisfied with it," and we talked about this matter and we then corresponded with each other about this matter, and finally, I think it was in March of the present year, I decided I would like to do that, and it was with the intention of converting these securities which I had access to and which were intended by him to be mine which

were in my possession into this loan; that is where I expected to get it.

Q Have you represented to the Board at any time that the investments made by you in your own name were afterwards transferred to Mr. Westcott?

A Mr. Westcott has given me some things which have not been transferred back to him. The investments I made for him I turned over to him, I think, every one. I don't think I have anything I have not turned back to him before I went to Europe.

Q Did you in March, then, hold \$55,000 to \$60,000. which was invested in your own name?

A With what he had and with what I had saved up I think there was more than that. I am not sure about that, the total amount, because I had some investments in Savannah I had been saving up little by little for a great many years, and those were mine. Then I had some property here which 855 had come from him—I must have had that much at that time with his that was in my possession at that time.

Q In making these investments in Orange you have stated that Mr. Westcott was to put in the land and you were to loan money to build the house?

A No; not for loaning money; to put in money and build the house.

Q In whose name does the title to the land stand to-day?

A Mr. Westcott has transferred to me—given to me—a half interest in the whole thing—the land and house.

Q In what way?

A A deed to me.

Q Have you turned over to him the \$60,000?

A No sir not all yet; one piece of property I have not yet turned over to him.

Q Explain to the Board how you got the part you turned over to him?

A The part I turned over to him—a part of it came through the intermediary of my wife, and part of it came direct.

Q Will you in March, 1897, did it stand in your name or his name?

A I don't remember.

Q Can you refresh your memory as to that?

A Yes, I could look at the records and see.

Q Will you bring them, a complete statement of that?

A Yes sir.

Q Having in mind your statement to the Board or

856 rather to me personally, you wanted to explain all this
I now notify you to make a complete statement as to each item—there are six?

A Which do you mean; do you mean these items covered by the questions asked me?

Q Yes; all the information you can?

A Can I have it in writing so that I can see just what it is?

Major Adams: You will have a copy of the stenographer's report which will give you the information.

By Colonel Gillespie:

Q You stated that you had special securities which you expected to sell to invest in this Orange property?

A Yes sir.

Q What were those securities?

A Part of them were some shares which Mr. Westcott had.

Q What kind of bonds, special investments—you can remember that?

A I don't remember the details of that because Mr. Westcott would change them; sometimes he would tell me "you can have certain things, and the next day he would determine he would sell them and give me an equal value of something else. I remember he asked for some Houston and Texas Central he wanted to sell, so I never kept a close account because he did just as he pleased with those things.

Q I thought your statement was that you held for your own purposes certain special securities which you expected to invest in this Orange property?

A These were mine. I mean what I considered he had allowed me to have as mine; they were in the box with his jointly and a piece of paper put around them.

Q What were those?

A I don't remember, because they were turned over to Mr. Westcott and what they were I don't remember. The other piece of property I can remember because that was a piece of real estate.

Q What piece of property was that?

A A piece of property he gave me some three or four years ago on Eighth Avenue.

Q Who was the agent for that property?

A A man by the name of Bragg.

Q What was that property worth?

A I think it was worth about forty or forty-five thousand dollars.

Q Then you stated you had an investment in Savannah; what was that?

A The first investment, I think, I ever made was \$500. in some Tow Boat stock; then I added to that as I could, and the stock was doubled and then doubled again—I mean script dividends—and then I added to that. Then in addition to that I had 500 shares in the Lighterage Company which was doubled in the same way, and I don't remember, but I think there were other little things I had in Savannah; some of the little things I had in Savannah were purchased by me or Mr. Westcott.

858 Q What were those?

A Some Brush Electric Company stock and some Brewery stock.

Q What was that Tow Boat Company?

A It is called the Savannah Propeller and Tow Boat Company. It is a Company which owns Tow Boats which does a general towage business in Savannah.

Q Was it employed in any way by the contractors?

A No sir, I think not. I think they might have hired some tugs but not in any other way. It was an entirely separate organization.

Q Separate from what?

A From the contractors. It was a Savannah organization. It is an incorporated Company.

By Captain Gillette:

Q Who owned the Barge Tomalich?

A That was owned by the Savannah Dredging Company. I don't know who owns it now. It was never owned by the Propeller and Tow Boat Company.

By Major Adams:

Q Will you tell us in what form the property came to you from your wife and through your wife?

A It came in presents to her from her father.

Q That is not what I want to know. I want to know the nature of the securities and bonds or stock whatever it was?

859 A I think there were some Chicago and Northwestern which came through—I could not remember at this date—I don't remember because nearly all of these things have been changed either on the advice of Mr. Westcott or others since that date and I don't remember.

Q The property that came direct to you from Mr. Westcott in what shape was that?

A Sometimes that came in the shape of bonds and sometimes in the shape of money from him.

Q Can you give us the names of the different bonds?

A I don't believe I can give you those, because as I have said they were turned back to him in part for this Orange property and then they were turned over by him from time to time so that I don't know. I remember Brush Electric but those were sold by him afterwards on the theory—I am not sure whether they were those or not. He had so many different kinds of securities I don't know which ones I had. By Captain Gillette:

Q You testified a moment ago as I understood it that the particular property that you were proposing to invest in in Orange came to you in two parts, one directly, the other through your wife, and that Mr. Westcott was anxious to see that you were satisfied with 4% on this investment. The question is what was the form of that property which was to be the basis of this investment, the part you testified that came from your wife and part direct from him, what was the form of that that came through your wife, was it stocks or what?

A No stocks ever came through my wife. It was either money or bonds. I don't think any real estate. I think nothing except money or bonds came through her.

Q What was the form of the other that was made direct; you must have known exactly what you had on hand that you were going to make this investment with? I cannot conceive of a man making or proposing to make an investment of \$60,000. without knowing something about what it was?

A I am not responsible for your lack of inability to conceive of these things.

Q I ask for an explanation?

A I am very glad to give the explanation, but as I say I am not responsible for your inability to conceive of things. All I state is this, that this old gentleman was liberal to me and these things he gave, as I say, I don't remember because sometimes I would come up and find that things which he had given me before he had changed absolutely, and of course being his son-in-law I did not feel I had any right to hold on to these things. He would think perhaps from the fluctuations of the market it was desirable to sell one thing and in place of it put in another, and so I say sometimes the form

of what I had would change four or five times say in six 861 months. When I was up here I talked it over with him sometimes, and when I would be away I would know nothing about it until I came back. He has consulted me on these things except when I was absent.

By Major Adams:

Q Will you state to the Board about how much currency Mr. Westcott had in his box when he went to Europe?

A I don't know, it was quite a large sum.

Q How much do you think?

A I don't know. I think that may be in the box was a memorandum, but I don't know. It seems to me there was a large sum but I don't remember how much.

Q Will you explain to the Board from what source that large amount was derived?

A That I don't know because when I first had access to Mr. Westcott's safe deposit box he had amounts which he had been getting for some time, how long I don't know. I don't know the sources of Mr. Westcott's wealth. I only know, I think that he organized the Union News Company and he sold the United States Express Company to Mr. Platt and organized the Westcott Express Company—in fact, I don't know all his business.

By Colonel Gillespie:

Q When did you first have access to his box?

A I think the first time I had access to his box was in the fall of 1892 or spring of 1893. Before that time he lived 862 in Orange and he had a good many of his securities in his safe in Orange, and then when he left Orange which I think was in the fall of 1892 he never went back there, and none of us have ever gone there to live or stay since that time.

Q Have you access to that box today?

A No sir, I have not had access since I went to Europe. When I sailed for Europe I turned everything over to him.

By Major Adams:

Q Will you state to the Board about how much in currency you took out of that box all told?

A I took out the major portion of what was in there, I remember that, because Mr. Reed advised me that the panicky times were over he thought it was better to make these investments and I thought so too, better than to let it lay without any interest, the only object in letting it lie was in case of more trouble in the market I could make more in one day

than I could in five by having it invested, so I remembered I invested the major portion of what was in there, but I don't remember how much.

Q Did you use that box to deposit your own currency, cash, in?

A No; never had any of my own during that time, because the only time I ever had any of my own was when he gave it to me or immediately before that time. At that time the only thing of my own, as I remember, came in checks, and those I deposited either in the Union Trust Company or the Merchants National Bank in Savannah.

Q Will you furnish the Board with a written statement showing the amount of currency in the safe deposit box when it was turned over to you?

A I don't know whether I will be able to do that, because Mr. Westcott gave me everything he had—I mean control of everything—every single thing he owned with powers of attorney calling for papers &c. and I don't know that I can get you that. The best thing I could do would be to think it over and I am sure that would be only a rough estimation.

By Captain Gillette: Q Did you give Mr. Westcott any memorandum or receipt or anything to show your responsibility for this large amount of currency while he was gone or while you had access to the box?

A No sir, I never gave Mr. Westcott any form of receipt or memorandum. His trust was implicit in me. He never exacted anything like that from me whatever as the whole thing was left on trust and on faith to me and to them.

Q Did his other children or possible heirs know of that arrangement?

A That I don't know.

JOHN F. GAYNOR called:

Examined by Colonel Gillespie.

Q Are you a member of the Atlantic Contracting Company?

864 A Yes sir.

Q In what capacity are you connected with that Company?

A President.

Q What contracts have you had with the Government late-

ly or in the years 1894, 1895 and 1896 in the District over which Captain Carter had charge?

A I have had several; Fernandina, Savannah and I guess two or three little ones along the coast between there. I don't exactly remember now which they were.

Q Is your Company an incorporated Company?

A Yes sir.

Q Do you remember when it was incorporated?

A I think it was before the letting of 1892. I think the papers are in your office somewhere—the papers were all filed there.

Q Have you changed your stockholders since its original organization?

A No sir.

Q Please state who principally constitutes your Company?

A Captain Greene and myself are the absolute owners of the stock—the stock is in our name in the books.

Q Are there any other stockholders?

A My brother Edward has five shares and my brother William has five shares for the purpose of making an organization so as to make them officers. They had to have the stock in order to constitute the Company—only just for the purpose of the Company organization so they could sign checks in case I was away because I could not be at different places at the same time. We made them Treasurer and Secretary and made additional powers for them to sign vouchers &c. while I was in Europe and at different places.

Q In what capacity did Captain Greene act?

A He was a stockholder in the Company. He was not an officer of the Company.

Q Was he the engineer of the Company?

A Yes sir.

Q Was he regarded by the Company as the chief engineer of the Company?

A Yes sir; considered him very valuable in that respect.

Q Was he regarded as the Chief Engineer of the Company?

A Yes sir.

Q The engineer to whom you would look for any engineering ability?

A Yes sir.

Q Did he perform any other services for the Company than that?

A Everything he could do to help the Company get work and progress it he did.

Q Was he generally known in the community as a ruling or controlling member?

A I suppose so; everybody knew that he was, there was nothing concealed about it. He attended to all letting and run around every where whenever he could do anything good for the Company—whenever he could do it he would go and do it.

Q Do you know whether he had allied with or anybody associated with him in holding his stock?

A I don't think so or I would have known it. I would know of it if there was.

Q Was Mr. Anson Bangs a member of your Company?

A No sir. We dissolved partnership. Since I have been thinking about that, since I spoke to you I have recalled that there were some papers drawn up dissolving the partnership; whenever the St Mary Canal was let, whatever date that was, then we dissolved partnership.

Q When was that?

A I am trying to remember the date. It was before the 1892 letting. He was up there and built that work; it was about that time, I can't give the exact date and we drew up dissolution papers and I think he has got them. I know I had them.

Q He has not been a member of the Company, then, since 1892?

A No sir.

Q Will you look at this check dated June 29th, 1895, to Mr. Bangs and explain the endorsement on that?

A That was drawn to Anson M. Bangs and he has endorsed that over to Mr. Greene. He had a contract there at Ferdinandina.

Q Was Mr. Greene his partner?

A No sir. We done the work for Mr. Bangs.

Q That is \$20,000?

867 A. Yes sir. We done the work for Mr. Bangs and he turned the matter over to us. You will find them all that way probably.

Q That is a check for \$20,000?

A Yes sir. I presume that is written payable to Mr. Bangs and he endorsed it to Mr. Greene or myself.

Q The only question I asked was why that check should be transferred to Mr. Greene?

A Because we done the work for Mr. Bangs. That check is all right; all of them was that way. All those checks are on the Fernandina contract. We did the work for Mr. Bangs.

Q He has not been a member of your Company?

A No sir; no stock issued in his name and nothing of the kind.

Q Did he do any work for you under the contract of 1894?

A I don't think so. I think there was only one contract? I don't remember any but once we did work for him.

Q There was a contract in 1894 for Cumberland Sound and the contract in Savannah in 1896 and Cumberland Sound in 1896. Has Mr. Bangs done any work for you under those contracts?

A I don't think so; no sir.

Q But he did do work for you under the Cumberland Sound contract?

A We done work for him.
By Captain Gillette:

Q Did you know beforehand you were going to do the work for him?

A No sir.

868 Q You didn't bid on that contract yourself?

A I don't remember. I can't remember. We have had so many lettings. If you will show me what it is I can show you. We are bidding all the time.

Q Cumberland Sound, 1894. The bidders were Anson M. Bangs, R. G. Ross and Rittenhouse R. Moore; your Company didn't bid?

A It seems not.

Q Was the idea of your not bidding the fact that Mr. Bangs did and you would do the work for him?

A I don't remember what the reason was. There was some reason but we did the work for Mr. Bangs. He was the bidder on it.

Q In the previous work for Cumberland Sound in 1892 you did not bid but Edward H. Gaynor got the contract. Did you do the work for him?

A He done the work—I think we done it for him at the time.

Q In doing it for him you employed him as foreman or manager or something?

A He was not working for us at the time. We were doing that work. He done the work on the Delaware River. He had a couple of contracts of his own up there.

Q You never bid against each other, do you?

A Oh yes.

Q The Atlantic Contracting Company and Edward H. Gaynor bid against each other?

A Yes sir. I have bid against Bangs. You will find some lettings at Fernandina where we had a hard time and I 869 know Mr. Bangs got the work. His father was the bidder at that time and he was working for us afterwards. We have had little spats when we sometimes got up against one another.

Q Brunswick Harbor in 1889. You did not bid. Charles C. Ely got that work. Did your Company know beforehand you were to do the work for him?

A No. How did we know that.

Q You naturally had an extensive plant in this vicinity, and in bidding for these contracts that plant has been used on a great many of them. You say you did not bid. Was there any general reason for not bidding?

A Yes; sometimes we did not want to bid for a great many reasons.

Q In cases where you did not bid would you let your plant lay idle or move it away?

A If we could run it and do good business with it we would. Whenever we can make any money out of it we will do it and we will keep our men to work sometimes when we don't make money so as not to break up our crews.

Q Can you remember any reason why you did not bid for instance in 1889 when Charles Ely got the contract?

A Who were the bidders on that?

Q David C. Howett and Charles C. Ely?

A We were doing other contract work and our plant was busy at that time.

Q Your plant did the work?

A I know that, afterwards, but may be at the time 870 of the letting we were pretty busy, and may be thought we would not take it and afterwards made some arrangement and took it and done the work.

Q On April 15th, 1891, John F. Gaynor was the bidder—

Cumberland Sound. Was B. D. Greene interested in that contract—you were the contractor yourself?

A Is he surety on that?

Q I don't know. I haven't got that here. If he was surety was he interested in the bid?

A If he was surety he was not interested in the bid. I know that because that is the law.

Colonel Gillespie: He and Anson M. Bangs were bondsmen.

Witness: Then he didn't have any interest.

Q Then there were neither of them interested in the bid.

A No sir.

By Colonel Gillespie:

Q Do you remember any Tow Boat Company in Savannah?

A Yes sir.

Q Who was the President of it?

A I think Jacob Paulsen.

Q Are you a stock holder in the Tow Boat Company?

A No, I think I am not. My sister has some stock in it.

Q Has B. D. Greene any stock in it?

A No sir.

Q What is the capital stock?

A I think \$300,000.

Q Who are the stock holders?

A I don't know.

871 Q Do you know any of the stockholders?

A I don't know. I hold stock in it, either me or my sister—no, I think it is my daughter who has the stock in it.

Q Did you ever use that Company for the execution of the contracts which you had in Savannah and Cumberland sound?

A Oh no. I have hired a tug from them once or twice for a tow in the course of eight or ten years; for instance, if there was a tug boat which would be broken I would hire one of theirs.

Q Did it form part of your plant at all?

A No sir, I don't think I paid them \$150. in five or ten years; only when a tug would be broken down I might hire one of their temporarily to tow some barges. There was no other tugs there.

Q Were you a stockholder in the Lighterage Company?

A Yes sir—no my boy is a stockholder; got \$2,000. or twenty shares.

Q Who was the President of that Company?

A Elton E. Smith.

Q Do you know the officers of the Company?

A I don't know the officers. Mr. Smith was the President and he owns a majority of the stock, and I don't know who the officers are.

Q Do you know any of the stockholders in the Company?

A I know two or three of them. I don't know how 872 much the stock is.

Q Who were they?

A I think Mr. Paulsen has some in there and I think Mr. I don't know, I am not certain about that. Of course they change and the stock was selling around the street. I remember that.

Q Are you a stockholder in the Electric Light Company of Savannah?

A No sir.

Q You were a stockholder in the Street Railway Company?

A I was a stockholder. I lost all the money I put in it. I would sell it pretty cheap. Two cents on the dollar. I had a little of it. I have got a quantity of these things.

Q Do you own any other investments in the State of Georgia?

A I have got some bonds of the Florida Southern that runs from Macon down there, which is a very good thing; made money on that.

Q Have you ever been interested in any civil enterprise apart from Government enterprises in which Captain Carter was interested?

A Never in my life.

Q Have you ever made any investments in which Captain Carter was mutually interested with you?

A Never in my life not a dollar.

Q Do you know of any investment that Captain Carter had down there?

A I do not. I don't know whether he has got a dollar 873 down there or not. I am not very much in Savannah—probably don't go there twice a year.

Q Do you know whether it was generally understood that Captain Carter was a man of means or not?

A I understood that he had plenty of money after he got married. I don't think he had much before that. After he was married I understood that Mr. Westcott was very good to him.

Q Is he regarded today as a man of means?

A I don't know anything about that. He knows more about that than I do.

By Captain Gillette:

Q Do you know a man by the name of William H. Walsh?

A Yes sir.

Q What relation is he to you if any?

A He was a foreman for us off and on, we discharged him.

Q When did you first hire him?

A I can't tell you. I think eight or ten years ago. We discharged him once or twice; had a row with him.

Q Where does he come from?

A He comes from Fayetteville.

Q Is he a relative of yours?

A He married a cousin of mine.

Q Did you bring him down to Savannah to be a foreman for you?

A I think so; yes sir.

Q Do you remember what year that was?

A I don't remember.

874 Q Is there any way you could find out?

A I don't know. I think it was eight or ten years ago.

Q Where did you put him to work?

A In the mat camps.

Q What contract?

A I can't remember. I put him making brush fascines. I had him twelve or thirteen years, I don't remember exactly, but it is a good while. I had him up to Richmond, I think.

Q When did you first bring him to the Savannah District?

A Ten or twelve years ago.

Q Do you know a man by the name of Cullen McKay Grant?

A Yes sir.

Q Did he ever work for you?

A Is he a negro or a white man?

Q I don't know anything about him?

A There was a lot of negroes named Grant, and there is a white man by the name of Grant, but I don't know what his first name is. Is he a contractor?

Q This man is probably a contractor. Did he ever work for you?

A No, I don't think so.

Q Do you know anything about the Empire Construction Company?

A Oh yes.

Q When was that organized, before or after the Atlantic Contracting Company?

A Long before. We done some work over in Orange, the Empire Construction Company.

875 Q Did you ever do any other work except in Orange?

A That is the only place we worked, I think.

Q Did you ever get your stock in it?

A No; it never was issued, I don't think.

Q Who had charge of the stock book?

A My brother Will Gaynor had it. He went there and worked at that and he had all the papers, and I had forgotten all about it when I heard that it turned up in this investigation afterwards.

Q What was the cause of the extinction of the Company?

A Because we got through, finished up what we went there to do in Orange.

Q It had about the same membership as the Atlantic Contracting Company apparently?

A No. Newton was to have one-third of that—John Newton's share was to be one-third I don't remember exactly, but he had about one-third of it.

Q It was a very small issue?

A I know he had one-third of that. He was the manager of it and was there all the time and finished it.

Q With that exception the organization of the Atlantic Contracting Company seems to have been something or a reorganization of the Empire Construction Company, the same men and about the same share except in that one instance. Do you know any reason why you changed the name,

why you reorganized or that new company was organized?

876 A I don't know why we did it; only we were not in very good graces in Orange. We had a lot of lawsuits and we wanted to get that Company out of existence as soon as we could. We killed horses and men and had everybody pounding us and we wanted to get out of it.

Q About how long an interval elapsed between the death and the birth of the other?

A I don't know. You can find out. I don't know about that. You can see the dates because you have the papers in your office when that other was organized; we had to send them all, down to your office, every year when we bid on the work.

Q You are sure they were left there are you, the organization papers of the Atlantic Contracting Company?

A I think they were because when we had to bid we had to put these papers on file there to show under what law we were organized, and I am pretty sure they were there.

Q What percentage of the stock of that Company did D. B. Greene own?

A He owns one-half.

Q And you the other half?

A Yes sir, with the exception of these two little amounts of either five or three shares that my brothers William and Edward hold for the purpose of organization.

Q Who is the Treasurer of the Company, in fact?

A William Gaynor is the Treasurer.

Q In name, but who is otherwise in fact?

877 A The fact of it is William is Treasurer and he hands over the vouchers to Captain Greene or myself just as happens to be. We are in fact the Treasurers.

Q Who do they draw on down there when they want a check to pay men?

A Captain Greene or myself, either one.

Q Indiscriminately?

A Yes, if I was off Captain Greene would take it and put it in his bank and he would send the money they wanted and if he was off I would send the money they wanted.

Q Suppose each one was to die how would you straighten out your accounts?

A We settle up every month so we would be only a month behind.

Q Do they draw on you about as often as they do on Captain Greene?

A No. Captain Greene being here most of the time it is handier for them to reach him than to reach me. I am on the Canal work and they can't find me half of the time.

Q What percentage or what part of the total drafts that are made up here are made on you and what part on him?

A I could not tell you about that.

Q Do you think you have drawn checks for one-third of the disbursements down there?

A I don't know. I can't tell about that—either he or me all the time.

By Captain Carter:

Q If anybody besides yourself and Captain Greene 878 had any interest whatever in any way in the Atlantic Contracting Company, would you have known of it?

A I should think so; certainly I would.

Q I want to ask you this, whether directly or indirectly to me or to any one for me in any way whatever, has any thing either from the Atlantic Contracting Company or anything in which you have been engaged ever been given to me?

A No, sir. I can answer that positively.

By Captain Gillette:

Q When was the firm of Greene & Gaynor first formed; when did you first do business with Captain Greene as partner?

A After he resigned from the Army; when that date was I don't know. I think it was 1881 or 1882—whenever he resigned.

Q Did he expect to do this when he resigned—did he resign for that purpose so far as you know?

A I don't know. He was a partner with Mr. Bangs. I came in the firm afterwards. He came in with Mr. Bangs and Mr. Dolbey and Mr. Howett, and I came in afterwards—right after he resigned—within six months.

Q So far as you know he resigned for that purpose?

A I don't know whether he quit the army to go into contracts or not.

Q On what basis were you first taken into the partner- 879 ship?

A I had one-seventh of that combination at that time.

Q How did you get it—they owned the Company first and

then they simply took you in as a partner on account of capital put in and services what was the basis on which you were to go in?

A I had to put up my own money just the same. I had one-seventh of that.

By Colonel Gillespie:

Q Has that connection been unbroken from that day to this?

A No sir. Then we dissolved in four years; then we made a partnership for four years with Mr. Howette, Mr. Dolbey, Mr. Bangs and myself and Captain Greene and that extended four years from the time we made it and then afterwards they went off and we commenced to bid against each other.

Q Since that date has this connection been unbroken—Greene & Gaynor.

A We have done business together from about six months after he resigned right straight through. At different times sometimes I would do a piece of work where he would not have any interest in it, and sometimes he done some work himself where I didn't have any interest in it.

Q I mean Government work?

A From the time he resigned we have been connected more or less—within six months after he resigned. I don't know how long; right directly after he resigned.

880 By Captain Gillette:

Q You didn't have to form a new partnership at each contract. If you got a contract on this canal work he hasn't got to come in with you?

A I have just taken a contract for \$5000,000. worth of work. I don't know whether he is coming in it or not. I have bid on it and got it and I don't know whether he is coming in or not—whether he will come in or not. I did not consult him when I bid on it. I have told him if he wants to come in on it to put up his share and he could come in. Maybe he will and maybe he won't come in. He has not stated yet whether he will come in or not.

By Captain Carter:

Q If he were a bondsman of yours on any Government work would he be interested in the work then?

A No sir.

Q Could he be a bondsman of yours on any Canal work and be interested in it?

A I think the laws are different in the State of New York;

you have to put up a certified check with your bid.

By Captain Gillette:

Q Did you never know of a case where a man was bondsman of a Government contractor and shared in the profits of the contract?

A I don't think so. I don't remember of any. I don't know.

881 By Captain Carter:

Q If it were an incorporated company then he would have a right to do it?

A Yes; if he was not an officer; that is the law. Captain Greene could go on the Atlantic Contracting Company's bond because he is not an officer. I asked the War Department that very question and they told me they would protect him as a bondsman so long as he was not an officer of the Company. A stockholder could go on the bond and that is the way the decisions are in the War Department.

By Captain Gillette:

Q A man who is supposed to be a partner can go on a bond. Did you never know where an actual partner did go on the bond in a Government contract?

A I don't understand your question.

Q A man is not supposed to be a member of a firm who goes on the firm's bond? I was curious to know if you never knew of a case in your history as a Government contractor where that was not carried out?

A I never heard of it; where the bondsman was a partner on a contract. He might be a partner in other work but not on that contract.

By Colonel Gillespie:

Q I think Captain Gillette's question was does not a man sometimes consent to be a bondsman in order to share the contract?

A That I don't know much about.

882

October 29, 1897.

All of the Board present. Also Captain Gillette and Captain Carter.

Major Adams: Captain Carter, In your statement presented this morning I find the following words: Referring to Mr. Westcott, I find the following: "He has replied to me and I have submitted his reply to this Board that the transactions to which I refer and by which I had the handling and control of large sums of money were had with and for him." I find checks drawn in this book, the check book, "R. F. West-

cott, O. M. Carter, Attorney," eleven checks, to the order of your mother and your brothers, amounting to \$4,642.35. I find the checks drawn by O. M. Carter in your other account and which you state belonged also to Mr. Westcott, checks to the amount of \$12,350., making in all \$16,692.35, turned over to your mother and brothers from the two accounts, and I want to ask you if this was done for Mr. Westcott?

Captain Carter: It was done for him in this way: that he gave me for my own use money and when I obtained that money for my own use I did with it as I chose.

Colonel Gillespie: Do you care to look at those checks?

A No. Of course the amounts I don't remember.

Major Adams: At the last meeting of the Board you were questioned as to certain cash deposits made with the Union Trust Company and with Reed & Flagg, amounting to over \$130,000. You stated that you obtained this money from Mr.

Westcott's safe deposit box. Have you asked Mr. Westcott to verify that statement?

A The statement that I had the \$130,000?

Q That you took over \$130,000. in currency from his safe deposit box and deposited it with the Union Trust Company and with Reed & Flagg, your brokers.

A No, I doubt if he knew the exact amount I took from his safe deposit box because I had authority to take from it whatever I chose and invest it and I doubt if Mr. Westcott knew the amount I took. He took from it when he chose and I took from it when I chose and rendered my reports to him of what I did with it, roughly; the details of what I did with what he allowed me to take I did not give him.

Q Have you asked Mr. Westcott to come here and verify these statements?

A I have repeatedly.

Q You state in this paper that you are not willing longer to endeavor to bring Mr. Westcott before the Board?

A If you had seen the character of my last interview with him, I don't think if you were in my place you would be willing to try it any longer. I tried and tried and tried.

Q Captain Carter, It appears from your testimony that under your power of attorney, acting for Mr. Westcott, you could give away to your relatives \$16,992. Will you please explain to the Board why, when this account was closed out, it

was necessary for you to deposit so small a sum as \$144.84 to the credit of Mr. Westcott?

884 A I don't remember. It may have been some collection of his that I made.

Colonel Gillespie: Let me see the books right there where it comes out. Just look at the check.

(Check book exhibited).

Captain Carter (Continuing) Yes. No. 50. I don't know. It may have been that I received something from Roanoke. I don't know what it is. I used to receive various things from him from time to time, and if they came from other sources over which I did not have control I turned them in with a memorandum, marking them "A" or "B", or whatever they were, and if they came from other sources I put them under another head. I don't remember why I drew these to the order of Mr. Westcott, but the chances are I thought first it was some money of my own I put in there. I don't know what it was. Of course I can't tell. It is just marked "From O. M. C. \$144.84." Whether I received that from the Conquest Estate, or from some of his others which I did not have control of, I don't know how. I don't remember.

Q Captain Carter, you have stated to the Board that the money of both accounts belonged to Mr. Westcott.

A Well, that is not strictly so because I had some of my own money in there but I mean the bulk of it, the major part of it was Mr. Westcott's money. In other words, what I had of my own money was so small in comparison with what came from him that I considered it all practically came from him

because as I remember it I only used to make a small in-
885 come outside of my own salary. Sometimes it was more and sometimes it was less. There was a \$1,500. fee at one time for consultation work, so that I really had money that was my own, but it was a small amount in comparison with Mr. Westcott's.

Q If you could draw out of that account \$4,600. for the benefit of your mother and brothers, what occasion was there for your putting in that small amount?

A Well, there would have been no real necessity for it. Of course I could have just kept this small amount and Mr. Westcott would never have said anything; but I suppose it must have come from some of those things that I did not have control of myself. I used to keep a pencil memorandum of some of the things I had control of and of some that I did not have control of, and I think now it may have come to me from

some of those outside sources and I drew this check to put it into the proper account. I don't remember how I did it, Major. First when my attention was brought to the amount I thought it was a check for some mileage, but I see that it is not. I don't know why I did it unless it is for that reason, to get it into the right account. That is the way I used to do I know.

Q After depositing that amount, the total balance, six thousand and something, went over to Mr. Westcott, did it?

A It was this way: I was mistaken about that. I said I drew him a check and transferred it. I find I did not. It

was this way: This account was his and has been standing in his name in the Union Trust Company for probable twenty-five years and when he came back from Europe he simply resumed control of it and there was a little deposit slip showing it was transferred from a statement account, which was sent to me, back to a pass book account, because Mr. Westcott preferred to have his account kept in that way. That was the only transfer there was.

Q During this period of 1895, did he ever make you a definite allowance?

A He never did. He allowed me just what I wanted.

Q If you could spend as you pleased and turn over say \$17,000. to your relatives, what occasion was there for returning by check the sum of \$144.84.

A There was not the slightest necessity except that I always used to do this: the amounts that I expended for myself or gave away I put down under one heading say "X" and then the amounts that I sent out for any little personal things of Mr. Westcott's I put down under say "Y" and the moneys that came in I put down under similar marks, those that I had control of under one and those that I did not have control of under another; the money from properties that I had control of I put under "X" and those that came in from properties that I did not have charge of I put under "Y". Then I could spend from both accounts, even when I was taking out of that "X" account any sum that I wanted to expend for myself. These divisions were made so that I could tell at the end of the time about what I was doing with Mr.

Westcott's money. That was all I suppose I must have put those divisions there for. Of course I don't remember at this time. All those divisions were not necessary. I could have left them loose, without any divisions at all, so

that It probably came more just from a memorandum habit that I had than from anything else.

Q Why did you use such vague forms of bookkeeping as "X" and "Y"?

A I have not the faintest idea why I did now. It was for my own memoranda and I did not keep a regular set of books at all.

Q Referring to Reed & Flagg, I read from your statement submitted this morning, page 19: Reed & Flagg and Mr. Westcott:

"I have explained at length my relations with him and at my request oft repeated his brokers have written letters which have been submitted to the Board explaining as far as they felt justified my relations to his account with them."

Here are 7 checks drawn by you as Attorney for Mr. Westcott. Reed & Flagg have explained two of them. Do you know any reason why they should not explain the other five? (Checks handed to Captain Carter).

Captain Carter: See that was one, and that. Those two are the ones and then these others are the five. No, I don't know any reason except this; They told me they were sorry that they had even let these go in because they are all Mr. Westcott's and that I had no business with them at all. They were checks for the purchase of stock and although the stock was his, yet in order for me to have transferred it, would have had to attach to it the original power of attorney that I had from Mr. Westcott and that would have left me without 888 any power of attorney, because a duplicate power of attorney would not go with them. But these checks were not in my name and were entirely and purely for Mr. Westcott's account and I had nothing to do with them except just as agent, to get the stuff for him.

Q The seven checks are drawn the same way?

A Yes, they are all drawn the same way. (Looking at signatures on checks) Yes, this is the same as that, this is also just the same. But my power of attorney that I had I could not give up. This is the only stock that I ever purchased that way. With bonds I did not need to attach a power of attorney, so that if I made an investment for him in bonds and wanted to dispose of them, I could do it, but I could not do it with stock, so that I had it put in my name for the facility of transfer, and that is the reason why they said they put those two checks out.

Q Referring to those checks number 107 and 110, Reed & Flagg have furnished two statements and they state that the statements include everything in your name individually or otherwise between 1891 and this date.

A Yes.

Q Now here are 5 more checks.

A Yes, but these have nothing to do with me, Major, either individually or as attorney at all. The checks are drawn as attorney because I had his bank power of attorney. The transactions were for him absolutely and this money of his was turned over to them by this bank power of attorney that I had so that the transaction after they got his money, I had nothing to do with it all. The same is true of those other 889 two checks also except it happens to appear on their books in that way as I said because I put it on their books for transfer. You see, I had to sign his checks with my name as attorney, because that is the way the bank power of attorney read. If I had simply put it "R. F. Westcott," they would not have cashed it. I had to add my name as attorney and in every check I drew, it made no difference what it was for, I added my name as attorney, and if I used the money myself, the check on his account would have to be drawn in just the same way.

Q I understand why they included these checks, 107 and 110, in the statement of your account, but I don't understand why they did not include the 5 other checks, numbers 14, 29, 27, 52 and 61.

A Well, that is the reason they gave me, Major, that everything I did for Mr. Westcott as his attorney went right straight down into Mr. Westcott's account and that was the end of it, and I suppose I took bonds down, or cash or whatever it was and it went right into Mr. Westcott's account and my connection with it ceased whenever they got hold of it. It did not do it in any other case, because the stock having been put in my name for the facility of transfer, my name came in on their books in connection with Mr. Westcott's. I asked them about that and they said that is absolutely true because that is the way the books are kept, that when business is done direct with a man it goes direct into his individual account, and when it was to be done for instance like this stock 890 was, although as they said that it was for him also and they knew it, still it went down under my name as attorney because the stock was put in my name.

Q Do you understand that the Board has asked you to pro-

duce the full statement of your account, or Mr. Westcott's account, including these checks?

A I understand that.

Q Have you produced them?

A I cannot. They won't give them to me because they are not mine. I went to them and asked them and they said it is not your account, Captain, and we cannot give them to you.

Colonel Gillespie: You say direct and indirect. Mr. Westcott was abroad. How could they know whether the account was direct or indirect? How would they know anything about these transactions until you came there with certain money in your hand or a check, how would they know anything about that account? You came in with money in your hands and you ordered an investment. How would they know which account except from what you had told them at the time?

A Oh, Mr. Westcott told them about the accounts when he took me down and introduced me to them. I think it was in 1893.

Q A sufficient answer to my question would be that Mr. Westcott told them that every transaction that you had at their office would be for him; otherwise it would not be explained at all.

A He did tell them.

Q Every transaction that you made with that company would be for him. That is the only way it could be explained.

891 A Well, I don't know if he prohibited me from doing anything on my own account.

Q Then they could not know that any transaction that you ordered was for him or you?

A Oh, they would have to rely on Mr. Westcott's word and mine.

Q Mr. Westcott was away in Europe.

A But he told them before he left that I was going to transact his business. I always talked with old Mr. Reed, because I know that he knew the sort of things that Mr. Westcott wanted. Mr. Reed told me from time to time that this or that was just the sort of stock Mr. Westcott would want me to get. I used to get his opinion because he was a man who had been in the business perhaps fifty years or a long time. Prior to my going there I did not know how they kept their books and I did not ask them, but now I see, it is very clear to me, because they kept their books in that way and I did not know how it was when I went there. May be they

would put it down on the account that I had, coming from O. M. Carter, Attorney. I have not seen their books, Colonel, they simply told me their method of book keeping and how they did, you know, and when, as I said, Mr. Westcott first took me down and introduced me to them, to Mr. Reed, I think, he told him I would transact his business. Sometimes I have come down from Richfield Springs when he would be up there and not be able to come down. I used to try to help him out anywhere whenever he did not feel well enough to come down.

Q Who is this Mr. Van Slyker?

892 A I think they call him Judge. I was introduced to him in that way. I don't know who he is. As to Meyers, I think he has come from Savannah to New York and his mother lives in Rochester and may be I can get hold of him. I remember making some purchases in Savannah from him and of course if I can get him I will.

LETTERS FILED WITH BOARD RECORD.

143 K.

New York, October 20th, 1897.

Col. George L. Gillespie,
Corps of Engineers, U. S. A.
Senior Member Board of Officers.

Colonel:—

Referring to your request of the 11th inst., I beg to state, 1st: The transfer of \$6436.66 on May 11th, 1896 from R. F. Westcott to R. F. Westcott was only a transfer from a statement account to a pass-book account. The records do not show at whose request this transfer was made, but it appears to be simply a request transfer and not by cheque.

2nd: I find upon application to the Union Trust Company that I have not used cheques from my regular cheque book since leaving Savannah and hence must have left it among my papers there, as I do not find it among my effects here.

3rd: The bank statement from the Union Trust Company of Nov. 7th, 1895 says the pass book was sent with the state-

ment. I do not remember it, and presume it is among my papers in possession of the Board.

4th: Statement already submitted.

5th: Statement already submitted.

Very respectfully,

Your obedient servant,

O. M. CARTER,

Capt. Corps. Engr. U. S. A.

144-K

New York, October 29th, 1897.

Col. G. L. Gillespie,

Senior Member of Board &c.

Sir:—

Replying to the request of the 27th inst. to furnish you with:

1. My personal check book, from Jan. 1896 to date;
2. Mr. Westcott's Pass Book;
3. Date of transfer of securities, Orange.
4. Account with Reed & Flagg,
5. " " C. H. Van DeVenter
6. " " A. R. Myers.

I have to state that the complete statement of the account with Reed & Flagg, standing in my name has already been sent to you. The private check book and the Pass Book have not been sent for reasons already given. The date of the transfer of securities for the Orange property I am unable to ascertain. I am unable to furnish a statement from Mr. Van DeVenter and enclose herewith a letter explaining why. I have been unable as yet to get a statement of the account with Mr. Myers.

Very respectfully,

Your Obedient Servant,

O. M. CARTER,

Capt. Corps. Engr. U. S. A.

MEMORANDUM FOR TRANSCRIPT.

Letter R F Westcott to Oberlin M. Carter dated Oct 18, 1897, a copy of which is among papers filed by the Board is found at p 2016 Vol 3 of Wyman Record.

Letter of O. M. Carter to Board of Officers dated Nov 3, 1897 is found at p 2039 Vol 3 of Wyman Record.

FINAL STATEMENT OF CAPTAIN O. M. CARTER.

New York, October 23, 1897.

Col. G. L. Gillespie,
Maj. C. W. Raymond,
Maj. H. M. Adams,
Corps of Engineers, U. S. A.

Sirs:—

Landing from the Steamship "St. Paul" on my return from London to assume my duties as a member of the Nicaragua Canal Commission, I was handed, on the morning of September 11th, a letter from the Chief of Engineers directing me, by order of the Secretary of War, to report to him in person in Washington. I did so, reaching Washington about 6 o'clock of the same evening and proceeded to the office of the Chief of Engineers, who then informed me that grave charges had been preferred against me by my successor at Savannah. These charges were read to me by the Chief of Engineers, who further informed me that that officer had appeared before the Secretary of War in support of his accusations and that formal charges against me were in course of preparation.

Conscious of my innocence, and stunned by this unexpected attack on my official integrity, and upon the work to which I had devoted so much of my life, and of the success of which I felt that I had reason to be justly proud, I requested the Chief of Engineers to give me an opportunity to meet these charges before I was publicly accused of wrong doing. I then requested an interview with the Secretary of War, which was granted on September 13th, and I was there informed that a Board of Engineer Officers would be appointed to investigate the matter. And it may be stated parenthetically that my natural desire to avoid publicity until after I should have had an opportunity to have the charges investigated availed me nothing, for on the morning of September 14th there appeared in two newspapers an extended and garbled statement of the charges against me.

At this point it will be necessary to give the Board a short narrative of the conditions existing at Savannah at the time I went away. About the last of May I received the

order for my transfer to London. Between that time and the date of my final departure, I was absent some of the time on duty and my attention was diverted from a close personal supervision of the work in my district. I left Savannah finally for Washington about the middle of July, my new duties requiring my departure at that time. I met my successor in Washington and went over with him as completely as I could the state of the whole district in my charge.

In Savannah work was being done on the breakwater. I informed my successor that the mattresses had not sanded up as I expected, but that I hoped the calm weather of summer would effect that result; that the work should be carefully watched, and if the desired sanding-over did not take place the mattress work should be stopped immediately and what was already in loaded very heavily with stone. I explained to him the dredging in progress and what would be desired in future.

At Fernandina I told him it was imperatively necessary to carry the north jetty seaward as rapidly as possible to develop the new channel forming between the jetties. For that purpose I had ordered a seaward extension of eight courses of mattresses, the former courses having, as my assistant engineer reported, filled up to the crest with sand. I cautioned him that the new work would have to be watched carefully, and unless the sand quickly followed to the top of that also it would have to be stopped at once. I told him also the estimate I had formed of the various employees in my district; turned over to him as my guest my house, which I had rented until the first of October, and informed him that I had requested his Chief Clerk, Mr. Sterly, whom I had taken as a soldier from the Engineer Battalion and promoted to his present position, to look after various things of mine, professional papers, books, personal effects, etc., and ship them to me when required. I also gave him letters of introduction to my various friends and extended to him several other courtesies of value, and requested that if any point whatever arose needing any explanation, or which I had failed to make thoroughly clear to him, he would advise me of it and that I would write to him, or, if necessary, would return to Savannah. He expressed himself as satisfied with this arrangement and we took leave of one another.

After my interview with the Chief of Engineers in Wash-

ington and being unable to go to Savannah, I sent to that place by Mr. Connolly a written order instructing Mr. Sterly to deliver to him my papers and personal effects. Mr. Connolly informed me later by wire that Mr. Sterly had declined to honor my order. On the afternoon of the 16th I left New York for that place, arriving there on the following afternoon. On the morning of the 17th, and while en route, I wired the Chief of Engineers for authority to have access to the official records and to my private books and papers, which were then in possession of my successor, who had received them from Mr. Sterly. This permission was at first granted but later was revoked. In view of this state of affairs, I did not go to the Engineer Office to inspect the records until the Board arrived. The charges read to me by the Chief of Engineers, and a copy of which was handed to me, were made during my absence from the country on official business. Those charges which I was called upon to explain before this Board are substantially as follows:—

First: That the fascines and mattresses used in the government work in my District since 1892 were not built according to the specifications, but that a mattress enormously cheaper was used without any reduction in price.

Second: That the specifications require that each mattress be sunk separately, instead of which many mattresses were sunk at once, thus permitting an enormous saving, none of which accrued to the United States—this change being made for the Atlantic Contracting Company to work by but not appearing in the specifications for other people to bid by.

Third: That three types of mattresses at the same price were asked for, and that bids must have been for the most expensive type, the government losing continuously the difference between the expensive type and the type used; and that the work done was so far from the specifications that the government lost \$1,600,000.

From these charges the accusation was deduced that I had acted dishonorably.

The Board convened in Savannah at the United States Engineer Office in the 21st day of September at 10 o'clock A. M.

Before the investigation began I gave the Board written permission to inspect privately the private papers and effects belonging to me and in my custody, and which were in

the possession of my successor, with the request that if any matters found therein needed explanation they would call them to my attention.

As the examination proceeded it was soon developed that in addition to the written charges which had been furnished to me I was to be confronted with numerous charges and insinuations extending over a period of many years, for the most part relating to small and unimportant irregularities, to furnish material for which my entire official and personal career at Savannah had been systematically ransacked and pried into. In view of this situation the Board will appreciate the difficulties under which I at that time labored in making my defense.

Nervous to a degree almost beyond endurance; dazed by the bitterness of the attack, it is no small wonder that in some instances my statements as to details occurring years before may have seemed conflicting, and my explanations of transactions which had long since passed from my memory somewhat involved. Since then, however, I have had time to think and to refresh my memory by an examination of the records and private documents, and I make this my final statement, and what is here set down is true and nothing but the truth.

Taking the written charges in connection with the statements and insinuations of my successor before the Board and the testimony submitted by him, we find that the alleged irregularities laid to my account and for which explanation is asked from me are, succinctly stated, as follows:

1. That three designs of mattresses were asked for at the same price, and that this necessitated higher bids by the contractors than would have been obtained had only the design of mattress actually used been specifically described in the specification.

- 2: That the fascines used were nothing like those contemplated in the specifications, and that the mattresses used were like none of the designs given, but that a mattress enormously cheaper was used without any reduction in price.

- 3: That the specifications require each mattress to be sunk separately with rock on each layer, instead of which many were sunk at once, thus permitting a large saving, none of which accrued to the United States.

- 4: That the fourth class stone used is not that contemplated by the specifications.

- 5: Miscellaneous.

(a) That a written order for a certain load of stone on mattresses in Savannah Harbor was countermanded orally, thus permitting the contractor to sink his mattresses improperly.

(b) That the cost of mattresses per cubic yard at Cumberland Sound is \$13.69.

(c) That the amount of mattresses actually used was largely increased over that called for in canvassing bids when Gaynor, Bangs, The Atlantic Contracting Company, Walsh or Ely were the contractors and decreased where Twiggs was the contractor.

(d) That in the specifications for Tybee Breakwater I called for 200,000 square yards of mattresses, but stated later that new soundings showed that 300,000 square yards of mattresses would be repaired, no such new soundings having been taken.

(e) That in my discussion of the inside route from Savannah to Beaufort I made statements which must have deceived the Chief of Engineers, and were apparently intended to do so.

(f) That I gave the Chief of Engineers as a reason for not removing a portion of Hutchinson's Island that people had been buying up lots for the purpose of exacting exorbitant rentals, no such purchase of lots having been made.

(g) That payments were made for piling which was of no use whatever except to the contractor.

(h) That many articles were improperly charged on the pay rolls, and that rolls and vouchers were improperly signed by me.

(j) That in my testimony in the case of Brown vs. The Atlantic Contracting Company I gave false evidence.
